YWCA	Young Women's Christian Association
YYS	(Zhongguo yishu yanjiuyuan) Yinyue yanjiusuo and variants (Music Research Institute (of the Chinese Academy of Arts))
Z	Zimmermann catalogue [Purcell]
zar(s)	zarzuela(s)
zargc	*zarzuela género chico*

Bibliographical Abbreviations

All bibliographical abbreviations used in this dictionary are listed below, following the typography used in the text of the dictionary. Broadly, *italic* type is used for periodicals and for reference works; roman type is used for anthologies, series etc. (titles of individual volumes are italicized).

Full bibliographical information is not normally supplied in the list below if it is available elsewhere in the dictionary. Its availability is indicated as follows: D – in the list of 'Dictionaries and encyclopedias of music'; E – in the list of 'Editions, historical'; and P – in the list of 'Periodicals'; these lists are located in vol.28. For other items, in particular national (non-musical) biographical dictionaries, basic bibliographical information is given here; and in some cases extra information is supplied to clarify the abbreviation used.

Festschriften and congress reports are not generally covered in this list. Although Festschrift titles are sometimes shortened in the dictionary, sufficient information is always given for unambiguous identification (dedicatee; occasion, if the same person is dedicatee of more than one Festschrift; place and date of publication; and name(s) of editor(s) if known). For fuller information on musical Festschriften up to 1967 see W. Gerboth: *An Index to Musical Festschriften and Similar Publications* (New York, 1969). The published titles of congress reports are generally reduced to their essentials, but sufficient information is always given for purposes of identification (society or topic; place and date of occurrence; journal issue if published in a periodical; editor(s) and publication details in unfamiliar cases). A comprehensive list of musical and music-related 'Congress reports' appears in vol.28. Further information can be found in J. Tyrrell and R. Wise: *A Guide to International Congress Reports in Music, 1900–1975* (London, 1979).

Library Sigla

The system of library sigla in this dictionary follows that used by Répertoire International des Sources Musicales, Kassel, as listed in its publication *RISM-Bibliothekssigel* (Kassel, 1999). Below are listed the sigla to be found; a few of them are additional to those published in the RISM list, but have been established in consultation with the RISM organization. Some original RISM sigla that have now been changed are retained here.

More information on individual libraries is available in the libraries list in volume 28.

In the dictionary, sigla are always printed in *italic*. In any listing of sources a national sigillum applies without repetition until it is contradicted.

Within each national list, entries are alphabetized by sigillum, first by capital letters (showing the city or town) and then by lower-case ones (showing the institution or collection).

A Note on the Use of the Dictionary

This note is intended as a short guide to the basic procedures and organization of the dictionary. A fuller account will be found in the Introduction, vol. l, pp.xix–xxix.

Abbreviations in general use in the dictionary are listed on pp.vii–xi; bibliographical ones (periodicals, reference works, editions etc.) are listed on pp.xiii–xviii and discographical abbrevations on pp.xix–xx.

Alphabetization of headings is based on the principle that words are read continuously, ignoring spaces, hyphens, accents, bracketed matter etc., up to the first comma; the same principle applies thereafter. 'Mc' and 'M'' are listed as 'Mac', 'St' as 'Saint'.

Bibliographies are arranged chronologically (within section, where divided), in order of year of first publication, and alphabetically by author within years.

Cross-references are shown in small capitals, with a large capital at the beginning of the first word of the entry referred to. Thus 'The instrument is related to the BASS TUBA' would mean that the entry referred to is not 'Bass tuba' but 'Tuba, bass'.

Signatures where the article was compiled by the editors or in the few cases where an author has wished to remain anonymous are indicated by a square box (□).

Work-lists are normally arranged chronologically (within section, where divided). Italic symbols used in them (like *D-Dl* or *GB-Lbl*) refer to the libraries holding sources, and are explained on pp.xxi–xxxvii; each national sigillum stands until contradicted.

Contents

L

[continued]

Liturgy and liturgical books. Modern definitions of 'liturgy' tend to be either juridical-ritual or theological. Most of the juridical-ritual definitions of the liturgy framed by Roman Catholic authors emphasize that the liturgy is the public and officially approved worship offered to God by the Church. Juridicial definitions thus separate 'liturgy' from other manifestations of piety, whether private or public, and from 'paraliturgical' accretions (e.g. tropes), which never received formal ecclesiastical approval. Theological definitions of 'liturgy', while recognizing its character as signs perceptible to the senses, seek a more profound understanding of its nature. The liturgy not only praises and worships God in recognition of his transcendence and in thanksgiving for creation and salvation, but it also acts as the channel through which God bestows his grace on humanity.

I. History and definition of liturgy. II. Medieval Western rite. III. Reformation and post-Reformation liturgical books. IV. Byzantine rite.

I. History and definition of liturgy

The word 'liturgy' derives from the Greek *leitourgia*, formed from the combination of the adjective *lēitos* ('state', 'public') and the noun *ergon* ('work'). In ancient Greece a *leitourgia* was the offering of financial support by private citizens for some activity in the public interest. Prosperous citizens could be obliged by law to perform a *leitourgia*, but the term also included spontaneous gestures of civic generosity. Thus one or more citizens might, for example, undertake the training and outfitting of a chorus for the theatre, the support of gymnastic events or the equipping of a ship in time of war. From the 3rd century BCE the term began to embrace other kinds of work that provided a service, often remunerated, or any kind of useful activity. The office of priest, who mediated between the people and one of the gods, was also sometimes called a *leitourgia*, but outside Egypt cultic connotations of the word were not widespread.

The Jewish translators of the Septuagint (prepared in Egypt, *c*250–150 BCE) adopted *leitourgia* (verb: *leitourgein*) as the normal word to describe the service (*'avodah*) of priests and Levites in the Temple; by choosing a word with weak religious connotations any terminology associated with pagan cults was thus avoided. Jewish priests and Levites performed the public 'service' of prayer and sacrifice directed to God on behalf of their people, for whose subordinate role other words (*latreuein*, *douleuein*) were chosen.

This technical use of the term was carried over into the New Testament. The priest Zachary, father of John the Baptist, encountered an angel who predicted the birth of his son, and then departed from the Temple 'when the days of his liturgy were fulfilled' (*Luke* i.23). The *Epistle to the Hebrews*, rejecting the efficacy of Jewish Temple sacrifices, glorified Christ as the true high priest of a superior 'liturgy' (*Hebrews* viii.6, cf viii.2). The author contrasted Christ's single offering of himself with the functions of an ordinary priest, who must perform his 'liturgy' daily (*Hebrews* x.11).

In the New Testament 'liturgy' also continued to be applied in the broader sense to other forms of service. Paul called himself 'a liturgist' of Jesus Christ to the Gentiles' (*Romans* xv.16) and described kindness towards himself as a 'liturgy' (*Philippians* ii.25, 30). He referred to a donation for Christians at Jerusalem as 'the fellowship of this liturgy' (2 *Corinthians* ix.12). Although the New Testament never related *leitourgia* to the nascent Christian cult, the word was taken up by the Greek-speaking Christian East to describe the ministry of the clergy in general, and was applied in particular to the eucharistic liturgy. In its celebration of the Eucharist the Eastern Church uses three principal 'liturgies': the Liturgy of St John Chrysostom, the Liturgy of St Basil the Great, and (on certain days during Lent and at the beginning of Holy Week) the Liturgy of the Presanctified.

The Latin translations of the scriptures did not adopt the Greek term directly but rendered it as *ministerium*, *munus* etc. Medieval authors in the Latin West most often employed terms such as *officium* (adj. *officialis*), *ritus* or *mysterium* when writing about the Church's worship.

Not until the 16th century (and under the influence of humanism) did the term 'liturgy' come into vogue. Pamelius published a treatise entitled *Liturgia latinorum* (1571), and Cardinal Bona's influential *Rerum liturgicarum libri duo* followed in 1671. The growing acceptance of the term in the 17th century is further attested in *De liturgia gallicana* (1685) by the Benedictine historian Jean Mabillon. In the 20th century the reform of Roman Catholic worship and prayer approved by the Second Vatican Council (1962–5) was preceded by what has been called the 'liturgical movement'.

II. Medieval Western rite

1. Structure of the liturgy and its books. 2. Mass books. 3. Office books. 4. Ritual and ceremonial books.

1. STRUCTURE OF THE LITURGY AND ITS BOOKS. The two principal services of the medieval Western liturgy were

the Mass and the Divine Office. The central element of the Mass is a memorial re-enactment of the Last Supper. This re-enactment was preceded by scripture readings and prayers, to which chants were later added. It culminated in the reception of bread and wine, believed to be in some real or mystical sense a sharing in the body and blood of Jesus. In cathedral churches and monasteries Mass was celebrated daily (several times in the case of churches with multiple altars) and with great solemnity on special feasts, but in smaller churches perhaps only on Sundays (*see* MASS, §I).

The Divine Office consisted of a daily series of eight times of prayer devised around the weekly recitation of the Psalter. It also comprised readings from the scriptures, the writings of the Fathers, the legends of the saints on their feast-days, hymns, chants and prayers. The liturgical day began with Matins and ended with Compline. Lauds (earlier known as Matins) was sung at daybreak, followed by the Hours of Prime, Terce, Sext and None, recited at 6 a.m., 9 a.m., noon, and 3 p.m., respectively. During the Middle Ages it became customary to celebrate with special solemnity 'first' Vespers on the evening preceding major feasts. On Sundays, however, afternoon Vespers was the principal observance, and still a major liturgical event in Catholic churches up to the early 20th century (*see* DIVINE OFFICE and related articles).

Both the Mass and the Divine Office contained prayers and chants that were recited or sung daily. Other components changed according to the liturgical day, season or feast. The fixed elements were known as the Ordinary – a term applied more frequently to the Mass than to the Office – while the latter was known as the Proper. The 'Proper of the Time' (Lat. *Temporale*) was organized around the liturgical year, which began on the first Sunday of Advent, four weeks before Christmas, and closed with the last Sunday of Pentecost. The Proper of the Time included what were known as 'feasts of the Lord'. These were mainly commemorations of events in the life of Christ. Some of these, such as Christmas (25 December), Epiphany (6 January) and the Annunciation (25 March) fell on the same date every year. The majority, however, were movable, notably those dependent upon the variable date of Easter. These included the season of Lent (40 days preceding Easter Sunday), the feasts of the Ascension (40 days after) and Pentecost (50 days after Easter). Sundays were numbered in relation to these major feasts: for example, the Second Sunday after Epiphany, the First Sunday after Easter, the Tenth Sunday after Pentecost (or after Trinity according to some customs).

The Proper of the Saints (Lat. *Sanctorale*) commemorated the feast-days of individual martyrs and saints celebrated on fixed dates of the calendar. Important observances, such as the Nativity of John the Baptist (24 June), the feasts of St Peter and St Paul (June 29), or the Assumption of the Virgin (15 August), were celebrated with greater solemnity than the commemorations of saints, about whom little was known. The *Sanctorale* varied to a certain extent from place to place and incorporated formularies for local feasts that were not universally observed. Formularies for saints of lesser rank were drawn from the Common of the Saints (Lat. *Commune sanctorum*), which furnished chants, readings and prayers for the several categories of saints: apostles, evangelists, martyrs, doctors, bishops, confessors, virgins etc. In liturgical books these formularies were grouped together at the end of the *Sanctorale*. Elaborate rules governed which feasts of the *Temporale* and *Sanctorale* took precedence in the event that two coincided on the same day. The medieval, as well as the modern Lutheran and Anglican practices, are more flexible than late 20th-century Catholic rules, which give exclusive precedence to Sundays.

The *Temporale* was based on solar and (to a lesser extent) lunar cycles, while the *Sanctorale* was based on the division of the year into 12 months. The fact that these two astronomical cycles did not coincide from year to year presented problems for the structure of liturgical books. The two cycles could be kept entirely separate – the solution of the 7th-century Gelasian Sacramentary – or blocks of sanctoral feasts could be dispersed among the observances of the *Temporale*. Efforts to date revisions of liturgical books by studying the relationships of the two cycles (Chavasse) remain problematical. Indeed, the history and typology of medieval liturgical books are extremely complex subjects that have been clarified in a number of recent studies (Vogel, Palazzo, Folsom). Moreover, not only are there many different types of liturgical book, but every medieval liturgical manuscript contains a potentially unique combination of elements that must be studied individually. (For examples *see* SOURCES, MS, §II.)

The earliest liturgical manuscripts, designed to permit a single individual (priest, deacon, cantor) to discharge a specific role in the liturgy, contained only the texts proper to that role. Beginning in the 9th century efforts were made to combine and standardize these books, but compilers had not only to integrate their separate contents but also co-ordinate the overlapping *Temporale* and *Sanctorale* cycles. These books, of which the missal and the breviary are the best known examples, combined in a single volume all or most of the elements needed for specific Sundays, feasts or weekdays (*feriae*). Liturgical standardization, a goal of the 8th-century Carolingian reforms, entered a new phase with the growth of large monastic congregations such as those of Cluny and Cîteaux. It reached its apex with the international orders of mendicant friars – Dominicans and Franciscans – who created standard *exemplaria* that governed liturgical observances in all houses of the orders. The printing press enabled leaders of the Reformation movement to publish orders of worship that conformed to their theological perspectives. The Council of Trent (1545–63) likewise made use of the same technology to issue a series of standard liturgical books that determined the shape of the Catholic liturgy for centuries to come.

2. MASS BOOKS.

(i) Sacramentary (from Lat. *sacramentarium*, *liber sacramentorum*). The book used by the officiating bishop or priest at the eucharistic liturgy. It contains the texts of the Proper prayers (collect, secret, post-Communion, Preface and Canon), together with a few other formulae (benedictions etc.) recited by the celebrant. In the earliest centuries of the Christian era bishops improvised their prayers at the Eucharist. Subsequently, these were written down and preserved in small collections known as *libelli missarum*. The earliest surviving Western collection of such texts, the Verona Sacramentary (also known as the Leonine Sacramentary after Pope Leo I, *d* 461; *I-VEcap*

85, early 7th century), is a collection of 5th- and 6th-century *libelli* from Rome. The collection is incomplete in some respects and redundant in others; there are, for example, 28 formularies for the feasts of St Peter and St Paul.

The most important complete sacramentaries of Roman origin are the Gelasian and Gregorian. The Gelasian (or 'Old Gelasian', named after Gelasius I, *d* 496; *I-Rvat* Reg.lat.316, *c*750) is thought to reflect the practice of the Roman *tituli* (parishes) in the mid-7th century (see Chavasse, 1952, 1989). It is divided into three books: (1) the *Temporale* and rites of ordination; (2) the *Sanctorale*; and (3) 16 Sunday Masses and votive Masses for various occasions. The Gelasian text was substantially revised in Francia in the mid-8th century, when it was augmented with material from the Gregorian Sacramentary and local Gallican formulae. This version is known as the 'Frankish' or '8th-century' Gelasian Sacramentary. The Gregorian Sacramentary was originally a papal book designed for the stational liturgy (*see* ROME, §II, 1) and was probably compiled in the early 7th century. Its intermingling of material from the *Temporale* and *Sanctorale* was adopted in the 8th-century Gelasians. The Gregorian sacramentary itself exists in several forms, the earliest of which, known as the 'Paduense' (*I-Pc* D.47), represents (according to Chavasse, 1952) an adaptation of the sacramentary for the presbyteral liturgy of the Basilica di S Pietro, Rome. The purest witness of papal practice is the 'Hadrianum', a copy of the Gregorian Sacramentary sent to Charlemagne (*d* 814) at his request. This text had to be supplemented in order to make it a practical Mass book for the Frankish Church. The resulting Franco-Roman liturgy became the foundation of the 'Roman' rite.

Western Churches that did not follow a local rite (Mozarabic, Ambrosian) were usually dependent in varying degrees on Roman models. Studies of the grouping and interrelationships of sacramentaries may be found in Bourque, Vogel, and Metzger. From the 10th century sacramentaries began to incorporate readings and chant texts (or their incipits) interspersed among the celebrant's prayers. These books eventually evolved into the missal (see below).

(ii) Lectionary (from Lat. *lectionarium*). The book containing the extracts (pericopes) from the New Testament Epistles or the Hebrew scriptures and the Gospels read at Mass in the order of the liturgical year. Before their combination in a single book, the series of Epistle and Gospel readings were transmitted separately. Historical precursors of the full lectionary consisted of lists that provided only the beginning and end of each reading, the complete text of which would be sought in a biblical codex. Such a list is known as a capitulary (from Lat. *capitulare*, *liber capitularius*; for an explanation of terminology, see Klauser, 1935). Marginal indications in some Bibles indicate that they were used in conjunction with such lists, for example, the Gospel Book of St Kilian (*D-WÜu* M.p.th.q.1a), with 200 indications entered between the 7th and 9th centuries. Several regional lectionary traditions (Gaul, Capua) are found in early manuscripts. The earliest Epistle list representing Roman usage is the Würzburg Capitulary (*WÜu* M.p.th f.62, ff.2*v*–10) from about 700, which reflects urban practice of perhaps as much as a century before. The same manuscript (ff.10*v*–16*v*) also contains a Gospel list that documents a later stage of liturgical development (*c*645).

The term 'epistolary' (Lat. *epistolare*) refers to a book containing the full text of the pericopes drawn from the Epistles and Hebrew scriptures read at Mass. An 'evangeliary' (from Lat. *evangelarium*, *evangeliarium*) contains the complete text of the Gospel pericopes. Epistles and Gospels are combined for the first time in a single series in the Lectionary of Murbach (*F-B* 184) dating from the late 8th century. This *capitulare* represents a Frankish adaptation of a Roman lectionary. The solemn reading of the Gospel at Mass was a special prerogative of the deacon, and the book for this reading was sometimes richly illuminated and covered with a binding embellished with gold, silver and precious stones.

See also EPISTLE and GOSPEL.

(iii) Gradual, cantatorium. The gradual (from Lat. *gradale*, *graduale*, *liber gradualis*) contains the antiphonal and responsorial chants of the Mass together with votive Masses that stand outside the *Temporale* and *Sanctorale*; it may also contain chants for processions and other functions closely related to the eucharistic liturgy. The gradual is sometimes combined with a KYRIALE containing chants for the Ordinary of the Mass (Kyrie, Gloria, Credo, Sanctus, Agnus Dei), a TROPER or a sequentiary (*see* SEQUENCE (i)). The earliest extant graduals, which date from the 8th and 9th centuries (ed. R.-J. Hesbert, *Antiphonale missarum sextuplex*, Brussels, 1935/*R*), transmit only the unnotated texts of the chants. All but one of these graduals are found combined in the same manuscript with a sacramentary or (in one case) an Office antiphoner. Complete neumed exemplars of the gradual are not attested until the 10th century (*CH-SGs* 339; *F-LA* 239). Pieces from suppressed chant repertories such as the Gallican and Beneventan supplemented the Gregorian chants of the gradual, a volume traditionally associated with Pope Gregory the Great (*d* 604). The physical size of the gradual eventually increased, so that it could be read by several singers standing around a lectern.

The term 'cantatorium' was also applied to books containing chants for the Mass, especially in Roman sources. The earliest surviving examples of cantatoria (dating from the 9th and 10th centuries), one of which includes musical notation, contain only soloist's chants, that is, the gradual, tract and alleluia. Later cantatoria vary considerably in their contents, but most are restricted to solo chants.

See also GRADUAL (ii), and CANTATORIUM.

(iv) Missal (from Lat. *missale*, *missalis plenarius*). The book containing all the material necessary for celebrating Mass; it resulted from the integration of the priest's sacramentary, the deacon's evangeliary, the subdeacon's epistolary and the cantor's gradual. Most missals incorporated rubrics as well as private devotional prayers (*apologiae*) and prayers related to ritual actions (censing, ablution) that were recited silently by the priest. Not all medieval missals contained complete cycles of Masses for the liturgical year, an indication perhaps that some priests repeated a relatively small repertory of Masses. Some contained no more than the incipits of the relatively lengthy texts of the Epistle and Gospel readings. The process that led to the development of the 'plenary' missal was well advanced by the end of the 9th century, stimulated at least in part by the increase in private Masses. This development also reflected a shift of liturgical perspective: the priest-celebrant now discharged all of the

liturgical duties that had formerly been fulfilled by clerical participants in the Mass. The function of plenary missals with musical notation has not been satisfactorily explained; certainly the copying of such books would have required planning to allow adequate space for the insertion of staffless neumes, a notation that demanded the skills of a professional singer for its interpretation.

See also MISSAL.

(v) Processional (from Lat. *processionale*, *liber processionalis*). The book containing the texts and music of processional antiphons and hymns, which were sung in some places at special ceremonies and before Mass on feast days. The earliest surviving processionals were copied in the 12th century; before this time processional chants were usually included in the gradual, although they could also form part of a troper, antiphoner or breviary. Most of the extant manuscripts are small in size, making them easily portable.

See also PROCESSIONAL.

(vi) Troper (from Lat. *liber troparius*, *troparium*). The book, or section of a chant book, containing the texts and music of the tropes and usually a selection of other soloist's chants from the Mass. Tropers vary considerably in their content and organization, and might include sequence texts and melodies, offertory verses, alleluias, processional chants or Ordinary chants. The earliest extant tropers date from the 10th century; after the 13th century they are rarely found as independent books.

See also TROPER.

(vii) Tonary (from Lat. *tonarius*, *tonarium*, *tonale*). The book in which the antiphons of Mass and Office chants of the Gregorian repertory are classified according to the eight psalm tones; *see* TONARY

3. OFFICE BOOKS. The earliest extant medieval books for the Divine Office, like those for the Mass, followed the principle that each participant in the liturgy would have his or her own proper book.

(i) Liturgical psalter. The book in which the psalms are divided according to the days of the week to which they were assigned; notated psalters also include the ferial antiphons for the psalms with the psalm-tone *differentiae* appropriate to each. The entire community of monks, nuns or secular canons participated in the singing of the psalms, but since the psalms were generally memorized, it was not necessary for every singer to use a psalter.

See also PSALTER, LITURGICAL.

(ii) Office lectionary. The book containing the readings from the scriptures recited at Matins. At first, each day's scripture reading simply continued from the point reached on the previous day; this practice required no book other than the Bible. As a system of fixed, assigned pericopes evolved, these were gathered into an Office lectionary, perhaps as early as the 9th century. These scriptural extracts were further abbreviated in the 11th century.

(iii) Homiliary (from Lat. *homeliarium*, *homeliarius*, *homelium*, *homiliarium*). The book containing excerpts from the writings of the Church Fathers prescribed to be read at Matins and arranged in liturgical order. These patristic readings either explained the meaning of a feast or liturgical season, or explicated passages of scripture. The two categories were usually distinguished as sermons or homilies, respectively, but the distinction was often blurred. Several homiliary traditions have been identified. The festal homiliary of S Pietro, Rome, can be traced back to the mid-7th century (see Grégoire); it presents an anthology of patristic texts appropriate to a given feast from which liturgical readings could be selected. The Frankish Church did not follow the Roman homiliary traditions; Charlemagne, as part of his liturgical reforms at the end of the 8th century, ordered the preparation of a new homiliary, a comprehensive collection of 244 texts organized according to the number of readings required for each liturgical observance. For certain occasions (the principal feasts of the *Temporale*, feasts of the saints, Sundays of Lent) the Carolingian homiliary provided a sermon for the three readings of the second nocturn. For the third nocturn of every Sunday and feast day there was a homily on the Gospel reading.

(iv) Martyrology (from Lat. *martyrologium*). A list of saints (not all of them martyrs) according to the days on which their feasts are observed. Generally, only the most essential details of the place, manner of death (in the case of a martyr) and approximate date of death (i.e. *natalitia* – birth into heavenly glory) are given. Regional modifications included the names of saints whose cult was local. Marginal entries listed the names of deceased friends and benefactors of the church or convent where the martyrology was in use, so that they could be remembered on the anniversary of their deaths. The martyrology was recited daily at Prime. In the Dominican rite the reading of the martyrology followed Prime as part of the Office of Pretiosa (called thus from its first words: 'precious in the sight of the Lord is the death of his saints').

(v) Legendary (*legendarius*, *passionarium*). A book containing the Lives of the Saints (*vitae*), ordered according to their feast days. Such readings were at first not part of the Divine Office at Rome but were popular in the Gallican and Spanish Churches. The books might not have been intended primarily for liturgical use. A complete *vita* might be far too long for recitation at the night Office; marginal annotations indicated the extent of the reading and divided the text into 'lessons' (1 to 9). The reading of the *vita* could, if desired, be continued in the refectory.

(vi) Hymnary (Lat. *liber hymnorum*). A book of hymns often found in conjunction with a liturgical psalter or an antiphoner. In the liturgical code of his monastic Rule, Benedict of Nursia (*c*480–550) prescribed the singing of a hymn at the Office Hours. This practice was adopted by the Irish and Gallican Churches, but not at Rome or at Lyons, where non-biblical texts were held in suspicion. The earliest hymnaries (known collectively as the 'Old Hymnary') contained mainly hymns for ferias and Sundays but very few Proper hymns for feasts. This repertory was expanded under Frankish auspices in the 8th and 9th centuries, but the largest increase came with the 'New Hymnary' (first found in 9th-century Frankish sources), which contained a repertory that eventually grew to more than 250 hymns in some 11th-century collections. The number of texts far exceeds the number of melodies, since melodies composed for a given metre could be fitted to all texts in that metre. Not all hymnaries are notated, but typically the melody is written out once with the first verse followed by the texts of the following verses.

See also HYMN, §II.

(vii) Antiphoner (antiphonal; from Lat. *antiphonarius*, *antiphonarium*, *antiphonale*). The book that brings together, in liturgical order, the musical items of the

Office sung by the cantor and choir: the antiphons for the psalms and canticles, the great responsories chanted after the readings, hymns, a collection of invitatories and possibly a psalter. Its organization follows the division of the liturgical year into the *Temporale* and *Sanctorale*, and includes a *Commune sanctorum*. Monastic and secular antiphoners differ mainly in the structuring of Matins, Lauds and Vespers. There were also many regional variations, particularly with respect to the choice of responsories. The term 'antiphonarius' is first attested from the mid-8th century and in the early Middle Ages was often applied to a book (without notation) of chant texts for the Mass as well as the Office. By the later Middle Ages and Renaissance the format of the antiphoner had grown in size and was placed on a massive lectern in the middle of the choir. Sometimes matched pairs of antiphoners were used, one on each side of the choir.
See also ANTIPHONER.

(viii) Breviary (from Lat. *breviarium*: 'abridgment'). The book combining all or some of the texts and, occasionally, music for the Divine Office or portions thereof, arranged according to the *Temporale* and *Sanctorale*. Medieval breviaries are not necessarily truncated versions of complete Offices or small, easily portable books. Whatever its size or degree of completeness, a breviary assembled material from various sources in a single volume. The material could be merely juxtaposed or, more usefully, integrated according to the order required for the service, although not every element needed for the celebration of the Office might be included. Salmon (1967) has traced the origins of the breviary to 9th- and 10th-century 'collectaires enrichis'. These combined the collectar (also known as the *orationale* or *manuale*), the prayers said by the officiant (called 'hebdomadarian' since the duty rotated weekly) at Sunday and ferial Offices, with a *capitula*, brief scriptural passages recited at all the Offices except Matins. Bound with the book might be a 'breviarium' or *ordo* describing the Office throughout the year and containing incipits of prayers and chants.
See also BREVIARY.

4. RITUAL AND CEREMONIAL BOOKS.

(i) Ordo (Lat.: 'ritual'). A book containing directions for the performance of one or a number of liturgical Offices. It served as a reference manual for the cantor, master of ceremonies or hebdomadarian who had responsibility for assuring the decorous celebration of the liturgy. Only the incipits of the readings, prayers and chants are usually given; the full form had to be sought in the relevant Mass or Office book. The term is generally applied to a group of documents known as the *Ordines romani*, commonly cited according to the modern edition of Andrieu (Leuven, 1931–56/*R*). Although the manuscript tradition of these *ordines*, numbered 1–50 in Andrieu's edition, begins in the late 8th century, a number of the ceremonies they describe date from the late 7th century. Two principal collections of *ordines* have been identified: the first (A) contains authentic Roman material with few modifications, while the contents of the second (B) has been more thoroughly adapted to Frankish practice. None of the extant manuscripts originated in Rome.

(ii) Ordinal (from Lat. *ordinarius*). Each diocese, cathedral, collegiate church, monastery or confederation of monasteries might have its own liturgical directory, generally known to modern scholars as an 'ordinal'. Unlike the *Ordines romani*, which describe either single ceremonies or only portions of the liturgical year (e.g. Holy Week), an ordinal covers the entire liturgical year. It was by nature a local document without the universal appeal of the Roman *ordines*. Ordinals intergrate the Mass and Office of the day in their proper sequence, but the large-scale structure of the book either combines the *Temporale* and *Sanctorale* in blocks over the course of the year, or divides the two cycles into separate books, a solution favoured from the 13th century onwards. The ordinal also incorporates certain ritual details about the rank of participants in the liturgy, the vestments to be worn, the number of candles etc., depending on the solemnity of the feast. A customary (from Lat. *consuetudo*) resembles an ordinal in some respects, but its primary purpose is the regulation of the internal discipline and customs of a monastery or a community of secular canons. (A handlist of ordinals and customaries for nearly 130 medieval institutions is given in *Le graduel romain*, ii: *Les sources*, Solesmes, 1962, 189–96.)

(iii) Ceremonial (from Lat. *ceremoniale*). A book prescribing in precise detail the actions of all participants in a liturgical observance. In general, chants or prayers specific to the liturgy are not mentioned. The two most important representatives of the genre are the Papal Ceremonial, which regulates the observance of the papal court, the election and coronation of the pope and the imperial coronation, and the Ceremonial of Bishops, which describes the conduct of Offices proper to the episcopal rank or those carried out in the presence of the diocesan bishop. Before the publication of the *Caeremoniale episcoporum* in 1600, many of these items could be found in the pontifical.

(iv) Pontifical (from Lat. *Ordo pontificalis*). The book containing the rites proper to a bishop. In the early Middle Ages books containing these rites did not follow any standard pattern; they included material for occasional services such as clerical ordination, confirmation, the expulsion of penitents on Ash Wednesday, their reconciliation on Maundy Thursday, the dedication of churches, the blessing of sacred vessels, and the anointing of monarchs. The pontifical contains the texts of all the prayers recited by the bishop, describes the course of the ceremonies, and provides the incipits of chants or, on occasion, complete texts with notation. Scholars distinguish four successive types of medieval pontifical: (1) the Romano-Germanic Pontifical of the 10th century, compiled (*c*950–62) at the abbey of St Alban in Mainz and subsequently introduced at Rome; (2) the Roman Pontifical of the 12th century; (3) the various 13th-century recensions of the Pontifical of the Roman Curia; and (4) the pontifical compiled (*c*1293–5) by Guillaume Durand, bishop of Mende. Durand added material to earlier pontificals, but eliminated all rites not proper to the episcopal office. Agostino Patrizi de Piccolomini and Johannes Burkhard revised Durand's work for the first printed edition of the *Pontificale romanum* (Rome, 1595).

(v) Benedictional (from Lat. *benedictionale*, *liber benedictionum*). The book containing the blessings pronounced by the bishop at Mass after the *Pater noster* and before the *Pax Domini semper vobiscum*; these blessings were not included in the sacramentary. Benedictionals may also contain some material for episcopal liturgical

functions outside the Mass. A number of lavish Anglo-Saxon exemplars are among the surviving manuscripts.

(vi) Ritual (from Lat. *rituale*, *manuale*, *agenda*, *sacramentale*). The liturgical book containing all the services other than the Mass and Office celebrated by a priest. Essentially, the ritual is the priest's equivalent of the pontifical and includes formulae for baptism, marriage, last rites, burial and various benedictions. Some of the earliest surviving rituals, which date from the 10th and 11th centuries, are combined with collectars or sacramentaries. From the 11th century onwards rituals became increasingly independent of the other liturgical books.

For further discussion of Western liturgical books *see* PLAINCHANT, §§2–3.

III. Reformation and post-Reformation liturgical books

None of the Churches that grew out of the Reformation maintained the medieval Latin liturgy intact. Emphasis shifted in the direction of the 'preaching service' that had evolved within the pre-Reformation Mass liturgy. In south Germany and Switzerland in particular the preaching of the Word and admonitions addressed to the congregation were central elements of every *Gottesdienst*. The demand that the liturgy should be intelligible to the worshippers led to the introduction of the vernacular. As the amount of ritual solemnity was curtailed, the variable chants of the Mass fell into disuse. With the abolition of monasticism within the Reformed Churches, the Divine Office ceased to be observed by Protestants, although Anglican Matins and Evensong were notable exceptions.

Martin Luther published a proposed reform of the liturgy in 1523 (*Formula missae et communis*), maintaining that he did not wish to abolish the Mass but rather to purify it of elements that contradicted the scriptures (*see* LUTHER, MARTIN). This reform entailed the abolition of the Canon with its focus on sacrifice. Luther's subsequent work, *Deutsche Messe und Ordnung Gottes Diensts* (1526), provided a simpler vernacular order of worship with congregational hymns in German. Luther adapted the traditional Latin oration and lection tones to the chanting in German of the Epistle, Gospel and pastor's chants at the altar. Other *Kirchenordnungen* were introduced in those parts of Germany that embraced the Reformation.

One of these local German uses inspired *Then swenska messan* (1531) of the Swedish reformer Olav Petri. No music was provided in this publication, although the vernacular liturgy was celebrated with great solemnity in Stockholm. The reformed liturgy of King Johann III (*Liturgia svecanae ecclesiae catholicae & orthodoxae conformis*, 1576, in Latin and Swedish), although limited in its influence, was remarkable for its determination to recover the richness of the traditional Latin liturgy while remaining true to reformed principles of worship.

Ulrich Zwingli's first vernacular order of Communion, *Aktion oder Brauch des Nachtmals*, was published in 1525 (*see* ZWINGLI, ULRICH). This order was intended to be a remembrance of the Last Supper and was celebrated only four times a year; the bread and wine were distributed to the congregation not at the altar rail but in the nave. On ordinary Sundays the service emphasized scripture readings and the sermon. The reformed Communion order for Basel, probably prepared by Johannes Oekolampad, dates from 1526. It was not derived from the Mass, but combined the preaching service with the order for distributing Communion outside the Mass. Common to both these Swiss orders was the presence of admonitions to the congregation that they receive Communion worthily. The earliest surviving version of Jean Calvin's order of reformed liturgy in Geneva, based on that of Strasbourg, carries the date 1542 (*see* CALVIN, JEAN). As its title, *La forme des prieres et chantz ecclesiastiques*, suggests, it was a book designed for the congregation, who sang the psalms and canticles in metrical versions. Calvin did not intend his liturgy to be imposed everywhere, but it was made obligatory for the reformed congregations of France by the Synod of Montauban in 1594.

In England the reform of the liturgical rites began after the death of Henry VIII in 1547, but the creation of a definitive English liturgy was not completed until the 1662 Book of Common Prayer. The moving spirit behind the first English liturgical reforms was Thomas Cranmer (*d* 1556), Archbishop of Canterbury, the chief author and editor of the *Booke of the Common Prayer and Administration of the Sacraments and Other Rites and Ceremonies of the Churche after the Use of the Churche of England*. In 1549 a parliamentary 'Act of Uniformity' prescribed the use of this service book throughout the realm. Three years later, another version of the Prayer Book rearranged parts of the liturgy and moved English worship closer to the spirit of continental reformers such as Zwingli. The 1662 Book of Common Prayer restored a 'consecration' of the bread and wine, as the Scottish prayer book had done in 1637.

Cranmer restructured parts of the medieval Divine Office into the prayer services of Matins (Mattins) and Evensong. In 1550 John Marbeck issued *The Booke of Common Praier Noted*, with simple syllabic settings of the services, but revisions introduced by the 1552 Prayer Book made Marbeck's syllabic settings obsolete almost immediately. From the time of Elizabeth I (1558–1603), a metrical psalter with melodies was often bound together with the Book of Common Prayer. The 1662 Prayer Book (with psalter) has never ceased to be the authorized worship book of the Church of England, although it was largely displaced in 1980 by *The Alternative Service Book*. The latter has itself been superseded by *Common Worship* (2000), which incorporates most of the material from the 1662 Prayer Book.

By the time the Council of Trent convened in 1545 to attempt to reverse the effect of the Reformation, reformed worship was entrenched throughout northern Europe. The liturgical decrees of the Council rejected the liturgical views of the reformers and ordered the preparation of standarized liturgical books (all in Latin) to be imposed on all the clergy and faithful. Chief among these were the *Missale romanum* (1570), the *Breviarium romanum* (1568, revised in 1914) and the *Pontificale romanum* (1595). These and the other liturgical books of the Roman Catholic Church remained virtually unchanged until the Second Vatican Council (1962–5). A revision of the *Graduale romanum* was also commissioned. The results, however, proved unfortunate since the editors applied humanistic concepts of accentuation and eliminated many melismas from the traditional melodies. This 'Medicaean' Gradual (so-called from the Roman printing office that issued it, 1614–15) distorted the traditional melodies, which were finally restored early in the 20th century on the basis of the research undertaken by the monks of the

abbey of St Pierre de Solesmes. The Vatican edition of the restored *Graduale romanum* was issued in 1907 and later republished by the monks of Solesmes with the addition of their 'rhythmic signs'. The modern LIBER USUALIS is not a reproduction of any medieval liturgical book but a compilation of chants for Sundays and feasts throughout the year, together with chants for portions of the Divine Office.

The most familiar liturgical book in modern churches is undoubtedly the hymnal. Although Anglican service books have mostly remained separate from the hymnal, many denominations have adopted a combined 'hymnal and service book'. Contents and arrangement differ but, in addition to the main corpus of hymns, there will usually be found various items of service music, an abridged psalter, rites for morning and evening prayer, and the text of occasional services (baptism, a burial Office). These books are normally official denominational publications, as, for example, the German *Evangelisches Kirchengesangbuch*, which exists in regional versions, and the Catholic *Gotteslob*, which serves Catholics in all the German-speaking countries of Europe.

For further discussion of liturgical books, including those used in the present-day services of the major denominations, *see* ANGLICAN AND EPISCOPALIAN CHURCH MUSIC; BAPTIST CHURCH MUSIC; LUTHERAN CHURCH MUSIC; METHODIST CHURCH MUSIC; PENTECOSTAL AND RENEWAL CHURCH MUSIC; REFORMED AND PRESBYTERIAN CHURCH MUSIC; ROMAN CATHOLIC CHURCH MUSIC; and UNITARIAN CHURCH MUSIC.

IV. Byzantine rite

1. Structure of the liturgy. 2. The liturgical year. 3. Liturgical books.

1. STRUCTURE OF THE LITURGY. The Byzantine rite is in most respects organized like that of the Western Church. There are regular services corresponding to the Mass (*see* DIVINE LITURGY (BYZANTINE)), celebrated daily in monasteries but normally only on Sundays elsewhere, and to the Divine Office, whose principal divisions are ORTHROS ('daybreak service', equivalent to Matins and Lauds) and HESPERINOS (Vespers). Although the Byzantine Offices are very long and prolix, their daily recitation is in theory (though not in practice) obligatory for the clergy. In addition the Office includes various lesser daily services: Apodeipnon (Compline); Mesonyktikon (the 'midnight' service); the four Little Hours of Hōra prōtē (Prime), Hōra tritē (Terce), Hōra hektē (Sext) and Hōra ennatē (None); and Typika, the short Office that falls between the sixth and ninth hours. The contents of these Hours are found in the hōrologion (see below). Both the Divine Liturgy and the Office contain fixed and variable elements corresponding to the Ordinary and Proper of the Western rite.

2. THE LITURGICAL YEAR. For each year in the Eastern Church there is a calendar of movable feasts with the Lent-Easter-Pentecost cycle at its centre, and a calendar of fixed commemorations of saints, the latter, since the 9th century at the latest, beginning with the Byzantine Indiction and the feasts of St Symeon Stylites on 1 September. As in the West, Christmas falls on 25 December, Epiphany on 6 January, St George's Day on 23 April, the Assumption on 15 August, etc. The Orthodox Liturgy has a further layer of organization not found in the West: an eight-week cycle, the weeks corresponding to the eight modes – the *oktōēchos* – of Byzantine chant. The OKTŌĒCHOS (with its expansion, the paraklētikē) is a collection of hymns and liturgical formulae sufficient for a full week's services in each of the eight modes. Beginning with the octave of Pentecost and continuing until the beginning of Holy Week, each week in the Byzantine calendar has a common mode assigned to it (1st mode for the first week, 2nd mode for the second, etc.; then 1st mode again for the ninth, 2nd mode for the tenth, etc.); during Easter week the mode changes each day, and the 3rd plagal mode (*barys*) is omitted. Texts not provided with a specific chant formula of their own are sung to music drawn from the appropriate mode in the *oktōēchos*.

3. LITURGICAL BOOKS. In comparison with Western usage, a relatively large number of liturgical books is employed for the celebration of the Byzantine rite. This is partly because the exceptional quantity of Eastern hymnody necessitates the division of some books that in the West remained undivided; but it is also because the contents of the Eastern books are designed more narrowly to suit particular liturgical functions and functionaries. Combination volumes such as the Western missal (in which the sacramentary, evangeliary, epistolary and gradual are combined) or the still more comprehensive, pre-Vatican II *Liber usualis* (which also includes much of the Divine Office) have been slower to gain popularity in the East.

The following list of liturgical books is comprehensive for the Byzantine period, omitting only some uncommon subdivisions and alternative divisions of larger collections. It is less complete for the post-Byzantine period, in which many novel anthologies with new names – anthologion, anastasimatarion, synekdēmos, biblion tōn proseuchōn, hieratikon, hierotelestikon, agiasmatarion, liturgikon, etc. – have combined anew the contents of older collections.

(i) Euchologion. The old Eastern 'prayer book' for the celebrant, corresponding to the Western sacramentary; it contained the texts of the prayers for the Divine Liturgy, Office, ordinations and other rites, and also included an outline of the services, at times providing rubrics or the *diakonika* (responses of the deacon). The earliest known Greek copy and the oldest surviving Greek liturgical book is the Barberini Euchologion, *I-Rvat* Barberini gr.336, which probably dates from the late 8th century. A special class of euchologion is limited to the prayers and rubrics of the Divine Liturgy. One or all three of the standard Byzantine eucharistic liturgies (St Basil, St John Chrysostom, the Liturgy of the Presanctified) may appear. Early manuscripts of the liturgy are often in roll format.

(ii) Hōrologion. The book of the Hours that corresponds to a Western breviary: it includes the Ordinary of the Hours (the full texts of prescribed psalms, lections and chants) as well as some Proper texts. Originally designed for the monastic Office in Palestine, the Byzantine hōrologion later fused early monastic traditions with those of the 'cathedral' rite.

(iii) Typikon. The book that provides a summary of the full Ordinary and Proper for the services throughout the year and the rules governing their celebration; it corresponds in one of its forms to the Western ordinal. No single Byzantine book, however, brings together all the provisions and directions for the execution of the various rites. A Jerusalem Holy Week typikon dating from 1122 is the earliest extant extensive Greek source for the characteristic liturgical practice of the Holy City (see

Papadopoulos-Kerameus). (Exemplars of the 9th–10th-century Constantinopolitan typikon have been published by Dmitrievsky (vol.i) and Mateos.)

(iv) Liturgical psalter. A psalter in which the psalms are arranged for liturgical recitation. As in the West, the psalter is often found as a separate liturgical book, but with the biblical canticles appended. There are separate monastic and cathedral traditions for the grouping of the psalms and their division into verses.

(v) Apostolos, evangelion, prophetologion. The liturgical books containing the readings from the scriptures, equivalent to the lectionaries of the Western Church. Unlike the liturgical volumes listed above, these books normally have provision for musical notation, which takes the form of ekphonetic (lectionary) neumes rather than melodic notation (*see* BYZANTINE CHANT, §2). The apostolos is the Epistle lectionary and contains all the readings from the New Testament except those from the Gospels and the *Apocalypse* (the latter is not used in the Byzantine liturgy). The pericopes are arranged according to their order in the calendar. Many 11th- and 12th-century copies are provided with ekphonetic neumes. In its fully developed form, the apostolos also contained, in appendices, the responsories (*prokeimena*, *allēlouïaria*) for the whole church year and calendars with lection tables for the movable and fixed cycles respectively.

The evangelion is the Gospel lectionary and is used primarily in the Divine Liturgy. Its pericopes are liturgically ordered, which distinguishes it from the tetraevangelion, a book simply containing the four Gospels in their biblical order.

The prophetologion contains the Old Testament lessons, which are more numerous in the Eastern Church than in the Roman, for the fixed and movable feasts of the year.

(vi) Synodikon. The book containing the acts of the Synods or Councils. In a rare case – the 11th-century Holkham Synodikon (*GB-Ob*) – ekphonetic notation is provided for some portions of the conciliar acts that were publicly chanted each year at the commemoration of particular Councils.

(vii) Synaxarion, menologion. The books containing collections, in calendar order, of the Lives of the Saints; they correspond to the Western martyrologies. The shortest examples are little more than annotated calendars; the longest run to a full volume for each of the 12 months.

(viii) Oktōēchos, paraklētikē. The liturgical books that together form the Common of the Time. The OKTŌĒCHOS is a set of eight complete Proper services for the Offices of Saturday night and Sunday morning (Hesperinos and Orthros), arranged in the order of the eight modes; it forms one of the most important collections of hymns, and its music eventually appeared in the heirmologion (see below) and the noted oktōēchos. Where there is no provision for a Proper formula in the Proper of the Time or Proper of the Saints, the formula is taken from the appropriate modal section of the oktōēchos.

The paraklētikē represents an expansion of the oktōēchos; it adds Common Hours services for each weekday to the eight-week, eight-mode cycle, and in its massive content normally includes also the Saturday and Sunday services of the oktōēchos.

As these two books in effect form a Common of the Time, they must be used in conjunction with three other collections – the mēnaion, triōdion and pentēkostarion – to make up an enormous missal-breviary containing the full Proper of the Time and Proper of the Saints.

(ix) Mēnaion, triōdion, pentēkostarion. The liturgical books that together form the Proper of the Saints for the Church year. The mēnaion ('month' services) contains the variable hymns and other texts proper to Hesperinos and Orthros for the fixed calendar year; it is still published in 12 volumes – a volume for each month (hence the usual plural, 'mēnaia'), beginning with the September volume for the start of the year. The mēnaia, then, contain the Proper of the Saints and the Proper of each feast that falls on a fixed date.

The triōdion contains the Propers for Lent, and, since the central Middle Ages, has also included the material for the Sundays before Lent.

The pentēkostarion contains the Propers from the Easter Vigil up to the Byzantine feast of All Saints – the octave of Pentecost.

(x) Hymnbooks. These are named according to their specific content and internal organization. The oldest collections, which date from the 9th and 10th centuries, are known variously as the tropologion, kanōnarion, kondakarion, theotokarian, paraklētikē and oktōēchos. These early books are not provided with notation; the earliest hymnbooks specifically designed to contain melodies throughout were the heirmologion and stichērarion (see below).

(xi) Heirmologion. The notated hymnbook containing the syllabic *heirmoi* (model-stanzas) for the *kānones*, which are sung at Orthros (*see* KANŌN), arranged according to the system of eight modes. A heirmologion may also contain the stylistically similar refrains accompanying the Beatitudes (*Makarismoi*). The earliest surviving manuscripts date from the 10th century, and all copies were specifically designed to carry musical notation throughout, usually in Palaeo-Byzantine neumes.

See also HEIRMOLOGION.

(xii) Stichērarion. The chant book containing music for the hymns (*stichēra*) sung at Orthros and Hesperinos throughout the year. With the heirmologion it was one of the oldest hymnbooks to be provided with melodic neumes throughout; the oldest extant copies date from the 10th and 11th centuries and are notated in Palaeo-Byzantine neumes. The stichērarion has four separate sections: the first three parallel the arrangement of the mēnaia, triōdion and pentēkostarion; the fourth provides music for the hymns of the modally ordered oktōēchos. These four sections of the stichērarion are also found as separate music books. Their hymn content may appear with notation interpolated within the parent text collections, making it possible to find notated hymns in a mēnaion, triōdion, pentēkostarion or oktōēchos, which are otherwise purely textual collections.

See also STICHĒRARION.

(xiii) Psaltikon, asmatikon. Two important music collections representing the usage of the church of Hagia Sophia at Constantinople between the 11th (or even 9th) and 13th centuries; they contain florid hymns and psalmody. The psaltikon is a soloist's book containing chants for the *prokeimena* of the Divine Liturgy and Office, the verses of the great *troparia*, the *allēlouïa* verses for the Divine

Liturgy, the great responsories (*hypakoai*), the *kontakia* for the year, and, in a rare case, the full Akathistos Hymn. Only a few copies survive, all dating from the 13th or 14th centuries. The asmatikon is the corresponding book for the trained choirs – *psaltai* – of Hagia Sophia. The functional division between the two collections is so strictly observed that in the case of responsorial chants such as the *prokeimena*, which are performed in part by the soloist (*psaltēs*), in part by the choir (*psaltai*), the solo sections appear in the psaltikon, the choral sections in the asmatikon; both books are required to reconstruct the chant in full. This division also extends to style. The psaltikon has its own characteristic, melismatic styles that differ from the styles found in the asmatikon. For example, texts such as the *hypakoai* and *kontakia* may occur in both books, but the type of setting depends upon the book.

Copies of the asmatikon may contain some or all of the following: the cycles of *koinōnika* (communions); the choral refrains of the *prokeimena* and great *troparia*; the *Pasa pnoē* in the eight modes; the *hypakoai* and the *kontakia*; some Proper chants for the Dedication; and some Ordinary chants of the Divine Liturgy, including the *eisodikon*, the three Trisagia (*see* TRISAGION) and the Cheroubikon. Fewer than a dozen Greek copies of the asmatikon survive, all dating from the 13th century or the early 14th; all but two are from south Italy. The two Greek copies from the Empire itself are *GR-ATS great lavra* γβ and Kastoria Cathedral Library MS 8; most of the south Italian copies are at Messina and Grottaferrata.

Supplementing these manuscripts is a small group of copies in Moscow and Leningrad that were written between the 11th and 13th centuries in Church Slavonic and noted in varieties of the early Slavonic melismatic notation. These manuscripts have been called 'kondakars' by Russian scholars, because they primarily contain the melodic versions of the *kontakia* found in the asmatikon; but they derive from lost archetypes of the Constantinopolitan asmatikon, and their so-called Slavonic 'kondakarion' notation is really derived – as are their melodies – from the Greek traditions.

(xiv) Akolouthiai and kalophonic collections. In about 1300 the Constantinople *maïstor* JOANNES KOUKOUZELES compiled the archetype of a collection called the Akolouthiai or Orders of Service, designed to contain within a single book most of the Ordinary and Proper chants then in use for Hesperinos, Orthros and the three eucharistic liturgies; many of the chants appeared there in notation for the first time. The principal omissions were the *heirmoi* and *stichēra*, whose inclusion would have made an already bulky collection altogether unmanageable.

During the 14th and 15th centuries further collections appeared, almost always containing novel florid elaborations of traditional melodic materials. The Byzantine term for such elaborations is 'kalophonic' ('beautiful sounding', or 'beautified'; *see* BYZANTINE CHANT, §12, and KALOPHONIC CHANT). Thus there arose the kalophonic stichērarion, kalophonic heirmologion and kalophonic kontakarion. Another collection, also from the time of the Byzantine Empire, called the kratēmatarion, was devoted to freely composed florid melismas in the new style.

See also AKOLOUTHIAI.

JOSEPH DYER (I–III), KENNETH LEVY/DIMITRI CONOMOS (IV)

Liturgy of the Hours (Lat. *Liturgia horarum*; It. *Liturgia delle ore*; Fr. *Liturgie des heures*, etc.). The Divine Office according to the 1971 revision, that is, the Office of the reformed Roman Breviary.

1. History. 2. Structure and content. 3. The Calendar. 4. Music

1. HISTORY. The Hour services of the Western Church (*see* DIVINE OFFICE) underwent radical revision after the Second Vatican Council. The principles of this revision were broadly outlined in the fourth chapter of the Constitution *De sacra liturgia* (adopted by 2131 *placet* to 50 *non placet*, 22 November 1963). A study group commissioned to work on the new breviary under the presidency of A.G. Martimort had an *editio typica* ready for the press by 1970, and this received the approval of Pope Paul VI on 1 November 1970 in his Apostolic Constitution *Laudis canticum*. Finally, the *Institutio generalis de liturgia horarum* (1971) offered a detailed presentation of the revision. It preceded by a few months the publication of the four-volume prototype *Liturgia horarum juxta ritum romanum*. Vernacular translations followed.

2. STRUCTURE AND CONTENT. Lauds and Vespers – Morning and Evening Prayer – are set forth as the most important of the Hours. The old night Office (Matins, Vigils) has been redesigned as an Office of Readings, suitable for recitation at any time. Prime has disappeared Terce, Sext and None remain, but if so desired any one of these may be chosen for recitation during the day as an *hora media*. Compline is the final Hour, to be said before going to bed.

Psalmody is the staple substance of the Hours, and in order to make its recitation more fruitful the Psalter has been redistributed over a period of four weeks. Additional canticles from the Old and New Testaments have been included. The lectionary has been completely recast: the Office of Readings now has two lessons only (instead of three or nine as formerly), one from the Bible, the other from the Fathers or some other ecclesiastical source. Each reading is followed by a responsory. The number of Office hymns has increased and optional hymns are proposed to give greater variety. The Latin texts have been revised here and there. A rich selection of intercessions is introduced into the Offices of Lauds and Vespers. These two Hours end with the Lord's Prayer and a collect; the other Hours have the collect only (Table 1).

3. THE CALENDAR. The calendar has been vigorously rehandled, with a view to emphasizing the Temporal Cycle and to obtaining a more equal distribution of saints' days. Sundays 'per annum' now replace Sundays 'post Epiphaniam' and 'post Pentecostem'. In classifying the Church's festivals the older distinction between first- and second-class doubles, major doubles, semi-doubles, simples etc., has been superseded by a simpler triple gradation: solemnities, feasts and memorials. The ordinary weekday (ferial) Office occurs with greater frequency than before.

4. MUSIC. There is a section of the *Institutio generalis* (§§267–84) dealing with music in the revised Office. Paragraph 274 repeats that Gregorian chant should be given pride of place when Latin is used, but it adds: 'No kind of sacred music is prohibited from liturgical actions by the Church as long as it corresponds to the spirit of the liturgical celebration itself and the nature of its individual parts, and does not hinder the active participation of the people'. The provision of suitable music for vernacular celebrations is recommended and singing in more than one language is not excluded (§276).

MARY BERRY

Lituus. A Roman brass instrument consisting of a long tube turning in upon itself at the end and thus producing the shape of the letter 'J' (it is classified as an AEROPHONE). Pictorial representations indicate that it had a large detachable mouthpiece. Sachs's contention that it derived from the Celtic CARNYX, a similarly shaped instrument, is not widely accepted: it was known to the Etruscans long before the Romans had any significant contact with the Celts. Indeed the instrument is now looked upon as being distinctly Etruscan–Roman since it is unusual among ancient instruments, with no counterpart among the Greeks, Egyptians or Mesopotamian peoples (most ancient instruments follow a general progress from east to west in the Mediterranean basin).

The earliest extant picture of a lituus occurs in a mural from the Tomba della Scimmia in Chiusi (dating from the early 5th century BCE). A number of instruments survive, including one found in 1827 in a grave at Caere (now in the Museo Gregoriano Etrusco at the Vatican); this example is approximately 1·5 metres long and sounds six pitches of the overtone series based on G.

Etruscan and early Roman representations of the lituus show it in processions, especially funeral processions, the *pompae funebres* (for illustration *see* TIBIA). Players in these processions were described as *siticines*, a generic term embracing the players of various instruments: *liticines* (lituus players), *tubicines* (trumpet players) and *cornicines* (horn players). In Roman literature the lituus, like most brass instruments, had mainly military associations. The abundant artistic representations of Roman military scenes, however, show the lituus only rarely. Behn suggested in explanation of this apparent contradiction that the lituus was used at cohort rather than at legionary level. Presumably, therefore, it would not have appeared in column reliefs and other monumental sources where only higher military orders were more likely to have been celebrated. Another possibility, raised by Wille, is that the term *lituus* may often have been used loosely as a substitute for *tuba*. The evidence supporting this includes the remark in *Noctes atticae* (Aulus Gellius, *c*130–180 CE) that 'Virgil uses this word in place of tuba' (v.8.11). More recently, Meucci has argued that about the turn of the 1st century the lituus was replaced in military usage by the BUCCINA, a smaller instrument derived from the horn of an animal that was more practical for the cavalry; poets, however, continued to use *lituus* to describe the more prosaic *buccina*.

In post-classical times the term *lituus* has been applied to other wind instruments, notably 18th-century brass. An inventory of 1706 formerly in Ossegg monastery (now Osek), Bohemia, mentions 'Litui vulgo Waldhorner duo ex Tono G'; Bach's Cantata no.118 calls for two litui in B♭ that play in the range of the tenor trumpet.

JAMES W. McKINNON

Litvinne, Félia (Vasil'yevna) [Schütz, Françoise Jeanne] (*b* St Petersburg, ? 11 Oct 1860; *d* Paris, 12 Oct 1936). Russian soprano of German and Canadian descent. She studied with Pauline Viardot and Victor Maurel in Paris, making her début with the Théâtre Italien troupe as Amelia (*Simon Boccanegra*) in 1883. She then sang throughout Europe, in New York, at La Monnaie as Brünnhilde in the first *Die Walküre* in French (1887), the Opéra, La Scala, and in Rome and Venice. From 1890 she appeared in the imperial theatres in Moscow and St Petersburg. Litvinne made her Metropolitan début in 1896 as Valentine (*Les Huguenots*) and sang, among other roles, Aida, Donna Anna, Brünnhilde (*Siegfried*) and Sélika (*L'Africaine*). In 1899 she appeared at Covent Garden, as Isolde, returning periodically until 1910; in her last season she sang Brünnhilde in *Götterdämmerung*. She sang in several Russian *Ring* cycles, 1899–1914, and, with Charles Dalmorès, in the French premières of *Götterdämmerung* and *Tristan* under Cortot in 1902. An excellent musician and linguist, she had a large, flexible voice and great stage presence. Her recordings (1902–8, several with Cortot as her pianist) vividly convey her vibrant, impassioned singing.

HAROLD BARNES/ALAN BLYTH

Liu Baoquan (*b* Beijing, 18 Nov 1869; *d* Beijing, 8 Oct 1942). Chinese narrative singer. He was the creator of *jingyun dagu* ('Beijing drumsong') and its Liu style. The son of an itinerant narrative singer from Hejian county south of Beijing, Liu by the age of seven was playing *sanxian* lute accompaniment for his father. He later accompanied and studied with leading drumsingers such as Song Wu, Hu Shi and Huo Mingliang. By the age of 30 he was established in Beijing, turning countryside drumsong into a sophisticated urban art. He now sang in Beijing speech, and created new and expanded melodies to depict the particular characters and mood of each tale. His *sanxian* accompanists, and a drumsong aficionado who wrote and revised texts, were vital collaborators, and his lifelong association with Beijing opera and its singers a constant inspiration.

His repertory of 22 pieces, mostly tales of strategy and war, loyalty and valour, drew audiences back time and again; favourites included *Da Xixiang* ('West Chamber Romance'), *Nao Jiangzhou* ('Ruckus at Jiangzhou'), *Dandao hui* ('Lone Blade Meeting') and *Ma'an shan* ('Saddle Mountain'). Liu performed with a martial energy, his drumming subtle, his enunciation crisp and explosive, while his brilliant voice leapt seamlessly over his range of nearly three octaves, strong in all registers. Dominating his contemporaries, he sang into his 70s; his recordings span 30 years.

KATE STEVENS

Liu Dehai (*b* Shanghai, 13 Aug 1937). Chinese PIPA plucked lute player. Considered by many to be the leading *pipa* musician of his generation, Liu Dehai began *pipa* lessons in 1950, also studying several other Chinese traditional instruments. In 1954 he became a pupil of *pipa* master Lin Shicheng, graduating from the Central Conservatory of Music in Beijing in 1961. Liu utilized this period not only to improve his skills on *pipa* but also to learn piano, the seven-string zither *qin* and traditional Chinese percussion. Other than lessons with Lin Shicheng, Liu Dehai took consultation lessons with musicians representing several distinct schools of performance. Liu's resulting repertory and style is thus one which combines aspects from several different musical sources, both Chinese and foreign.

In 1970 Liu received the post of *pipa* soloist with the Central Philharmonic (Zhongyang yuetuan), and in 1983 he was appointed to the China Conservatory of Music, both located in Beijing. Liu has composed a small number of pieces for his instrument, but his best-known work is a collaborative *pipa* concerto entitled *Caoyuan xiao jiemei* ('Sisters of the Grassland'), co-written with Wu Zuqiang and Wang Yanqiao (1973).

JONATHAN P.J. STOCK

Liu Guanyue (*b* An'guo county, Hebei, 1918). Chinese wind player. Born to a poor peasant family, he earned a meagre living in his youth as a folk 'blower-and-drummer', playing *guanzi* double-reed pipe, *suona* shawm and *dizi* flute in rural ceremonies. Summoned to Tianjin in 1950, from 1952 he was employed as soloist in the state-supported Tianjin Song-and-Dance Troupe (Tianjin gewutuan).

His compositions, mostly arrangements of folk melodies, such as *Yinzhong niao* ('Birds in the Shade'), became staples of the new conservatory professional concert repertory. Along with FENG ZICUN he became known as an outstanding exponent of the lively, angular 'northern'

style of *dizi*, although pieces such as *Heping ge* ('Doves of Peace') and *Guxiang* ('Old Home') are said to combine aspects of northern and southern styles. In accordance with the ethos of the new society, he also experimented with 'improved' versions of the construction of the traditional *dizi*.

STEPHEN JONES

Liutaio (It.). *See* LUTHIER.

Liu Tianhua (*b* 4 Feb 1895, Jiangyin, Jiangsu province; *d* 8 June 1932). Chinese composer and music reformer. Liu Tianhua's practical musical education began at middle school in 1909, when he joined his school band as cornet player. By 1914 Liu was employed as a school music teacher in the cities of Jiangyin and Changzhou. At this time, and despite his initial training in Western music, Liu became increasingly interested in Chinese traditional music. Liu studied the two-string fiddle *erhu* and four-string lute *pipa* particularly seriously, but also learnt *Kunqu* opera singing, the seven-string zither *qin* and other folk instruments. Liu also devoted much time to the collection of folk music, contracting a fatal bout of scarlet fever while investigating folk percussion music in the Tianqiao district in Beijing.

In 1922 Liu took a teaching post at Beijing University, where he became active as a music reformer. Liu, his associates and pupils strove to develop a new genre of 'national music' (*guoyue*), drawing on Chinese regional folk traditions, which they attempted to synthesize into a single, national style. Liu saw *guoyue* as open to modernization and development in ways in which he felt the regional traditions were not. He was also anxious to adopt aspects of Western music theory, and to use Western models of music education and dissemination in the transmission of his new genre. In 1927 he was founding editor of the journal *Yinyue zazhi* (Music magazine).

Liu's principal musical monument lies in his book of studies for *erhu* and *pipa* first published after his death in 1933. The ten unaccompanied *erhu* solos in this collection, commonly played today, include *Bingzhong yin* ('Groaning During Sickness'), *Yueye* ('Moonlit Night'), *Chuye xiaochang* ('Festival Night Canzonetta'), *Xianju yin* ('Reciting During Leisure'), *Kongshoung niaoyu* ('Birds Singing on the Deserted Mountain') and *Guangming xing* ('March of Brightness'). They combine traditional characteristics (small-scale sectional form, conventional fingering patterns, descriptive titles) with aspects of Western music (such as compound time, tonal procedures and violin techniques).

JONATHAN P.J. STOCK

Liuto (i) (It.). 'Lute' (*see* LUTE, §II).

Liuto (ii) (It.). *See* BUFF STOP.

Liuto attiorbato (It.). A term that suggests a lute rebuilt into a theorbo-like instrument, but it was stated by Alessandro Piccinini (1623) to be merely a synonym for *arciliuto* (*see* ARCHLUTE); in any event the top two courses of a theorbo are tuned an octave lower than those (of a *liuto attiorbato*). The English term 'theorbo lute' referred, in many instances, to the theorbo and not to the *liuto attiorbato*. Thomas Mace (*Musick's Monument*, 1676) used the terms 'theorbo' and 'theorbo lute' ir terchangeably, and called the two-headed lute merely a 'French lute with two heads' (not 'theorbo lute').

ROBERT SPENCER

Liuzzi, Ferdinando [Fernando] (*b* Senigallia, 19 Dec 1884; *d* Florence, 6 Oct 1940). Italian musicologist and composer. At Bologna he studied the piano and composition with Guido Alberto Fano and took an arts degree at the university (1905); at Rome he studied with Stanislao Falchi at the Liceo Musicale; at Munich he studied composition with Reger and Mottl and philosophy with Theodor Lipps. He was appointed professor of theory at the Parma Conservatory (1910–17) and also taught composition at the Naples Conservatory (1912–14); from 1917 he was professor of theory at the Florence Conservatory until 1923, when he became professor of musical aesthetics at the University of Florence; in 1927 he was appointed to the same post at the University of Rome and between 1928 and 1932 he introduced the subject to the syllabus at the Accademia di S Cecilia. He also taught at the Università per Stranieri, Perugia. In 1939 racial laws forced him to flee to Belgium, where he was visiting professor at the Ecole des Hautes Etudes de Belgique, Brussels. He was then invited to the International Musicological Congress, New York; a heart attack in January 1940, which later proved fatal, forced him to return to Italy.

Liuzzi's first compositions are all in a Romantic style, the best reflecting French impressionism (Violin Sonata, the rhapsody for orchestra *Gaiola e Marechiaro*). He also wrote a puppet opera (*L'augellin bel verde*, 1917) and other theatre music, a Passion (1930, staged at Milan in 1935), the symphonic poem *Hyla* and other vocal and chamber music. His scholarly activities gradually led him away from composing to the revivals of medieval music (he arranged the music of the play *Sponsus*, Rome, 1936) with special interest in *laude* and in liturgical drama. His publications on the *lauda*, early Christian hymnody, the interaction of Italian and Flemish music, and Palestrina are fundamental to our knowledge of early Italian music. His arrangements include Vecchi's *Amfiparnaso* (Florence, 1938), a stage version of Bach's Coffee Cantata

(perf. Venice, 1932) and an unpublished realization of Cavalli's *L'Ercole amante*.

CAROLYN GIANTURCO

Livadić [Wiesner], **Ferdo** (*b* Celje, 30 May 1799; *d* Samobor, 8 Jan 1879). Croatian composer. He became interested in music at an early age and began to study with the organist Josip Herović in Samobor. After attending the Gymnasium in Zagreb, he continued his schooling at the Graz Lyzeum (1816–17) and then studied law at Graz university. During that time he also studied composition and joined the Steiermärkischer Musikverein (1816–22), where he probably played the violin in the orchestra. The assumption that he studied with Anselm Hüttenbrenner has not been confirmed. After graduation he settled at his family estate in Samobor and spent the rest of his life there, composing in his spare time. During the Croatian national movement (1835–48) he was a prominent supporter of its leader, Ljudevit Gaj. He composed many revolutionary marches and patriotic songs, including *Još Hrvatska nij' propala* ('Croatia Hasn't Fallen Yet'), on a text by Gaj, which became an unofficial anthem of the movement. From that time he used the Croatian form of his family name, rather than the German (Wiesner).

Livadić composed mainly short instrumental and vocal-instrumental works. His early songs, in the style of lieder, show an extraordinary lyrical talent and sensibility. However, in support of the national movement he attempted to free his style from foreign influences by adopting the Croatian folk idiom; this simplification arrested his artistic development. His output of about 100 songs in Croatian, 47 in German and seven in Slovene ranges from revolutionary songs, couplets and drinking-songs to Singspiel-style songs, romances and ballads. They are all strophic and usually very simple, but with a clear and rounded melodic line. The spirit of the early Romantic movement is displayed in Livadić's piano works, especially in the nocturne in F♯ minor of 1822 (on the model of John Field and thus among the earliest works in the genre); the scherzos *Der Scherz* and *Der Eigensinn*; and the programmatic piece *Poziv Zrinskoga subojnike u boj* ('Zrinski's Battle Call to his Soldiers'), depicting the battle against the Ottomans at Szigetvár in 1566.

WORKS

(*selective list*)

MSS in HR-Zu, Zh, Zda and SMm

VOCAL

Sacred: Mass, C major, S, A, B, orch, org; 2 missae croaticae pastorales, 1v, org; hymns

*c*150 songs, incl.:

(Croatian text): Udaljenoj ljubi [To my Distant Love] (I. Kukuljević Sakcinski), before 1845; Crne oči [Dark Eyes] (L. Vukotinović); Crnogorski sin [Montenegrin Son] (I. Budimir); Kad [When] (P. Preradović); Kamena dieva [The Stone Girl] (A. Mihanović); Mio ti je kraj [The Lovely Countryside] (Mihanović); Moja ladja [My Boat] (Preradović); Okičke vrane [The Crows at Okić] (Vukotinović), ballad; Prelja [The Spinner] (Kukuljević Sakcinski); Stanak za crnooku [Home for the Dark-Eyed Girl] (Vukotinović); Ti si moja [You are mine] (S. Vraz)

(Ger. text): Das Mädchen von Neidpath (W. Scott), *c*1820; Alpenlied (J.P. de Sermage), 1821; Nähe des Geliebten (J.W. von Goethe), in Musikalische Blumenlese (Graz, 1824); Der Schnee, 1833; Der Entfernten, pubd as suppl. to *Iris* (Graz, 1857); Der erste Mai 857, 1857; Wiegenlied (C.A. Tiedge), pubd as suppl. to *Iris* (Graz, 1857); Alpenglöckchen; An das Klavier; Das Traumbild (L.C.H. Hölty); Der Bettelknabe; Der liebe Vaterland (F.W. Weber); Der Sänger; Der Südsturm; Der Wunsch (?Livadić); Die Nonne (L.G. Neumann); Entsagen (H. von Schulheim); In dieser Stunde (R. Prutz); 3 Lieder: Die Klage (Hölty), Lauras Lied (Tiedge), Hoffen bringt wohl schwere Plagen; 2 Romanzen: Die Rose, Das Mädchen; Vergessen (Schulheim); Vorüber; some in *Popijevke na njemačke stihove/Art Songs on German Texts*, ed. M. Hornbaker (Zagreb, 1993)

Kbd (for pf unless otherwise stated): Ländler, 1818–23; Galop, A♭, 1820; Notturno, 1820–22, ed. J. Muraj (Zagreb, 1975); Les charmes des Marienheim, 3 scherzos en forme de valse, ?1820; Ouverture, *c*1820; Polonaise mélancholique d'amour, *c*1820; Galop di Marienheim, 1821; Scherze über Romeos und Juliens Leiden, waltz, 1821–2; Einmal und nie wieder, Tonskizze, op.18, before 1823; Slawisches Rondo, d, *c*1832; Kolo Ilirique (Graz, *c*1835); Poziv Zrinskoga subojnike u boj [Zrinski's Battle Call to his Soldiers], 1866; [2] Charakteristische Tonbilder: Der Scherz, Der Eigensinn, pubd as *Dva scherza*, ed. S. Stančić (Zagreb, 1932); Erinnerung, Tonskizze; Kroatische Heimatsklänge; marches; dances; preludes, org

Incid music: Juran i Sofija (I. Kukuljević Sakcinski), 1840; Frankopan (M. Bogović)

ZDRAVKO BLAŽEKOVIĆ

Livanova, Tamara Nikolayevna (*b* Kishinyov, 5/18 April 1909; *d* Moscow, 4 April 1986). Russian musicologist. She studied at the Rubinstein College of Music (1925–6), the Gnesin State Institute for Musical Education (vocal studies 1926–8; theory 1929–30) and with Ivanov-Boretsky, Mazel' and Gnesin at the Moscow Conservatory (1930–31). She completed her postgraduate studies under Ivanov-Boretsky (1935), and was awarded the doctorate in 1940 for her book *Ocherki i materialï po istorii russkoy muzïkal'noy kul'turï*. She taught at the Conservatory (1934–46, 1948–56), where she became professor in 1939, and at the Gnesin Institute (1944–8). She was director of studies at the Tallinn Conservatory (1948–9), and worked with Asaf'yev and Protopopov on the commission 'Glinka i yego sovremenniki' ('Glinka and his contemporaries') at the Moscow Conservatory. She assisted in setting up the music section of the Institute for the History of the Arts, where she was a senior researcher (1944–86) working with Boris Vipper. She was a member of the State Prizes Committee (1948–54), director of the musicology and criticism commission of the Union of Composers (1950–52) and president of the USSR VAK Commission of Experts for the defence of dissertations (1952–6).

Livanova's research centred on the history of Russian and European music, especially that of the 17th and 18th centuries. She made a significant contribution to Bach studies. Other achievements include the development of a musical-aesthetic theory of simultaneous contrast, evolved in connection with her studies of the music of Bach. Also important are her writings on the problems of the theory and history of musical styles and musical historiography.

TAT'YANA DUBRAVSKAYA

Liveralis, Iossif [Liberal(l)i, Giuseppe] (*b* Corfu, 1820; *d* Zakynthos, 17 Sept 1899). Greek composer and pianist. His first teachers were his brother Antonios (1814–42), a composer and the first director of the Corfu Philharmonic Society, and Nikolaos Mantzaros. In 1840, after studying at the conservatories of Naples and Milan, he returned to Corfu, where he became assistant conductor at the newly

founded Philharmonic Society. He also taught piano and theory (after 1849) and was appointed a conductor on his brother's death. In 1852 he settled in Zakynthos as a distinguished piano teacher, but he also spent some time in Patras (1870–76 or later).

With Frangiskos Domeneginis (1809–74), whose works are no longer extant, Liveralis ranks among the earliest Greek Ionian composers to write operas inspired by the 1821 Greek War of Independence. His piano piece *Le réveil du Klepht* (1847) is the earliest extant Ionian composition inspired by the folklore of continental Greece. This work, and the recurring presence of folk elements in other compositions by 19th-century Ionian composers (including Xyndas, Carrer and early Samaras), challenge Kalomiris's self-interested rejection of 19th-century Greek music as 'italianate' and his monopolizing of the national school. Although Liveralis composed some stage music, and was reportedly admired by Mantzaros and Rossini, his surviving output is mainly of piano music, marking him as one of the earlier Greek composer-pianists alongside Demetrios Agathidis (*fl* 1852–82). Liveralis's pieces combine melodic elegance with a sober harmonic taste. They contain transparent piano writing, with delightful virtuoso passages and ornamentation, betraying a thorough assimilation of the instrument's expressive potential.

WORKS

VOCAL

music lost unless otherwise stated

Il ritorno di Canaris in Psara (cant.), S/Mez, T, mixed chorus, Corfu, S Giacomo, ? ant. 1840, music lost, lib at Corfu Reading Society

GEORGE LEOTSAKOS, STELIOS TZERBINOS

Liverati, Giovanni (*b* Bologna, 27 March 1772; *d* Florence, 18 Feb 1846). Italian composer, conductor and singer. He had his first training as a singer in Bologna from Giuseppe and Ferdinando Tibaldi. From the age of 14 he was taught singing by Lorenzo Gibelli and composition by Stanislao Mattei. He began as an opera composer there in 1790 with *Il divertimento in campagna* and from 1792 was first tenor at the Italian theatres in Barcelona and Madrid. On 2 October 1795 he took part in a public concert in Bologna and in 1796 went to Potsdam as Kapellmeister of the Italian Opera. In 1799 Domenico Guardasoni called him as Kapellmeister to the National Theatre in Prague, where he became acquainted with the aristocratic Kinsky and Lobkowitz families. From 1805 to 1814 he lived as a singing teacher in Vienna, where he knew Haydn, Beethoven and Salieri, as well as Leopold Kozeluch, Joseph Gelinek, Gyrowetz, Gelli, the music publisher Mecchetti and the singers J.M. Vogl and Giuseppe Siboni.

In 1815 Liverati succeeded Vincenzo Pucitta as composer and music director at the King's Theatre in London. After two years there he is said to have returned to Italy, but must later have again settled in London, as in 1822 he was listed among the professors on the original staff of the Royal Academy of Music; letters written in 1827, 1829, 1831 and 1835 show that he was still there. He apparently spent his last years in Florence, where he was a professor at the Accademia di Belle Arti; he was also a member of the Bologna Accademia Filarmonica. His sacred drama *David* was performed in Florence in 1844.

Liverati's most frequently and widely performed opera was *La prova generale* (1799), written in the *buffo* manner. The late Neapolitan style of his *opere serie* and cantatas resembles that of Salieri and Spontini, while his skilfully written ensembles are in the tradition of G.B. Martini. In Vienna it was just these stylistic idiosyncrasies and the occasionally arbitrary instrumental accompaniments of his arias (as in the use of obbligato bassoon and trombone or waldhorn in *David*) that excited the indignation of Weber along with other representatives of Romantic German opera.

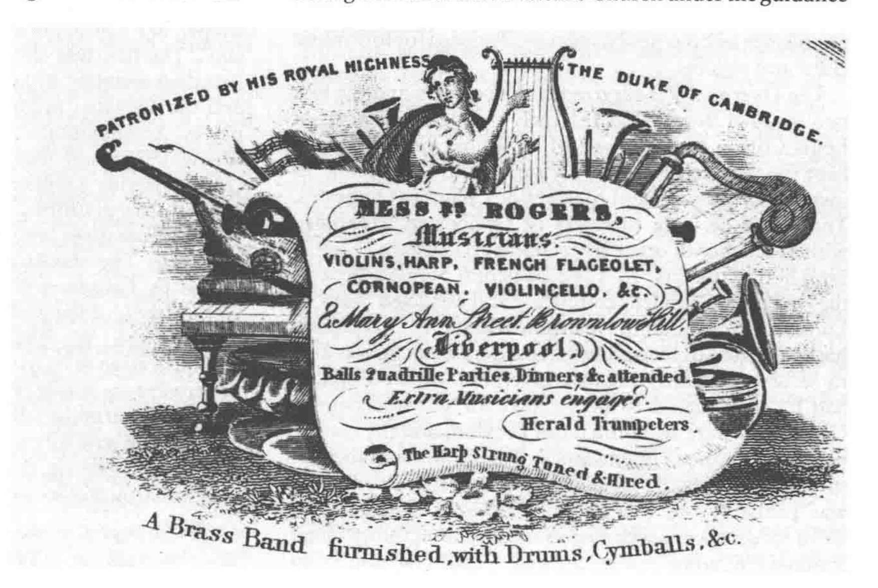
HELENE WESSELY

Liverpool. City in north-west England on the Mersey estuary.



1. EARLY HISTORY. The earliest reference to music in the Town Books occurs in 1541, when the mayor and corporation resolved that 'theare shalbe hired a clercke that can syng his playne song and pryck songe and play the organs'. From then until the second half of the 18th century town musicians were frequently mentioned in the records, often for being troublesome. The duties of the Liverpool Waits included attendance at the houses of returning sea captains in addition to their normal work of sounding curfew and providing music for civic dignitaries. Waits are last mentioned in 1764 and were presumably disbanded not long after. The first music festival appears to have taken place in St Peter's Church in 1766 under Dr Hayes of Oxford, with an orchestra from London.

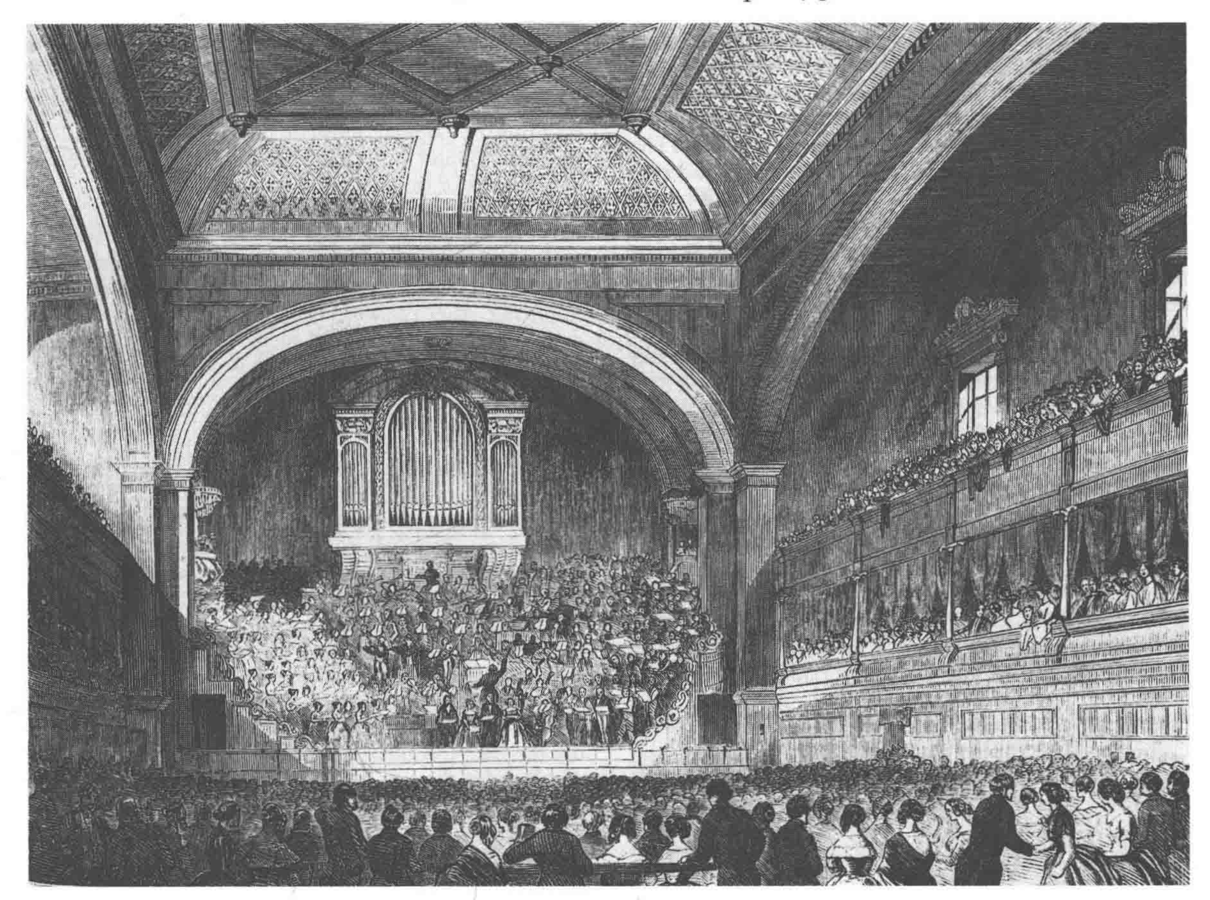
Among local musical societies, or convivial clubs based on musical activities, were the Ugly Face Club (1743), at least part of whose aim was the singing of songs, and the Apollo Glee Club (1796). In 1786 a Music Hall to seat 1400 was opened in Bold Street, sumptuously built and lavishly appointed at a cost of £4526 6s. 4d. It was converted into a shop in 1836 and extensively rebuilt a few years later after fire damage and survives the redevelopment that has claimed other early Liverpool buildings. But the Music Hall was never used for concerts again; only the musical motifs betray its original purpose and it still retains at the rear the colonnade under which chair carriers and coachmen sheltered while waiting for patrons.

Outdoor music was available in the Ranelagh Gardens (now Ranelagh Place) in imitation of the 18th-century London establishment of that name (*see* LONDON, §V, 4). Liverpool made an important contribution to music publishing with *The Muses Delight* (1754), which contained songs as well as treatises on singing and several instruments. The collection was engraved and published by John Sadler, who later became celebrated for his invention of transfer printing on pottery. A later edition is notable because it includes the french horn duets by the mysterious 'Mr Charles'.

In August 1838 Johann Strauss (i) gave six concerts at the Royal Amphitheatre, inspiring some local imitators who, aware of the huge appeal of the new Viennese-style music, lost no time to turn Strauss into 'Scouse'. The mid-19th century demand, in Liverpool as elsewhere, for freelance players to perform Strauss's works is vividly documented in the surviving papers of the Rogers family. Charles Henry Rogers (*b* 1826) was a Welsh musician who settled in Liverpool, as did his brother George Frederick (1833–74). With their numerous offspring and other family members they formed the Rogers Family of Musicians. Their trade card offers all kinds of combination, including 'A Brass Band furnished with Drums, Cymbals, etc.' (fig.1), and they acted not only as players but also fixers, instrument and sheet-music sellers and concert agents. Members of the Rogers family played in the Amphitheatre orchestra and the great houses in the area. There was even the occasional foray to London. The family's documents and diaries for 1858–9, giving details of engagements and fees, show how hard a life jobbing musicians led at that time. By the end of the century most of them had succumbed to consumption.

2. PHILHARMONIC SOCIETY. The Liverpool Philharmonic Society owes its foundation to the enthusiasm of a group of music amateurs. They had met for some years during the 1830s in St Martin's Church under the guidance

1. *Trade card of the Rogers Family of Musicians, c1860*



of William Sudlow, a stockbroker and organist, their chief interest being choral music. In 1840 a society was constituted with the object of promoting 'the Science and Practice of Music'; its orchestra consisted largely of amateur players. The task of conducting the choir and orchestra devolved upon various members in turn, but in 1844 the Swiss Jakob Zeugheer (also known as Zeugheer Herrmann) was engaged and he occupied the post for over 20 years. On 1 January 1850 Charles Hallé started his work in Manchester; his activities 35 miles from Liverpool were to have a powerful and lasting effect on the musical life of the seaport. He persuaded many musicians from London and Germany to live in Manchester, so for the first time a fair supply of fully professional players became available in north-west England; they welcomed the opportunity of supplementing their income with outside engagements, and the arrangement saved the Liverpool Philharmonic the expense of importing what was euphemistically described as 'metropolitan talent' from London. Conductors of the Philharmonic who followed Zeugheer were Alfred Mellon (1865–7), Julius Benedict (1876–80), Max Bruch (1880), Charles Hallé (1883), Frederic Hymen Cowen (1896–1913), Henry Wood, Thomas Beecham 'and guests' (from 1913). The period during and after World War I was one of uncertainty. The use of one pool of players to augment the amateurs and semi-professionals in both the Liverpool and Manchester orchestras continued to function, but less effectively. The depression forced many musicians to seek more secure employment in ships' orchestras; some combined the occasional symphonic work the two orchestras offered with work in hotels, cafés and (until the arrival of talking pictures) cinema orchestras.

Since its inception in 1840 the Liverpool Philharmonic Society has supported its own choir – indeed in its earlier years the choir *was* the society: when Bruch arrived in 1880 he was designated musical director of, principally, the society, not the orchestra. The considerable Welsh population has provided ample talent for the large Liverpool Welsh Choral Union, active continuously (usually in collaboration with the Liverpool PO) since 1849 – so much so that in 1878 the Welsh National Eisteddfod was held not in Wales but Birkenhead, on the other side of the Mersey. By contrast, the even larger Irish population in Liverpool has generally opted for folk music clubs and *ceilidhs*.

The Liverpool PO survived the depression and the first two years of World War II largely through the efforts of Louis Cohen, formerly one of its second violinists, who kept the players together by forming and conducting his own Merseyside SO and Merseyside Chamber Orchestra. The influx of large numbers of servicemen (combined with a shortage of other entertainment) caused a boom in symphony concerts. In 1942 Malcolm Sargent became the orchestra's resident conductor and attracted many of London's top-ranking instrumentalists to Liverpool, partly because of the valuable recording work he was able to secure and partly because Liverpool, unlike London, had by then ceased to be a target for German bombs. Conditions were still difficult in London, and the combination of various circumstances raised the reputation of the Liverpool PO to its zenith; through its recordings it was probably the best-known orchestra in Britain. In 1948 Sargent was succeeded as musical director by Hugo Rignold. Wartime audiences had forced the society to broaden its policies. Its activities had hitherto been enjoyed almost exclusively by the upper classes: evening dress had been obligatory in most parts of the Philharmonic Hall, and to some parts admission was denied to 'tradesmen' whatever their dress. Rignold's appointment was bitterly opposed by a section of the society on the grounds that he had come to symphonic music via jazz (as a viola player in Jack Hylton's band). Intrigues and counter-intrigues resulted in an unsettled period for the orchestra (now once again without its 'metropolitan talent' and recording contracts), culminating in 'industrial action' by the Musicians' Union. At about this time an innovation was made in concert-giving which reflected the new spirit brought about by wartime conditions: the introduction of Industrial Concerts, with single-price tickets sold in offices and factories. It was a successful way of retaining the audiences recently gained and did much to offset the inevitable postwar slump in attendances. Efrem Kurtz and John Pritchard were joint musical directors of the Liverpool PO from 1955 to 1957, when the latter took sole charge. Charles Groves became director in 1963. He was succeeded in September 1977 by Walter Weller, followed by David Atherton in 1980, Marek Janowski in 1983 and Libor Pešek in 1987. Pešek and the orchestra introduced music by Suk and Novák to British audiences, and made many foreign tours. Special links were forged between the orchestra and Pešek's homeland, including an association with the Prague Spring Festival. In 1997 he was succeeded by another Czech conductor, Petr Altrichter. The Liverpool PO was granted the prefix Royal in 1957.

The Philharmonic Society has possessed its own concert hall almost from its formation. The design of the first Liverpool Philharmonic Hall was entrusted in 1844 to John Cunningham, a noted pioneer architect who specialized in cast-iron structures that were amazingly advanced for the period, but the conservative members of the committee rejected his proposed design 'in the horse-shoe shape' and insisted on a more conventional building. This was completed and opened in 1849 (fig.2) with a four-day music festival: its acoustics were universally agreed to be superb. It was destroyed by fire in 1933; a new hall was designed by the Liverpool architect Herbert J. Rowse and this time the society accepted an unconventional shape, 'like a megaphone with the orchestra at the narrow end'. The hall was the first to be built with an interior based on scientific acoustical data; it was opened in 1939 and the acoustics pronounced excellent, if a little dry in places. Architecturally it resembles many picture palaces of the 1930s and was in fact designed to double as a cinema, having a full-size screen which can be raised from beneath the platform, as can a Rushworth & Dreaper organ whose pipes are hidden behind decorative grilles at each side. The entrance hall has notable engraved glass panels by Laurence Whistler. The Royal Liverpool PO was for most of the 20th century the only orchestra in the country able to rehearse and keep its library and administration in its own building. In 1995–6 the building underwent a major refurbishment, including a long overdue 'warming' of the hall's acoustics, platform enlargement and an extension housing a hospitality and administrative wing, the Peter Moores Suite, named after the Philharmonic Society's principal benefactor.

3. Other institutions. The amateur Societa Armonica was founded in 1847 and was separate from the

2. Philharmonic Hall, Liverpool, designed by John Cunningham, opened 1849: engraving from the 'Illustrated London News' (1 September 1849)

Philharmonic Society. It gave concerts until 1909, conducted by, among others, Henry J. Wood, Vasco Akeroyd, Gordon Stukely and the German-born Alfred E. Rodewald, who also conducted the Liverpool Orchestral Society in 1884. A friend of Elgar as well as Hans Richter, Rodewald introduced Liverpool to Richard Strauss's *Tod und Verklärung* and works by Rachmaninoff. In 1911 the Rodewald Concerts Society was founded in his honour for the promotion of celebrity chamber music concerts given by international artists.

From about 1900 until at least the 1930s Liverpool had a Post Office Choral Society which performed choral and orchestral works under the direction of Percival Ingram, but their programmes and other records were lost when the Victoria Street post office was bombed in 1941. The Liverpool Male Voice Choir was formed in the early years of the 20th century and, apart from periods of decline during the two world wars, survives with a healthy membership. The Liverpool Music Group (1949), drawn mostly from members of the Royal Liverpool PO and ranging from quartets to a chamber orchestra, presented for many years lighthearted concerts of 18th- and 19th-century music and an annual April Fools concert. The Liverpool Lieder Circle (1968), formed by Celia Van Mullem, promoted regular concerts to help students and young professionals embark on their singing careers. The two foregoing organizations and the Rodewald Concerts Society have been in abeyance since about 1990, but Royal Liverpool PO musicians have filled some gaps with several ensembles that perform in small halls for schools and music clubs. The semi-professional Liverpool Mozart Orchestra has been in continuous operation since 1951, and seeks out young professional conductors and soloists, but has moved its meetings to Birkenhead Town Hall. There are also several long-established amateur operatic societies in the city.

Apart from the Philharmonic Hall, venues used for concerts at various times have included the main St George's Hall (1851) which, however, because of its cavernous acoustics, is considered less suitable for orchestral concerts than organ recitals on its 1855 Willis Organ. This is the instrument over which W.T. Best presided from that year, an appointment he held from 1851, combining it with that of organist to the Philharmonic Society (1848). The St George's Hall Small Concert Room, on the other hand, has been found ideal for chamber music. Large orchestral concerts have taken place in the Methodist Central Hall, smaller orchestral and chamber concerts in the Bluecoat Hall situated in the former Bluecoat School (1717). The concert hall of the Wellington Rooms (1815) – former assembly rooms that once housed a dancing academy – has also offered spacious facilities and good acoustics, but during the 1970s the concert hall became an Irish club and beer hall, temporarily renamed the Irish Centre, until it closed in 1997. However, during its Irish period it often resounded to Irish folk music. Even the Minstrels Gallery of the

18th-century Town Hall has occasionally hosted small period orchestras.

The proximity of Wales and Ireland, together with the continuous influx of sailors and other travellers, combined to give Liverpool folk music a special vitality. The Spinners folk group (active from 1958 to about 1990) began as a skiffle group but instead of turning, like most others, to rock and roll, remained true to the folk movement. Their guitars stayed non-electric and, with a minimal commercial veneer, they were influential in keeping real Liverpool folk music alive. Certain folk roots doubtless also played a part in the beat-group cult of the 1960s. The former Beatle Paul McCartney founded and partly funded the Liverpool Institute for Performing Arts (1996). It is housed in McCartney's old school, the Liverpool Institute, formerly the Mechanics' Institution (1835). One of its aims is to support the traditionally ad hoc creation of pop stars and other entertainers with a basis of theoretical and practical training, also offering courses in ancillary arts disciplines such as management. The Mechanics' Institution's original circular lecture theatre makes a fine and intimate hall for chamber music.

The University of Liverpool has a music department giving theoretical and practical tuition. The first Alsop Professor of Music was Gerald Abraham (1947), succeeded by Basil Smallman (1965) and Michael Talbot (1986), with Robert Orledge (1988) holding the Personal Chair in Music. The department also embraces the Institute of Popular Music (1988), under the directorship of David Horn, where a degree course in popular music is available. There is an extensive music library of standard works and a separate library of popular music, as well as the John Lennon Resource Centre.

Liverpool Hope University College, formed in 1995 from a merger of teacher training colleges, has a music department under the direction of Stephen Pratt. Its Concordia Concert Society specializes in performing new (and lesser-known old) works, encouraging young artists and composers.

Of the numerous instrument manufacturers active in Liverpool from the 19th century (Ward, J. & H. Banks, Jordan, Stansfield, Vassiere, Maybrick etc.) the only major organ builder to survive is Rushworth & Dreaper. The technical director of the firm is Alastair Rushworth, of the fifth generation since William Rushworth (i) founded the firm. The magnificent Rushworth Collection of Musical Instruments was founded by William (ii), who employed full-time scouts to find early instruments throughout Europe. In 1967 it was bought by the National Museums and Galleries on Merseyside and is now in the Liverpool Museum, where it forms approximately half of the museum's collection of European musical instruments. The collection includes a Snetzler chamber organ (1776) and a Stein-type fortepiano (*c*1800) with probable Beethoven associations.

The Liverpool Public Library was founded as a result of the 'free libraries' movement initiated by Liverpool philanthropists during the 19th century. It had a fine music section, with important manuscsripts, comprehensive music reference shelves and a good orchestral library. Some material was lost during the bombing of World War II but unfortunately even more has been dispersed since in regular book sales, in response to the city council's demands for economy. The services of a music librarian have been dispensed with and the music library now concentrates on providing a CD library.

4. Popular music. Liverpool has a rich and varied tradition of popular music-making. Early in the 20th century its grand music halls attracted the most successful entertainers of the time; during the 1930s and 40s local dance bands performed in the city's numerous dance halls; in the 1950s and 60s the city's folk and country music scenes flourished, with some local musicians still referring to Liverpool as the 'Nashville of the North'; and for many years cabaret music has continued to attract audiences to Liverpool pubs and social clubs and to well-known cabaret venues such as the Wooky Hollow.

The city is best known, however, for its rock and pop music which has earned it a worldwide reputation. There was, for example, the so-called 'Liverpool Sound' of the early 1960s involving the 'Merseybeat' bands that had emerged out of the skiffle groups of the 1950s. The most famous of these was the Beatles, who performed in many city venues, including the notorious Cavern Club which was originally a popular traditional jazz haunt. In the late 1970s and early 80s the city spawned other nationally and internationally renowned bands such as China Crisis, the Real People, Echo and the Bunnymen, Teardrop Explodes, Orchestral Manoeuvres in the Dark and Frankie Goes to Hollywood. During the 1990s Liverpool bands such as Cast, Space and the Lightning Seeds continued to top the charts. A thriving contemporary dance scene also developed in the city, supported by new music businesses such as the internationally famous Cream.

These and other popular music scenes have been shaped by Liverpool's unique social, cultural, political and economic characteristics. As a port the city had a direct shipping link with America; it was also situated close to the Burtonwood airbase which for many years housed US servicemen who regularly visited Liverpool clubs and venues. Such connections helped bring American musical influences (jazz, country, rhythm and blues, soul, rock and roll) into Liverpool at an early stage, influencing the city's popular music culture. Liverpool's musical life has also been shaped by its Irish, Jewish and African immigrants. Jewish music businesses, for example, helped support bands such as the Beatles during the 1960s, while Irish musical influences are detectable in various local popular music styles and in the city's strong tradition of music performance in pubs.

FRITZ SPIEGL (1–3), SARA COHEN (4)

Liviabella, Lino (*b* Macerata, 7 April 1902; *d* Bologna, 21 Oct 1964). Italian composer. He studied at the Rome Conservatory, taking diplomas in piano (1923), organ (1927) and composition (1928) with Respighi. His symphonic poem *Il vincitore* brought him recognition in the music competition at the 1936 Berlin Olympics. He taught at the conservatories in Venice (1931–40), Palermo (1940–42) and Bologna (1942–53). He was also director of the Liceo Musicale in Pescara (1928) and then the conservatories in Pesaro (1953–9), Parma (1959–63) and Bologna (1963). In 1962 he was awarded an honorary diploma in art and culture of the Repubblica Italiana.

Liviabella's work is characterized by a tendency towards musical pictorialism, chromaticism and polytonality within a traditional context. These elements are as apparent in the chamber music and dense orchestral frescos reminiscent of Respighi, such as *Monte Mario* and *La mia terra*, as in the operas and cantatas. Some of his most significant pieces belong to the latter genre, including *Caterina da Siena* and *Le sette parole di Gesù*.

WORKS
(*selective list*)

DRAMATIC

Santina (op, W. Liviabella), 1922; Zanira (op, R. D'Andrea), 1924; Favola di poeta (ballet), 1936; Antigone (lyric tragedy, 3, E. Mucci), Parma, Regio, 29 Dec 1942; La conchiglia (op, 2, E. Mucci, after R.L. Stevenson), Florence, Comunale, 1955; Canto di Natale (op, 1, E. Murolo, after C. Dickens), RAI, 1963

ORCHESTRAL

Vibrazioni violacee, 1921; Giovinezza mia, sym. poem, 1922; Trittico sinfonico, 1923; Il Natale, suite, 1925; Fiabesca, suite, 1933; Il vincitore, sym. poem, 1936; Monte Mario, sym. poem, 1937; Il poeta e sua moglie, suite, 1937; I canti dell'amore, hp, hmn, str, 1939; La mia terra, sym. poem 1942; Tema, variazioni e fuga, 1950; Poema, pf, orch, 1954; Vn Conc. 1956; 3 serenate, 1959; 2 concerti, 1964

With chorus: Per la divina vittoria, 1926; L'ultima luce, 1927; Manina di neve (cant.), 1935; Sorella Chiara (cant.), 1943; Caterina da Siena (cant.), 1949; O crux, ave! (cant.), 1950; Le sette parole di Gesù sulla croce (cant.), 1957

With 1v: L'usignolo e la rosa, spkr, orch, 1925; Riderella, spkr, pf, hp, str, 1927; 3 liriche allegre, 1930; 3 pagine d'argento, 1933; La madre, 1935; 3 liriche su testo di carattere popolare, 1938; Trittico lirico, 1938; Ninna nanna, 1942; 4 quartetti: sinfonia con soprano (T.S. VIRGILIO BERNARDONI

Liviana. Andalusian Gypsy song and dance form in flamenco style. *See* CANTE HONDO and FLAMENCO, Table 1.

Living Colour. American hard rock band. Formed in 1983, its line-up stabilized in 1985 as Vernon Reid (*b* London, 22 Aug 1958; guitar), Corey Glover (*b* Brooklyn, NY, 6 Nov 1964; vocals), Muzz [Manuel] Skillings (*b* Queens, NY, 6 Jan 1960; bass) and William Calhoun (*b* Brooklyn, NY, 22 July 1964; drums). Skillings was replaced by Doug Wimbish in 1992, and the group disbanded in 1995. They created an innovative and compelling fusion of hard rock and funk, with Reid's guitar solos also displaying the influence of free jazz. Reid was a founding member of the Black Rock Coalition, which promoted black artists and fought racial stereotyping; accordingly, Living Colour was deliberately formed as a rock band that was made up entirely of black American musicians. Their lyrics often featured political criticism and emphasized self-reliance. *Vivid* (CBS, 1988) is usually regarded as their best album.

ROBERT WALSER

Livius Andronicus, Lucius (*b* ?Tarentum [now Taranto]; *fl* Rome, 3rd century BCE). Roman dramatic and epic poet of Greek origin. He was the first Latin poet known by name and worked at Rome as a teacher and actor. He was instrumental in introducing Greek drama to Rome; his adaptations performed in Latin versions at the *ludi romani* in 240 BCE were the first of their type. Titles or fragments survive of ten tragedies and two comedies by him; as 'lawgiver [*Nomothet*] of the Old Roman drama' (Fraenkel) he laid the foundations for Naevius (*c*271–201 BCE), TITUS MACCIUS PLAUTUS and others, who extended and elaborated the *cantica* (solo scenes accompanied by music and dancing) of the Roman comedies. Livius Andronicus also set a precedent with his Latin adaptation of Homer's *Odyssey* which was still used as didactic literature in the mid-1st century (Horace, *Epistulae*, ii.1.69). His contemporary reputation was considerable: the state commissioned from him a processional *partheneion* (maiden-song, now lost) after the Greek manner for expiatory ceremonies during the Second Punic War (207 BCE). After the successful performance of this piece, poets and actors were accorded the right to form a guild, and the Senate granted them an official centre in the Temple of Minerva on the Aventine in Rome.

GÜNTER FLEISCHHAUER

Livorno (Eng. Leghorn). City in Italy, on the coast of Tuscany. Founded at the end of the 16th century by the

Medici grand dukes, it acquired commercial, cultural and civic importance in the 17th and 18th centuries. Many of its documents were destroyed during World War II. The Medici encouraged people of various nationalities and creeds to settle in the new city. The Sephardi Jewish community, still large today, was of particular importance; their synagogue chants were collected and transcribed by Federico Consolo at the end of the 19th century. A *Sacra rappresentazione di S Orsola* was performed in 1514 in the parish church of S Giulia. The organ of the parish church of S Francesco (later collegiate church and then cathedral) was built in 1596 by Francesco Palmieri and Giorgio Steiniger. The first *maestro di cappella* there was appointed in 1632 and the first cathedral organist in 1785, with the title of *maestro di cappella* and the option of conducting the theatre orchestra. Music featured here and in the lesser churches especially on feast days, for which musicians from Pisa and Lucca were engaged. Notable *maestri di cappella* include C.A. Campioni (?1752–62); a description of a typical church music performance (with his music) is given in a letter by Anton Raaff to Padre Martini in 1752. In the 18th century oratorios were sung in the cathedral and other churches, in the meeting-places of confraternities and in the Teatro Avvalorati.

There was a 'commissario delle bande' in Livorno castle by 1600. From mid-century in the Palazzo Granducale, festivities held to honour visiting foreign notables included concerts and opera. The first recorded opera performance, at Carnival 1656–7, was of Cavalli's *Giasone*, by the Fedeli company. In 1658 the Teatro Nuovo (also called Teatro delle Commedie or Teatro S Sebastiano) was inaugurated; it was the scene of Francesco Gasparini's and Carlo Goldoni's first successes. It closed in 1779 and was replaced by the Teatro degli Armeni (1782–1944; later Avvalorati), inaugurated with the première of Cherubini's *Adriano in Siria*. Other theatres were the Carlo Lodovico (1806–1944; also called dei Floridi or S Marco); the Rossini (1842–1944; also called dei Fulgidi); the Leopoldo (inaugurated 1847; also called Caporali or Goldoni), which was restored in the late 20th century; and the Politeama (inaugurated in 1878 and demolished 1968). During the 19th century opera was also performed in private theatres (the Pellettier; the Vecchio Giardinetto, also called Gherardi del Testa or Strozzi); arenas (the S Cosimo or Labronica; the Teatro Diurno or Arena degli Acquedotti or Alfieri; the Arena Garibaldi) and the outdoor summer Teatro (Teatrino) della Fiera. The theatre-cinemas La Gran Guardia and I Quattro Mori were built after World War II.

Concerts were usually given in the theatres. The violinist Pietro Nardini, with G.M. Cambini, Filippo Manfredi and Luigi Boccherini, formed the Quartetto Toscano in the mid-18th century – perhaps the first established quartet in history. There are small recital rooms in the Istituto Musicale P. Mascagni (named after the composer, a native of Livorno), the Museo Fattori and the Villa Corridi. Open-air concerts take place in the summer theatre of Villa Mimbelli, and the Fortezza Vecchia and Fortezza Nuova of the Medici.

In the second half of the 19th century the orchestral players and choruses employed in the theatres formed such associations as the Società Orchestrale Livornese and the Società del Quartetto a Corda (1881). Other 19th-century institutions were the Società per gli Esercizi Musicali (1809), the Società Filarmonica (*c*1839), the Società della Banda Nazionale, the Banda Musicale Volontaria Livornese (1844), the Società Corale di Dilettanti and two choral societies, the Costanza e Concordia (1894; later called Mascagni) and the Guido Monaco (1900), both still active. Early in the 20th century the Circolo Mandolinistico G. Verdi had many members. Concert series were organized by the Amici della Musica and Diapason, amalgamated in 1950 as the Associazioni Riunite Concerti, and by the municipality.

In 1847 the Pie Scuole Israelitiche had a music school. The Schola Cantorum G.B. Pergolesi was founded in 1872 at the church of S Benedetto; the first city music schools were the free school for string instruments in the Teatro Goldoni (?1867), the school run by the Società Filarmonica (?1877) and, most important, the Istituto Musicale Livornese (later renamed after Cherubini), founded in 1875 by Alfredo Soffredini, whose pupils there included Mascagni. The successful Orchestra Labronica (1937) was founded by Emilio Gragnani but disbanded because of the war. Some of its members founded the Istituto Musicale P. Mascagni (1953), whose activities include teaching, management of a youth orchestra and concerts, and musicology; its library holds materials on local music history, arranges conferences and issues publications. The Associazione Aulòs – Accademia Italiana dei Legni (1987) carries out research on wind instruments; the Centro Studi Mascagnani collects manuscripts and memorabilia of the composer and organizes conferences.

The violin makers Gaetano Bastogi, Francesco Magri, Francesco Meiberi and the Gragnani family were active in Livorno. The Cresci family made keyboard instruments in the 18th century, and Giovanni Galeazzi may have made flutes in the 19th. The Armenian typographer Yovhannes of Jaffa worked in Livorno (1640–45), and Marco Coltellini's firm printed the first edition (1755–62) of Francesco Algarotti's *Saggio sopra l'opera in musica*. At the beginning of the 19th century Fedele Gilardi printed works by Filippo Gragnani. During the city's commercial and cultural heyday dealers in music and instruments (Moniglia, Masi etc.) flourished. In the 19th century Gaspare Bigotti made pianolas. The recording company Fonè has its headquarters in Livorno.

ROSSANA CHITI, CAROLYN GIANTURCO

Livret (Fr.). *See* LIBRETTO.

Lizogub, Aleksandr Ivanovich (*b* Chernihov region, Ukraine, Feb 1790; *d* ? Moscow, Jan 1839). Ukrainian composer and pianist. He was educated at the St Petersburg military school and spent the majority of his life in military service, rising to the rank of Major-General in 1834 after a distinguished career. From an early age he displayed a keen musical interest; he was an accomplished pianist and singer, and from the 1820s he performed regularly in the leading St Petersburg and Moscow salons and became particularly well known in amateur musical circles. Much of his output for piano was published during his lifetime by two leading Russian-based publishing houses, J. Paez and H. Reinsdorp. It included sets of variations on Ukrainian folksongs (a number of which are available in modern anthologies), mazurkas and at least two nocturnes. He also composed several vocal *romances*, a form which gained particular popularity in Russia during the early 19th century. Of the variation sets for piano, the most notable is based on *Sredi doliny rovnyya*, a folksong later used by Glinka as the basis of a set of piano variations. Lizogub was one of the earliest composers to take up the nocturne form, recently introduced into Russia by John Field; his two examples, which date from the early 1820s, illustrate Field's influence, not only in their forward-looking harmonic and melodic invention, but also in the use of pedal for poetic effect.

Lizogub's brother, Il'ya Ivanovich Lizogub (1787–1867), was the first Ukrainian known to have composed and published a sonata for cello and piano.

NIGEL YANDELL

Ljubljana (Ger. Laibach). Capital city of Slovenia. The area of today's inner city has been continuously inhabited since at least 2000 BCE. At the beginning of the Christian era the Roman settlement of Emona was founded; this became a diocesan seat in the 4th century CE. The city is first mentioned in written sources in 1144 and 1146. In the 16th century it became the cultural centre of the Slovenian nation; prior to that it had been the capital of the central Slovenian province of Carniola (Kranjska), which was ruled by the Habsburg house for six centuries. In 1918 Ljubljana became the capital of the Slovenian nation and in 1945 of the Federal Republic of Slovenia, both within Yugoslavia. In 1991 the city became the capital of the independent state of Slovenia. The proximity of the city to the important cultural centres of central Europe and its long stability and freedom from Turkish invasions ensured a rich and varied musical life. The cultural identity of Ljubljana as a central European city has been influenced mostly by the achievements of Italian and German culture. The cultural history of Slovenia can be seen as a long process of formation and consolidation of a national and central European identity.

Art music during the Middle Ages was fostered predominantly by churches and monasteries. A Franciscan monastery was founded by 1242 and music was practised in the church of St Peter from the 10th century. The cathedral was musically active from the late Middle Ages and had a song school from the early 15th century. Later the Jesuit college became a centre for musical instruction. The earliest references to organized bodies performing secular music date from the 16th century; in 1544 the city council appointed musicians to the permanent posts of *Stadtpfeifer* and *Landestrompeter*, and *Stadtgeiger* are recorded from 1571. Throughout the 17th century these musicians regularly took part in the numerous musical performances at the Jesuit theatre which, towards the end of the 16th century, had the important task of luring the citizens away from Protestantism, at that time strongly increasing in Slovenia. After the defeat of Protestantism in Slovenia the theatre continued to add more and more splendour to its performances, but frequent visits by Italian operatic companies contributed to its decline about the middle of the 18th century. Operas had been performed by professional companies since the 1650s; after 1740 the stream of visiting Italian companies was unbroken, and after 1768 German companies began appearing too. In the 18th century operatic performances were given in the palace of Count Auersperg, until the Stanovsko Gledališče (Theatre of the Estates) was opened in 1765. Between 1779 and 1782 Emanuel Schikaneder's company performed a number of Singspiele and operas.

The important Academia Philharmonicorum (founded 1701) was an aristocratic music society which performed oratorios and orchestral music until the middle of the century, and in 1794 the middle-class Philharmonische Gesellschaft was founded. The orchestra of this society from its inception performed many works by contemporary Viennese composers. It elected Haydn (1800) and Beethoven (1819) to honorary membership; in 1816 it opened a public music school, one of the unsuccessful applicants for the post of teacher being the 19-year-old Schubert. The society continued until the early years of the 20th century, remaining identified with the German-speaking section of the population.

The activity of the Slovenian nationalists in the mid-19th century was centred on the Čitalnice (Reading Rooms), cultural societies which devoted much time to music, especially choral. The Ljubljana Reading Rooms reappeared after the March Revolution of 1848 as late as 1861. From 1872 onwards, musical life was the domain of the Glasbena Matica (Musical Centre), This society also founded the short-lived Slovenska Filharmonija (1908–13) under Václav Talich. The division into two streams of parallel effort by the German-speaking minority and Slovenian-speaking majority caused several crises as well as a positive spirit of competition during the period of growing national consciousness in the second half of the 19th century, which substantially enhanced the level and extent of musical life.

Operatic activity was likewise divided between the German Landestheater and the Slovenian Dramatično Društvo (Dramatic Society) from which the Slovenian Opera evolved. The Theatre of the Estates was destroyed by fire in 1887, and in 1892 a new theatre was built. The house was shared by the German and Slovenian ensembles and was known as the Slovensko Deželno Gledališče (Slovenian Regional Theatre). Mahler spent the 1881–2 season as conductor at the German theatre. The Slovenian Opera owed its remarkable progress to Fran Gerbič, who

was its musical director between 1886 and 1895. Fritz Reiner conducted the opera in 1910–11, and Václav Talich in 1909–10 and 1911–12. The building now houses the Opera of the Slovenian National Theatre (cap. 700); the normal season extends from September to June.

After World War I the city became one of the foremost musical centres of Yugoslavia. The main task of performing orchestral music fell on the orchestra of the opera. The Ljubljana PO was founded in 1934, but lasted only until 1941. In 1948 the orchestra was reconstituted and named Slovenska Filharmonija, taking the name of the orchestra which had existed earlier in the century. Glasbena Matica continued its manifold activity – it has supported a choir, an orchestra, published music and opened a music school; in 1934 an Institute for Folk Music was started under its auspices. After World War II Ljubljana Radio-Television formed an orchestra and a choir which were considered the best in Yugoslavia, while in the 1980s opinion favoured the Slovenska Filharmonija.

The city's long tradition of music schools continued with the founding of Glasbena Matica's school in 1882 and a conservatory in 1919. In 1926 this was reorganized as a state conservatory and in 1939 became the Academy of Music. Since World War II all important Slovenian music institutions have been concentrated in Ljubljana. In addition to those already mentioned, these include the department of musicology at Ljubljana University (founded 1961), the institute of musicology at the scientific research centre of the Slovenian Academy of Sciences and Arts (founded 1980), the music collection of the Slovenian National and University Library (founded 1948), Gallus Hall in the Cankarjev Dom cultural centre, where operas and concerts are performed, the Ljubljana Festival, held each summer, and various music societies, notably the Society of Slovenian Composers. The music history of Ljubljana is to a large extent also the music history of Slovenia as a whole. The need to express Slovenian identity stimulated a breadth and a level of musical culture which is on a par with much bigger cities.

BOJAN BUJIĆ/IVAN KLEMENČIČ

Ljungberg, Göta (*b* Sundsvall, 4 Oct 1893; *d* Lidingö, nr Stockholm, 30 June 1955). Swedish soprano. She studied in Stockholm with Gillis Brand, then in Milan and Berlin, making her début in 1917 as Gutrune with the Swedish Royal Opera, where she was engaged until 1926 and was admired for her intelligence, appearance and acting ability. The sensational success of her Covent Garden début in 1924 as Sieglinde led to her engagement at the Berlin Staatsoper. Her later London roles were Salome, Kundry, Tosca, Elisabeth (*Tannhäuser*) and the title role of Goossens's *Judith*, which she created (1929). At the Metropolitan (1932–5), she sang Salome and Wagner heroines, and created Lady Marigold Sandys in Hanson's *Merry Mount* (1934). Ljungberg was visually and vocally ideal as Salome, and her recording of the final scene of Strauss's opera shows the vibrant, clear and sensuous quality of her voice. Her recordings of Sieglinde and Kundry reveal similar vocal and dramatic excitement.

LEO RIEMENS/ALAN BLYTH

Llanas (i Rich), Albert (*b* Barcelona, 7 June 1957). Catalan composer. He studied the flute, the piano and composition at the Barcelona Conservatory and won a prize for special distinction in composition. He furthered his studies with Josep Soler, Lewin-Richter and Donatoni, while maintaining regular contact with Cristóbal Halffter. From the outset Llanas's compositions have won awards, including the European Youth Competition in the Netherlands (1985), the Tribune of Composers from the March Foundation in Madrid (1984, 1986) and the municipal prizes of Barcelona (1987), Girona (1989) and Alcoy (1989). He won the International Composition Competition and International Guitar Prize (both 1990) and the Queen Sofía Composition Prize (1996). He was selected by the ISCM for the World Days Festival (1988) and has been commissioned to compose pieces for the Spanish National Orchestra and other bodies.

Llanas teaches in various centres of Catalonia, specializing in new technologies and acoustics. His compositions reflect his desire to explore and expand the field of composition through the fusion of computer technology and traditional methods.

Lleno (Sp.). *See under* ORGAN STOP (*Compuestas*).

Lleó, (y Balbastre), Vicente (*b* Torrent, Valencia, 19 Nov 1870; *d* Madrid, 27 or 28 Feb 1922). Spanish composer. When he was five his family moved to Valencia, where he became a choirboy at the Real Colegio del Corpus Christi, for whose choir he composed a six-part motet in 1883. He became interested in the zarzuela, and from 1885 his works in that genre were performed in Valencia. In 1890 he moved to Barcelona, where he was a theatre conductor for some years before moving to Madrid in 1896. His first major success there came in 1899 with *Los presupuestos de Villapierde*, and in 1910 he had a huge success with the biblical zarzuela *La corte de faraón*. He also had success adapting foreign works for Spain, among them Giuseppe Mazza's *La prova d'un opera seria* (1845) as the one-act zarzuela *El maestro Campanone* (1903) and Viennese operettas such as Lehár's *Der Graf von Luxemburg* (with a baritone lead). His output of more than 100 works includes revues as well as operas and zarzuelas.

ANDREW LAMB

Llissa, Francisco. Name under which FRANCISCO LLUSSA is found in some sources.

Llobet Soles, Miguel (*b* Barcelona, 18 Oct 1878; *d* Barcelona, 22 Feb 1938). Spanish guitarist, composer and arranger. His uncle brought a guitar home when Llobet was 11; at 14 he was presented by his first teacher, Magín Alegre, to Francisco Tárrega, who accepted him as a pupil. He gave his first series of private concerts in 1898 and his first public appearance was in 1901 at the conservatory in Valencia. He performed in Madrid in 1902 and again in 1903 in front of the royal family. His friend Ricardo Viñes, the noted pianist and Debussy interpreter, presented him in his foreign début, in Paris in 1904. From 1905 to 1910 Llobet gave concerts throughout Europe. He made his South American début in 1910 and set up home temporarily in Buenos Aires, from where he left from time to time on concert tours. Having made his US début in 1912 he continued to tour until the outbreak of World War I, when he returned to America for the duration of the war. After 1930 Llobet settled in Barcelona to teach and give occasional concerts. In 1934 he gave concerts in Vienna, Germany and other parts of western Europe, and a final concert in the USA at the Library of Congress, Washington, DC. He returned to Barcelona at the height of the Spanish Civil War in 1937.

Llobet is given credit for bringing the classical guitar into the modern musical world of international concert tours. He also contributed new works and transcriptions to the repertory and introduced the public to works by Falla, Villa-Lobos, Ponce and others. (Falla wrote *Homenaje pour le tombeau de Claude Debussy* in response to Llobet's persistent requests for a new work for guitar.) In 1925 he made the first electric recordings on the classical guitar.

Llobet's tally of approximately 75 publications includes 13 known original compositions, among them his guitar arrangement of Catalan folk songs, *Diez canciones populares catalanas* (1899–1918); of these the best known, *El mestre* (*c*1900), is harmonically one of the most advanced guitar works of its time and was much admired by Segovia.

RONALD C. PURCELL

Lloyd, A(lbert) L(ancaster) (*b* London, 29 Feb 1908; *d* London, 29 Sept 1982). English ethnomusicologist and folksinger. At the age of 15 he went to Australia as an assisted migrant, working on sheep stations for nine years. There he learnt bush songs from fellow workers and educated himself in music and the arts. Returning to England in the early 1930s, he associated with the left-wing London artistic set and became a founder member of the Artists International Association (1935). Needing money he signed on as a labourer on a factory ship for the 1937–8 Antarctic whaling season. The trip provided few folksongs, as the crew tended to sing hymns and popular hits. On his return he worked as a BBC scriptwriter and as a journalist on *Picture Post*. A self-taught ethnomusicologist, he owed much to the work of Brăiloiu and Katsarova. Influenced by A.L. Morton's *A People's History of England* (1938) he wrote *The Singing Englishman* (1944), a colourful, if largely unsubstantiated, polemical Marxist history of English folksong. From 1950 he worked as a freelance folklorist, concentrating mainly on south-east Europe. During the 1960s he was a visiting lecturer in ethnomusicology at various American and Australian universities. As a folksinger he made numerous recordings of English and Australian song, and was, with Ewan MacColl, one of the architects of the postwar British folk music revival. During the Cold War his Marxist credentials allowed him unique access to Albania, Bulgaria, Romania and their folklore institutes. Here he acquired many recordings of 'peasant' music but failed to acknowledge its subjection to communist cultural management and manipulation. From 1952 he broadcast on radio and television on different aspects of folk music, including virtuosity, polyphony, ritual, epic song, coal mining, and Bartók as a folklorist. His book *Folk Song in England* (1967) attempts to trace 'folksong' development (or erosion) from some idealized agrarian past to the urban industrial present, though is flawed by its scanty historical evidence. He remains an influential, if controversial, figure in British and Australian folk music performance and scholarship.

DAVE ARTHUR

Lloyd, Charles Harford (*b* Thornbury, Glos., 16 Oct 1849; *d* Slough, 16 Oct 1919). English organist and composer. He was educated at Thornbury Grammar School and Rossall School, then went to Magdalen Hall (now Hertford College), Oxford, in October 1868, with an open classical scholarship. He graduated BMus in 1871, BA in theology in 1872, MA in 1875 and DMus in 1892. He helped to found the Oxford University Musical Club, becoming its first president in 1872. In June 1876 he succeeded S.S. Wesley as organist of Gloucester Cathedral, and conducted the Three Choirs Festival at Gloucester in 1877 and 1880. The festival occasioned most of his major works over the next 20 years. While at Gloucester he also conducted the Gloucester Choral Society and the Gloucestershire Philharmonic Society. In September 1882 he returned to Oxford as organist of Christ Church Cathedral and lecturer in music at the college. In the same year he conducted the Oxford Choral Society and the Oxford Symphony Concerts, the latter until 1886. From 1887 to 1892 he taught the organ and composition at the RCM, and became in 1892 precentor and music instructor of Eton College; in 1914 he resigned this post to become organist of the Chapel Royal, St James's.

Although Lloyd enjoyed some success as a composer, notably with his cantata *Hero and Leander*, his real strengths lay elsewhere: as an organ recitalist and extemporizer, as a choirmaster, and as a respected teacher; among his pupils were George Sinclair Robertson, Herbert Brewer, Frederick Kelly, Edward Dent and George Butterworth. Parry, grateful of Lloyd's support during the turbulent first performance of his cantata *Prometheus Unbound* at Gloucester in 1880, wrote his first set of organ chorale preludes for him (published 1912).

Lloyd's music is well written though undistinguished. Stylistically similar to S.S. Wesley's, it lacks Wesley's individuality in the treatment of dissonance. His orchestral writing is effective, as in the opening chorus of *Hero and Leander* and the Wagnerian *The Longbeards' Saga*; the incidental music to *Alcestis* (for men's chorus, flute, clarinet and harp) shows a feeling for vocal and instrumental colour.

STEPHEN BANFIELD/JEREMY DIBBLE

Lloyd, Edward (*b* London, 7 March 1845; *d* Worthing, 31 March 1927). English tenor. The son of the tenor Richard Lloyd (1813–53), he sang in the choir of Westminster Abbey under James Turle. His voice never actually broke but deepened gradually from treble to tenor. In 1866 he joined the chapel choirs of Trinity and King's colleges, Cambridge, but resigned in 1867 to return to London and join the choir of St Andrew's, Wells Street, under Barnby. He became a Gentleman of the Chapel Royal in 1869 for two years, then turned exclusively to concert singing.

Although he sang in Beethoven's Choral Fantasy in 1870, Lloyd's first great success was in Bach's *St Matthew Passion* at Gloucester in 1871, followed by *Acis and Galatea* at the Crystal Palace Handel Festival in 1874. Thereafter he sang in the first performances of many important works. The last of these was the unsuccessful première of Elgar's *The Dream of Gerontius* in 1900, following which he, and the other performers, received unjust criticism from some of Elgar's supporters. His intention to retire had been announced in 1898, but he sang in concerts in London on 12 December 1900 and on 18 October 1902. He also sang at George V's coronation in 1911 and at a benefit concert in 1915. He was the outstanding festival tenor of his day, gifted with a voice of exceptional range and beauty. His repertory included both Wagner, whose music he helped popularize in the concert hall, and popular songs, which he vigorously defended. He also sang in North America and on the Continent. In deference to his wife's wishes, he never appeared on the public theatrical stage. His younger brother Henry was also a tenor. His son E. Turner Lloyd studied the piano with Clara Schumann and singing under F. Walker; in 1897 he taught singing at the Royal Academy of Music.

W.H. HUSK/GEORGE BIDDLECOMBE

Lloyd, George (Walter Selwyn) (*b* St Ives, Cornwall, 28 June 1913; *d* London, 3 July 1998). English composer and conductor. He studied at the Trinity College of Music, where his teachers included Harry Farjeon and William Lovelock. His first success came in 1932 when he conducted his First Symphony with the Penzance Orchestral Society; the work was performed again the following year with the Bournemouth Municipal Orchestra. The Second Symphony (1933) and a canon for orchestra, since destroyed, were heard in Eastbourne in 1934. His father, who had encouraged him to write operas, became his librettist and their opera *Iernin* (1933–4), on a Cornish legend, was produced in Penzance in November 1934. Frank Howes, music critic for *The Times*, hailed the work as 'spontaneous, melodious and dramatic'. The New English Opera Company was established to stage *Iernin* at the Lyceum Theatre, where it ran for three weeks, the third longest run in British operatic history. Impressed by the opera, John Ireland recommended Lloyd's Third Symphony (1933, rev. 1935) to Edward Clark at the BBC, where Lloyd was invited to conduct the work on 29 November 1935. In 1938 the Lloyds' second opera, *The Serf* (1936–8), set during the reign of King Stephen, was performed at Covent Garden and in Liverpool and Glasgow. Here Lloyd's lifelong veneration of Verdi is most apparent. Lyrical and stage worthy, it was well received by the public, but attracted some criticism for its overly traditional libretto.

During World War II, Lloyd served in the Royal Marines as a bandsman. Assigned to an Artic convoy, he was one of only four survivors when his ship's transmitting station was struck by its own malfunctioning torpedo. Suffering from oil ingestion and shell-shock, he was slowly nursed back to health by his wife. While recuperating in Switzerland after the war, he wrote a concert overture for *The Serf* (1946) and his Fourth (1946) and Fifth (1947–8) symphonies. When he returned to London, however, only the overture was accepted by the BBC. Despite this setback, he was one of three composers commissioned by the Arts Council to write an opera for the Festival of Britain. Plagued by a poor production and off-stage rivalries, as well as by Lloyd's physical exhaustion, the opera, *John Socman* (1949–51), was later withdrawn from the Carl Rosa tour.

Leaving London for rural Dorset, Lloyd became a market gardener, continuing to compose in his spare time. Over many years, he accumulated a substantial portfolio of new works. His First Piano Concerto 'Scapegoat' (1963) was given its première by Ogdon in 1964. Later he assisted Ogdon with his own Piano Concerto. It was not until 1973 that he returned to London and full-time composition. With the BBC Northern SO's broadcast of his Eighth Symphony (1961, orchestrated 1965) under Edward Downes in 1977, he began to attract wide public recognition. During the 20 years that followed, he enjoyed a remarkable renaissance, his music, with its wide-spanning lines and traditional tonal harmony becoming for many an icon of anti-modernism. Downes introduced another five of his symphonies and recorded three of them. Lloyd conducted his own Fourth Piano Concerto (1970, orchestrated 1983) at the Royal Festival Hall in 1984, and continued to conduct and record his own

works. When *Royal Parks* (1984) was used as the test piece for the 1985 European Brass Band Championship, a succession of commissions followed. He became associated with the Albany (New York) SO, for which he wrote both the Eleventh (1985) and Twelfth (1989) symphonies. This period also saw the composition of choral music, including *The Vigil of Venus* (1980), *A Symphonic Mass* (1992) and *A Litany* (1995), all characterized by their dramatic treatment and superb ear for choral textures. He continued to compose until his death. Almost all of his works have been recorded.

WORKS

Ops (all librettos by W. Lloyd): Iernin (3), 1933–4, Penzance, Nov 1934; The Serf (3), 1936–8, London, 20 Oct 1938, extracts arr. vn, pf; John Socman (3), 1949–51, Bristol, 15 May 1951

Orch: Sym. no.1, 1932, rev. 1934, 1980; Sym. no.2, 1933, Sym. no.3, 1933, rev. 1935; The Serf, concert ov., 1946; Sym. no.4, 1946; Sym. no.5, 1947–8; John Socman, ov., 1951; Sym. no.6, 1956; Sym. no.7, 1959; Sym. no.8, 1961, orchd 1965; Pf Conc. no.1 'Scapegoat', 1963; Pf Conc. no.2, 1964; Pf Conc. no.3, 1968; Suite Charade, 1969; Sym. no.9, 1969; Pf Conc. no.4, 1970, orchd 1983; Vn Conc. no.2, vn, str, 1977; Sym. no.11, 1985; Sym. no.12, 1989; Le Pont du Gard, 1990; The Dying Tree, 1992; Floating Cloud, 1993; The Serf, 2 orch suites, 1997; Vc Conc., 1998

Wind: Trinidad, march, military band, 1941, orchd 1946, arr. 1990; Vn Conc. no.1, vn, wind, 1970; Sym. no.10 'November Journeys', 1981; Royal Parks, 1984, no.2 'In Memoriam', arr. orch; Diversions on a Bass Theme, 1986; English Heritage, 1987; Forest of Arden, 1987; Evening Song, 1991; King's Messenger, 1993

Vocal: The Vigil of Venus (Pervigilium Veneris), S, T, chorus, orch, 1980; A Sym. Mass, chorus, orch, 1992; A Litany, S, B, chorus, orch, 1995; Ps 130, chorus, 1995; Requiem, Ct, chorus, org, 1998; songs, incl. Wantage Bells (J. Betjeman), We'll Go No More a Roving (G. Byron), Noon on the River (W. Lloyd)

Chbr and solo inst: Lament, Air and Dance, vn, pf, 1975; Sonata, vn, pf, 1976; Miniature Triptych, brass qnt, 1981

Pf: An African Shrine, 1966; Aubade, 2 pf, 1971; The Aggressive Fishes, 1972; The Lily-Leaf and the Grasshopper, 1972; The Road Through Samarkand, 1972, arr. 2 pf, 1995; St Antony and the Bogside Beggar, 1972; Suite 'Transformation of the Naked Ape', 1972; Intercom Baby, 1987; Eventide, 2 pf, 1989

Arr.: Les sylphides, small orch, 1935

Principal publishers: R. Smith, George Lloyd Music Library, UMP, Boosey & Hawkes

Principal recording companies: Lyrita, Conifer, Albany

LEWIS FOREMAN

Lloyd [Floyd, Flude], **John** (*b c*1475; *d* London, 3 April 1523). English or Welsh priest and composer. On 4 January 1499 he requested an allowance from the monastery of Thetford, which passed to William Cornysh upon his death. He was a priest in the Chapel Royal in 1505, but his permanent career as a Gentleman of the Chapel Royal began only about 1509. His will, dated 18 January 1519, includes bequests to churches in Caerleon and Bristol. He was in France at the Field of Cloth of Gold in 1520, after which he made a pilgrimage to the Holy Land. He appears to have returned less than a month before his death. Hawkins described him as a bachelor of music, and the inscription below one of the two puzzle canons by him in the Henry VIII manuscript (ed. in MB, xviii, 1962, 2/1969) reads 'Flude in armonia graduat'; but the year and the university are unknown. Hawkins added that he was buried in the Savoy Chapel and gave the inscription: 'Johannes Floyd virtutis et religionis cultor' with the date of death.

Lloyd almost certainly composed the antiphon *Ave regina* and the Mass *O quam suavis* preserved in a manuscript of the Cambridge University Library (Nn.vi.46). Both works make extensive use of notational puzzles: the Mass (ed. H.B. Collins, London, 1927) plays upon rhythmic transformation of the tenor, while the note-lengths of one voice of the antiphon are determined by the vowels of its apparent text (Thurston Dart's unpublished edition, which broke this code, is in *GB-Lbbc*). The identity of their composer is concealed in an inscription attached to the antiphon: 'Hoc fecit m…es maris', in which a contraction obscures the key word; this was formerly misread as 'iohannes', and 'Johannes Maris' was explicated as 'John of the Sea – Flood – Fludd – Lloyd'. The word is now taken to read 'matres', which seems to be nonsense, but it may be an anagram for 'master' with 'maris' as a riddling designation of the composer as before. Owing to the esoteric nature of the music and its obscure notational presentation, together with the usual requirement of a Mass-antiphon pair for the Cambridge degrees of MusB or MusD after 1515, these pieces may be taken as the composer's Exercise.

The Mass is an artistic production on the highest level. Its lengthy cantus firmus (the antiphon for the *Magnificat* at first Vespers of Corpus Christi) is quoted only twice in the entire work: once in the Gloria and Credo together, and once in the Sanctus and Agnus, a layout also used in Fayrfax's Mass *O quam glorifica*, his Oxford DMus Exercise of 1511. The style is highly florid and melismatic throughout, enlivened by numerous unobtrusive points of imitation. The mass is firmly in the tradition of esoteric academic quadrivial compositions that embraced works by Fayrfax, Ashwell, Aston and Taverner.

JOHN CALDWELL/ROGER BRAY

Lloyd, Jonathan (*b* London, 30 September 1948). English composer. His early studies were with Emile Spira and Edwin Roxburgh as a junior exhibitioner at the RCM, where he later studied with Roxburgh and John Lambert (1966–9). In 1969 he attended classes with Pousseur at Durham, and was awarded the Mendelssohn Scholarship to work in Paris. His *Cantique* (1969) was selected for the SPNM's 30-year retrospective in 1973. During a fellowship to Tanglewood to study with Ligeti (1973) he won the Koussevitsky Prize with *Scattered Ruins*. After a period as a performer and busker he was appointed composer-in-residence at Dartington College theatre department (1978–9). His breakthrough came with *Toward the Whitening Dawn* (1980), a highly original cantata with elements of music theatre written in memory of John Lennon. Its distinctive, postmodern symbiosis of serious and popular idioms has been re-explored in a number of subsequent works: … *and Beyond* (1996), composed for the 30th anniversary of the London Sinfonietta, involved

a similarly unpredictable intermingling of atonal complexity, minimalism and jazz. From the early works such as the Viola Concerto (1979–80) and *Won't it ever be Morning* (1980) to the concertos for flute and violin (both 1995), such stylistic dislocations demostrate Lloyd's capacity to surprise and challenge. The combination of coherent motivic processes, imaginative and often exotic instrumentation and clarity of structure result in a winning communicability underpinned by intellectual rigour. This is especially evident in the five symphonies (1983–9), several of which are arranged for different media: no.2 is a version of the Mass, acclaimed for its refreshing response to familiar liturgy, while no.3, where players are required to hum a plainchant, was reworked as *Revelation*. Lloyd's versatility is also demonstrated by his community opera *The Adjudicator*, written for the village of Blewbury in Oxfordshire, by his bold 1999 adaptation of *The Beggar's Opera*, and by a variety of virtuoso chamber works including the witty *Feuding Fiddles*, featured in the 1986 Almeida Festival.

MALCOLM MILLER

Lloyd, Norman (*b* Potesville, PA, 8 Nov 1909; *d* Greenwich, CT, 30 July 1980). American music educationist and composer. He studied at New York University (BS 1932, MS 1936), and then joined the music faculty of Sarah Lawrence College, Bronxville, New York, where he remained for ten years. There and during summers spent at Bennington College in the 1930s he developed relationships with several established choreographers, among them Hanya Holm, Doris Humphrey, Martha Graham and José Limón, for whom he composed and conducted scores. From 1946 to 1963 he held various positions at the Juilliard School, where he set up a dance department, and, with William Schuman, he designed the Literature and Materials of Music system of teaching theory at Juilliard, a method which focussed on class discussion and the study of actual musical scores rather than textbooks, employed only composers as theory teachers, and integrated the traditionally separate areas of harmony and counterpoint into a single study. In 1963 Lloyd gained the doctorate from Philadelphia Conservatory, and left Juilliard to become dean of the Oberlin College Conservatory, joining the Rockefeller Foundation as director of arts programming two years later; after his retirement in 1972 he continued to act as a private consultant for various foundations and educational institutions.

Lloyd's published compositions include a Piano Sonata (1958) and other works for piano, and several pieces for band and for chorus; much of his music, however, notably the many dance and film scores, remains unpublished. His collections of folksong arrangements, including *The Fireside Book of Favorite American Songs* (1947) and *The Fireside Book of Love Songs* (1954), and the popular *Golden Encyclopedia of Music* (1968) have become standard works in their areas. His manuscripts are held at Boston University.

ELLEN HIGHSTEIN/MICHAEL MECKNA

Lloyd, Robert (*b* Southend-on-Sea, 2 March 1940). English bass. He studied with Otakar Kraus in London, and made an auspicious début in 1969 at the Collegiate Theatre as Don Fernando in *Leonore*. He sang with Sadler's Wells Opera, then in 1972 joined the Royal Opera, Covent Garden, where he has sung more than 60 roles, including Sarastro, the Commendatore, Don Basilio, Philip II, the Landgrave, Heinrich der Vogler, Gurnemanz, Daland, Fasolt, Arkel, Fiesco, Banquo, Ashby (*La fanciulla del West*), Walter Furst (*Guillaume Tell*), Rocco, Sir Giorgio (*I puritani*), Frère Laurent, Philosophe (*Chérubin*) and Ramfis, all of which have displayed his considerable gifts as a singing actor. He has also appeared at Glyndebourne, Aix-en-Provence, Amsterdam, Munich, Madrid, San Francisco and Chicago. In 1991 he sang Gurnemanz at La Scala and the Metropolitan, where he returned (1995/6) as Arkel, Fiesco and Sarastro. His acting ability, fine presence and resonant voice are superbly displayed in the title role of *Boris Godunov*, which he sang in the Tarkovsky production at Covent Garden (1983) and at the Kirov Opera (1990), preserved on video. His many operatic recordings include Osmin, Sarastro, Rossini's Don Basilio, The Grand Inquisitor, Banquo and Bottom. Lloyd is also a distinguished soloist in choral works, his firm tone and authoritative phrasing making him particularly effective in Verdi's Requiem. He was made a CBE in 1991.

ELIZABETH FORBES

Lloyd-Jones, David (Mathias) (*b* London, 19 Nov 1934). English conductor, editor and translator. After reading Russian and German at Oxford University, he studied music privately with Iain Hamilton. As a Russian-language specialist, his first professional engagement was to coach *Boris Godunov* in Russian at Covent Garden in 1959. He assisted John Pritchard in preparing the Royal

Liverpool Philharmonic Orchestra's 'Musica Viva' series in 1960, and became chorus master and assistant conductor of the New Opera Company the same year. In 1963 he began guest engagements with the BBC Welsh Orchestra and other orchestras. He conducted Scottish Opera in his own translation of *Boris Godunov* in 1967 and gave the first British performances of Fauré's *Pénélope* (1970, RAM) and Haydn's *La fedeltà premiata* (1971, Camden Festival). He was engaged by the Welsh National Opera and the Wexford Festival, and made his Covent Garden début with *Boris Godunov* in 1971. The next year he joined Sadler's Wells Opera as assistant to the musical director and conducted, with conspicuous success, the first British stage performances of Prokofiev's *War and Peace*. For ENO he conducted the première of Hamilton's *The Royal Hunt of the Sun* in 1977.

Lloyd-Jones was appointed music director of Opera North (initially ENO North) on its foundation in Leeds (1977), and when it became independent of the ENO was its artistic director (1981–90). During this time he conducted 50 productions for the company, including the première of Wilfred Joseph's *Rebecca* (1983), the first British stage productions of Krenek's *Jonny spielt auf* (1984) and Strauss's *Daphne* (1987), *Boris* on tour in Dortmund and *The Love for Three Oranges* at the Edinburgh Festival (1989). He was responsible for establishing a sound musical basis for the company, and providing an enterprising variety of productions; he was also founder-director of the English Northern Philharmonia. He has worked widely in Europe, North and South America and Israel, and in Britain has conducted much opera for television. He received an honorary MusD from Leeds University in 1985, and in 1989 was appointed director of the opera course at the GSM. He has prepared important critical editions of *Boris Godunov* and *Prince Igor*, as well as *The Gondoliers* and Berlioz's *L'enfance du Christ*. His translations include *The Love for Three Oranges*, *Yevgeny Onegin* and Rachmaninoff's *Francesca da Rimini*. He made the first recordings of Musorgsky's *Night on the Bare Mountain* in its original version, and has also recorded much British music, including works by Constant Lambert, Delius and Bax. His versatility and authority in performance are combined with stylistic feeling and scholarship and, in opera, a belief in lyrical qualities and verbal clarity.

ARTHUR JACOBS/NOËL GOODWIN

Lloyd Webber. English family of composers and musicians.

(1) William (Southcombe) Lloyd Webber (*b* London, 11 March 1914; *d* London, 29 Oct 1982). Composer and organist. By the age of 14 he was well known as an organ recitalist. He won an organ scholarship to Mercer's School and subsequently to the RCM (FRCO 1933), where his teachers included Vaughan Williams, among others. Although World War II interrupted his compositional development, the conclusion of the war marked the beginning of his most prolific years. His works from 1945 to the mid-1950s include the oratorio *St Francis of Assisi* (1948), the orchestral tone poem *Aurora* (1951) and the Sonatina for viola and piano (1951). Writing in a style firmly embedded in the Romanticism of such composers as Rachmaninoff, Sibelius and Franck, he became more and more convinced that his music was 'out of step' with the prevailing climate of the time. Rather than compromise his approach, he virtually stopped composing, turning instead to academic music. He taught at the RCM and in 1964 became director of the London College of Music. Shortly before his death, a sudden flourish of creativity produced the *Missa sanctae Mariae Magdalenae* (1979), among other works.

WORKS
(*selective list*)

Fantasy Trio, pf trio, 1936; Lento, str orch, 1939; Sonatina, fl, pf, 1940; St Francis of Assisi (orat, D, Pleydell-Bouverie, A. (2) Andrew Lloyd Webber [Lloyd-Webber; Lord Lloyd-Webber of Sydmonton] (*b* London, 22 March 1948). Composer and producer, son of (1) William Lloyd Webber.

1. Life and works. 2. Style.

1. LIFE AND WORKS. He was educated at Westminster School and the RCM. From an early age he wrote incidental music for shows with his toy theatre; at Westminster he wrote music for school revues. In the April of 1965 he met the lyricist TIM RICE with whom he wrote the unperformed musical *The Likes of Us* and some pop songs. Their first success came with the commission to write a choral work for Colet Court School; the resulting pop cantata, *Joseph and the Amazing Technicolor Dreamcoat*, was gradually extended to a full-length show and has become a constant of both amateur and professional repertories. They released the concept album for *Jesus Christ Superstar* (1970), which became one of the bestselling albums of that time in both the UK and USA; it was then developed for stage and opened in New York (1971). After the failure of the book musical *Jeeves* (1975), Lloyd Webber decided that in future works the music would lead the plot and consequently, apart from the revision *By Jeeves* (1996), has not yet returned wholly to book musicals. Also as a result of *Jeeves*, he began the annual Sydmonton Festival at his Berkshire home, Sydmonton Court, in order to test future ideas more fully before staging them commercially. In 1976 a concept album was released for *Evita*, a musical based on the life of Eva Peron, and all his works since have been given workshop performances at Sydmonton. In 1977 he first presented at Sydmonton his Variations for solo cello and rock band, written for his brother (3) Julian. Recorded in 1978, it also provided for many years the signature tune to London Weekend Television's long running 'The South Bank Show'. In the same year *Evita* was staged in London and marked the last major collaboration between Rice and Lloyd Webber; a virtual compendium of their styles, it has achieved wide acclaim and remains one of Lloyd Webber's most dynamic scores.

He began collaborating with lyricists other than Rice, notably with DON BLACK for the dramatic sequence of songs *Tell me on a Sunday* (1979) and later for *Phantom*

of the Opera and *Sunset Boulevard*. Along with Variations, this work was combined into the successful *Song and Dance* (1982). The adaption of T.S. Eliot's poetry for *Cats* (1981) was an unexpected international success, and produced the now standard ballad 'Memory'. His next musical, *Starlight Express*, a collaboration with the writer Richard Stilgoe, gained a popularity in part associated with the dramatic and technological staging that has become a hallmark of many of his shows. He divorced his first wife in September 1983, and the following year married the soprano Sarah Brightman, who sang the soprano solo for the première of his Requiem, with its hit single 'Pie Jesu'. In *The Phantom of the Opera* (1986) Brightman created the role of Christine, written to exploit her individual light soprano sound. They were divorced in November 1990.

In 1993 he opened a musical version of the classic film *Sunset Boulevard* in London, choosing Los Angeles rather than New York for its American première. The planned Broadway opening of *Whistle Down the Wind* was cancelled after its Washington, DC, previews (1996), but the show was revised for the West End (1998). The cover version of its song 'No Matter What' by the pop group Boyzone was a number one chart success, and a complete album of cover versions of further songs from the show by established performers such as Tom Jones, Sounds of Blackness and Meatloaf was also released. Lloyd Webber formed these strong links between studio recording and stage with his first works: the concept albums of *Jesus Christ Superstar* (1970) and *Evita* (1976) were released before staging, and the creation of advance public and commercial interest has continued with nearly all of his later shows, most noticeably with single releases including 'Love changes everything' (*Aspects of Love*) sung by Michael Ball.

In 1977, in a move to retain both artistic and managerial control over his and Rice's works, the Really Useful Company was founded. As successive works achieved commercial success, Lloyd Webber bought the Palace Theatre in the West End (1983) and in January 1986 the increasingly powerful company was floated as the Really Useful Group on the London Stock Exchange, an indication of the growing global importance of the organization (London VII, 6 (iii)). Bought back into the private control of Lloyd Webber in 1990 (but not bought back outright until 1999), the company's interests extended to continental theatres dedicated to performances of Lloyd Webber musicals, such as that at Bochum, Germany, for *Starlight Express* and licensed productions of *Cats* and *Phantom of the Opera* in Hamburg. Along with the producer Cameron Mackintosh, with whom Lloyd Webber has sometimes collaborated, and the marketing strategies of the Really Useful Group, he has led the development of a world market in 'mega-musicals', and productions of *Cats*, *Phantom of the Opera* and *Aspects of Love* have run simultaneously in London and on Broadway. Through the record-breaking length of runs of his musicals, many now exceeding a decade, Lloyd Webber has been responsible for raising the cultural and commercial profile of the musical worldwide through the 1980s and 90s.

He was awarded an FRCM (1988), a knighthood for services to the arts (1992) and a life peerage (1997). He received the Richard Rodgers Award for Excellence in Musical Theatre (1996), and has gained six Tony awards, five Olivier awards, three Grammy awards (including that of Best Classical Composition for *Requiem*, 1986) and, along with Rice, an Academy Award (1997) for the song 'You must love me', written for the film version of *Evita* (1996).

2. Style. The long periods of development and frequent overlapping of projects, along with the regular recycling of previously discarded material, blunts any clear demarcation between different stages in Lloyd Webber's style. Certain features have remained constant. His use of familiar styles has been particularly effective in creating the sense of an individual sound world for each of his shows, for example *Phantom of the Opera* uses opera, while the contrasts between angular and aggressive rock-based sections in *Evita* and *Cats* are far removed from the film-style brooding opening of *Sunset Boulevard*. Although his early rock opera successes of *Jesus Christ Superstar* and *Evita* are essentially episodic in their construction, Lloyd Webber has concentrated on developing the sung-through narrative musical. Recitative and arioso sections are effectively used in *Phantom* but reach their most laboured in *Aspects of Love*, where repeating motifs often contribute more to the musical character rather than a precise highlighting of dramatic moments. With subsequent works he has included a more clearly defined structure and spoken narrative.

Lloyd Webber has consistently drawn on three main elements: pastiche, the rock riff and the lyric ballad. *Joseph and the Amazing Technicolor Dreamcoat* established the role of pastiche as a major stylistic feature through such numbers as the French chanson 'Those Canaan Days', the 'Benjamin Calypso' and the Elvis Presley-inspired rock and roll number, 'Song of the King'. Later examples have ranged through ragtime ('King Herod's Song', *Jesus Christ Superstar*), country and western ('U.N.C.O.U.P.L.E.D.', *Starlight Express*) and gospel hymnody ('The Vaults of Heaven', *Whistle Down the Wind*). Beyond these examples of deliberate pastiche, Lloyd Webber has demonstrated a consistent ability to embrace popular and classical music vocabularies, recombining their elements to create remarkably popular works. The blurring of these boundaries has sometimes led to melodies with an apparent pre-existing familiarity: 'I don't know how to love him' (*Jesus Christ Superstar*) has a melodic profile similar to the second movement of Mendelssohn's Violin Concerto, while 'On this Night of a Thousand Stars' (*Evita*) is reminiscent of Louigy's *Cherry Pink and Apple Blossom White*. Whether these similarities are conscious reworkings or simply the constant absorption of a wide range of musical sources into an already eclectic style has aroused some debate (Walsh, 13–14; Coveney, 197–200).

The riff-based element of his style draws on a strong melodic motive underpinned by equally affirmative chord sequences, further defined by a rhythmic pattern which is also subject to intense repetition rather than development: the early title chorus of *Jesus Christ Superstar*, 'Love's Maze' (*By Jeeves*) and *Hosanna* from the Requiem are striking examples of this. This technique is at its most effective when developed, as with the displacements of melodic and rhythmic cells across the bar-line in 'Take that look off your face' (*Tell me on a Sunday*). The Variations (1977) uses the theme of Paganini's A minor caprice and redefines its formal construction in terms of the rock riff, notably in Variation no.7. A fondness for

introducing irregular metres into these repetitive sequences, particularly 7/8 as in 'And the money kept rolling in (and out)' (*Evita*) also adds to their memorability.

Lloyd Webber's ballads point to a fundamental lyricism that runs through all his works. Early examples used the limited vocal range of the pop song ('Close ev'ry door', *Joseph and the Amazing Technicolor Dreamcoat*), but he gradually adopted a wider melodic range, in *Cats* drawing on the upper extremes of both the musical theatre 'belt voice' in 'Memory' and the vernacular ballad singer in 'The Ballad of Billy McCaw'. With *Phantom of the Opera* he used a more expansive lyricism suited to the operatic setting, as in the wide melodic leaps of the romantic duet 'All I Ask of You', the Puccini-influenced ensemble 'Prima Donna' and 'Music of the Night', which exploits the drama of vocal extremes for a single voice. Although frequently heard outside their original contexts, Lloyd Webber's ballads have been particularly effective when allied to strong dramatic moments, as with 'High Flying Adored' (*Evita*), 'Memory' (*Cats*) and 'With One Look' (*Sunset Boulevard*). Throughout, such numbers have tended to retain simple structural forms, from 'Any dream will do' (*Joseph and the Amazing Technicolor Dreamcoat*) to 'Too Much in Love to Care' (*Sunset Boulevard*), some 25 years later. Such structural familiarity, however, allied to an innate sense of the melodically memorable account for much of Lloyd Webber's lasting popular appeal.

WORKS

DRAMATIC

unless otherwise stated, all are stage musicals and dates are those of first London performance; where different, writers shown as (lyricist; book author); vocal selections for most published at time of first London performance

Joseph and the Amazing Technicolor Dreamcoat (cant., 1, T. Rice, after Bible: *Genesis*), orchd Lloyd Webber, Colet Court School, 1 March 1968; rev. 1968 [for recording]; rev. 21 Aug 1972, Edinburgh [in *Bible One: Two Looks at the Book of Genesis*]; rev. (2) orchd D. Cullen and Lloyd Webber, London, Albery, 17 Feb 1973; [incl. Any dream will do, Close ev'ry door]

Jesus Christ Superstar (op, 2, Rice, after Bible: *Gospels*), orchd Lloyd Webber, discs, MKPS 2011–2 (MCA, 1970) [incl. Heaven on their Minds, Herod's Song, I don't know how to love him]; rev. New York, Mark Hellinger, orchd Lloyd Webber, 12 Oct 1971; film 1973

Jeeves (2, A. Ayckbourn, after P.G. Wodehouse), orchd D. Walker, Lloyd Webber, K. Amos and Cullen, Her Majesty's, 22 April 1975; rev. as By Jeeves, Duke of York's, 2 July 1996

Evita (op, 2, Rice), orchd Lloyd Webber, discs, MCX 55031–2 (MCA, 1976) [incl. Another Suitcase in Another Hall, Don't cry for me, Argentina, High Flying Adored, Oh What a Circus]; rev. 1978, orchd H. Kay, Prince Edward, 21 June 1978; film 1996 [incl. You must love me]

Tell me on a Sunday (D. Black), Royalty Theatre, Jan 1980 [incl. Take that look off your face, Tell me on a Sunday]; rev. as Song and Dance, Palace, 26 March 1982 [with Variations; see OTHER WORKS]

Cats (2, T.S. Eliot, addl lyrics by R. Stilgoe and T. Nunn, after Eliot: *Old Possum's Book of Practical Cats*), orchd D. Cullen and Lloyd Webber, New London, 11 May 1981 [incl. Memory]

Starlight Express (2, Stilgoe), orchd Cullen and Lloyd Webber, Apollo Victoria, 27 March 1984; rev. 1992

Cricket (1, Rice), private perf., Windsor Castle, 18 June 1986

The Phantom of the Opera (prol, 2, C. Hart and Stilgoe; Lloyd Webber and Stilgoe, after G. Leroux), orchd Cullen and Lloyd Webber, Her Majesty's, 9 Oct 1986 [incl. All I Ask of You, Music of the Night, The Phantom of the Opera, Wishing You Were Somehow Here Again]

Aspects of Love (2, Black and Hart; Lloyd Webber, after D. Garnett), orchd Cullen and Lloyd Webber, Prince of Wales, 17 April 1989 [incl. Love changes everything]

Sunset Boulevard (2, Black and C. Hampton), orchd Cullen and Lloyd Webber, Adelphi, 12 July 1993 [after film; incl. As if We Never Said Goodbye, Too Much in Love to Care, With One Look]

Whistle Down the Wind (2, J. Steinman; P. Knop, G. Edwards and Lloyd Webber, after M. Hayley Bell), orchd Cullen and Lloyd Webber, Aldwych, 1 July 1998 [incl. No Matter What]

OTHER WORKS

Film scores: Gumshoe, 1971; The Odessa File, 1974

Orch: Variations, vc, rock band, 1977, rev. Cullen, vc, orch, 1978; Requiem, orchd Cullen and Lloyd Webber, boy S, S, T, SATB, orch, New York, St Thomas's Episcopal Church, 24 Feb 1985

Individual popular songs, incl. Down Thru' Summer (Rice), 1967; Probably on Thursday (Rice), 1967; Believe me I will (Rice), 1968; What a line to go out on (Rice), 1972; Christmas Dream (Rice), 1974; It's easy for you (Rice), 1977; Magadalena (Rice), 1977; Amigos para siempre (Black), 1994 [anthem for Barcelona Olympic Games]

(3) Julian Lloyd Webber (*b* London, 14 April 1951). Cellist, son of (1) William Lloyd Webber. He studied with Douglas Cameron, Joan Dickson and Harvey Phillips at the RCM and Fournier in Geneva. He made his London recital début in 1971 and his concerto début the following year with the first London performance of Bliss's Cello Concerto, of which he subsequently made the first recording. Lloyd Webber has appeared widely as a soloist in Britain and abroad and has given many premières, including Rodrigo's *Concierto como un Divertimento* (1982), Arnold's Fantasy for Cello (1987) and Cello Concerto (1989), and Gavin Bryars's *Farewell to Philosophy* (1995), of which he is also the dedicatee. He was appointed professor of the cello at the GSM, London, in 1978, and was artistic director of Cellothon 88 at the South Bank in 1988. Lloyd Webber is known for his exploratory approach to repertory, introducing many neglected masterpieces into his programmes and recording his brother Andrew's *Variations* for cello and rock band. He has also made numerous recordings, of which several, including Bridge's *Oration*, are world premières. His skilful control of the instrument and well-focussed, mellow tone are allied to an acute sense of style. He plays the 'Barjansky' Stradivarius dated *c*1690. He has written *Travels with my Cello* (London, 1984).

CALLUM ROSS (1), JOHN SNELSON (2), MARGARET CAMPBELL (3)

Llull, Ramon [Ramón] [Lull, Raymond; Lullus, Raymondus] (*b c*1232; *d c*1316). Mallorcan theologian and mystic. According to his *Vida*, Llull became seneschal to the king of Mallorca, and was a devotee of troubadour lyrics before his 'conversion to penitence'. He did not leave an extended discussion of music as a liberal art, however, there are brief references to music among his many theological and literary works.

In his *Ars brevis* Llull defined music as 'the art devised to arrange many voices so that they may be concordant in a single song', a definition he used in other works. The treatment of his *Ars generalis ultima* considers music from the standpoint of his unusal theory of cognition. More typical of his writing is the passage in his *Libre de doctrina pueril*, 'De les vii arts', which compares the clergy singing in praise of God with minstrels expressing worldly vanity in songs and on instruments. He put great stress on reforming worldly entertainment into morally improving works, and proposed the idea of divine troubadours in two works, *Libre de contemplació* and *Libre de Blaquerna*; he may have been influenced in this by the Franciscan idea of the holy minstrel. It is clear that he was aware of the power of oral transmission (as in the joglar's art) to spread ideas. The parallels drawn between music and rhetoric in his *Libre de contemplació* are worthy of note.

A modern Catalan composer, Xavier Benguerel Godó (*b* 1931), has set texts by Llull.

ANDREW HUGHES/RANDALL ROSENFELD

Llussa, Francisco (*fl* 1687–1738). Spanish composer and organist; he is erroneously called Llissa in some sources. According to a document in the Barcelona municipal archives (transcribed in *AnM*, ii, 1947, pp.203–16), he requested retirement in 1738 at an advanced age after serving as organist and priest at S María del Pino from 1687. His known works, all for organ, are found in four manuscripts at Barcelona and Astorga. *E-Bc* M.729 and M.736 contain settings in from two to four parts of hymns that were traditional favourites with Spanish organists, *Pange lingua* and *Sacris solemniis*. These retain the cantus firmus in various voices and surround it with animated figures, at times in close imitation. Three brief Sanctus versets are extant (*E-Boc* 12, ed. F. Pedrell, *Antología de organistas clasicos españoles*, ii, Madrid, 1908, 2/1968, and J. Muset, *Early Spanish Organ Music*, New York, 1948). Llussa's only long composition is a tiento in a manuscript discovered in the late 1960s (*E-AS*; ed. J.M. Alvarez Perez, *Colección de obras de órgano de organistas españoles del siglo XVII*, Madrid, 1970). Though written for divided register with the left hand as soloist, it is more consistently contrapuntal than is usual with works of this type and maintains a single subject through several rhythmic transformations.

ALMONTE HOWELL

Loaysa y Agurto, Joseph de. *See* AGURTO Y LOAYSA, JOSEPH DE.

Łobaczewska [Gérard de Festenburg], **Stefania** (*b* Lwów, 31 July 1888; *d* Kraków, 16 Jan 1963). Polish musicologist. She studied the piano with V. Kurc at Lwów Conservatory and musicology with Guido Adler in Vienna and Adolf Chybiński in Lwów (1914–18). In 1929 she took the doctorate at Lwów University with a dissertation on Debussy's harmony; in 1949 she completed the *Habilitation* at Poznań with a work on Szymanowski. She taught theoretical subjects at the Szymanowski School of Music in Lwów (1931–9) and at Lwów Conservatory (1940–41). From 1945 she lived in Kraków, where she was professor, dean and finally rector of the State Higher School of Music until 1955. From 1952 until her death she was also head of the musicology department at Kraków University.

Łobaczewska's activity as a scholar concentrated chiefly on 20th-century music; her monumental biography of Szymanowski remains an important work on the composer. She was also interested in stylistic problems and in the last years of her life she began a voluminous work dealing broadly with this subject. She also edited *Dokumentacja warszawskiego okresu życia i twórczości Fryderyka Chopina*.

ZYGMUNT M. SZWEYKOWSKI

Lobanov, Vasily Pavlovich (*b* Moscow, 2 Jan 1947). Russian composer and pianist. He received his musical education at the Moscow Conservatory in two areas of specialization: composition (Balasanian and Schnittke) and piano (Naumov). In the 1970s he began a busy career as a soloist and ensemble player; he has been a member of a piano trio with Oleg Kagan and Natal'ya Gutman (1977–90), has played piano duets with Sviatoslav Richter (1982–4) and has also played in ensembles with Kremer and Bashmet. Since 1990 he has lived in Germany and in 1997 was appointed professor of piano at the Cologne Hochschule für Musik. He has appeared at many international festivals and headed international workshops on composition, piano and chamber music in Russia, Germany, Japan, Finland, Austria, Chile and

other countries. In 1997 he was appointed Artistic Director of the Kammermusiktage Osnabrück festival.

Continual contact with the international musical repertory has left its stamp on the way Lobanov thinks as a composer. His thinking is universal by its very nature: 'I am firmly convinced that a composer is only a medium, an intermediary between the Cosmos, God and Humankind, an intermediary between eternity and history, life and creativity. It is precisely on this boundary that art occurs.' This explains the breadth of themes and genres that are so typical of him, his freedom in using extra-musical associations, his predilection for 'eternal' subjects (the operas *Antigone* after Sophocles and *Father Sergius* after Leo Tolstoy), and the non-standard treatment of seemingly traditional performing forces. Equally as universal is Lobanov's musical language, which, despite the variety of stylistic influences (from Bach and Mahler to Rachmaninoff and Messiaen), is notable for its strict unity and consistency. Tonal coloration and clear-cut metrical organization of the minimalist type are combined with static meditation, which, quite unlike that in mainstream minimalism, is punctuated with sudden dramatic impulses.

WORKS

Stage: Antigone (op, 3, after Sophocles), op.51, 1985–7; Vater Sergius (op, 4 scenes, after L. Tolstoy), op.57, 1990

TAT'YANA FRUMKIS

Lobback, G. Christian (*b* Hamburg, 20 Sept 1938). German organ builder. He served his apprenticeship with E. Kemper & Son of Lübeck (1958–61), then worked freelance for two years in Ludwigsburg and Brackwede, with the firms of E.F. Walcker and Detlef Kleuger respectively. He set up his own organ workshop in Wedel in 1964, and he moved to Neuendeich in 1981.

Lobback builds organs which have slider-chests and mechanical key actions. Each is individually designed in a contemporary style that does not refer to particular historical concepts. Organs built by him include Ss Peter und Paul, Garrel (1980); Herz-Jesu, Bremerhaven-Lehe (1981); St Antonius von Padua, Rheine (1984); St Gertrud, Lohne (1985); and St Augustinus, Hanover (1991). Lobback has also undertaken restorations of instruments with mechanical and tubular-pneumatic actions, of which the best known is the reconditioning of the Jahnn organ at the Heinrich-Hertz-Schule in Hamburg (built 1926–31, restored 1990–91).

UWE PAPE

Lobe, Johann Christian (*b* Weimar, 30 May 1797; *d* Leipzig, 27 July 1881). German writer on music, composer and flautist. He received his first flute lessons at the age of seven, and scored his first successes as a virtuoso between 1808 and 1811, the year he joined the Weimar Hofkapelle. He made intensive studies of dramatic and musical theory and early attempts at composition until 1819, and subsequently produced five operas (of which *Die Fürstin von Grenada* was conspicuously successful) and nearly 40 instrumental works. Because of the absence of enduring success and increasing financial difficulties, he largely gave up composing around 1840 and founded a private music institute. Pensioned off from Weimar in 1845, he was appointed professor and moved to Leipzig in 1846, where he became editor of the *Allgemeine musikalische Zeitung*. From 1853 to 1857 he edited his own series, *Fliegende Blätter für Musik*, and later (1861–3) the musical section of the *Illustrirte Zeitung*. Lobe became well known through his theoretical and aesthetic writings. His *Compositions-Lehre*, a systematic treatise about thematic and motivic work, appeared in 1844. His most important works are the four volume *Lehrbuch der Komposition* and the *Katechismus der Musik*, which enjoyed international popularity. Author of numerous essays, Lobe was concerned with questions about the creative process, musical education and style. Critical of Romanticism and its free poetic description of music, he tried to establish a theory of emotive meaning based on 18th-century rationalism and the aesthetics of Weimar classicism. While holding to the model of Mozart and Beethoven, he nonetheless supported Berlioz and Liszt, though he objected to Wagner's writings.

WORKS

STAGE

all first produced at Weimar, Hoftheater

Wittekind, Herzog von Sachsen (op, 3, J.C. Lobe), 1818–21, perf. 5 Jan 1822, lib (Weimar, 1821)

Die Flibustier (op, 3, E. Gehe, after C.F. van der Velde), 1825–6, perf. 5 Sept 1829, vs (Leipzig, *c*1831)

Die Fürstin von Grenada, oder Der Zauberblick (op, 5, Lobe and P.C.C. Sonderhausen), ?1830–33, perf. 28 Sept 1833, fs (Paris and Mainz, 1834)

Der rothe Domino (comic op, 2, Theophania [Fr. von Langen], after H. Zschokke: *Das Abenteuer einer Neujahrsnacht*), ?1836–7, perf. 22 April 1837, lib (Weimar, 1837)

König und Pachter (comic op, 4, F.L.C. von Biedenfeld, after *Karl der XII. auf Rügen*), ?1843–4, perf. 24 June 1844, *D-WRdn*

INSTRUMENTAL

Orch: Fl Conc., G, op.1 (Leipzig, 1819); Concertino, fl, orch, e, op.21 (Leipzig, 1831); Ov., 'Les charmes du vogage', B, op.26 (Dresden, 1833); other ovs., pieces for fl and orch

Chbr: Pf qt, E♭, op.2 (Leipzig, 1823); Pf qt, d, op.9 (Leipzig, 1824); Str qnt, A, op.35 (Mainz, 1840); other chbr works, pieces for pf, fl, etc.

TORSTEN BRANDT

Lobel', Solomon Moiseyevich (*b* Iaşi, Romania, 14/27 Jan 1910; *d* Kishinev [Chişinău], 2 April 1981). Moldovan composer. He studied at the Iaşi Conservatory (1931–7) while involved in the underground activities of the Romanian Communist Party. He then studied composition with Jora and the piano with Musicescu at the Bucharest Academy of Music (1938–9). When Bessarabia became part of the USSR in 1940, Lobel' moved for political reasons to Kishinev where he entered the conservatory, graduating in 1949 from Gurov's composition class. After serving in the Soviet army (1941–5) he joined the staff of the Kishinev Conservatory (1949–81, in 1962 appointed assistant professor and in 1980 professor) and became one of the most significant composition teachers in Moldova. He joined the USSR Composers' Union in 1950. He was made an Honoured Representative of the Arts in 1960 and received many other official awards. His output is largely instrumental and while the influence of 19th-century Russian composers dominates in early works, neo-classical traits appear in his compositions of the 1960s and 70s; Moldovan folklore plays an important role in his creative work.

Lobkowitz [Lobkowicz, Lobkovic]. Bohemian noble family of patrons of music. The genealogy of the family, notable for its patronage of the arts, particularly music, may be traced back to the middle of the 14th century. Ferdinand August Lobkowitz (1655–1715) was an amateur lutenist and guitarist. His sons (1) Philipp Hyacinth Lobkowitz and Johann Georg Christian (Jan Jiří Kristián) Lobkowitz (1686–1755) both played important roles in Gluck's early development, the latter, as Austrian governor of Milan, receiving the dedications of his *Arsace* (1743), *La Sofonisba* (1744) and *Ippolito* (1745). Of Johann Georg Christian's children, Joseph Maria Karl (Josef Maria Karel) Lobkowitz (1725–1802) maintained a private orchestra in St Petersburg, where he was Austrian minister plenipotentiary to the Russian court; and August Anton Joseph (August Antonín Josef) Lobkowitz (1729–1803) was the family's most prominent patron of the Loreto church at Hradčany in Prague (founded in 1626 by Benigna Katharina von Lobkowitz), where the family maintained both a vocal and an instrumental ensemble.

(1) **Philipp Hyacinth** [Filipp Hyacint] **Lobkowitz** (*b* Neustadt an der Waldnab, 25 Feb 1680; *d* Vienna, 21 Dec 1734). Lutenist and composer, son of Ferdinand August Lobkowitz. He was a friend of the famous lutenist S.L. Weiss. On his extensive tours of England, France and Italy he bought large quantities of music, including lute music, and the first London editions of Handel's works. He was also responsible for the largest musical foundation in Prague in the 18th century, the musicians attached to the Loreto church. In 1727 Gluck's father became his head forester at Eisenberg (now Jezeří) and about 1735–6 Gluck started his career at private concerts at the Lobkowitz-Althan family's palace in Vienna, where Philipp Hyacinth lived from 1729. A suite in B♭ by him survives in the Nationalbibliothek, Vienna

(2) **Ferdinand Philipp Joseph** [Ferdinand Filipp Josef] **Lobkowitz** (*b* Prague, 27 April 1724; *d* Vienna, 11 Jan 1784). Composer, third son of (1) Philipp Hyacinth Lobkowitz. He was the ruling prince at Vienna from 1743 and came to be known as 'a very learned prince whose profound knowledge embraced the most diverse sciences'. He studied the violin with Gluck, who was his employee, and in 1745 he took Gluck on a tour of Italy and London. While in Berlin during the 1750s he became a member of the Berlin Academy of Sciences and studied the violin with Franz Benda. Burney wrote an account of the impromptu composition of a symphony by him and C.P.E. Bach, each writing alternate bars. His works, which were highly appreciated by Burney in Vienna in 1772, are apparently lost.

(3) **Joseph Franz Maximilian** [Josef Frantisek Maximilián] **Lobkowitz** (*b* Roudnice nad Labem, 7 Dec 1772; *d* Třeboň, 15 Dec 1816). Patron and bass singer, son of (2) Ferdinand Philipp Joseph Lobkowitz. He was the first Duke of Roudnice and the foremost patron of the arts in Vienna and Bohemia from his coming of age in 1797 until 1814. The Lobkowitz accounts record vast sums paid for art, books, musical instruments, and music scores. He also granted several artists annual pensions, the most famous of these being Beethoven. Beginning in 1796 or 1797 he hired a small orchestra which accompanied him on his travels and he had several operas performed every year at his seats in Vienna, Roudnice and Eisenberg (now Jezeři). He hired several copyists' workshops to make hundreds of copies of the works of Mozart, Haydn, Beethoven and other composers and substantially enlarged the family music archives. In 1799 he converted the largest hall in his Vienna palace into a concert hall with a stage for 24 orchestra players and upholstered benches for the audience. His support of opera and theatre was prodigious: in 1809 he gave the Vienna Court Opera 20,576 florins and in 1811 a similar amount was paid to the Kärntnertortheater. In 1810 it is reported that his expenditures totalled 1.5 million florins. His extravagant support of the arts threatened to destroy the family fortune. In June 1813 his estates were put under a "friendly administration" and in July 1814 under state control, thereby ending his tenure as Vienna's most generous patron. He died two years later at the age of 44.

He was a bass singer, performing in Handel's *Alexander's Feast* at Vienna (3 December 1812), and played both the violin and the cello. A member of the association of noblemen responsible for the direction of the Vienna court theatres from January 1807, he later had the sole direction of the opera for several years and led the Hoftheater-Musik-Verlag. He was one of the founders of the Gesellschaft der Musikfreunde in Vienna and of the Jednota pro Zvelebení Hudhy v Čechách (Association for the Promotion of Music in Bohemia), which began the Prague Conservatory in 1810–11.

As a musical patron he supported principally Beethoven and Haydn. Haydn assisted Lobkowitz with his house concerts as early as 1793. Lobkowitz commissioned Haydn's string quartets op.77 and was also one of the sponsors of *The Creation* and *The Seasons*, performing the former with his private orchestra in Italian (1801) and Czech (1805) and singing the bass part in the Czech performance. His music collection contains many of Haydn's late masses and other vocal works in authentic copies.

Lobkowitz's first recorded contact with Beethoven also dates from a concert in 1793. He subscribed to Beethoven's op.1 trios in 1795 and continued to support the composer by purchasing multiple copies of his new works. In May and June 1804 Lobkowitz put his private orchestra at Beethoven's disposal for rehearsals of the Eroica Symphony; in October he authorized a payment of 700 florins to Beethoven for the dedication of the symphony. In 1809 he joined Prince Kinsky and the Archduke Rudolf in putting up an annuity for Beethoven, the sole stipulation being that the composer should stay in Austria. (Beethoven also believed, though it was not specified in the contract, that the agreement gave him access to Lobkowitz's orchestra.) Beethoven dedicated several of his works to him (the op.18 quartets, the Eroica Symphony, the Triple Concerto, the Fifth and Sixth Symphonies, the 'Harp' String Quartet op.74 and the song cycle *An die ferne Geliebte*). Though relations between the two were sometimes strained (Beethoven once ridiculed his patron's intelligence by calling him "Prince Fizlypulzy" and on another occasion called him a "Lobkowitzian Jackass"), Beethoven expressed regret in 1816 that the prince died before he could dedicate his song cycle to him. The annuity from the Lobkowitz estate was paid until Beethoven's own death in 1827.

(4) **Ferdinand Joseph Johann** [Ferdinand Josef Jan] **Lobkowitz** (*b* Oberhollabrunn, Lower Austria, 13 April 1797; *d* Vienna, 18 Dec 1868). Patron, son of (3) Joseph Franz Maximilian Lobkowitz. He maintained a private orchestra until about the 1860s, with Josef Cartellieri as Kapellmeister; in addition he had a special hunting band. He was a patron of Adalbert Gyrowetz. In 1831 he organized a private music school at Eisenberg for the promotion of church music and musical education in the country.

Several later members of the family also included music among their interests. Moritz (Mořic) Lobkowitz (1831–1903), the son of (4) F.J.J. Lobkowitz, was a pianist, and enlarged the family's music collection. Ferdinand Georg August Lobkowitz (1850–1926), a grandson of (3) J.F.M. Lobkowitz and nephew of (4) F.J.J. Lobkowitz, was the president of the Jednota pro Zvelebení Hudby v Čechách (Association for the Promotion of Music in Bohemia) from 1885 to 1909, and is credited with the development of the Prague Conservatory and the smooth transfer of that institution to state control in 1918–19. Ferdinand Joseph Lobkowitz (*b* 1885), a grandson of Moritz Lobkowitz, was a pianist who performed as a soloist and with the České Kvarteto; he was an adherent of Jaques-Dalcroze's method of eurhythmics and founded a musical institute of that type at Prague in 1912.

In 1990 the Czech government passed laws ordering the return of private property confiscated by the Communists to their original owners. The Lobkowitz family asked William Lobkowicz (*b* Boston, 1961) to represent them; more than 200 properties were returned, as well as the surviving collection of art, books, manuscripts and musical instruments. The bulk of the collection is housed at the Museum of Czech Music. The Lobkowitz castle Nelahozeves holds a summer music festival and portions of the collection are on display there. Work on organizing and cataloguing the collections is being undertaken by the Roudnice Lobkowicz Foundation, Prague.

MILAN POŠTOLKA/WILLIAM MEREDITH

Lobkowitz, Juan Caramuel y. *See* CARAMUEL, JUAN.

Lobo [Lobo de Borja], **Alonso** (*b* Osuna, 25 Feb 1555; *d* Seville, 5 April 1617). Spanish composer. Lexicographers have persistently confused the facts of his life, which are as follows. He was certainly not born at Borja, as has been erroneously stated, but at Osuna. The error arose from the fact that his mother's maiden name was Jerónima de Borja; both she and her husband were natives of Osuna. At the age of 11 Lobo became a choirboy at Seville Cathedral. He took the degree of *licenciado* at Osuna University and was appointed chapter secretary by 20 September 1581; on 26 May 1586 he was elevated to canon in the collegiate church at Osuna. On 21 August 1591 the Seville Cathedral chapter appointed him to assist the aging *maestro de capilla*, Francisco Guerrero; according to an agreement dated 2 September, he was to board and instruct the choirboys for an annual salary of 400 ducats and 80 *fanegas* of wheat. On 29 November that year he was invited to direct the choir while Guerrero was on leave of absence. On 22 September 1593 he was appointed *maestro de capilla* of Toledo Cathedral. He returned to a similar post at Seville on 9 March 1604. His *Liber primus missarum* comprises six masses and seven motets. The one five-part mass, *Prudentes virgines*, and the two for six voices, *Beata Dei genetrix* and *Maria Magdalena*, are based on motets by Guerrero, with whom he presumably studied during his years as a choirboy. Lobo followed the general trend towards polychoral writing begun in Spain by Victoria, though none of his extant works calls for more than two choirs. He was the first composer to publish in Spain a parody mass based on a Palestrina motet (*O Rex gloriae*), adding to the stylistic purity of his model the learned profundity of the Spanish school. His *Credo romano* with figured bass (ed. in Cárdenas Serván, 55–67) uses as cantus-firmus the widespread mensural version of Credo IV in the *Liber usualis*; the work continued to be popular long after his death, as were the six-voice Lamentations for Holy Saturday, copied as late as 1772 (ed. in Cárdenas Serván, 66–93). Victoria, with whom he corresponded, esteemed him as an equal. Worn copies of his 1602 *liber primus missarum* in Mexico City, Puebla and Coimbra show that in Portugal and Mexico as well as in Spain he was regarded throughout the Baroque period as one of the finest Spanish composers.

WORKS

Liber primus missarum (Madrid, 1602): Missa 'Beata Dei genetrix', 6vv; Missa Maria Magdalenae, 6vv; Missa 'O Rex gloriae', 4vv; Missa 'Petre, ego pro te rogavi', 4vv; Missa 'Prudentes virgines', 5vv; Missa 'Simile est regnum coelorum', 4vv; Ave Maria, 8vv; Ave regina coelorum, 6vv; Credo quod Redemptor, 4vv; O quam suavis est, Domine, 6vv; Quam pulchri sunt gressus tuae, 6vv; Versa est in luctum, 6vv; Vivo ego, dicit Dominus, 4vv; all ed. in Renaissance Performing Scores, ser. A: Spanish Church Music, x–xvi, xxxvii, lxxiii-lxxiv, xciv (London, 1978–87)
Credo romano, 3 Passions, Lamentations, psalms, hymns (see Stevenson, 1973)
3 motets, lost: Corona aurea super caput eius, 5vv; Isti sunt dies, 6vv; Miserere, 12vv (cited in *JoãoIL*)

ROBERT STEVENSON

Lobo, Duarte [Lupus, Eduardus] (*b* ?1564–9; *d* Lisbon, 24 Sept 1646). Portuguese composer. There is no evidence to support the assumption that he was born in Alcáçovas in 1565 or 1575. He studied music with Manuel Mendes at the Évora Claustra da Sé, the Cathedral cloister school, where he was a boy chorister. He became *maestro de capilla* at the Hospital Real, Lisbon and from about 1591 until at least 1639 he was *maestro de capilla* at Lisbon Cathedral. He was also director of the Seminário de S Bartolomeu, Lisbon. He taught for many years at the Lisbon Claustra da Sé where his pupils included António Fernandes, João Alvares Frouvo, Fernando de Almeida and Manuel Machado. He was the most famous Portuguese composer of his time. He published four volumes of liturgical music and was one of the leading Portuguese exponents of the polyphonic style notable in particular for the ease with which he combined mastery of learned counterpoint with refined and expressive interpretation of the text. The influence of composers such as Ockeghem and Josquin is seen in his use of cantus firmus and canonic techniques. Several of his parody masses are based on motets by Palestrina and Francisco Guerrero (i).

ARMINDO BORGES

Lobo, Elías Álvares (*b* Itu, São Paulo, 9 Aug 1834; *d* São Paulo, 15 Dec 1901). Brazilian composer. He was orphaned at an early age and educated by a local priest, Diogo Antonio Feijó, but he was mostly self-taught in music. His most important sacred work is his *Missa de São Pedro de Alcântara*, written in 1858 for the Emperor Pedro II. Lobo's name became nationally known after the première of his opera *A noite de São João* (14 December 1860) at the Teatro Lírico Fluminense in Rio de Janeiro. Produced by the Opera Lírica Nacional, this was the first opera dealing with a regional subject written by a Brazilian composer and a Brazilian librettist, the latter being the well-known Indianist writer José de Alencar. In two acts, the opera is of comic character and tells of the love affair of two cousins in the town of Brás (São Paulo). A second opera by Lobo, *A Louca*, was never produced. Most of his later life was dedicated to composing and conducting church music in his native state of São Paulo. Lobo also composed in the contemporary salon music genres of *modinha* and *lundu*. In 1890 he was appointed a music professor at the São Paulo Escola Normal.

GERARD BÉHAGUE

Lobo, Heitor (*b* Vila Real, Trás-os-Montes, *c*1496; *d* after 1571). Portuguese organ builder. He is generally acknowledged as the father of Portuguese organ building and one of its best exponents. It is not known where he learned his craft, although the decoration and technology of his work suggests that he was familiar with the traditions of the Italian Renaissance. The first organ known to have been built by Lobo was built for the Augustinian priory of the church of Santa Cruz, Coimbra, in 1530–2. Surviving documents (cited in Pinho Brandão) provide a good description of this organ, which was hailed as 'without equal in the realm'. Heitor rebuilt the organ in 1541 and again about 1559. Repoussé metal pipes in the façade of the present organ are probably from the original instrument. Lobo is recorded as having built two smaller organs at Santa Cruz, one a *realejo*, and the other almost certainly the small instrument in the choir.

A large organ for the high choir of Oporto Cathedral dates from 1537–8, and he almost certainly built two smaller instruments in the nave. Apparently some of the Flautado and Oitava pipes from these organs were re-used by Manoel Lourenço da Conceição when he replaced them in the 18th century.

Between 1544 and 1553 Lobo was employed by the chapter of Évora Cathedral. For a salary of 13,000 reis, he was 'to repair and tune the organs that he made and is to make'. The historic instrument, which survives to this day on the gospel side of Évora Cathedral, was almost certainly built by Lobo during this time. According to Esteves Pereira and others, the ensemble at Évora included a complementary organ on the epistle side of the nave. This disappeared about 1940, at that time being no more than an empty case. It is not known if it was ever a complete instrument. In 1551 Lobo built a large organ for the church of S Salvador, Vilar de Frades, Barcelos. Another instrument, built in 1562 for the church of Nossa Senhora da Oliveira, Guimarães, has been altered beyond the point of recognition.

The Évora instrument is noted for its tonal quality, the result of masterful pipe construction and low wind pressure. Although now somewhat changed, the instrument is useful in the evaluation of Lobo's style and of early Portuguese organ-building traditions. Its tonal capabilities were compatible with the requirements of contemporary repertory: in its original form the instrument almost certainly had five undivided foundation stops, Flautado de 24, Flautado de 12, Oitava, Quinta, and Mixtures 15 and 17. There were no reeds and the only solo stop was a four-rank Cornet in the treble.

It is likely that Lobo was a prolific builder (the Santa Cruz documents of 1541 state that he was 'of much experience and had built many organs') but that most of his organs were replaced in the 18th century. At Évora, the Clarim and Trombeta stops, added to the façade in the late 18th century, almost certainly represented an attempt by an unknown visionary to modernize the instrument and at the same time save it from replacement by a Baroque substitute.

Lobo de Mesquita, José Joaquim Emerico (*b* Vila do Príncipe [now Serro, Minas Gerais], 12 Oct 1746; *d* Rio de Janeiro, April 1805). Brazilian composer and organist.

Son of the Portuguese José Lobo de Mesquita and his slave Joaquina Emerenciana, he was active in the province of Minas Gerais during the latter part of the 18th century, spending most of his life at Arraial do Tejuco (now Diamantina), where he settled in about 1776, and Vila Rica (Ouro Prêto). In 1788 he entered the brotherhood of Nossa Senhora das Mercês dos Homens Crioulos in Arraial do Tejuco, confirming that he was a mulatto. He served as organist at the church of S Antonio (1783–4), at the Ordem Terceira de Nossa Senhora do Carmo (1787–95) and was apparently the first organist of the Irmandade do SS Sacramento, all in the same city. In 1798 he moved to Vila Rica, where he worked as a composer, conductor and organist of the same Ordem Terceira brotherhood as well as for the brotherhood of the Matriz (main church) of Nossa Senhora dos Homens Pardos. There he was appointed *alferes* (a military rank corresponding to second lieutenant) of the Terço de Infantaria dos Homens Pardos. In 1801 he moved to Rio de Janeiro, where he held the post of organist at the church of Nossa Senhora de Carmo until his death.

Mesquita was the most prolific composer of the Brazilian captaincy. The oldest manuscripts found to this date bear the date 1779 (*Antiphona regina coeli laetare* and *Antiphona zelus domus tuae*), but many works were copied throughout the 19th century in Minas Gerais and São Paulo as well. Mesquita cultivated primarily an individual homophonic concertante style, whose components often recall European Classical practices, and 'possessed an extraordinarily expressive and advanced technique for his epoch' (Lange, 1965). He is the only composer whose works are found in all of the sacred music archives of Minas Gerais, in several regional centres. In recognition of his importance, he was made the patron of Chair no.4 of the Brazilian Academy of Music.

WORKS
(*selective list*)

Masses: Missa, for Holy Week, 1778; Missa, F, *c*1780; Missa, E♭, *c*1782; Missa, C; Missa concertada e credo; Missa de requiem; Missa de S Cecilia; Missa Passio domini nostri Jesu Christi

Motets: Tercio, S, SSAB, str, 1783, Museu da música da arquidiocese de Mariana, Minas Gerais (facs. (Rio de Janeiro, 1985) [incl. thematic catalogue]); Congratulamini mihi omnes; Processione cum ramis benedictis

Ants: Regina caeli laetare, 1779; Salve regina, chorus, str, org, 1787, ed. F.C. Lange, *Archivo de música religiosa de la capitanía geral das Minas Gerais*, i (Mendoza, 1951); Zelus domus, 1779; Ave regina caelorum; In pacem in idipsum

GERARD BÉHAGUE

Lobwasser, Ambrosius (*b* Schneeberg, Saxony, 4 April 1515; *d* Königsberg, 27 Nov 1585). German jurist and humanist. He was one of the children of a Saxon mine inspector. In 1527 he went to school and later to university in Leipzig; in 1535 he took the Master of Arts degree and remained as a teacher at the university until 1550, when he became *Hofmeister* (private tutor) to two noble students at Leuven University and, from 1551, at the University of Paris. On returning to Leipzig in 1556, he was appointed councillor and chancellor to the Prince of Meissen (Saxony). In 1562 he went to Bologna to study at the university, taking the degree of Doctor of Laws, and in 1563 he was called by Duke Albrecht of Prussia to the chair of law at Königsberg University, where he stayed until his retirement in 1580.

Lobwasser's great achievement was the translation of the Genevan (or Huguenot) Psalter into German, following the original verse forms exactly, in the years immediately after its completion in 1562. This allowed the French metrical psalms together with the Genevan melodies to be used in German-speaking countries, both in their monophonic versions and in the homophonic settings for four voices by Claude Goudimel (1565). Although as a Lutheran Lobwasser had translated the French psalms purely out of literary interest, he thus becamc a pioneer in the introduction of the Huguenot Psalter to the German-speaking areas affected by the Reformation. The translation was completed by 1565, although it probably did not appear in print until 1573 in Leipzig, followed the next year by an edition published at Heidelberg. (The possibility of an earlier edition from Danzig has not been confirmed.) The Leipzig edition is described in the title as 'Der Psalter ... in deutsche reyme verstendiglich und deutlich gebracht ... und hierüber ... vier stimmen'. The latter statement refers to the four-voice Goudimel settings which were published in the same volume. In 1583 Lobwasser's translation was officially adopted in Neustadt an der Haardt in the Palatinate. This was the beginning of the extraordinary career of 'Lobwasser', as it was called: it continued to appear in innumerable editions (for one to four voices) brought out by all the established reformed churches of Germany and in the Zwinglian areas of northern Switzerland well into the 18th century, usually coupled with other Protestant hymns in a second section of the book. In Herborn (Nassau) alone at least 40 editions of 'Lobwasser' appeared between 1586 and 1694 and more than 60 were published in northern Switzerland in the course of the 17th century. This was not the only translation of the Genevan Psalter into German – Martin Opitz, among others, prepared one – but, because of its early date, it was the only one to be officially approved. Its influence extended as far as Denmark and even the Lutheran church was affected by it, as is shown by the 'Lutheran Lobwasser' (Rothenburg ob der Tauber, 1617), which was an attempt at providing Lutheran versions of his translations which could still be sung to the same melodies. Lutheran antagonism, of course, was stronger, but it could not stop the psalm-singing of the reformed church. The well-known *Psalter Davids Gesangweis* (1602), by the Leipzig professor of theology Cornelius Becker, was one such deliberate

counter-offensive, but it was not used for long. The popularity of 'Lobwasser' rested, initially at least, as much on the easily-remembered French tunes as on the texts which, from the 17th century onwards, were subjected to growing criticism for both their theological content and their literary style. However, 'Lobwasser' remained in common official use up to the second half of the 18th century and was only gradually supplanted by the hymnbooks of the 18th-century Age of Enlightenment and, in western Germany, by the *Neue Bereimung der Psalmen* of Matthias Jorissen (Elberfeld, 1798).

WALTER BLANKENBURG

Locatelli, Giovanni Battista (*b* Milan or Venice, 7 Jan 1713; *d* after 1790). Italian impresario and librettist, active in central Europe and Russia. He was a member of Pietro Mingotti's opera troupe and wrote the librettos for Filippo Finazzi's intermezzo *Il matrimonio sconcertato, per forza del Bacco* (Carnival 1744, Prague), and a three-act opera *Diana nelle selve* (23 November 1745, Prague; score in *CZ-Pnm*). From 1748 to 1757 he rented the city theatre, Prague. He founded his own opera company and engaged good singers – notably Rosa Costa, Catarina Fumagalli, and his wife Giovanna della Stella, who also sang at the Bonn court and at Dresden from 1745 to 1749. For several seasons at Prague his Kapellmeister was Gluck, who directed the premières of his own *Ezio* (1750) and *Issipile* (1752), and a revival of *Ipermestra* (1750).

Locatelli's concern to employ excellent singers and mount impressive productions was largely responsible for the growing financial difficulties under which his company operated. Leaving large debts, he moved to Russia after the outbreak of the Seven Years War, and became head of the tsarina's opera in St Petersburg (1757–62); its first performance under his leadership was a pasticcio on his own text *Il retiro degli dei* (3 December 1757). With Italian singers and conductors (Francesco Zoppis and G.M. Rutini), he introduced *opere buffe* by Galuppi, Fischietti and others to Russia. He was also engaged to take his own troupe to Moscow; it opened there on 9 February 1759 with Galuppi's *La calamità de' cuori*, but in 1761 its performances ceased through lack of public interest. As a reward for *Il consiglio delle muse*, a birthday serenata for Catherine II (1763), Locatelli gained permission to open a place of entertainment called Krasnïy kabak ('The Pretty Tavern'). In later years he occasionally wrote cantata texts (*La sorpresa delli dei*, 1777, music by Paisiello; *Jahvé*, 1783). After a gala benefit in St Petersburg (1783) he left public life.

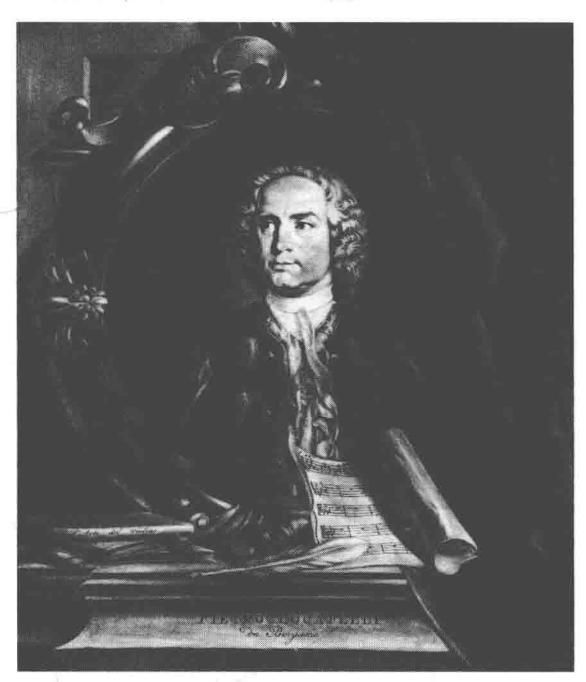
TOMISLAV VOLEK

Locatelli, Pietro Antonio (*b* Bergamo, 3 Sept 1695; *d* Amsterdam, 30 March 1764). Italian composer and violinist. His importance lies particularly in his *L'arte del violino*: 12 violin concertos, with altogether 24 caprices for solo violin in the first and last movements of each concerto. This collection had an immense influence on the development of violin technique, especially in France, where violin teaching continued to bear signs of his style of virtuosity until the beginning of the 19th century. Locatelli must be considered the founding-father of modern instrumental virtuosity, and he also left a body of work whose idiom, from his op.2 onwards, reflects aspects of the most advanced style of his day.



1. LIFE. His parents were Filippo Locatelli and Lucia Crocchi (or Trotta). A document in the Locatelli archive (*I-BGc*) indicates that Pietro Antonio was the first of seven sons. He would have learnt the rudiments of music in the choir of S Maria Maggiore in Bergamo, possibly under Ludovico Ferronati or Carlo Antonio Marino, two of the city's leading musicians. In April 1710 the 14-year-old violinist appeared as a member of the basilica's instrumental ensemble, and the following January he acquired the official position of third violin. In the same year, 1711, the young Locatelli was granted permission to go to Rome. The tradition that he was one of Corelli's pupils is true only in the broad sense that he belonged to the Corelli 'school'. In fact, Locatelli polished his skills as a violinist under the wing of a recognized representative of the prestigious circle of virtuosos associated with Corelli. Possibly it was Giuseppe Valentini (who is known to have played alongside Locatelli in 1714 at performances promoted by the aristocratic Caetani family in Sermoneta) who took care of his training when he was first in Rome, but it is equally likely that Locatelli sought assistance from someone in the Ottoboni circle of the calibre of Franceso (Antonio) Montanari or Domenico Ghilarducci. Between 1717 and 1723 Locatelli was frequently called upon for performances sponsored by Cardinal Pietro Ottoboni at S Lorenzo in Damaso, and during the same period he took part on a fairly regular basis in the Congregazione dei Musici di S Cecilia and performed with this society in Rome on several occasions. It is not known exactly when Locatelli came into contact with the pope's major-domo Monsignor Camillo Cybo, the dedicatee of his *XII concerti grossi opera prima* (1721), but he must certainly have been under the protection of this noble prelate fairly early on, possibly from the time of his affiliation with the Congregazione (1716). After February 1723, the date of his last documented appearance at Ottoboni's residence, information about Locatelli becomes scarce. Perhaps he is the 'bergamasco' who played at S Giacomo degli Spagnoli in Rome in July that year. One fact is certain: Locatelli's name disappears from

Roman documents in 1723, at the same time that his protector, Monsignor Cybo, left the city.

The title of *virtuoso da camera* which the Landgrave Philipp von Hesse-Darmstadt, Habsburg Governor of Mantua, conferred on Locatelli in 1725 does not in itself constitute evidence of his having stayed for any length of time at the landgrave's court: no trace of Locatelli's visit has yet been discovered in Mantuan archives. Nor do Venetian archives show that Locatelli resided in that city, although that he spent some time in Venice between 1723 and 1727 can be deduced from the letter of dedication to the Veneto patrician Girolamo Michiel Lini at the head of the concertos in his *Arte del violino* op.3. On 26 June 1727 Locatelli was in Munich, at the court of the Prince-Elector Karl Albert, where he received 12 gold florins for a performance, and the following year he was in Berlin, as is confirmed in a report by the ambassador from Brunswick to the Prussian court, referring to the violinist's appearance at the palace of Monbijou in the presence of the Queen Sophie Dorothea. Tradition has it that Locatelli came to the court of Friedrich Wilhelm I of Prussia from Dresden in the retinue of the Prince-Elector Augustus the Strong, and that he gave two performances before the King of Prussia and received from him a gift of 'eine schwere goldene Dose mit Ducaten'. The problem with this legend is the precise relationship between Locatelli and the Dresden court: the only indication of a link between Locatelli and the Elector of Saxony, King of Poland, at that time is the presence of some of the composer's works in the archive of the Dresden Kapelle. Evidence for his presence in Frankfurt in 1728 is provided by his signature on a page – showing an Andante later published in the Sonata for flute op.2 no.3 (1732) – in a personal album belonging to Hendrik van Uchelen, a Dutch-born businessman living there. In December that year Locatelli was in Kassel, where he received a fee of 80 imperial thaler for 'services rendered' at the court of the Landgrave Carl von Hessen-Kassel. It is indeed because of Locatelli's contacts with the Kassel court that we are able to make a fair approximation of the date on which he arrived in Amsterdam: from a letter of December 1729 to Prince Maximilian von Hessen we learn that he had been in Amsterdam for at least four months and that he intended to remain there for the whole winter.

The reason for Locatelli's presence there is explained not by concert-giving in the Dutch Republic or, more precisely, in Amsterdam, but by the country's flourishing music-publishing firms, which, with their advanced technology and efficient commercial network, guaranteed wide international circulation. In Amsterdam Locatelli's collaboration with the publishing house of Roger and Le Cène, which had begun with his op.1 in 1721, continued with the publication of his orchestral works, while he issued at his own expense the collections of chamber music opp.2, 5 and 8, personally taking charge of sales from his own home. In 1731 he obtained from the States of Holland and East Friesland a privilege to print his own works which lasted for 15 years and was renewed in 1746, demonstrating cautious planning and practice in the publication of his works.

On the basis of Locatelli's own testimony and that of his contemporaries, he avoided the public, 'and he never will Play any where but with Gentlemen'. His regular Wednesday concerts in his own home were probably for a small circle of prosperous amateurs. His estate at the time of his death demonstrates clearly that in the 35 years he spent in Amsterdam he enjoyed a certain prosperity. Among the possessions in his house were large collections of works of art and old books (covering various fields and in various languages), sometimes in multiple copies, suggesting that he was engaged in commercial activities in the northern Netherlands, where there were at the time numerous collectors.

1. Pietro Antonio Locatelli: mezzotint by Cornelis Troost, 1733–6

2. Works. Two aspects sit side by side in Locatelli's musical personality: as a composer spanning two eras he showed himself receptive to changes in the air, while as a performer his stance might even be described as provocative. The dichotomy this reveals has caused confusion in musicological writings: the questionable taste of many of the 24 caprices in the *Arte del violino* for a long time blinded critics to the historical value of a work whose exceptional technical demands placed Locatelli as the founding-father of the 19th-century virtuoso concerto. In his psychological make-up Locatelli also seems to be a prototype of the modern virtuoso. Whether as performer or – slightly later – as composer, he leaves the historian with the impression of developments prematurely stranded in the prosperity and isolation of a commercial city such as Amsterdam.

As a violinist Locatelli explored uncharted territory, particularly in conquering the very top register of the instrument: his almost systematic exploration reaches, in the *Arte del violino*, c'''' (16th position), while in the 'Capriccio, prova dell'intonazione' in the Sonata op.6 no.12 Locatelli reaches b''''' (22nd position). Left-hand extensions, double and triple stopping, polyphonic passages, trills and double trills are explored in various ways, almost systematically. Frequent employment of the so-called staccato-legato, on the other hand, exemplifies the exploration of new possibilities for the right arm. Altogether these innovations earned Locatelli much criticism during his lifetime, in relation to beauty of

2. *Opening of the second sonata of Locatelli's 'XII sonate . . . da camera' op.6 (Amsterdam, 1737)*

sound, and contemporary critics compared him unfavourably with violinists who were certainly less innovative and influential. Locatelli's violin technique as a whole remains to this day a challenge for the player.

Locatelli's works comprise concerti grossi, solo concertos, trio sonatas and sonatas for one melody instrument and bass. The op.1 concerti grossi, following the model of Corelli's op.6, are divided into eight *da chiesa* and four *da camera* concertos. They are distinguished by the vitality of their counterpoint: the fugatos, fugues and double fugues generally go beyond the Corelli model and reveal a familiarity with the Roman contrapuntal tradition. Their density of texture is further intensified by the use of a viola in the concertino group. The severity of these concertos is mostly abandoned in the concertos opp.4 and 7: in many of these there is a clear tendency towards the solo concerto. The flute sonatas op.2 were widely known in the composer's day; their structures already show features which would later contribute to the formation of sonata form. They also show a movement towards the *galant* style: the flute's melodic line is characterized by numerous decorations including lombardic rhythms, sighs, appoggiaturas, syncopations and a huge variety of rhythmic values over a bass whose sole function is to articulate the harmony. The trio sonatas op.5 aim to create a pleasant mood, while the violin sonatas opp.6 and 8 represent the peak of Locatelli's work (fig.2), showing a highly personal fusion of the abilities of a virtuoso violinist with those of a composer at the forefront of the latest stylistic trends.

WORKS

Edition: *Pietro Antonio Locatelli: Opera omnia*, ed. A. Dunning and others (London, 1994) [D]

printed

published in Amsterdam unless otherwise stated

op.
1 XII concerti grossi a 4 e a 5, 2 vn, 1/2 va, b (1721, 2/1729); D i
2 XII sonate, fl, b (1732); D ii

ALBERT DUNNING

Locatello, Gasparo (*fl* 1598–1625). Italian composer. He was a canon at S Marco, Venice, and on 30 May 1612 was elected head of the *compagnia* of the singers there. On 17 August 1617 he was appointed *maestro di canto* of the seminary of S Marco; he was replaced by Alessandro Grandi the following year (see J.H. Moore: *Vespers at St. Mark's: Music of Alessandro Grandi, Giovanni Rovetta and Francesco Cavalli*, Ann Arbor, 1981, i, pp.8, 77). Locatello contributed a spiritual madrigal and a solo motet to anthologies (RISM 1598[6] and 1625[2]).

DENIS ARNOLD/TIM CARTER

Locatello [Loccatello, Lucatelli, Lucatello], **Giovanni Battista** (*b* Forlì; *fl* 1579–93). Italian composer and organist. He was the organist of S Pietro, Rome, from 1581 to at least 1590 and in 1593, and of S Spirito in Saxia, Rome, from 1579 to some time before 1595; he also taught the harpsichord to the foundling boys in the adjoining hospital. In the 1580s he was in the service of Cardinal Filippo Buoncompagni, nephew of Pope Gregory XIII. Single madrigals by him appear in numerous collections, and six are printed together in Cancineo's first book of madrigals of 1590. His *Ardo lunge e d'appresso* is printed in the madrigal anthology *Le gioie* (RISM 1589[7]), published by members of the Congregazione dei Signori Musici di Roma, to which Locatello must therefore have belonged. It shows a competent composer capable of matching a variety of textures to the text, but in a rather restrained style; De Ford has judged him one of the more conservative of Roman madrigalists. The eight-voice motet *Super flumina Babylonis* is more adventurous, both rhythmically and in its confident handling of the double-choir medium.

Given the long time gap there must be some doubt that the *Primo libro de madrigali* of 1628 is by the same Giovanni Battista Locatelli; it might well be by a son who shared the same name.

WORKS

11 madrigals, 4–6vv, 1582[4], 1583[10], 1585[29], 1589[7], 1589[11], 1590[21]
Super flumina Babylonis, motet, 8vv, 1614[3]
Laudate pueri, psalm-motet, 8vv, double choir, *I-Rn*

Doubtful: Primo libro de madrigali, 2-7vv, bc (Venice, 1628)

Lochon, Charles (*b* Lyons, *c*1760; *d* Paris, after 1817). French violinist and composer. He may have been related to the composer J.-F. Lochon who was active in Paris in the late 17th century. The *Mercure de France*, announcing his *Six duos pour deux violons* op. 1 in September 1777, called him 'premier violon de la Comédie de Bordeaux'. There Lochon came under the tutelage of the eminent Mannheimer F.I. Beck, who was conductor of the orchestra. About 1780–81 he went to Paris where he took lessons from Bertheaume, and in 1782 became a first violinist both at the Opéra and at the Concert Spirituel. In 1783 the *Almanach musical* referred to him as a violin teacher. There is no mention of any solo performances nor, from this date, of further compositions. He remained with the orchestra of the Opéra until April 1817 when he was pensioned. Béranger in his *Annonces* of 19 December 1794 mentioned a 'demoiselle Lochon', and Lochon *fils* is called an 'excellent violiniste' in the supplement to Choron and Fayolle (ii, 464).

Lochon's known works, all instrumental, were printed in Lyons between 1777 and 1778 by Guera and include, in addition to the violin duos op.1, a *symphonie concertante* in F for two violins op.2, another in A op.4, a symphony in E♭ (issued together with the first edition of Haydn's 'Der Schulmeister' Symphony and another by Vanhal) and a divertimento in D. Only the symphony and the *symphonie concertante* op.2 are extant, the former being a large, well-wrought, four-movement piece with a profusion of themes showing the influence of Beck and a more lyrical than dramatic talent. Lochon's attraction to the divertimento, a rare genre among his French contemporaries, likewise shows Beck's influence. (*BrenetM*; *BrookB*; *BrookSF*; *Choron-FayolleD*; *FétisB*; *GerberL*)

BARRY S. BROOK, JAIME GONZALEZ

Lochon, Jacques-François (*b* Paris, 1660–65; *d* after 1700). French composer. The son of René Lochon, he entered the Ste Chapelle as a choirboy on 28 April 1670 and served continuously until 24 March 1679. Some time after this he may have held a position at Liège, which could explain Sébastien de Brossard's adding the word 'Liégeois' after his name on one of his motets. Lochon published *Motets en musique … et un Oratorio* (Paris, 1701). The motets (nine solos, one duet and two trios,

with continuo) comprise slow *récitatifs* and fast movements. The oratorio is a Christmas work for four voices and two violins, comprising a chorus, a few dialogues and a *symphonie*. These works are part of the early 18th-century attempt to introduce elements of the Italian style into French music. Lochon's efforts, however, resulted in predictable and regular turns of phrase, sequential repetitions and idly rushing scales. As well as two motets from this volume, there are four further motets in Brossard's collection (*F-Pn* Vm[1]. 1175–1175[bis]).

WILLIAM HAYS (with JEAN-PAUL MONTAGNIER)

Locke [Lock], **Matthew** (*b* ?Exeter, 1621–3; *d* London, shortly before 10 Aug 1677). English composer and organist. He was the most important, influential and prolific English composer of his generation, contributing to most genres of the time.

1. Life. 2. Domestic consort music. 3. Other instrumental music. 4. Sacred music. 5. Secular vocal music.

1. LIFE. A portrait of Locke attributed to Isaac Fuller in the Faculty of Music, Oxford University (fig.1) has the inscription 'aetat 40 / anno domini 1662', which implies that he was born sometime between March 1621 and March 1623, while Anthony Wood wrote that he was 'bred a chorister in the Cath. Church of Exeter (being as I presume a Devonian born)'; he was perhaps the son of Humphrey Locke, carpenter and freeman of Exeter, who married Elinor Deymont in 1619. He probably joined the cathedral choir around 1630, where his teachers would have been Edward Gibbons (eldest brother of Orlando) and the organist John Lugge, though Wood mentioned that he was also taught by William Wake, a lay vicar. He carved 'MATHEW LOCK / 1638' on the organ screen, possibly when his voice broke, and was warned by the dean and chapter on 29 August 1640 for fighting with a colleague. Perhaps a second carving, 'ML / 1641', records the year he left the choir.

1. Matthew Locke: portrait attributed to Isaac Fuller, 1662 (Faculty of Music, Oxford)

The next record of his activities is his copy of Italian motets (*GB-Lbl* Add.31437, ff.29–43*v*) labelled 'A Collection of Songs [made] when I was in the Low Countreys 1648'. Charles I made Exeter the base for his activities in the west in 1644 and conscripted all adult Devon men into the royalist army, and it is possible that Locke was one of those who accompanied Prince Charles to France in 1646. Hulse suggested that Locke was with Charles at The Hague in 1648, and accompanied the Duke of Newcastle to Antwerp early in 1649. Perhaps he became a Catholic at this point, and copied the Latin motets in *GB-Lbl* Add.31437 as part of the process; he apparently took them from Antwerp reprints of Venetian prints. The annotation 'made at the request of Mr W[m]. Wake for his Schollars 1651' against *The Little Consort* in his autograph score book (*GB-Lbl* Add.17801) suggests he had returned to Exeter by then. The *Duos for Two Bass Viols* are dated 1652 (Add.17801), but it is not known where or for whom they were written.

There are indications that he spent some time during this period in Herefordshire. John Aubrey wrote that there was 'a great friendship' between him and the antiquary and amateur musician Silas Taylor, who 'bought church lands (during the Commonwealth) and had half the bishop's palace at Hereford'. He added that Locke 'married Mr Garnon's daughter in Herefordshire', and the 1683 visitation of Hereford confirms that his wife was Mary, daughter of Roger Garnons from Trelough, south of Hereford. On 29 March 1654 a deposition was made against 'Mr. Matthew Lock as being a papist' and being involved in a fracas in Hereford, while he labelled a canon (*GB-Lbl* Add.17801) 'A Plaine Song given by M[r]. William Brode of Hereford. [16]54.'; William Broad had been a vicar-choral of Hereford Cathedral. *The Flat Consort*, 'for My Cousin Kemble', has been linked with a member of the prominent Catholic family of Pembridge Castle, Herefordshire.

It is often said that Locke was in London in 1653, when James Shirley's masque *Cupid and Death* was performed. But it is likely that the work only had music by Christopher Gibbons at that stage, and that Locke's contribution was made for the 1659 revival. There is no other sign of his presence in the capital before 1656, when Playford published his *Little Consort of Three Parts*, and he wrote lost vocal music for the fourth entry of Davenant's *The Siege of Rhodes*; he shared the part of the Admiral of Rhodes with Peter Ryman. He also seems to have written music for Davenant's *The Cruelty of the Spaniards in Peru* (?25 July 1658) and *The History of Sir Francis Drake* (?16 June 1659). *The Apes Dance* and *The Symerons Dance* in the Locke section of Playford's *Courtly Masquing Ayres* (1662) appear to come from the sixth entry of the former and the second entry of the latter. His contribution to *Cupid and Death*, made for a semi-public performance at a riding school in Leicester Fields in 1659, involved expanding the role of music by

setting a number of the original speeches to recitative, perhaps to hoodwink the authorities into thinking that their ban on spoken plays did not apply to it.

By the Restoration in 1660 Locke was England's leading composer: the main figures of the pre-war royal music had either died in the Interregnum or were nearing retirement. He was appointed composer to the Private Music, the pool of musicians that played in the royal apartments at Whitehall. A section called the Broken Consort (because it mixed violins, viols and continuo instruments) continued the tradition of contrapuntal consort music developed at Charles I's court, and presumably played Locke's two eponymous sets of suites. The first is dated 1661 in two sources and the second was probably written soon after. But, as Roger North put it, Charles II had 'an utter detestation of Fancys', and preferred the French-style dance music played by the court violin band, the 24 Violins. Locke received a second post as its composer, authorized 'to order & direct them in his course of Wayting', though this role was supplanted in spring 1662 when John Banister (i) created a Select Band and became effective leader of the whole 24 Violins.

It is often said wrongly that Locke also had a post as composer to the royal wind musicians, but he did write two five-part suites and a six-part pavan-almand 'For his Majesty's Sagbutts & Cornetts', and they have plausibly been associated with the entertainment organized for Charles II's entry into London on 22 April 1661, the night before the coronation. John Ogilby's published description mentions that he wrote all the music, and includes the texts of some lost songs. Locke eventually acquired a third court post when Catharine of Braganza established a Catholic chapel at St James's in 1662 (in Somerset House from 1671); Christopher Gibbons described him as 'ye Queenes-Organist' in a letter of 22 June 1663 (facsimile in Rayner). According to Roger North, he carried out his duties in unusual circumstances:

> He was organist at Somerset House chappell, as long as he lived; but the Italian masters, that served there, did not approve of his manner of play, but must be attended by more polite hands; and one while one Sabinico [Giovanni Sebenico], and afterwards Sig^r^ Babtista Draghe, used the great organ, and Lock (who must not be turned out of his place, nor the execution) had a small chamber organ by, on which he performed with them the same services.

It has been presumed that Locke's Latin motets were intended for the queen's chapel, but there is no sign that string players were employed there, so the ones with obbligato violins may have been the product of other circumstances.

As a Catholic, Locke was not a member of the Chapel Royal, though he wrote for it in the 1660s: the texts of some of his anthems appear in James Clifford's *Divine Services and Anthems Usually Sung in his Majesties Chappell* (London, 2/1664), and most of the others probably date from the same period. In 1666 he composed a novel through-composed setting of the Ten Commandments, but it was sabotaged by the Chapel Royal choir during the first performance on 1 April. He retaliated by publishing it as *Modern Church-Musick Pre-accus'd, Censur'd, and Obstructed in its Performance before his Majesty* (London, 1666), and Samuel Pepys, for one, thought it 'excellent good' when he tried it out with his friends. Later that year, on 14 August, the great polychoral anthem *Be thou exalted Lord* was performed in the chapel to celebrate Albemarle's naval victory over the Dutch; Pepys wrote of hearing 'a special good Anthemne before the king after sermon'.

Locke was one of eight members of the 24 Violins paid travelling expenses between 30 June 1665 and 18 February 1666, when the court was sheltering from the plague at Hampton Court and in Oxford. While in Oxford he participated in some of the weekly meetings of the Music School, adding a Gloria to his *Jubilate Deo* on 9 November 1665, and writing a four-part fantasy and courante (the so-called *Oxford Suite*) and the motet *Ad te levavi oculos meos* for the following week. His New Year songs *All things their certain periods have* and *Come loyal hearts* were performed for the king in Oxford on 1 January 1666. He probably maintained a connection with the Music School after 1666 through Edward Lowe, and was paid £5 by the university for writing an ode (probably *Descende caelo cincta sororibus regina*) for a degree ceremony in the Sheldonian Theatre on 14 July 1673.

In view of Locke's Oxford activities and his prominent position in English musical life, it is surprising he never received a doctorate from the university, as did Christopher Gibbons and Benjamin Rogers. Perhaps it was because he was a Catholic, though it is also likely that his assertive and quarrelsome personality, revealed in his writings, offended potential academic patrons. In particular, his quarrel with Thomas Salmon could have done him no good, since Salmon was an MA of Trinity College, and was supported by his Oxford colleagues. Salmon had approached Locke for music lessons some years earlier, but had been referred to the teacher and minor composer John Birchensha. Birchensha published Salmon's *Essay to the Advancement of Musick* (London, 1672), which proposed a reform of notation, to which Locke responded with *Observations upon a Late Book, Entitled, An Essay to the Advancement of Musick, etc.* (London, 1672). Salmon replied with *A Vindication of an Essay to the Advancement of Musick from Mr. Matthew Lock's Observations* (London, 1672), which in turn provoked Locke's *The Present Practice of Musick Vindicated* (London, 1673), including a supporting essay by John Phillips, Milton's nephew, and a letter from Playford.

In essence, Salmon proposed to reform notation by replacing the Gamut with the ordinary letters of the scale, by abandoning tablature, and by introducing a universal four-line stave in which the bottom line would always be G and its pitch would be indicated by the symbols B (bass), M (mean) and T (treble). It was probably unrealistic to expect Locke to welcome such far-reaching proposals from an amateur, but he and his supporters did not advance their case by responding with personal abuse rather than logical arguments. In many respects, the debate exemplifies the contemporary conflict between conservative and progressive thought systems, the former characterized by a respect for tradition and rote learning, the latter by an insistence on the dispassionate evaluation of evidence. Not surprisingly, Salmon was supported by the Royal Society, and was partially proved right: the Gamut was eventually abandoned, staff notation did replace tablature, and, ironically, Playford soon began to confine himself to treble and bass clefs when publishing vocal music.

Locke's main sphere of activity outside the Restoration court was London's commercial theatre. As already mentioned, he had contributed to some of Davenant's operatic experiments during the Commonwealth, and he

continued the association after 1660, becoming the main house composer for Davenant and his Duke of York's Company, first at Lincoln's Inn Fields Theatre and after 1671 at Dorset Garden. He wrote music for at least 12 of their productions, though for some reason his last known theatre music, a lost song for D'Urfey's *The Fool Turn'd Critick* (November 1676), was for the rival King's Company. The 'Instrumental, Vocal and Recitative Musick' for Stapylton's *The Step-Mother* (October 1663) is unfortunately lost, as is most of his music for Shakespeare's *Macbeth* (November 1664), but we have three important late dramatic works: the masque of Orpheus and Euridice from Settle's *The Empress of Morocco* (July 1673), the suite of incidental music for *The Tempest* (April 1674), and an extended score for Shadwell's *Psyche* (February 1675), the prototype of the Purcellian type of semi-opera.

Locke remained active until the last few months of his life. In 1673 John Carr issued his *Melothesia, or Certain General Rules for Playing upon a Continued-Bass*, a publication that includes keyboard music by him and eight colleagues. Locke 'carefully reviewed' it, and also apparently edited Carr's anthology *Tripla concordia, or A Choice Collection of New Airs in Three Parts* (London, 1677, but licensed on 2 March 1676), which includes three suites by him. These were apparently written specially for the collection, and are probably his last consort music; much of the rest of the music, by five younger colleagues, is corrupt or incompetent. This is perhaps a sign that his powers were failing, though he was appointed Master of the Music when Nicholas Staggins went abroad in spring 1676, and was still deputizing on 22 May 1677. He died shortly before 10 August 1677, when Henry Purcell was sworn in to his post as composer to the 24 Violins. There is no evidence that Purcell was Locke's pupil, as has often been claimed, though his early music is heavily influenced by Locke, and he wrote an affecting elegy, 'On the Death of his Worthy Friend Mr. MATTHEW LOCKE', *What hope for us remains now he is gone?* (z472). Locke's daughter Maria administered his estate, which implies that his wife was already dead and that there was no male heir.

2. Domestic consort music. Locke was one of the greatest English composers of consort music after the Jacobean golden age, and consort music forms the largest and most consistently important part of his surviving output. The main source is the autograph score, *GB-Lbl* Add.17801 (fig.2), which contains six sets, each with a different scoring. He probably wrote most of them during the Commonwealth, when the interest in domestic consort music was at its height and before he had acquired demanding theatre or church commitments, though he revised them in later life.

Locke made a distinctive contribution to English consort music in the way he ordered the movements of his suites. The structure of *The Little Consort* is relatively conventional. The keys chosen for the suites do not make a meaningful pattern, and the uniform sequence of pavan–air (almand)–courante–saraband uses the established principle that the movements should be ordered in a progression from the slowest and most serious to the fastest and liveliest. *For Several Friends* uses the same principle, but is less orderly: the 54 pieces divide by key into 12 suites with between three and seven movements, though those in G minor/major, D minor/major, A minor/major, and C minor/major are adjacent and were probably intended to be performed together; William Lawes had paired fantasia-suites in this way in the 1630s. Indeed, the six suites that begin with a fantasia could be thought of as extended fantasia suites, particularly if organ accompaniment is used. The set is difficult to date. It was revised extensively before and after it was copied into the autograph, and its backward-looking features might suggest that the first version was written at least as early as *The Little Consort*, though there is no evidence for this in the sources.

2. Autograph manuscript of the opening pavan from Locke's 'The Little Consort of Three Parts', composed 1651 (GB-Lbl Add.17801, f.18)

Despite their early date, the *Duos for Two Bass Viols* are more sophisticated in design. There are four three-movement suites, each consisting of two fantasias and a courante or saraband. The sequence fantasia–fantasia–dance is found in William Lawes's five- and six-part viol consorts, though Locke was the first person to apply it to a complete collection, and the set is the first he organized so that the suites can be performed separately, in pairs or as a complete sequence. By contrast, *The Flat Consort* is relatively incoherent as a set since it has no meaningful key sequence, no standard scoring and no consistent pattern of movements. Indeed, it should perhaps be thought of as two sets, united only by three-part writing, a penchant for flat keys and, presumably, an origin in the musical activities of the Kemble household. The first two

suites are scored for treble, tenor and bass, and have the unusual and effective sequence fantasia–courante–fantasia–saraband–fantasia–jig, while the other three require a treble and two basses and consist (in the revised autograph version) of four-movement sequences of fantasia–courante–fantasia–saraband. The first two may perhaps be a little earlier than the others, since they use the same scoring as the first part of *The Little Consort* and are relatively straightforward, while the other three have more complex and developed fantasias, with some elaborate division writing. However, they all probably date from Locke's Hereford period in the 1650s.

In the first part of *The Broken Consort* and the *Consort of Four Parts* Locke developed more intricate and satisfying versions of the triple-layered pattern used in the *Duos for Two Bass Viols*. They both consist of six suites with the uniform sequence fantasia–courante–air (almand)–saraband, but the suites are also paired by key and by the fact that the odd-numbered fantasias begin with homophonic 'slow introductions'. But Locke took the pairing of suites a stage further in the *Consort of Four Parts* by giving the even-numbered suites a matching 'drag' or conclusion; only the last suite in *The Broken Consort* has this feature. This may mean that the *Consort of Four Parts* is later than has been thought, and it may even have been written after the first part of *The Broken Consort*, despite its scoring for conventional viol consort. Roger North rightly described it as 'a magnifick consort of 4 parts, after the old style, which was the last of the kind that hath bin made', and it certainly contains some of Locke's most mature, complex and sophisticated music.

The Broken Consort was a conscious revival of the pre-Civil War court tradition of contrapuntal consort music, not least in its use of a mixed ensemble of violins, bass viol and continuo instruments; Locke presumably played the organ and the partly autograph *Och* Mus.772–6 contains parts for three theorbos. The fantasias are noticeably less contrapuntal than those in the *Consort of Four Parts*, probably because Locke was aware of Charles II's 'utter detestation of Fancys', and it is perhaps significant that the five suites of the second part begin with pavans rather than fantasias. He only copied the first two into *Lbl* Add.17801, so we do not know whether he was entirely responsible for the rather disorderly sequence found in secondary sources, with suites of three, four and five movements. However, the three extended suites for two violins and bass in *Tripla concordia*, the only important domestic consort music he is known to have written after the early 1660s, are even more disorderly, and are similar to English theatre suites and the loose sequences of movements extracted from Lully's operas that began to circulate in England in the 1670s. They are certainly a remarkable synthesis of Locke's distinctive melodic and harmonic idiom and elements of the French orchestral style.

Locke tended to be an innovator in matters of structure and musical language rather than scoring. The combinations he used in his domestic consort music were not new, though he may have been the first person to write suites for treble, tenor and bass, treble and two basses, and four viols. He was certainly unusual at the time in not providing his consort music with organ parts, though this

Ex.1 Fancy in G from *Tripla concordia*, excerpt

Ex.2 The Masque of Orpheus and Euridice from *The Empress of Morocco*, excerpt

does not mean that he did not intend organ accompaniment; it is likely that he accompanied from score at the keyboard (there are a few figures in *Lbl* Add.17801), and there are continuo parts in the secondary sources of most of his sets. He was not the only English composer of the period to cultivate an angular and unpredictable melodic and harmonic idiom, but he went further than most in extracting harmonic colour from unprepared dissonances, and in raising the emotional temperature by speeding up relatively conventional progressions (ex.1). His fantasias contain some skilful counterpoint, though he was not much interested in contrapuntal devices for their own sake, and the feature of his consort suites that remains in the memory is his superb melodic sense, whether

deployed in an elegant courante, a passionate slow almand or an exubherant one-in-a-bar saraband.

3. Other instrumental music. Locke has long been recognized as an important and original orchestral composer by virtue of his suite for *The Tempest*, with its extraordinarily vivid curtain tune depicting the storm at the opening of the play. It was published in *The English Opera* (London, 1675), together with his music for *Psyche*, but most of the rest of his orchestral music survives only in a problematic manuscript score, 'The Rare Theatrical' (*US-NYp* Drexel 3976). It seems to contain much of the incidental music he wrote for Restoration plays, but only one or two of the 78 pieces can be identified with particular productions, and the copyist evidently broke up suites so as to organize the manuscript by key. There is little doubt that it was all intended for the 24 Violins, a section of which worked regularly for the Duke's Company from winter 1664–5. The collection also contains some fine suites of branles, probably written for court balls, and most of the pieces seem intended for a single violin part, two violas, and bass violins in B♭, the scoring used by the group at the time. However, *The Tempest* suite and a few of the 'Rare Theatrical' pieces have two equal soprano parts, which suggests that a change to the more modern 'string quartet' scoring was made during the 1670s.

Locke's keyboard music is less important. His harpsichord works, mostly printed in *Melothesia*, are simple pieces doubtless written for teaching, some arranged from consort dances. The seven organ voluntaries in *Melothesia* were probably also written for teaching, intended to serve as specimens of what was essentially an improvisation genre. Locke claimed in *The Present Practice of Musick Vindicated* that he had written lute pieces without having 'the Practical Use of the *Lute*'. They are lost, as are the pieces for two flageolets that Pepys played with Thomas Greeting on 13 August 1668.

4. Sacred music. Locke copied Latin motets by Galeazzo Sabbatini, Giovanni Rovetta and Francesco Costanzo da Cosena (*fl* 1621) when he was in the Netherlands in 1648, and would have come across other examples of the genre in Richard Dering's *Cantica sacra* (RISM 1662[4]); most likely, he also knew the corpus of Italian music copied by musicians in Oxford from Venetian prints now at Christ Church. His own Latin motets are for one to five solo voices with or without strings and continuo. Some of them were published in *Cantica sacra* (London, 1674[2]), the sequel to Dering's collection, and all of them are similar to Italian models in scoring, formal outlines and idioms of word-setting, though they use a much more angular and dissonant melodic and harmonic idiom, related to English traditions of declamatory song. The finest are those that are most extended and depend on the interplay of voices and violins, such as *Audi, Domine, clamantes ad te* and *Super flumina Babylonis*. They mostly survive in Oxford sources, and may have been written for the Music School in the 1660s.

Locke's domestic sacred music, for one to three solo voices and continuo, uses a similar blend of Italian and English idioms. The most important pieces are a group of 14 psalm settings for three male voices and continuo in the autograph manuscript *GB-Lbl* Add.31437, ff.1–19. They have often been thought of as church music, but they belong to a tradition of three-part devotional psalm settings that goes back to *Choice Psalmes* (RISM 1648[4]) by William and Henry Lawes. Four devotional solos and duets were published in *Harmonia sacra* (1688[1]), perhaps at the instigation of Henry Purcell, who had a part in editing the volume.

It is possible that Locke wrote church music for Exeter Cathedral before the Civil War, though there is no reason to think that any of his surviving anthems were written before 1660. The most old-fashioned, such as the fine *When the son of man shall come in his glory*, with its Schütz-like sense of drama, still use an instrumental consort to accompany the solo voices in the Jacobean manner, though there is a continuo part as well. It is likely that they were written in the early 1660s, at a time when cornetts and sackbuts were still used in the Chapel Royal. We have only two Locke anthems with violins in the modern Restoration style, *O be joyful in the Lord, all ye lands* and *Be thou exalted Lord*. The latter is virtually the only true polychoral work from Restoration England, and seems designed to exploit the geography of Whitehall chapel. It is scored for three 'Quires' of voices. The first was probably sung by four solo voices, perhaps in the organ gallery, and was joined from time to time by soloists from the two choirs, presumably placed in the choirstalls on the floor of the chapel. They were accompanied by two groups of instruments, a consort of two violins, two bass viols and two theorbos, probably placed in a gallery, and a five-part string orchestra disposed in the French manner, presumably on the floor of the chapel. Magnificent as this work is, Locke's penitential verse anthems with organ, such as *Turn thy face from my sins* and *Lord let me know mine end* were more influential at their time with their fruitful synthesis of formal counterpoint and expressive soloistic vocal writing – the English equivalents of the *stile antico* and the *stile moderno*.

5. Secular vocal music. Although Locke wrote some effective single songs, dialogues and partsongs, his most important secular vocal music was written for plays and masques. His contributions to *Cupid and Death*, the only English masque with more or less complete surviving music, are relatively immature, though the Fifth Entry is set to almost continuous music, with some effective florid dialogue passages between Mercury, Cupid, Death and Nature. It is unfortunate that Locke published his music for *Psyche* in a compressed form in *The English Opera*, for the score does not contain all the details of the instrumental writing; Thomas Shadwell's text mentions that Locke used flageolets, flutes, 'pipes', recorders, 'hoboys', cornetts, sackbuts, trumpets, drums, strings, organ and harpsichord. As it stands, the most impressive passages are the dialogues for solo voices, such as the beautiful and highly original quartet of despairing lovers in Act 2, or the song of three Elizian Lovers in Act 5. However, his most successful surviving dramatic work is the little masque of Orpheus and Euridice from Act 4 of *The Empress of Morocco* (ex.2). With its sensitive yet flamboyant approach to setting English in the declamatory style, it must have been an important model for the miniature all-sung operas written by his followers, John Blow and Henry Purcell.

ANGLICAN CHURCH MUSIC

Be thou exalted Lord (A Song of Thanksgiving for his Majesty's Victory over the Dutch), verse anthem, 12vv, 2 vn, 2 b viols, 2 theorbos, 5 str, bc, 1666, H
How doth the city sit solitary, verse anthem, 5/5vv, org, H
I will hear what the Lord God will say (1p. Lord thou hast been gracious), verse anthem, 7/5vv, 3 insts (? cornett, 2 sackbuts), bc, H
Lord have mercy on us (res to the Ten Commandments), I believe in one God, the Father Almighty (Nicene Cr) (Communion Service, F), full, 4vv, *Ob**, *Lbl*, Modern Church-Musick Preaccus'd, Censur'd and Obstructed in its Performance before his Majesty (London, 1666), ed. F. Bridge (London, 1917)
Lord let me know mine end, verse anthem, 5/4vv, org, H
Lord thou hast been gracious (2p. I will hear what the Lord God will say), verse anthem, 4/5vv, 3 insts (? cornett, 2 sackbuts), bc, *Lbl* (attrib. Blow)
Not unto us, O Lord, verse anthem, 8/8vv, org, H
O be joyful in the Lord, all ye lands, verse anthem, 4/4vv, 4 str, bc, H
The Lord hear thee in the day of trouble, verse anthem, 5/5vv, 4 insts (? 2 cornetts, 2 sackbuts), bc, H
Turn thy face from my sins, verse anthem, 5/5vv, org, H
When the son of man shall come in his glory, verse anthem, 6/6vv, 4 insts (? 2 cornetts, 2 sackbuts), bc, H
Who shall separate us from the love of Christ, verse anthem, 4/4vv, bc, H

fragments

God is gone up with a merry noise, 1v only, *Lbl*
Lord, thou hast been our refuge, 1v only, *IRL-Dcc*
Lord, who shall dwell in thy tabernacle, 3vv only, *Dcc*
O clap your hands together, 1v only, *GB-Lbl*
O praise God in his holiness, 1v only, *Y*

doubtful

Mag, Nunc (Evening Service, d), verse, 5/4vv, *Lbl* (attrib. Locke by later hand)
O clap your hands together, 4/4vv, 4 viols, bc, *Ob* (attrib. Locke by later hand)

lost

Awake, awake, put on thy strength, text in J. Clifford, The Divine Services and Anthem (London, 2/1664)
O sing unto the Lord a new song, text in J. Clifford, The Divine Services and Anthems (London, 2/1664)

LATIN MOTETS

Ad te levavi oculos meos, for Oxford Music School, 1665, 3vv, 2 tr viol/vn, 2 b viol, bc, H
Agnosce O Christiane, 2vv, bc, *Lbl**, 1674[2]
Audi, Domine, clamantes ad te, 5vv, 2 tr viol/vn, b viol, bc, H
Cantate Domino canticum novum, 2vv, bc, *Lbl**, 1674[2], ed. C. Bartlett (Wyton, 1989)
Bone Jesu verbum Patris, 2vv, bc, *Bu*
Domine est terra, 3vv, 2 tr viol/vn, b viol, bc, H
Jesu auctor clementie, 3vv, 4 str, bc, H
Jubilate Deo omnis terra (Gl added for Oxford Music School, 1665), 2vv, 2 tr viol/vn, b viol, bc, H
O Domine Jesu Christe, 2vv, bc, 1674[2], ed. C. Bartlett (Wyton, 1989)
Omnes gentes plaudite manibus (2p. Ascendit Deus), 2vv, bc, 1674[2]
Recordare Domine creaturae tuae, 2vv, bc, 1674[2]
Super flumina Babylonis, 4vv, 2 tr viol/vn, b viol, bc, H

doubtful

Bone Jesu verbum Patris, 1v, bc, L
Cantate Dominum et invocate nomen eius; Quid faciemus cum tuba de coelo intonare; Urbs caelestis, urbs beata; Vox dilecti mei: all 2vv, bc, *B-Bc* (attrib. Locke), *GB-Cfm* (attrib. S. Taylor)

Gratiam fac mihi, O Deus, 3vv, 2 tr viol/vn, b viol, bc, *US-NYp* (anon., probably by Locke)

ENGLISH DEVOTIONAL SONGS AND PARTSONGS

And a voice came out of the throne, 2vv, bc, 1688[1]
Arise, O Lord, 3vv, bc, *GB-Lbl**
Behold how good, 3vv, bc, *Lbl**, 1663[6], W
Blessed is the man, 3vv, bc, *Lbl**
Come honest sexton (The Passing Bell), 2vv, bc, 1688[1], L
From the depth have I called, 3vv, bc, *Lbl**
A hymn, O God, becometh thee in Syon, 3vv, bc, *Lbl**, *Ob*
I know that my Redeemer lives, 2vv, bc, 1688[1], ed. T. Roberts, *Restoration Duets*, ii (London, 1986)
In the beginning, O Lord, 3vv, bc, *Lbl**; ed. in Anthems for Mens Voices, i (London, 1965)
Let God arise, 3vv, bc, *Lbl**; ed. in Anthems for Mens Voices, i (London, 1965)
Lord let me know mine end, 2vv, bc, 1674[2], reduction of the verse anthem
Lord now lettest thou thy servant, 3vv, bc, *Lbl**
Lord, rebuke me not, 3vv, bc, *Lbl**; ed. in Anthems for Mens Voices, ii (London, 1965)
O give thanks unto the Lord, for he is gracious, 3vv, bc, *Och*, ed. J.E. West (London, 1908)
O how pleasant and how fair, 2vv, bc, 1674[2]
O Lord hear my prayer, 3vv, bc, *Lbl**; ed. in Anthems for Mens Voices, i (London, 1965)
O Lord our Lord, how marvellous is thy name, 3vv, bc, *Lbl**
Praise our Lord, all ye gentiles, 3vv, bc, *Lbl**, W
Sing unto the Lord a new song, 3vv, bc, *Lbl**, ed. J.E. West (London, 1905)
Then from a whirlwind oracle, 1v, bc, 1688[1], L
When I was in tribulation, 3vv, bc, *Lbl**

doubtful

As on Euphrates shady banks; I to thy wings for refuge fly; Lord, to my prayers incline; My prayers shall with the sun's uprise ascend; New composed ditties sing; Now great Jehovah reigns; Now in the winter of my years; Remember Edom Lord: all 2vv, bc, *B-Bc* (attrib. Locke), *GB-Cfm* (attrib. S. Taylor)

SACRED CANONS

Domine Jesu Christe miserere mei, canon 6 in 3, 6vv, *Observations upon a Late Book* [see 'Theoretical Works'], *GB-Lbl*
Gloria Patri et Filio, canon 4 in 2, 4vv, *Bu*
Glory be to the Father, canon 2 in 1, 2vv, *Lbl*
O bone Jesu miserere mei, canon 2 in 1, 2vv, *Observations upon a Late Book* [see 'Theoretical Works'], *Lbl*
Sanctus, sanctus, sanctus, Dominus Deus, canon 3 in 1, 3vv, *Observations upon a Late Book* [see 'Theoretical Works']

Domine salvum fac regem, 8vv, lost, mentioned by Pepys, 21 Feb 1660

SECULAR VOCAL

Alas, alas, who has been here, on the burial of Sir Charles Lucas and Sir George Lisle, 1661, 2vv, bc, L
All things their certain periods have, for the New Year, 1666, 3/4vv, bc, *GB-Lbl*, *Ob*
Ambitious man, why dost thou raise, 1/4vv, bc, *Lbl*, *Lgc*
Cloris, it is not in our power (G. Etherege), 3vv, 1667[6]
Come let us drink and never think, catch, 3vv, 1673[4]
Descende caelo cincta sororibus regina, Oxford academic ode, 1673, 4vv, 2 vn, b viol, bc, *Och*
Divinest siren, cruel fair (T. Stanley), 1v, bc, L
Hail ye hallowed numens of this place, 1/3vv, 1667[6]

PETER HOLMAN

Lockenburg [Lochemburgho], **Johannes** [Jhänj] (*d* Munich, 1591 or 1592). ?German composer, organist and court servant. He was a valet in the pay of Duke Albrecht V of Bavaria at his court at Munich and later a composer in the Kapelle directed by Lassus. Payments to him are first recorded in the treasury accounts in 1558. About 1562 he was taken on permanently as an organist. His starting salary was 166 florins, but he was often granted special honoraria (100 gold crowns in 1567), and when he married, in 1568, the duke gave him a drinking-vessel worth 82 florins. In the same year Massimo Troiano (in his *Discorsi delli triomfi*) praised him as a skilled composer. In court documents from about 1570 to 1575, the period of his main activity in Lassus's Kapelle, he is not described as organist but only as a *chamerdiener-officier*. He enjoyed a close friendship with the musicians of the Landshut Kapelle of Duke Wilhelm V, including Gosswin. He was awarded an annuity for life of 250 florins by a ducal decree of 26 October 1581. He was one of several competent minor composers in Lassus's circle. His close connections with Lassus are attested by his three parody masses, one of which is based on a chanson by Lassus, *Avec vous mon amour finira* (from his first print, of 1555). After Lassus's death, Lockenburg's mass on the chanson *Or sus à coup* was wrongly ascribed to Lassus and printed thus in Paris in 1607, an error repeated in several subsequent editions. The mass on Crecquillon's *Se salamandra* has also on occasion been wrongly attributed to Lassus.

WOLFGANG BOETTICHER

Lockhart, Beatriz (*b* Montevideo, 17 Jan 1944). Uruguayan composer. She started her studies at the age of five with Emilia Conti de Alvarez (piano), and at 15 entered the Conservatorio Nacional de Música, being instructed by Carlos Estrada and Héctor Tosar. From 1969 to 1970 she attended the Di Tella Institut in Buenos Aires to study composition and electronic music with Ginastera, Gandini and Kroepfl. During that time she wrote orchestral, chamber and piano works, and electronic music. From 1974 to 1988 she was in Venezuela, teaching in Caracas at the Conservatorio Juan José Landaeta and the Escuela de Música José Lorenzo Llamozas. She has won composition awards from the Instituto Panamericano de Cultura, Montevideo (1972), the Símon Bolívar University, Caracas (1977), and the municipality of Caracas (1978, 1983, 1984, 1987). She has attended symposia in Venezuela, Mexico, Puerto Rico, Chile and Uruguay, where she has presented her works. Her *Convergencias* was performed at the International Conference Institut für Neue Musik in Weiz in 1985, and her *Triptico sudamericano* and *Microconcierto* were heard at the First Festival of 20th-Century Latin American Chamber Music in Caracas in 1986. She teaches at the University of Montevideo and is married to the composer Mastrogiovanni.

SUSANA SALGADO

Lockhart, James (Lawrence) (*b* Edinburgh, 16 Oct 1930). Scottish conductor. He studied at Edinburgh University and the RCM, and worked as a répétiteur successively at Münster, Munich, Glyndebourne and Covent Garden, as well as directing the opera workshop of the University of Texas at Austin (1957–9). He made his début with

Sadler's Wells Opera in 1960 (*Figaro*), and after two seasons there became resident conductor at Covent Garden (1962–8). He conducted the première of Walton's *The Bear* for the English Opera Group at the Aldeburgh Festival (1967), which he also recorded. He was music director of the WNO (1968–73), where his wide repertory included the first production of Berg's *Lulu* by a British opera company (1971), and his qualities as a trainer and his overall skill decisively strengthened the company's musical standards.

From 1972 to 1981 Lockhart was Generalmusikdirektor at Kassel, where his activities ranged from the *Ring* cycle to the first German production of Gilbert and Sullivan's *The Yeomen of the Guard* (as *Der Gaukler von London*) in 1972. He moved to Koblenz (1981), where he introduced several Britten works and a Janáček cycle to the opera repertory and was made director of the Rhine State PO, with whom his recordings include orchestral works by Maurice Emmanuel and Paul Le Flem. In the USA he made his Metropolitan début (1984) conducting the ENO in *War and Peace*, and conducted *Peter Grimes* at San Diego. In 1986 he became director of opera at the RCM (from 1992 the London Royal Schools Vocal Faculty), where his productions have included the première of Paul Max Edlin's *The Fisherman* (1989) in association with London International Opera Festival. As a pianist Lockhart is a sensitive accompanist of singers, notably the soprano Margaret Price, with whom he has made a number of recordings.

ARTHUR JACOBS, NOËL GOODWIN

Lockspeiser, Edward (*b* London, 21 May 1905; *d* Alfriston, Sussex, 3 Feb 1973). English musicologist and composer. He studied in Paris (1922–6), during the last year as a pupil of Nadia Boulanger, and at the RCM (1929–30) under Kitson and Malcolm Sargent. He worked as a composer and conductor (founding the Toynbee Hall Orchestra in 1934) before becoming London music critic for the *Yorkshire Post* in 1936. From 1941 to 1950 he worked for the BBC, after which he spent his time teaching and as a musical journalist.

Lockspeiser's chief interest was French music. His pioneering Master Musicians study of Debussy (1936) was followed by 30 years' intensive research on the life and personality of the composer, culminating in his two-volume *Debussy: his Life and Mind* (1962–5). In his teaching he stressed the value of studying a composer's social and aesthetic background, and in his last work extended this principle to the visual arts. Lockspeiser's compositions date mainly from the 1920s, though he later wrote some film music. Only one work was published (*Deux mélodies*, Paris, 1926). For his services to French music he was made an Officier de l'Académie in 1948. His extensive library was acquired after his death by Lancaster University.

DAVID SCOTT

Lockwood, Annea [Anna] **(Ferguson)** (*b* Christchurch, New Zealand, 29 July 1939). New Zealand composer. After attending Canterbury University, New Zealand (BMus 1961), she studied with Peter Racine Fricker at the RCM, London (1961–3); she also attended Darmstadt summer courses (1961–2) and worked with Koenig at the Staatliche Hochschule für Musik, Cologne, and at the Bilthoven electronic music studio (1963–4). In 1973 she went to the USA and taught at Hunter College, CUNY, and in 1982 joined the staff at Vassar College.

While working in many genres, Lockwood' consistently focusses on timbre and performance with spatial considerations. Her early works, including the Violin Concerto (1962), the chamber cantata *A Abélard, Héloise* (1963) and *Aspekte einer Parabel* (1964), are atonal. In the mid-1960s she moved away from both instrumental music and synthesized electronic materials to work with acoustic sounds from nature, attracted by their subtle complexity, rich variety and unpredictability. Her imaginative *Glass Concert*, performed many times from 1966 to 1973, uses diverse sizes and shapes of glass which are struck, rubbed, bowed and snapped. Other examples of her work as an instrument builder include *Sound Hat* and *Sound Umbrella* (both 1970) which create a private concert for the wearer of delicate sounding, suspended objects such as bamboo chimes and table tennis balls. For *Silver* (1984) she created a basketball-size 'sound ball' containing two colanders, six speakers, amplifiers and an FM receiver, all covered with gray foam; the sound ball was also used in *Three Short Stories and an Apotheosis* (1985), playing a Gertrude Stein text as it was passsed through the audience.

During the 1970s and early 80s she turned her attention to tape pieces and the exploration of other performance possibilities. *Tiger Balm* (1970), for tape, effectively combines the sounds of a cat purring, a heartbeat, gongs, Jew's harps, tigers mating, an airplane, and a woman's sexual arousal. Here, and typically, Lockwood's arrangement and selection of sounds are crucial since the sounds used are unmodulated. Participatory pieces, such as *Humming* (1972), demonstrate her interest in the connections between sound and the body, stemming from her study of psycho-acoustics during the early 1970s. Among her most unusual and controversial installations was *Piano Transplants* (1968–72) in which pianos were burnt, gradually drowned in a shallow lake, planted in a garden or anchored at a beach. In *A Sound Map of the Hudson*

River (1982) the musical parameters of rhythm, pitch, counterpoint, texture and form are constructed using recorded sounds from 15 locations along the river. In the mid-1980s Lockwood returned to composing for acoustic instruments and for voices, composing solo pieces and chamber works such as *Thousand Year Dreaming* (1990) and *Ear-Walking Woman* (1996). Throughout her career she has frequently collaborated, co-authoring early tape works and also working with performers, such as in *Monkey Trips* (1995) composed with the ensemble California EAR Unit.

J. MICHELE EDWARDS

Lockwood, Lewis (Henry) (*b* New York, 16 Dec 1930). American musicologist. He took the BA in 1952 at Queens College, CUNY, where he studied with Edward Lowinsky; subsequently he worked at Princeton University with Strunk and Mendel, taking the MFA in 1955 and the PhD in 1960. He joined the Princeton faculty in 1958 and was appointed professor in 1968. He was appointed professor at Harvard University in 1980, and in 1985 was named Fanny Peabody Professor of Music. From 1964 to 1967 he was general editor of the *Journal of the American Musicological Society* and he was president of the AMS from 1982 to 1987.

Lockwood's research focusses on music history and its intellectual contexts. His principal areas of concern are Renaissance music and Beethoven studies. His Renaissance interests include the musical reforms that followed the Council of Trent and the role of Vincenzo Ruffo in their implementation. He has made a thorough study of Ruffo's life and works, showing the stylistic differences between the pre- and post-Tridentine compositions and using archival materials to document Ruffo's relationships with contemporary composers and the Catholic hierarchy, particularly Cardinal Borromeo. Lockwood's other Renaissance investigations include a study of musical activities at the court of Ercole I d'Este at Ferrara, and several approaches to the problems of *musica ficta*, in which he has examined the writings of contemporary theorists and used computers to help determine those melodic and harmonic configurations that might require the addition of accidentals.

As one of the leading American Beethoven scholars, Lockwood is concerned with the use of sketches and autograph scores in textual criticism. His research into the sources of the op.69 cello sonata and the unfinished piano concerto of 1815, among other works, indicate no clear line of development from sketch through working score to fair copy, but rather an interrelationship between these sources as Beethoven attempted to clarify points of melodic, harmonic and formal structure and details of scoring.

PAULA MORGAN

Lockwood, Normand (*b* New York, 19 March 1906). American composer. He studied with Respighi (1924–5), Boulanger (1925–7) and was a fellow of the American Academy in Rome (1929–32). His teaching appointments included positions at Oberlin Conservatory (1932–43), Union Theological Seminary (1945–53), Trinity University (1953–5), the University of Hawaii, Manoa (1960–61), and the University of Denver (1961–74). In 1945 Stravinsky included him on a list of ten notable American composers. He has received two successive Guggenheim Fellowships (1943–5), honorary doctorates from Berea College (1974) and the University of Denver (1979), and awards from the American Academy and Institute of Arts and Letters (1946, 1981) and the Colorado Council on the Arts and Humanities (1971) among others.

Lockwood's compositional priority in his approximately 500 works is timbre. His adept text settings comprise tonal (*Out of the Cradle Endlessly Rocking*, 1938), modal (*To Margarita Debayle*, 1977) and starkly dissonant harmonic languages (*Donne's Last Sermon*, 1978; *Medea redux*, 1992). Bitonal, quartal, octatonic and 12-note constructions appear in the concertos for organ and brasses (1951, 1977), the Piano Concerto (1973) and *Reflections on the Surface of Time* (1993). In most of his vocal works the musical structure evolves from the text; leitmotifs are employed in the operas and oratorios, and motivic relationships are also important in the instrumental compositions.

KAY NORTON

Loco (Lat.: 'in its place'). A term used to countermand a previous instruction such as *8va bassa*, ALL'OTTAVA or *sul ponticello*.

Locrian. The term commonly used when referring to the octave species from *B* to *b* divided at *f* and consisting of a diminished 5th plus an augmented 4th, *B–c–d–e–f* + *f–g–a–b*; Glarean, in the *Dodecachordon* (1547), called this division of the octave HYPERAEOLIAN. The term 'Locrian' is mentioned by several classical writers, including Cleonides (as an octave species) and Athenaeus (as an obsolete *harmonia*); it occurs twice in classical citations in the *Dodecachordon* (i/9 and i/25) and similarly in Zarlino's *Le istitutioni harmoniche* (2/1573, p.367). There is no warrant, however, for the modern usage of 'Locrian' as equivalent to Glarean's 'Hyperaeolian' in either classical authority, Renaissance modal theory or its successive phases in the 17th and 18th centuries (see, for example, the entries 'Modus musicus' and 'Modus locricus' in *WaltherML*), or modern scholarship on ancient Greek musical theory and practice.

HAROLD S. POWERS

Loder. English family of musicians.

(1) John David Loder (bap. Bath, 14 Aug 1788; *d* London, 13 Feb 1846). Violinist and music publisher. A son of John Loder, musician of Bath (bap. Candle Stourton, Devon, 23 Sept 1757; *d* Weymouth, 1795), he began early to play in concert orchestras in Bath, and on 4 April 1800 took the first violin in a string quartet by Blasius at the New Assembly Rooms. From 1799 to 1836 he played in the orchestra of the Theatre Royal, most of the time as leader. From about 1812 his annual benefit night there became a considerable occasion, with visiting celebrities from London. In 1821 he engaged Angelica Catalani for a grand concert on 7 October; she returned her fee, 'as a small tribute of regard for his private worth, and high professional skill'. He resigned in 1836 after a public quarrel with Woulds, the lessee of the theatre, but returned for two seasons in 1840–41.

Loder was the first Englishman to lead the orchestra at the Philharmonic Society of London, which he did at least once a year from 12 May 1817. From 1826 he played a large part at the Three Choirs Festivals. He was in business as a music publisher at 46 Milsom Street, Bath. In 1840 he became a professor of violin at the RAM, and he also played at the Ancient Concerts, where he succeeded Franz Cramer as leader in 1845. From 1842 until his death he played the viola in Dando's Quartet Concerts at Crosby Hall. His *General and Comprehensive Instruction Book for the Violin* (1814) was widely used, and was republished as late as 1911. He also produced three duets for two violins (1837) and *The Whole Modern Art of Bowing* (1842).

An uncle of John David Loder, Andrew Loder (bap. 1751), was organist of the Octagon Chapel, Bath; he published *A Collection of Church Musick* (Bath, 1798) which included ten hymn tunes of his own composition. One of John David Loder's seven children was John Fawcett Loder (*b* Bath, 1812; *d* London, 16 April 1853), who was active in Bath as a violinist, teacher and concert manager before moving around 1840 to London, where he worked as an orchestral player and leader.

(2) Edward (James) Loder (*b* Bath, 1813; *d* London, 5 April 1865). Composer, son of (1) John David Loder. His mother, formerly Miss Mills, came of a long line of actors and actresses, and was stepdaughter of the comedian John Fawcett (1768–1837). Musical ability and early training came from his father. He was sent to Frankfurt in 1826 to study under Ferdinand Ries, an old friend of the family. He returned to England in 1828, and in 1830 arranged the music for a production of *Black-eyed Susan* at the Theatre Royal, Bath, taking the melodies from Dibdin. Later he returned to Germany with the idea of qualifying for the medical profession, but changed his mind and again placed himself under Ries, whose ambitious but unsuccessful English opera *The Sorceress* had been produced in London in 1831. Loder's chance to excel in the same direction came in 1834, when S.J. Arnold decided to open the rebuilt Lyceum Theatre as the English Opera House. He commissioned several new operas, one of which was Loder's *Nourjahad*, based on an old play of Arnold's. The theatre opened on 14 July with a week of established operas; *Nourjahad* followed, and Macfarren later called it 'the inaugural work of the institution of modern English operas'. Though it contained spoken dialogue, like *Oberon* and *The Sorceress*, it was also, like them, a genuine musical drama, not a

string of independent songs and ballads in the manner of Bishop. The opera found favour with the critics. William Ayrton acknowledged that 'the music highly gratified, and not a little surprised us . . .. Every piece in the opera is calculated to please both those who are and those who are not qualified to judge it critically'. As a popular success it was somewhat overshadowed by Barnett's *The Mountain Sylph*, which opened at the same theatre on 25 August.

Loder had few opportunities in his life to develop this promising beginning. As *The Times* put it, he 'chiefly occupied himself in the production of such works for the music publishers as would be most likely to procure him the means of subsistence'. For some years he was under contract with Dalmaine & Co. to furnish a new composition every week, and he produced a very large number of songs and partsongs during the next ten years. His next five dramatic productions were pot-boilers of low degree, including the so-called 'opera' *Francis the First* which was merely a collection of his songs strung together on the slenderest dramatic thread. One of them, 'The Old House at Home', became his most popular song.

Meanwhile, however, Loder had 'made many successful appeals to amateurs of taste and musicians' in the form of more sophisticated compositions, among them a string quartet in E♭, several times performed by the Society of British Musicians, and a set of nine sacred songs dedicated to Sterndale Bennett. In 1846 he became musical director at the Princess's Theatre, and returned at last to serious opera composition, with the production of *The Night Dancers*. Described as a 'romantic opera', it had a libretto by George Soane based on a French version of a German folk tale, *The Wilis*, already familiar to London audiences in Adolphe Adam's ballet *Giselle*. It was a very considerable success with both press and public. The composer was called for each night for a fortnight; the work was revived in 1850, and in many later years, having in the meantime travelled as far as New York and Sydney (1847).

With such encouragement Loder might well have felt able to continue to develop his serious operatic style. But the three pieces he brought out at the Princess's Theatre in 1848 represent a return to the old ballad opera form. A somewhat more serious work was the 'operatic masque' *The Island of Calypso*, which in the later 19th century would have been called a 'cantata'. It was written for the National Concerts in 1850, but when these fell through it was not performed until 14 April 1852, when Berlioz conducted it for the New Philharmonic Society at Exeter Hall.

In 1851 Loder was engaged as musical director of the Theatre Royal, Manchester, by William Howard Glover, who had begun an ambitious programme of English opera there in 1848. The season frequently included one or two weeks of Italian opera by one of the London companies on tour, but apart from that Loder was in almost sole charge of the music and was evidently kept busy composing and arranging new farces, pantomimes and overtures, the music of which has disappeared. His last important work, and perhaps his masterpiece, *Raymond and Agnes*, was produced there on 14 August 1855, and had a run of seven performances. It had been announced originally (as *Agnes and Raymond*) for performance during the 1849–50 season at the Princess's Theatre. At Manchester the opening was several times postponed, isolated songs from the work being sung at concerts in the town. It was not a great success. The theatre was half empty on the opening night; the local newspapers gallantly defended the cast, but it is obvious that the difficult music was too much for the provincial singers (Henri Drayton as the Baron, and George Perren and Miss S. Lowe in the title roles).

Shortly after this disappointment Loder was attacked by a brain disease, which removed his only means of earning a living and soon brought him into poverty and distress. He had to give up the Manchester position and return to London. A subscription to help him was started by some fellow musicians, and was publicized by the *Musical World* in 1856 and 1857. His friends and family made efforts to induce the Pyne–Harrison company to perform *Raymond and Agnes* at Covent Garden in 1858; eventually its only London production was given by another short-lived 'English opera company' (formed by Augustus and Hamilton Braham, Susan Pyne and a Mme Rudersdorff) on 11 June 1859 at the St James's Theatre. Loder was too ill to conduct, and the performance was directed by his cousin (3) George Loder jr. As usual the critics were enthusiastic about the music, but the performance was no better than at Manchester and the production lasted for only a week. On 7 July a charming light operetta *Never Judge by Appearances* was staged at the Adelphi Theatre; it was probably written and first performed during Loder's Manchester period. The following year *The Night Dancers* was revived at Covent Garden.

But these successes had come too late for Loder to enjoy them. He was by now quite paralysed, and soon sank into a deep coma in which he spent the last four years of his life. He was unmarried, and he died, neglected and alone, at 101 Bolsover Street; his death was registered by his nextdoor neighbour.

Loder's three serious operas show him to have been a composer of outstanding ability. He was the equal of Balfe or any other contemporary in the rich lyricism he could pour into a ballad. 'Wake, my love' from *The Night Dancers*, and 'Farewell, the forest and the plain' from *Raymond and Agnes*, have a warmth of passion not often found in that pale form. But he possessed gifts more unusual in an English composer of his time, among them a mastery of orchestration remarked by critics in all three operas, and the ability to build up cumulative dramatic tension in a series of musical movements, the one indispensable talent for a real opera composer. This last quality is found in the grand scena 'Giselle's dream' in *The Night Dancers*, but it was fully developed only in *Raymond and Agnes*. As Peter Heyworth said, 'in the second act the score develops a sustained dramatic attack that is all too rare in the annals of English opera' (*The Observer*, 8 May 1966). According to Nigel Burton (*GroveO*), 'the sense of drama and depth of musical characterization is close to Verdi, especially in the magnificent confrontation between Raymond and Inigo in Act 2, and in the quintet "Lost! and in a dream"'. Burton considers Loder the foremost composer of serious British opera in this period.

Little of the rest of Loder's large output is of value. He was clearly a victim of the circumstances of his time. In the absence of any effective law of copyright, he was compelled to sell his music to publishers outright for a small sum, and gained nothing from the subsequent popularity of some of his songs. Most of his music was

therefore written not only in great haste, but in deliberate denial of his true musical inclinations. He forced himself to write plain, obvious tunes such as the public wanted, Shakespeare songs in close imitation of Bishop, church music in the accepted church manner. When he wrote as he wanted to, critics acclaimed him, but the public was unimpressed. Many of his best songs were composed for the theatre. A few others, such as 'Invocation to the Deep', 'I heard a brooklet', *Sacred Songs and Ballads*, display something of his full powers. The string quartet, which is not extant, was highly praised by musicians who heard it. A fine flute sonata in E♭, commissioned by Walter Broadwood, survives in a manuscript with the last page missing.

Loder's reputation did not last out the century; *The Night Dancers*, with other fairy operas of the English Romantic school, succumbed to the satire of *Iolanthe*. By 1900 only a few of the popular ballads were known. 'I heard a brooklet', Loder's setting of Longfellow's of the text of Schubert's *Wohin?*, did receive exaggerated admiration: Husk (*Grove2*) said it was 'quite worthy to stand beside Schubert's setting', and Walker called it 'a solitary, but very real, masterpiece ... an almost incredible effort'. Apart from this nothing was done for Loder until the revival of *Raymond and Agnes* at the Arts Theatre, Cambridge, on 2 May 1966. The music was edited by Nicholas Temperley. As Fitzball's libretto could not be found, the story was reconstructed and new dialogue written by Max Miradin. A shortened version was broadcast by the BBC on 18 December 1966. Since then, a copy of the original printed libretto has been discovered at the Library of Congress, Washington.

(3) George Loder jr (*b* Bath, 1816; *d* Adelaide, 15 July 1868). Conductor and composer, nephew of (1) John David Loder. His father, George Loder, was a successful flautist in Bath, and his mother, Fanny Philpot, was a piano teacher and sister of LUCY ANDERSON. He went to the USA in 1836, living first in Baltimore and then in New York, where he was prominent in the early years of the Philharmonic Society (founded 1842). He played the

double bass for five seasons, and occasionally conducted the society's orchestra, notably at the first American performance of Beethoven's Ninth Symphony on 20 May 1846. In 1844 he was principal of the New York Vocal Institute, for which he published *The New York Glee Book* containing many of his own partsongs. In 1856 he went to Australia, with Anna Bishop, and conducted operas at Adelaide. In 1859 he was again in London, conducting the revival of (2) Edward Loder's *Raymond and Agnes* there on 11 June. His operettas *Pets of the Parterre* and *The Old House at Home* were staged at the Adelphi Theatre in 1861–2. In 1863 he returned to Australia, conducting that year in Melbourne the first Australian performance of *Les Huguenots*. He died in Australia after a long illness.

(4) Kate (Fanny) Loder (*b* Bath, 21 Aug 1825; *d* Headley, Surrey, 30 Aug 1904). Pianist and composer, sister of (3) George Loder jr. Precociously musical, she demonstrated perfect pitch at the age of three. She studied piano with Miss Batterbury (an assistant of her mother) and then with Henry Field. At the age of 13 she entered the RAM, studying the piano with her mother's sister, Lucy Anderson, and composition with Charles Lucas. In 1839 she gained the King's Scholarship. She appeared as a pianist at the RAM concerts in March 1840, at Her Majesty's Theatre on 31 May 1844 (when she played Mendelssohn's G minor Concerto in the composer's presence), and at the Philharmonic Society on 15 March 1847, when she played Weber's Concerto in E♭. Her performance of Mendelssohn's G minor Concerto at the Philharmonic on 29 May 1848 achieved the rare distinction of an encore, and her reputation was made; a large connection of private pupils was rapidly formed. Her last appearance in public was on 6 March 1854.

Kate Loder was appointed a professor of harmony at the RAM in 1844. On 16 December 1851 she married Henry Thompson, an eminent surgeon, who was knighted in 1867, created a baronet in 1899 and died on 18 April 1904. They had a son (Sir Herbert Thompson) and two daughters. About 1871 Lady Thompson became gradually paralysed, but she remained a strong influence on English musicians. It was at her house on 7 July 1871 that Brahms's *German Requiem* was first performed in England; she and Cipriani Potter played the accompaniments as a piano duet.

She achieved considerable success as a composer. Her works include an opera *L'elisir d'amore*, an overture (performed at the RAM, 20 April 1844), two string quartets (G minor, 1846; E minor, 1848), a piano trio, a sonata in E for violin and piano (performed at the Society of British Musicians, 5 Oct 1847) and various sonatas and other pieces for piano and for violin and piano. Among her songs, *My Faint Spirit* (1854) is outstanding, and compares favourably with Sullivan's setting of the same text.

NICHOLAS TEMPERLEY

Lodge, (Thomas) Henry (*b* Providence, RI, 9 Feb 1884; *d* West Palm Beach, FL, 16 Feb 1953). American pianist and composer. He began composing in his teens and had at least three pieces published in 1904 (two songs and a march); between 1904 and 1918 he issued some 17 rags and ragtime blues. Having moved to New York, he played piano in theatre and dance orchestras and was engaged for solo cabaret appearances. In the 1920s, while playing in dance orchestras in New York and West Palm Beach, Florida, he also wrote background music for films, spending part of 1930 in Hollywood writing film music.

Lodge is best remembered for his rags and especially for *Temptation Rag* (1909). One of the most successful works in the genre, it was recorded more than any other rag in the years preceding 1920. Lodge's earlier rags were sophisticated danceable pieces which lent themselves well to orchestral treatment, but his later ragtime blues were more sombre and increasingly adventurous in harmony and structure. More than any other rag composer, Lodge explored and developed the use of minor tonalities. Among his more than 100 published works are pieces of all types including songs, waltzes and various pieces of instrumental dance music. His biggest song hit was *That Red Head Gal* (1922).

WORKS
(*selective list*)

all printed works published in New York

Pf rags: Red Pepper: Spicy Rag (1909); Temptation Rag (1909); Oh! You Turkey: a Rag Trot (1914); Geraldine: Valse Hesitation (1915); Silver Fox: a Raggy Fox Trot (1915); Baltimore Blues (1917); The Bounding Buck: a Rag Dance (1918)
Song: That Red Head Gal (G. Van, J. Schenck) (1922)

RICHARD ZIMMERMAN

Lodge [Lodge Ellerton], **John.** *See* ELLERTON, JOHN LODGE.

Lodi, Pietro da (*fl c*1510). Italian composer. His surviving music consists of eight frottolas and two *laude* which were printed in anthologies by Petrucci and Antico. He is also known to have composed music in Petrucci's tenth frottola book, now lost. Apart from a simple strophic setting of a sonnet and one *strambotto* in Petrucci's seventh book, Lodi's frottolas are all *barzellette*, showing his skill as a composer within its metrical and formal limits. In *La beltà ch'ogi è divina*, he inverted the normal order of the *barzelletta*, delaying the *ripresa* until after the stanza. As usual in such cases, the *ripresa* cites a popular tune, in this case, *Beato è colui ch'à bella vicina*. One of Lodi's two *laude*, *Stella coeli extirpavit*, sets a Latin antiphon to the Virgin for relief from the plague, which raged in northern Italy in the first decade of the 16th century; the other, *Legno sancto e glorioso*, sets a corporate, devotional prayer in the first person plural. Like many *laude*, it is a *barzelletta*. The *laude* settings are

similar in style to the frottolas, one being indistinguishable from a *barzelletta* in form.

JOAN WESS/WILLIAM F. PRIZER

Lodïzhensky, Nikolay Nikolayevich (*b* St Petersburg, 20 Dec 1842/1 Jan 1843; *d* Petrograd, 2/15 Feb 1916). Russian diplomat and composer. His father was a cousin of Dargomïzhsky. In 1866 he became acquainted with the Balakirev circle. While pursuing a career in the diplomatic service he also composed, but few of his works were completed and, when he was posted to the Balkans, he gave up composition altogether. He was later appointed consul in New York, and on his return to Russia founded the Society for the Unification of the Orthodox and Anglican Churches. Though accepted socially by Balakirev and his friends, Rimsky-Korsakov regarded him as 'bizarre, incomprehensible, eccentric, intelligent, educated and talented, and apparently fit for nothing'. Few were impressed by his music, though Rimsky referred to a 'powerful, purely lyrical gift for composition' and Stasov remarked that his songs were 'full of poetry, talent and intense emotion'.

Lodïzhensky composed parts of an opera, *Dmitry samozvanets* ('The False Dmitry', based on the episode of Russian history used by Musorgsky in *Boris Godunov*), sections of a cantata entitled *Rusalka*, and sketches for a symphony, all of which remain in manuscript. In 1873 he published a set of six songs, which reveal a gift for attractive melody and an ability to create an appropriate and imaginative musical atmosphere. A further set of four songs, *Rekviyem lyubvi* ('Requiem of Love'), was completed in 1880 and performed in 1882 at a musical evening at the home of Nikolay and Aleksandra Molas (née Purgold, Rimsky-Korsakov's sister-in-law) in the presence of Balakirev, Stasov, Glazunov, Borodin and Blumenfeld, but it remained unpublished.

JENNIFER SPENCER/EDWARD GARDEN

Lodwick. *See* BASSANO family, (2).

Łódź. City in central Poland. It was under Russian domination from 1795 to 1918. From 1844 touring theatre companies, mostly from Warsaw, visited the young industrial city, performing lighter works by Polish composers (Stefani, Kurpiński, Baszny and Duniecki), as well as operas by Weber, Bellini, Donizetti, Rossini and Verdi; Moniuszko's *Halka* was given in 1875 and was followed by his other works. The Victoria Theatre opened in 1877; among the companies that performed here was the successful Opera Łódzka, 1892–6. From 1901 numerous operettas were performed in the newly opened Teatr Wielki. After World War I, operatic life depended on occasional guest performances organized by the Opera Society (from 1925), just as after World War II it relied on regular visits from the Silesian Opera of Bytom (1946–54).

On 18 October 1954 the Society of the Friends of Opera, under the musical direction of Władysław Raczkowski, opened the first permanent opera house in the city, the Opera Łódzka. In 1967 the company moved to the new Teatr Wielki (the largest theatre in Poland outside Warsaw; cap. 1400). Since then it has built a reputation as the best opera company in Poland after those in Warsaw and Poznań, presenting an ambitious repertory, both classical (*Fidelio*, *Mefistofele*, *La Juive* and *Die Walküre*) and modern (works by Henryk Czyż and Romuald Twardowski), and reaching a high standard of singing and production. A second music theatre, the Operetka Łódzka (Łódź Operetta), was opened in 1946.

KORNEL MICHAŁOWSKI

Łodzia z Kępy, Jan [de Kampa, de Kempa, de familia Łodza, Johannes] (*b* Kępa, Great Poland, before 1300; *d* ?Poznań, 14 April 1346). Polish poet. In 1319 he was chancellor, in 1320–21 archdeacon and from 1335 Bishop of Poznań, and in his official capacity he took an active part in the proceedings against the Knights of the Cross, particularly in 1339 in Warsaw, as well as in other important political events of the period. According to the information provided by Jan Długosz (1415–80) and confirmed in the Włocławski Annual, Łodzia was a great lover of both sacred and secular music and wrote sequences and other liturgical works. Three sequences – *In laudem sancti sacro presuli* (text ed. in Szołdrski and Kowalewicz, 1964), *Paule, doctor egregie* and *Salve, salutis ianua* (texts ed. in AH, x, 1819, xlii, 1903, and in Kowalewicz, 1964) – and an antiphon – *Lux clarescit in via* (in *PL-Kk*, *GNd*) – found among Polish manuscripts can be ascribed to Łodzia; two other works mentioned by Długosz (*Benedicta* and *Tu es Petrus*) have not so far been identified. Existing melodies (ed. Pikulik, 1975) were adapted to suit Łodzia's texts, possibly by the poet himself.

MIROSŁAW PERZ

Loeffler, Charles [Karl] **Martin** (*b* Schöneberg, nr Berlin, or Mulhouse, Alsace, 30 Jan 1861; *d* Medfield, MA, 19 May 1935). Composer and violinist. He claimed Alsatian birth; his parents, however, were natives of Berlin, and the records of the Hochschule für Musik give one of their residences, Schöneberg, as the composer's birthplace. The later political difficulties endured by his father, including imprisonment (to which Loeffler attributed his father's death), made the son so hostile towards Germany that he adopted French manners, tastes and style. He had his first violin lessons in the late 1860s from a German member of the Russian Imperial Orchestra. By the age of 13 he had decided to become a professional violinist, and from 1874 to 1877 studied violin with Joachim and Eduard Rappoldi and theory with Friedrich Kiel and Bargiel at the Hochschule für Musik in Berlin. He continued his musical studies in Paris, taking private lessons in violin from Massart and in composition from Guiraud. He was a member of Pasdeloup's orchestra for a season, then played in the private orchestra of Paul de Derwies (1879–81).

After the death of Derwies in June 1881, Loeffler left for the USA. Although he returned several times to Europe (he studied violin with Léonard in Paris in 1884), he decided to settle in the country he found 'quick to reward genuine musical merit and to reward it far more generously than Europe', and became an American citizen in 1887. During the 1881–2 season he played in Leopold Damrosch's orchestra in New York. In May 1882 he participated in Theodore Thomas's New York Festival and the following summer in his 'Highway' tour. In the autumn of 1882 Loeffler joined the Boston SO as second concertmaster, a position he held for 21 years, and he became a favourite soloist with the Boston public. He was a proponent of contemporary music and played the American premières of works by such composers as Bruch, Saint-Saëns and Lalo. Loeffler's brother Erich played the cello in the Boston SO. Loeffler was also a popular composer. The first of his works to receive a public performance was one movement of the String Quartet in A minor, played by the Adamowski Quartette in Philadelphia in 1889. The Boston SO gave the première of his first orchestral work, *Les veillées de l'Ukraine*, in 1891.

Loeffler retired from the orchestra at the end of the 1902–3 season. After spending a year (1904–5) in Paris he settled in Medfield, Massachusetts, where he shared his time between his working farm, his thoroughbred horses, and his musical activities. He taught violin and coached chamber ensembles, and founded the female American String Quartette in 1908. For a time he directed a boys' choir in Gregorian chant, and in 1909 visited the Benedictine monastery at Maria Laach, Germany, where he studied chant practice. He remained active in the musical life of Boston, retaining unofficial ties with the Boston SO; he was a member of the board of directors of the Boston Opera Company, and served as an adviser on various competition juries. Loeffler also had interests in New York, serving as an adviser on the foundation of the Juilliard Graduate School (1924).

Loeffler's major occupation was composition. He was a skilled and careful, even fastidious, composer, who was severely self-critical; he repeatedly revised his compositions and withheld most of them from publication. His music was, nevertheless, often performed. Early in his career he was considered avant-garde, primarily for his use of programmatic forms and advanced harmonies. He was also known as a symbolist and was frequently described as decadent for the bizarre and sinister moods that coloured many of his early works (for example *La mort de Tintagiles*, *Rapsodies*, and *Quatre poèmes*). Loeffler espoused no particular school of composition: his technique was based on a Germanic foundation, but his style was most strongly influenced by French composers; he also borrowed heavily from Russian music, especially in early compositions such as the String Sextet, the Quintet, and *Les veillées de l'Ukraine*. His music displays fluid rhythmic and melodic writing, a marked ingenuity of orchestration, and sensitivity to harmonic colour.

Loeffler supported American musical activity and admired many native composers. With the exception of some works that incorporated jazz elements (for example, the Partita for violin and piano), however, he did not attempt to write in an American style. He drew from a variety of literary inspirations, including Virgil, St Francis, Gogol, Whitman, Poe, Yeats, Maeterlinck, and Verlaine. His musical interests, equally eclectic, ranged from Gregorian chant (used notably in *Canticum fratris solis* and Music for Four Stringed Instruments) to national musics (the *Divertissement espagnol* and the Five Irish Fantasies draw respectively on Spanish and Irish themes).

A man of aristocratic bearing and cosmopolitan culture, Loeffler was extremely well read (especially in French literature) and was esteemed as an intellectual as well as an artist. John S. Sargent, who painted his portrait, was among his friends. Among the many honours Loeffler received as a composer were membership in the National Institute of Arts and Letters (1908), which later awarded him a Gold Medal (1920), an honorary doctorate from Yale (1926), and election to the American Academy of Arts and Letters (1931). He was also named an Officer de l'Académie des Beaux Arts (1906) and a Chevalier of the Legion d'Honneur (1919).

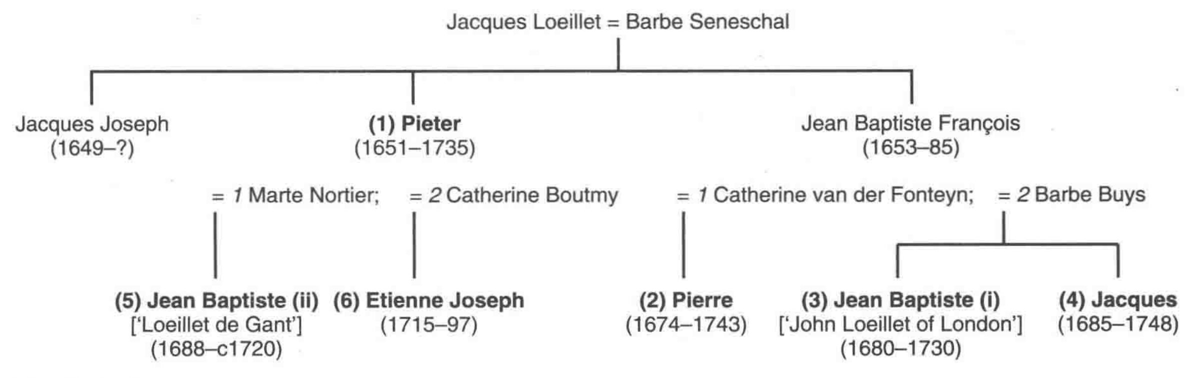
ELLEN KNIGHT

Loeillet. Flemish family of instrumentalists and composers (fig.1).

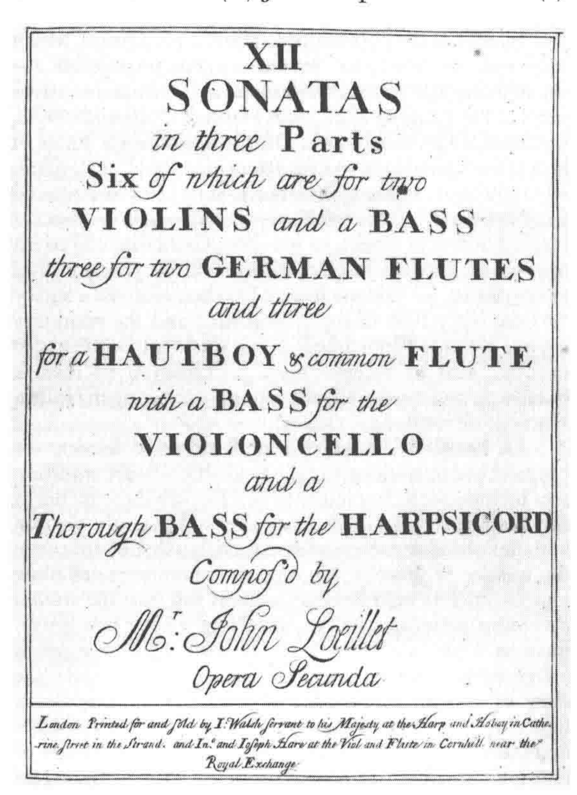
(1) Pieter [Pierre Noël] **Loeillet** (*b* Ghent, bap. 21 May 1651; *d* Ghent, 2 Nov 1735). Violinist and concertmaster. Second son of Jacques Loeillet and his wife Barbe (née Seneschal). He was a violinist and concertmaster at Ghent, and from 1715 to 1730 he worked at Bordeaux. His younger brother, Jean Baptiste François Loeillet (1653–85), was a surgeon at Ghent.

(2) Pierre Loeillet (*b* Ghent, bap. 20 April 1674; *d* Ghent, 24 Nov 1743). Violinist, nephew of (1) Pieter Loeillet. He was the eldest son of Jean Baptiste François Loeillet by his first wife, Catherine (née van der Fonteyn); he succeeded his uncle Pieter Loeillet as violinist at the cathedral of St Baaf in Ghent.



(3) Jean Baptiste Loeillet (i) ['John Loeillet of London'] (*b* Ghent, bap. 18 Nov 1680; *d* London, 19 July 1730). Composer, nephew of (1) Pieter Loeillet. He was the son of Jean Baptiste François Loeillet by his second wife, Barbe (née Buys); he is often confused with (5) Jean Baptiste Loeillet (ii) ('Loeillet de Gant'). In view of his father's death in 1685, it is possible that John Loeillet was brought up by his uncle Pieter Loeillet. He settled in London in about 1705, where his surname was often rendered more or less phonetically as 'Lullie' or 'Lully', and he anglicized his first name to John. He is mentioned in 1707 as a member of the Drury Lane orchestra, and a year or two later he appears as principal oboist (and flautist) in Heidegger's list of the opera band at the Queen's Theatre, Haymarket. In 1710 or soon after he started weekly concerts at his house in Hart Street, Covent Garden, where, on a famous occasion (probably in December 1714), Corelli's concerti grossi op.6 were first played in England. Loeillet became a celebrated master and teacher of the harpsichord. There is a tradition, which may well be true, that he was chiefly responsible for introducing the transverse flute as a fashionable instrument in England. In 1722, with Handel, Croft and others, he tested a new organ at St Dionis Backchurch. Later in his life Loeillet moved to East Street near Red Lion Square, where he died. In his will, dated 1 May 1729 and proved 9 September 1730, he left bequests to his half-brother (2) Pierre Loeillet in Ghent, to his sister Catherine and to his brother (4) Jacques Loeillet in Munich; his young cousin at Bordeaux, (6) Etienne Joseph Loeillet, received a legacy and the 'very Best of my Absecords', and the residuary legatee was (1) Pieter Loeillet 'my oncle att Bordeaux in France', also to receive 'my ... Collection of musick boocks ... and musickell instruments consisting in violins, Flutes of all kind, Bass violins'.

John Loeillet of London's nine suites of lessons for harpsichord or spinet are in the English keyboard tradition and include such characteristically English movements as the hornpipe and cibell. They are competently written and make modest technical demands, but do not approach the quality of those of his English contemporaries Blow and Croft. His instrumental sonatas fall into the *sonata da chiesa* pattern, usually comprising a slow first movement in common time, a fast *alla breve* fugal movement (often with a bass of running quavers), a sarabande-like slow movement requiring much ornamentation, and a lightweight gigue. Within these limits Loeillet used a markedly different style for each of the three groups of instruments for which he was writing. His six trio sonatas for recorder and oboe and the six sonatas for recorder are his most conservative works, and they follow the stereotyped formula of movements; the bass simply supports the melodic parts, but the two treble voices have almost equal status, whereas in the trio sonatas for two like melodic instruments the second part is subordinate to the first. The six trio sonatas for two flutes are less predictable in style than those for recorder and oboe, and more forward-looking: Loeillet used long melodic lines with suspensions, and upper parts in parallel 3rds and 6ths. The trio sonatas for two violins represent Loeillet at his most adventurous, containing idiomatic string figures and expansive themes based on arpeggios reminiscent of Corelli and Vivaldi, and the cello part is more consistently integrated into the musical texture.



WORKS

all published in London

Lessons (e, D, g), hpd/spinet (*c*1712); ed. in MMBel, i (1932)
[6] Sonatas for Variety of Instruments (F, G, g, D, C, e), op.1 (1722); nos.1, 3, 5 for rec, ob, bc; 2, 4, 6 for 2 fl, bc

2. *Title-page of Jean Baptiste Loeillet (i)'s 12 Sonatas in Three Parts op.2 (London: Walsh & Hare, c1725)*

6 Suits of Lessons (g, A, c, D, F, E♭), hpd/spinet (1723/*R*); ed. in MMBel, i (1932)
12 Sonatas in Three Parts (B♭, F, A, d, G, c, E, b, g, e, D, G), op.2 (*c*1725); nos.2, 4, 6 for rec, ob, bc; 8, 10, 12 for 2 fl, bc; others for 2 vn, bc
12 Solos (C, d, F, a, g, d, e, G, D, b, D, G), op.3 (1729); nos.1–6 for rec, bc; 7–12 for fl, bc

(4) **Jacques** [Jacob] **Loeillet** (*b* Ghent, bap. 7 July 1685; *d* Ghent, 28 Nov 1748). Composer and oboist, younger brother of (3) Jean Baptiste Loeillet (i). He was an oboist to the Elector of Bavaria while the latter was in the Netherlands, and in 1726 he moved to the elector's court at Munich; later he became *hautbois de la chambre du roi* at Versailles. In 1746 he returned to Ghent. His widow received a pension from the king of France.

All his extant sonatas are in the *sonata da chiesa* pattern, although they include four movements with French titles. His six solo sonatas are more substantial works than the six duets.

WORKS

6 sonates (G, D, b, A, G, e), 2 fl/vn, op.4 (Paris, 1728)
6 sonates (e, G, g, D, b, G), fl/vn, bc, ?op.5 (Paris, 1728); ed. A. and C. Manners (London, *c*1982–3); ed. R.P. Block (Monteux, *c*1985)
Opp.1–3 unknown
2 concertos, *D-ROu*: E♭, ob, str; D, fl, 2 vn, bc

(5) **Jean Baptiste Loeillet** (ii) ['Loeillet de Gant'] (*b* Ghent, bap. 6 July 1688; *d* Lyons, *c*1720). Composer, son of (1) Pieter Loeillet. He was the eldest son of Loeillet by his first wife, Marte (née Nortier). Loeillet de Gant, as he styled himself on all his published compositions, went to Lyons in the service of the archbishop, Paul-François de Neufville de Villeroy, and died there at an early age – before 1729 and probably about 1720. He has often been confused with his cousin (3) Jean Baptiste Loeillet (i). 48 sonatas for recorder and continuo, together with some other works, were composed by Loeillet de Gant and published in Amsterdam between about 1710 and 1717, and republished in London by Walsh & Hare between about 1712 and about 1722.

His sonatas are in the Italian style of Corelli and are generally of the *sonata da chiesa* type, although some (especially op.3 onwards) include several movements with named dances such as allemanda, sarabanda, gavotta and giga and have more than four movements. The bass parts are more independent than those of John Loeillet of London, not only in the fugal second movements, where they may play an equal part, but also in the slow movements, where they often have their own rhythmic patterns throughout the movement; his basses often start a movement with two or three bars solo before the recorder enters. Loeillet de Gant had a stronger contrapuntal sense than his two cousins; occasionally his fugal movements have clearly differentiated countersubjects but they lack the skill shown by many of his contemporaries. Unlike John Loeillet, Loeillet de Gant ornamented many of his slow movements in the French manner, with flourishes of demisemiquavers and *notes perdues* (the 'little note that does not enter into the bar'; Marais: *Pièces à une et à deux violes*, 1686).

WORKS
all published in Amsterdam

op.
1 12 sonates (a, d, G, F, B♭, C, c, d, g, F, G, e), rec, bc (*c*1710); ed. G. Orbán (Budapest, *c*1988)
2 12 sonates (F, g, d, B♭, c, G, e, F, g, D, g, a), rec, bc (1714)

Loer, Adam. *See* AQUANUS, ADAM.

Loeschhorn [Löschhorn], **Carl Albert** (*b* Berlin, 27 June 1819; *d* Berlin, 4 June 1905). German pianist and composer. He was a pupil of Ludwig Berger from 1837, and later studied at the Royal Institute for Church Music in Berlin, where his teachers included A.E. Grell and A.W. Bach; he became a piano teacher at the institute in 1851 and professor in 1858. From 1846 Loeschhorn, together

with the brothers Adolf and Julius Stahlknecht, formed a trio which gained fame within Germany and toured Russia in 1853. Loeschhorn was widely known as a composer of salon pieces, studies and sonatas for piano, as well as chamber music, and for his publication of *Wegweiser in der Pianoforte-Literatur* (with J. Weiss; Berlin, 1862, 2/1877) and *Führer durch die Klavier-Literatur* (Berlin, 1886, 2/1895).

CHRISTOPHER FIFIELD

Loesser, Frank (Henry) (*b* New York, 29 June 1910; *d* New York, 28 July 1969). American lyricist, composer, librettist and publisher. The son of a noted piano teacher and the half brother of Arthur Loesser (1894–1969), concert pianist, author, and for many years professor of piano at the Cleveland Institute, Frank grew up in a musical home that disdained popular culture. He enrolled at the City College of New York at the age of 15, but failed nearly every subject. After his father died unexpectedly in 1926, Loesser gained temporary employment with a succession of newspapers, at the same time working in various and often unusual jobs, including those of a process server and a restaurant reporter. He began writing song lyrics in his late teens. In 1931, while working for the publishers Leo Feist, he sold his first song lyric, *In Love with a Memory of You*, with music by the future eminent American composer, William Schuman. After several more years of writing and selling song lyrics, in 1936 Loesser and composer Irving Actman managed to have several songs interpolated into a revue, *The Illustrators' Show*. Although the revue was a critical débâcle and rapidly folded, their songs won them a six-month contract with Universal Studios. For the next six years Loesser wrote more than 100 lyrics for various composers, most notably Hoagy Carmichael (*Heart and Soul* and *Two Sleepy People*), Burton Lane (*How'dja like to love me* and *Says My Heart*) and Jule Styne (*I don't want to walk without you*). In 1942 Loesser published his first song as a composer as well as lyricist, *Praise the Lord and pass the ammunition*, an immediate success that quickly sold more than two million records and one million copies of sheet music. In addition to composing several other popular World War II songs (*What do you do in the infantry?* and *Rodger Young*) and the music to several revues as Private First Class Loesser, he would also, with increasing frequency, compose both the music and lyrics for films. One of these songs, *Baby, it's cold outside* (1944), a party-piece duet with his first wife, Lynn Loesser, eventually appeared in *Neptune's Daughter* (1948) and won an Academy Award.

Loesser's Broadway score, *Where's Charley?* (1948), based on Brandon Thomas's perennially popular 1892 play, *Charley's Aunt*, was conceived as a star vehicle for Ray Bolger. Backed by enterprising novice producers Cy Feuer and Ernest Martin and drawing on the extensive authorial and directorial experience of George Abbott, *Where's Charley?* derived much of its humour from Bolger's frantic switches of costume between Charley and his aunt. Despite many imaginative touches, the show is best remembered for 'Once In Love with Amy', which Bolger sang to and notably with his audiences until the show closed as the tenth-longest running musical up to that time. Loesser's next musical *Guys and Dolls* (1950), based on Damon Runyon stories about the gruff but lovable tinhorn gamblers and the devoted Salvation Army missionaries who inhabit Times Square, produced by Feuer and Martin this time under the direction of George S. Kaufman, is widely regarded as one of Broadway's most perfect amalgamations of story, music and stagecraft. After winning the Tony Award for best musical, Loesser's second successive hit would also emerge as a popular film in 1955 and return to Broadway and London regularly, most remarkably in a 1992 Broadway revival that lasted for three seasons. In 1952 he composed eight songs for film producer Samuel Goldwyn and his star, Danny Kaye, a fictional account of the famed story teller, *Hans Christian Andersen*.

By this time Loesser had begun the four-year challenge of writing the libretto as well as the lyrics and a vast score for *The Most Happy Fella*, a process observable in 16 sketchbooks with mostly datable entries and many other subsequent drafts. The poignant story, adapted from Sidney Howard's Pulitzer Prize-winning play, *They Knew What They Wanted* (1924), was a popular success, both in 1956 and in two New York revivals of the early 1990s. Nevertheless, Loesser's self-designated 'opera with a lot of music', with its heterogeneous assortment of classical and popular styles, has only gradually approximated the critical and popular stature of the more consistently vernacular, homogeneous, and less operatic *Guys and Dolls*. Beginning in 1948 he began to acquire the rights to his own material, and by 1950 had formed the Frank Music Corporation and began to seek out other promising songwriters. Starting with *Kismet* (1953) he would publish all the future musicals of Robert Wright and George Forrest, and he also played a large part in discovering and developing the talents and careers of Richard Adler and Jerry Ross and Meredith Willson, as well as publishing Adler and Ross's *The Pajama Game* (1954) and *Damn Yankees* (1955) and Willson's *The Music Man* (1957).

In 1960 Loesser experienced his first Broadway failure with *Greenwillow*, a musical based on the charmingly bucolic but undramatic novel by B.J. Chute. The following year he and his collaborators achieved great success again with *How to Succeed in Business without Really Trying*, which eventually surpassed *Guys and Dolls* as the most popular musical of his career. A clever, good-natured, yet often wickedly irreverent satire on the world of business adapted from Shepherd Mead's best selling handbook, *How to Succeed*, it earned for Loesser another New York Drama Critics Circle Award after those for *Guys and Dolls* and *The Most Happy Fella*, also his second Tony Award, and became only the fourth musical to win the Pulitzer Prize for drama. Loesser's last completed musical, *Pleasures and Palaces* (1965), which Samuel Spewack, Loesser and director-choreographer Bob Fosse adapted from Spewack's unsuccessful 1961 play *Once There Was a Russian*, closed out of town in Detroit. He abandoned his final incomplete musical based on a story by Budd Schulberg, *Señor Discretion Himself*, one year prior to his death from lung cancer in 1969. He was survived by his second wife, Jo Sullivan, a talented singer who created the role of Rosabella in *The Most Happy Fella*, and by two children from each of his marriages, the oldest of whom, Susan Loesser, wrote his first biography (New York, 1993).

Throughout his productive career, first as a lyricist for films and then as a composer-lyricist for films and musicals

in the tradition of Berlin and Porter, Loesser exhibited a rare knack for capturing the humour as well as the humanity of a dramatic situation with catchy vernacular lyrics that invariably match their readily accessible cultivated and vernacular melodies, despite the fact that – with the exception of 'Standing on the Corner' from *The Most Happy Fella* and 'I believe in you' from *How to Succeed . . .* – relatively few songs from his musicals became major hits. Perhaps more than Berlin and Porter, his show-stopping Broadway songs, regularly displaying an unprecedented degree of imaginative counterpoint and harmony, typically function as miniature scenes that advance the action as well as our understanding of his characters.

WORKS
(selective list)

STAGE

unless otherwise stated, all are musicals, music by Loesser and dates are those of first New York performance; writers shown as (lyricist; book author)

The Illustrator's Show (revue, Loesser; Liebman, O. Soglow and others), 48th St, 22 Jan 1936, music I. Actman and others [incl. Bang the bell rang (music: Actman)]

Skirts (revue, mostly Loesser and H. Rome), Cambridge, London, 25 Jan 1944, music mostly Loesser and Rome

About Face! (revue, Loesser, J. Livingston and others; A. Auerbach and others), Camp Shanks, 26 May 1944, music Loesser, Livingston and others [incl. One Little WAC (music: E. Dunstedter)]

Hi, Yanks! (revue, Loesser, A. North and others; Auerbach and others), Theatre No.5, Fort Dix, NJ, 7 Aug 1944, music Loesser, North and others

PFC Mary Brown (revue, mostly Loesser; Auerbach and others), *c*Nov 1944, music mostly Loesser [incl. PFC Mary Brown]

OK, U.S.A.! (revue, probably Loesser), *c*June 1945

Where's Charley? (2, Loesser; G. Abbott after B. Thomas: *Charley's Aunt*), orchd T. Royal, H. Spialek and P.J. Lang, St James, 11 Oct 1948 [incl. Make a miracle; My darling, my darling; Once in Love with Amy]; film 1952

Guys and Dolls (2, Loesser; J. Swerling and A. Burrows, after D. Runyon), orchd G. Bassman and Royal, 46th St, 24 Nov 1950 [incl. Adelaide's Lament, Fugue for Tinhorns, Guys and Dolls, If I were a bell, I'll know, I've never been in love before, Luck be a lady tonight, My Time of Day, Sit down, you're rockin' the boat]; film 1955 [incl. Pet me, Poppa; A Woman in Love]

The Most Happy Fella (3, after S. Howard: *They Knew What They Wanted*), orchd D. Walker, Imperial, 3 May 1956 [incl. Big D, Happy to Make your Acquaintance, How Beautiful the Days; Joey, Joey, Joey; The Most Happy Fella, My heart is so full of you; Somebody, Somewhere; Standing on the Corner]

Greenwillow (2, Loesser; L. Samuels and Loesser, after B.J. Chute), orchd. R. Ginzler, Alvin, 8 March 1960 [incl. The Music of Home, Never will I marry]

How to Succeed in Business without Really Trying (2, Loesser; Burrows, J. Weinstock and W. Gilbert, after S. Mead), orchd Ginzler, 46th St, 28 Mar 1963 [incl. Brotherhood of Man, The Company Way, Happy to Keep his Dinner Warm, I believe in you]; film 1967

Pleasures and Palaces (Loesser; Loesser and S. Spewack, after Spewack: *Once there was a Russian*), orchd Lang, Fisher Auditorium, Detroit, 11 Mar 1965

Señor Discretion Himself (Loesser; Loesser, after B. Schulberg), Musical Theatre Works, 20 Nov 1985

FILM SONGS

Lyrics by Loesser, composer in parentheses: The Moon of Manakoora (A. Newman), in *The Hurricane*, 1937; Blame it on the Danube (H. Akst), in *Fight for Your Life*, 1937; Heart and Soul (H. Carmichael), in *A Song is Born*, 1938; How d'ja like to love me (B. Lane), Moments Like This (Lane), I fall in love with you every day (M. Sherwin), in *College Swing*, 1938; Says My Heart (Lane), in *Cocoanut Grove*, 1938; Small Fry (Carmichael), in *Sing You Sinners*, 1938; Two Sleepy People (Carmichael), in *Thanks for the Memory*, 1938

Fidgity Joe (M. Malneck), Strange Enchantment (F. Hollaender), in *Man About Town*, 1939; The Boys in the Backroom (Hollaender), in *Destry Rides Again*, 1939; The lady's in love with you (Lane), in *Some Like It Hot*, 1939; Say it (J. McHugh), in *Buck Benny Rides Again*, 1940; I hear music (Lane), in *Dancing on a Dime*, 1940; Dolores (L. Alter), in *Las Vegas Nights*, 1941; I'll never let a day pass by, Kiss the boys goodbye, Sand in my Shoes (V. Schertzinger), in *Kiss the Boys Goodbye*, 1941

Katy-Did, Katy-Didn't (Carmichael), We're the couple in the castle (Carmichael), in *Mr. Bug Goes to Town*, 1941; I don't want to walk without you (J. Styne), in *Sweater Girl*, 1942; Touch of Texas, Can't get out of this mood, I get the neck of the chicken (McHugh), in *Seven Days Leave*, 1942; Jingle Jangle Jingle (J. Lilley), in *The Forest Rangers*, 1942; Let's get lost, Murder, He says (McHugh), in *Happy Go Lucky*, 1943; The Dreamer, How sweet you are, I'm riding for a fall, Love isn't born, it's made, They're either too young or too old (A. Schwartz), in *Thank Your Lucky Stars*, 1943

Lyrics and music by Loesser: Spring will be a little late this year, in *Christmas Holiday*, 1944; In My Arms, in *See Here, Private Hargrove*, 1944 [with T. Grouya]; I wish I didn't love you so, Poppa don't preach to me, The Sewing Machine, in *The Perils of Pauline*, 1947; Tallahassee, in *Variety Girl*, 1947; Baby, it's cold outside, in *Neptune's Daughter*, 1947; Red Hot and Blue, in *Red Hot and Blue*, 1949; Roseanna, in *Roseanna McCoy*, 1949; Anywhere I Wander, I'm Hans Christian Andersen, The King's New Clothes, No Two People, Thumbalina, Inchworm, Wonderful Copenhagen, in *Hans Christian Andersen*, 1952

Other films, lyrics by Loesser unless otherwise stated, composer in parentheses: Blossoms on Broadway (Sherwin), 1937; Vogues of 1938 (Sherwin), 1937; Freshman Year (Actman), 1938; Men with Wings (Carmichael), 1938; Spawn of the North (Lane), 1938; Stolen Heaven (Sherwin), 1938; Cafe Society (Lane, L. Shuken), 1939; The Gracie Allen Murder Case (Malneck), 1939; Hawaiian Nights (Malneck), 1939; Invitation to Happiness (Shuken), 1939; Island of Lost Men (Hollaender), 1939; Saint Louis Blues (Carmichael, Lane, Malneck), 1939; Zaza (Hollaender), 1939

The Farmer's Daughter (Hollaender), 1940; Johnny Apollo (A. Newman, L. Newman), 1940; Moon Over Burma (Hollaender, H. Revel), 1940; Seven Sinners (Hollaender), 1940; A Night at Earl Carroll's (Hollaender, G. Niesen), 1940; Northwest Mounted Police (V. Young), 1940; The Quarterback (Malneck), 1940; Seventeen (Hollaender, Niesen), 1940; Typhoon (Hollaender), 1940; Youth Will Be Served (L. Alter), 1940

Aloma of the South Seas (Hollaender), 1941; Caught in the Draft (Alter), 1941; The Fleet's In (Schertzinger), 1941; Glamour Boy (Schertzinger), 1941; Hold Back the Dawn, 1941; Sailors on Leave (Styne), 1941; Sis Hopkins (Styne), 1941; World Premiere (Lane), 1941; Beyond the Blue Horizon (Styne), 1942; Priorities on Parade (Styne), 1942; Reap the Wild Wind (Young), 1942; This Gun for Hire (J. Press), 1942; Tortilla Flat (F. Waxman), 1942; True to the Army (H. Spine), 1942

Swing Your Partner (Styne), 1943; Tornado (Hollaender), 1943; Jam Session (McHugh), 1944; Moon over Las Vegas (McHugh), 1944; You Can't Ration Love (Styne), 1944; Duffy's Tavern (Loesser), 1945 [lyrics, Burrows]; Her Lucky night (McHugh), 1945; Let's Dance (Loesser), 1950; Malaya (Styne), 1950; The Flaming Feather (Sherwin), 1951; With a Song in My Heart (A. Schwartz), 1952

OTHER SONGS

lyrics and music by Loesser, unless otherwise stated; other composers in parentheses

I'm in love with a memory of you (W. Schuman), 1931; Doesn't that mean anything to you (B. Emmerich), 1934; Goo Goo Ge'Da (E. Breuer), 1934 [lyrics with B. Frisch and R. Leveen]; I wish I were twins (J. Meyer), 1934 [lyrics with E. DeLange]; Junk Man (Meyer), 1934 [lyrics with DeLange]; A Tree in Tipperaray (Actman), 1936; The last thing I want is your pity (1938); Hello Mom (Dunstedter), 1942; Praise the Lord and pass the ammunition, 1942; Have I stayed away too Long?, 1943; What do you do in the infantry?, 1943

GEOFFREY BLOCK

Loetti, Gemignano. *See* CAPILUPI, GEMIGNANO.

Loevendie, Theo (*b* Amsterdam, 17 Sept 1930). Dutch composer. His musical career began in the Amsterdamse Postharmonie wind band, in which he played the clarinet. He soon started composing for bands which he formed with friends, in a jazz idiom inspired by the music of Benny Goodman, and later Parker, Gillespie and Ellington; he subsequently began to play the alto saxophone. After completing his military service he became a professional musician, formed his own quintet and gave concerts in night clubs. As a member of an international light orchestra, he travelled in the early 1950s to Turkey, where he acquired a lifelong fascination for Turkish folk music. Back in the Netherlands he decided at the age of 25 to enter the Amsterdam Conservatory, where he studied with Mulder and Orthel (composition) and Ru Otto (clarinet). He became active in improvised music, and as the leader of the Boy Edgars Big Band and later of his own Theo Loevendie Consort, he developed in the 1960s into one of the most successful Dutch jazz musicians, gaining an international reputation.

After his début as a composer in 1969 with *Scaramuccia* for clarinet and orchestra, Loevendie gradually emerged as a leading Dutch composer. He became a lecturer at the conservatories of Rotterdam (theory and composition) and Amsterdam (composition) and in the 1970s organized informal but influential STAMP concerts (Foundation for Alternative Music Practice), in which widely differing musical genres were presented on the same evening. He received many prizes, including the Koussevitzky Award for *Flexio*, the Matthijs Vermeulen Prize for *Naima* and the 3M Prize for his entire output. He has also been active in an administrative capacity: first as chairman of the GeNeCo (Society of Dutch Composers) and then as chairman of the Fonds voor de Scheppende Toonkunst.

Loevendie's late entry (at the age of 38) into the world of composed serious music with *Scaramuccia* was in part due to the lack of affinity he felt with the rigid intellectual aspects of serialism which, in the 1960s, governed the musical thinking of younger Dutch composers. He regarded serialism as 'an excess of rationalism' which did not offer him any points of contact. In *Scaramuccia* he contrasted this with music which excelled in polyrhythmic flexibility, a predilection for melodic and rhythmic ostinato motifs and a view of harmony and timbre which owed something to French music; the influence of Stravinsky was also important. Loevendie was not entirely insensitive to the prevailing musical fashions: for example, the spatial arrangement of the musicians in *Orbits* (1976) for solo horn and orchestra cannot be viewed in isolation from Stockhausen's *Gruppen*; and the construction of the earlier *Aulos* (1972), in which the performers are given freedom in the choice of pitch, has aleatory characteristics, although in Loevendie's case a link with improvised music is more logical.

The influence of jazz is also clearly apparent from the mid-1970s on. In *Strides* (1976) the hypnotic repetitions of notes characteristic of Loevendie are integrated with reminiscences of the style of Fats Waller's Harlem stride piano, and in *Bons* (1991) an improvising soloist (preferably with demonstrable jazz credentials) is set against a chamber ensemble playing fully written-out parts.

From an early age Loevendie had a predilection for strict counterpoint, and devices such as canon and isorhythm, as well as ostinato, heterophony and passacaglia form play a role in all his compositions, often in the form of complex rhythmic conglomerates. *Incantations* for bass clarinet and orchestra (1975), *Six Turkish Folkpoems* (1977), *Flexio* for orchestra (1979) and *Twee stukken op canons van Guillaume de Machaut* (1993) are appealing examples. In addition, influences from non-Western music play a role in Loevendie's work: African polyrhythm in *Timbo* for percussion ensemble (1974) and *A Dramé* for jembe and ensemble (1996); Turkish heterophony in such works as *Incantations*, the *Folkpoems*, the chamber opera *Gassir, the Hero* and the Piano Concerto (1995); and Argentine tango in *Amsterdam Tango* (1994).

Rhythm and melodic cyclic structures related to Turkish and Arabic music have also come to play an important role. These structures and their connected principle of 'non-octave modes' can be tracked back to the 'curve technique' which Loevendie first used in *Flexio* and with which he diverted his attention from rhythmic to pitch organization. Curve technique, unlike serialism, is not a closed system, but a flexible approach to systematic musical thought, which leaves ample latitude for the intuitive and the improvised. In its simplest form it consists of a basic melodic or melodic-rhythmic idea that is maintained throughout a work. This basic thought may be stretched and enlarged, compressed and reduced in such a way that its curve and the inherent relationships between the notes are preserved.

Since 1979 his work has been governed by six or seven curves per composition, each with a length of three to eight notes, though Loevendie has been applying the technique intuitively for longer as an improviser throughout his whole career, although as a composer for the first time in his String Quartet (1961), in a rudimentary form. In *Gassir, the Hero*, a stack of curves gives rise to a mode which is repeated not at the octave but at other intervals. These non-octave modes also determine the melodic and harmonic structure in works such as *Cycles* (1992), *Lerchen-Trio* (1992), *Laps* (1995) and his third opera *Esmée* (1987–94).

The subject of *Esmée*, like the first, *Naima*, is the conflict between freedom, power and the role of the

outsider; this theme undoubtedly has autobiographical roots. *Naima* is concerned with a small group of musical guerillas who resist the 'Institute'; *Esmée* tells the story of the resistance fighter Esmée van Eeghen, who during World War II was suspected of espionage for the Germans. The latter, as with all Loevendie's operatic works, has an eclectic musical design: alongside intricate melodic-rhythmic structures, it contains a lied, Protestant psalm melodies, choral adaptations, bar music and a fugal march for percussion, recalling the composer's captivation by brass band music in his youth.

ERIK VOERMANS

Loewe, (Johann) Carl (Gottfried) (*b* Löbejün, nr Halle, 30 Nov 1796; *d* Kiel, 20 April 1869). German composer and singer. He was the twelfth and youngest child of the Kantor and schoolmaster Adam Loewe (*d* 1826), from whom he received his first musical education. In 1807 he became a choirboy in the Cöthen court chapel, moving two years later to the Franke Institute in Halle, where he studied with Türk. His singing attracted the attention of King Jérôme of Westphalia, who awarded him an annual stipend of 300 thaler to enable him to devote his full attention to music.

Loewe's studies were interrupted by the outbreak of war in 1812, and the death of Türk in 1813. When King Jérôme was forced to flee later that year, Loewe's funding came to an abrupt end. In 1814 he became organist at a local church, and in 1817 he enrolled at the University of Halle to study theology and philology though his main energies continued to be devoted to music. He joined the Halle Singakademie, founded after Zelter's model by Naue, Türk's successor as musical director of the university, and around this time composed his first important songs. It was through the Singakademie that Loewe met his first wife, Julie von Jacob, whom he married in 1821.

In 1819 and 1820 Loewe paid visits to Dresden, Weimar and Jena, making the acquaintance of Weber, Goethe and Hummel. Having been a professor at the Gymnasium in Stettin from January 1820, in November that year he was appointed organist at the Jakobikirche; as part of the examination for the post, he was required to submit a musical exercise to Zelter. On 14 February 1821 he became musical director of the city; he worked in Stettin until 1866, when he was asked to resign his various positions following illness. Loewe spent his last years at Kiel, though after his death his heart was buried near the organ in the Jakobikirche, Stettin. His first wife having died in 1823, in 1850 he married Auguste Lange, who survived him.

During his long career in Stettin, Loewe established a reputation across Europe both as a composer and a singer. Much respected at the Prussian court, where he was a favourite of both Friedrich Wilhelm III and Friedrich Wilhelm IV, he was elected a member of the Berlin Academy in 1837. He travelled extensively: in 1837 he undertook a lengthy tour of Germany, visiting the Düsseldorf and Mainz festivals, as well as Hamburg, Lübeck and Bremen; in 1844 he visited Vienna; and in 1847 he was in London, where he performed at court and heard Jenny Lind sing. Among other important trips were those to Sweden and Norway in 1851 and France in 1857.

Loewe's posthumous reputation as a composer rests mainly on his songs, though, for all the importance they are accorded in the scholarly literature, they remain largely neglected by modern performers. His earliest offerings, for example, the *Acht Jugendlieder* and three

Carl Loewe: unsigned lithograph

Anakreontische Lieder, belong firmly to the mainstream late 18th-century tradition, with their dependence upon a single melodic line, rudimentary accompaniment and largely strophic and varied strophic forms. From around 1817, however, Zumsteeg's influence becomes strongly apparent, and henceforth the ballad was the predominant vocal genre that Loewe cultivated. The first collection of *Balladen*, published in 1824, brings together three of his most successful early settings: *Edward*, *Der Wirthin Töchterlein* and *Erlkönig*. Each is cast in the usual rhapsodic form, but there is a striking absence of organic musical development. The choice of *Erlkönig* begs inevitable comparison with Schubert, and though Loewe has found his champions, his treatment is generally reckoned less effective. (The claims of his daughter Julie, that Loewe saw Schubert's setting in manuscript and was prompted to his own version because he believed he could improve upon it are now largely discredited.) In contrast to the Schubert, there is no unifying musical motif which sets the framework for the whole song: instead, each poetic idea is treated separately and episodically. This essentially conservative approach to the ballad is maintained throughout Loewe's output. Even in such late works as *Odins Meeresritt* (1851) and *Die Schwanenjungfrau* (1857), there is no attempt to disguise the multisectional structure of the work.

In other respects, Loewe was more adventurous. His handling of the accompaniment was imaginative and, at times, daring. In his setting of Alexis's *Walpurgisnacht*, for example, he provided a veritable pianistic tour de force, while in songs such as *Die Begegnung am Meeresstrande*, with its wonderfully atmospheric opening, and the plangent *Die schwarzen Augen*, he demonstrated a keen appreciation of the piano's sonorous and tonal potential.

For his earliest ballads, Loewe frequently chose poems dealing with supernatural or grotesque themes, in many cases setting texts that had been popular with composers of the previous generation, such as Uhland's *Geisterleben*, Körner's *Wallhaide* and the *Todtengräberlied* (a translation of the gravediggers' scene from Shakespeare's *Hamlet*). Although such subject matter continued to fascinate him, together with texts relating to Norse, Scottish or other folk myth, Loewe gradually turned to ballads dealing with patriotic and historic themes. Frequently, these were concerned with Teutonic history, such as Schiller's *Der Graf von Habsburg*, Schwab's *Kaiser Heinrichs Waffenweihe* and the set of four historic ballads *Kaiser Karl V*, which brought together poems by Grün, Hohlfeld and von Platen. Loewe was not immune, however, from the influence of the new Romantic movement; as well as setting a number of texts translated from the French, Italian and Spanish, he was strongly attracted to poetry reflecting an oriental influence, such as Stieglitz's *Wanderbilder aus Arabien* and *Bilder der Heimath aus Persien*.

Although Loewe made his most characteristic contribution to the development of the lied through his ballads, he by no means limited himself to this genre. Throughout his career, he continued to compose shorter songs, often taking religious poetry, or texts dealing with nature in a stylized and idealistic anacreontic fashion strongly redolent of an earlier era. Here, as in his ballads, his choice of poets was commendably eclectic. As well as setting the verses of classical masters such as Goethe, Schiller and Herder, he was also attracted to a wide range of lesser, as well as more modern poets. His setting of Chamisso's *Frauenliebe*, for example, predated Schumann's more famous cycle by four years, while Loewe was also one of the first to set Rückert's poetry.

In essence, though, Loewe was a conservative figure. Despite his extensive tours, he appears to have assimilated few of the more radical trends of the mid-19th century. With a few notable exceptions, it is hard to detect any influence from Schumann, Chopin or Liszt, for example, and by the time of his death he was an outdated figure. Nonetheless, his songs remained popular in Germany for some time afterwards, particularly for informal performance, though their influence on later composers is limited.

Even in Loewe's instrumental works, the influence of song is never far removed. This is demonstrated most strikingly in his E major Piano Sonata op.16, whose slow movement is a setting for tenor of a poem entitled 'Adolf an Adele'. Generally, Loewe owed much to the example of Hummel, Ries and, above all, Weber in his keyboard works, though they rely for much of their effect on technical display at the expense of musical invention. Even the programmatic sonatas, such as *Mazeppa* op.27, lack emotional depth, though in their characterful description they have much in common with the more advanced of his song accompaniments.

For most of his early career, Loewe struggled in vain to gain acceptance as an operatic composer. Some fragments of a setting of Kotzebue's *Die Alpenhütte* survive, but the work was apparently never performed. His next opera fared little better: even though *Rudolf der deutsche Herr* was well received at a private concert performance and earned Spontini's support, Loewe was unsuccessful in his

attempts to have it staged. In 1834 he finally achieved his ambition, and the comic opera *Die drei Wünsche* was given at the Berlin Schauspielhaus. While it was well received by the audience, some critics had reservations: 'Dr Loewe would be even more suited to serious, heroic or tragic opera than to comic Singspiel', noted the reviewer of the *Allgemeine musicalische Zeitung* (xxxvi, 1934, col.229).

In fact, with the oratorio *Die Zerstörung Jerusalems*, first performed two years earlier in Leipzig, Loewe had already found a more appropriate outlet for his dramatic talents. After *Die drei Wünsche* he effectively abandoned opera for oratorio, producing 14 works in which biblical themes were given a highly charged and dramatically compelling treatment. Although he was later not entirely unmoved by the Baroque revival that was gradually sweeping across Germany, Loewe's conception of the oratorio remained essentially operatic. A small quantity of sacred vocal music also survives, though this contains few original moments.

As a singer, Loewe excelled in the performance of his own songs: contemporary accounts praise his imposing presence and his fine, well-honed baritone voice. He sang others' songs only infrequently, but his *Gesang-Lehre*, which ran to five editions, provides some insight into his overall approach to the art and remains a useful source for contemporary vocal practice.

EWAN WEST

Loewe, Frederick (*b* Berlin, 10 June 1901; *d* Palm Springs, 14 Feb 1988). American composer of German birth. He was the son of an actress and the popular operetta singer, Edmund Loewe, who sang in numerous roles in Berlin and Vienna. Virtually all information about his European years, supplied by the composer, remains undocumented. According to his own account, Loewe was a precocious child prodigy: a composer at five, sexually active at nine, at 13 the youngest pianist to appear with the Berlin Philharmonic, and at 15 the composer of a hit song *Katrina* that sold two million copies of sheet music. His claim to have studied with Eugen d'Albert and Ferruccio Busoni before emigrating to the USA in 1924 remains unverified and questionable. Also by his own account, for the next decade Loewe worked in a series of unusual and sometime improbable occupations that included boxing, gold prospecting, delivering mail on horseback and cow punching. In 1935 one of his waltzes was sung by operetta star Dennis King in the play *Petticoat Fever*; the following year a waltz with lyrics by Earle Crooker was interpolated in the short-lived revue, *The Illustrator's Show* (five performances). His next three musicals with Crooker also failed: *Salute to Spring* (1937) and *Life of the Party* (1942) closed in St Louis, and *Great Lady* closed on Broadway after twenty performances in 1938. In 1942 he met the much younger and untested ALAN JAY LERNER (1918–86) who helped with the libretto of *Life of the Party*.

After two commerical failures, *What's Up?* (1943) and *The Day Before Spring* (1945), their next musical, *Brigadoon* (1947), a romantic musical fantasy set mainly in Scotland, established Lerner and Loewe as the most successful new creators of so-called integrated musicals. After their less successful next collaboration, *Paint Your Wagon* (1951), set in California during the Gold Rush days of the 1850s, they wrote *My Fair Lady* (1956), an adaptation of George Bernard Shaw's *Pygmalion*, the longest-running show of its era and one of the most highly regarded of all musicals. Two years later with *Gigi*, Lerner and Loewe contributed the screenplay, lyrics and music to an Academy Award-winning film adaptation of a Colette novella. Their final Broadway collaboration, *Camelot* (1960), adapted from T.H. White's version of the King Arthur legend, *The Once and Future King*, survived a creative process plagued by the health problems of the director Moss Hart, personal tensions and poor initial reviews, and achieved a respectable Broadway run. Worries about his own health and continued difficulties with Lerner led to Loewe's retirement after *Camelot*. More than a decade later the pair would reunite for an ill-fated stage adaptation of *Gigi* (1973) and a final film, *The Little Prince* (1974).

After *Brigadoon*, Lerner and Loewe musicals characteristically feature a central character played by a fundamentally non-singing male actor who delivers his songs with an idiosyncratic hybrid of talking and singing (Lee Marvin in the film of *Paint Your Wagon*; Rex Harrison on stage and film in *My Fair Lady*; Louis Jourdan in *Gigi*; Richard Burton (stage) and Richard Harris (film) in *Camelot*). There is also a popular lyrical romantic ballad (e.g. 'On the Street Where You Live' from *My Fair Lady*), sung by secondary characters. Loewe's successful evocation of Scottish melodies in *Brigadoon*, Western folk songs in *Paint Your Wagon* (the only Lerner and Loewe musical with an American locale), and British music hall and French cabaret tunes in *My Fair Lady* and *Gigi*, respectively, camouflaged a distinctive personal style, which demonstrated a predilection, even in the Western *Paint Your Wagon*, for a European rather than an American vernacular musical language. The Loewe collection is held by the Music Division of the Library of Congress.

WORKS

Edition: The Lerner and Loewe Songbook, ed. A. Sirmay (New York, 1962)

STAGE

works are musicals, librettos and lyrics are by A.J. Lerner and dates are those of first New York performances, unless otherwise stated

Petticoat Fever (play, M. Reed), 4 March 1935 [1 song: Love tiptoed through my heart (I. Alexander)]
The Illustrator's Show (revue), 22 Jan 1936 [1 song: A waltz was born in Vienna (E. Crooker)]
Salute to Spring (Crooker), St Louis, 12 July 1937
Great Lady (Crooker and L. Brentano, Crooker), Majestic, 1 Dec 1938
Life of the Party (Lerner, Crooker), Detroit, 8 Oct 1942
What's Up? (Lerner and A. Pierson, Lerner), National, 11 Nov 1943
The Day Before Spring, orchd. H. Byrns, National, 22 Nov 1945
Brigadoon, orchd. T. Royal, Ziegfeld, 13 March 1947 [incl. The Heather on the Hill; Come to me, bend to me; Almost like Being in Love]; film, 1954
Paint Your Wagon, orchd. Royal, Schubert, 12 Nov 1951 [incl. I talk to the trees; They call the wind Maria; Wand'rin' Star']; film, 1969 [with five new songs (Lerner), music by A. Previn]
My Fair Lady (after G.B. Shaw: *Pygmalion*], orchd. R.R. Bennett, Mark Hellinger, 15 March 1956 [Wouldn't it be loverly; With a Little Bit of Luck; Just you wait; The Rain in Spain; I could have danced all night; On the Street Where You Live; Get me to the church on time; Without You; I've grown accustomed to her face]; film, 1964
Camelot (after T.H. White: *The Once and Future King*), orchd. Bennett and P.J. Lang, Majestic, 3 Dec 1960 [Camelot; What do the simple folk do?; If ever I would leave you]; film, 1967
Gigi (after Colette), orchd. I. Kostal, Uris, 13 Nov 1973 [from film, 1958; incl. 5 new songs]

FILMS

Gigi (Lerner, after Colette), 1958 [Thank heaven for little girls; The Night they Invented Champagne; I remember it well; I'm glad I'm not young anymore; Gigi]; rev. for stage, 13 Nov 1973
The Little Prince (Lerner, after A. de Saint-Exupéry: *Le petit prince*), 1974 [incl. Be Happy; I'm on your side]

GEOFFREY BLOCK

Loewe, Sophie (Johanna Christina) (*b* Oldenburg, 24 May 1812; *d* Budapest, 29 Nov 1866). German soprano. She studied in Vienna and with Francesco Lamperti in Milan. In 1831 she was in Naples, where she sang Adelaide in Rossini's *Tancredi*. The following year she sang Elisabetta in Donizetti's *Otto mesi in due ore* at the Kärntnertor-theater, Vienna. After an engagement at Berlin, where she sang Isabelle (*Robert le diable*) and Amina (*La sonnambula*), in 1841 she sang at Her Majesty's Theatre, London, as Alaide (*La straniera*), Donna Elvira and Elena (*Marino Faliero*). The same year she created the title role of Donizetti's *Maria Padilla* at La Scala. In 1844 she sang Elvira in the first performance of *Ernani* and in 1846 she created Odabella in *Attila*, both at La Fenice. She also sang Abigaille (*Nabucco*) and Giselda (*I Lombardi*) at Parma. In 1848 she retired. A forceful singer, she excelled in dramatic parts such as Norma and the soprano roles in Verdi's early operas.

ELIZABETH FORBES

Loewenberg, Alfred (*b* Berlin, 14 May 1902; *d* London, 29 Dec 1949). British lexicographer and historian of German birth. He studied at the universities of Berlin and Jena, taking the PhD at the latter in 1925. He at first intended to make his career as a lecturer in philosophy, but took a lively interest in the cultivation of opera, then at its height in Berlin. While attending every operatic performance he could, he began to accumulate voluminous data about operatic history: details of opera titles, composers, librettists, places and dates of production and subsequent performances all over the world. This mass of material was incomplete when the Nazi regime compelled Loewenberg to leave Germany in 1935. Having settled in London, he undertook further research in the British Museum and was able to add extensively to the material for his long-planned book, which appeared in 1943 as *The Annals of Opera*. The third edition, by Harold Rosenthal, included corrections and additions, but did not take the terminal date beyond 1940. Loewenberg's own plans to do so are realized in a further volume. The book remains an invaluable work of reference, a monument of accurate, painstaking research. His remarkable capacity for organizing a complex mass of titles, facts and other data led to his appointment, in 1947, as editor of the *British Union-Catalogue of Periodicals*. He wrote some important essays on operatic history and was also a keen student of the history of the English theatre.

Loewenstein, Herbert. *See* AVENARY, HANOCH.

Löffeloth, Johann Matthäus. *See* LEFFLOTH, JOHANN MATTHIAS.

Lofthouse, Charles Thornton (*b* York, 12 Oct 1895; *d* London, 28 Feb 1974). English music educationist, conductor and harpsichordist. After singing as a chorister in St Paul's Cathedral (1904–10) he attended the RMCM, Manchester; after World War I he studied the organ with Walter Parratt and conducting with Boult at the RCM. Subsequently he studied the piano with Cortot in Paris and the harpsichord with Aimée van der Wiele and Gustav Leonhardt. He took the degrees of BMus (1930) and DMus (1935) at Trinity College, Dublin. From 1921 to 1939 Lofthouse was accompanist to the London Bach Choir; in this post he developed the art of continuo playing, for which he was the first person to use a harpsichord in the Royal Albert Hall. He was a professor at the RCM (1922–71), and director of music at Westminster School (1924–39) and Reading University (1939–50). He became an examiner for the Associated Board of the Royal Schools of Music in 1923, and acted as external examiner in music for several university

institutes of education. Lofthouse created and conducted the University of London Music Society (1934–59), with which he encouraged performances of Bach and Vaughan Williams in particular. He appeared as a continuo, chamber or solo harpsichordist throughout Europe and in the USA, and published *Commentaries and Notes on Bach's Two- and Three-Part Inventions* (London, 1956).

LIONEL SALTER

Logan, Wendell (Morris) (*b* Thomson, GA, 24 Nov 1940). American composer. He studied at Florida Agricultural & Mechanical University, (BS 1962), with Will Bottje at Southern Illinois University at Carbondale (MMus 1964) and with Hervig at the University of Iowa (PhD 1968). In his youth he was influenced by the music of James Brown, Fats Domino and other popular music entertainers; while in college, he played the trumpet and arranged music for jazz ensembles and marching and concert bands. He taught at Florida Agricultural & Mechanical University (1962–3, 1969–70), Ball State University (1967–9) and Western Illinois University (1970–73) before joining the faculty of the Oberlin College Conservatory. He has been the recipient of awards from the NEA, the Martha Baird Rockefeller Fund, the Cleveland Arts Prize in Music (1991) and a Guggenheim fellowship (1991). In 1995 Logan was resident composer at the Rockefeller Study Center in Bellagio, Italy. His compositions vary in style from those based on jazz idioms to electronic music. He is the author of various articles on jazz and the *Primer for Keyboard Improvisation in the Jazz/Rock Idiom* (1980).

DORIS EVANS MCGINTY

Logar, Mihovil (*b* Rijeka, 6 Oct 1902). Serbian composer. He studied composition at the Prague Conservatory with Jirák and in Suk's masterclasses, from which he graduated in 1927. In that year he settled in Belgrade, teaching at the Mokranjac School of Music until 1944, when he was appointed professor of composition and instrumentation at the Academy of Music. He retired in 1972. A prolific and technically accomplished composer, he has tackled a variety of styles and genres belonging to the late Romantic era. His early works were atonal and expressionist, but later he came to adopt a style more conventional in harmony and more direct in feeling. The first of his stage works, the *Četiri scene iz Šekspira* ('Four Scenes from Shakespeare'), took fragments from *King Lear*, *The Merchant of Venice*, *Antony and Cleopatra* and *A Midsummer Night's Dream*, set in contrasted movements on the model of a symphony. His densely orchestrated opera *Pokondirena tikva* ('The Stuck-up Woman') achieves the spirit of *buffo* and high drama through parlando dialogues and grotesque arioso passages. In the opera *Četrdesetprva* ('1941') he predominantly uses recitative, rich orchestration and bold dissonance to build psychological profiles of main characters. His instrumental pieces are notable for their serene optimism, burlesque moods, restless melody, quick and lively rhythms and striking, colourful orchestration.

WORKS
(*selective list*)

STAGE

Četiri scene iz Šekspira [4 Scenes from Shakespeare] (stage sym., after W. Shakespeare), 1930

Sablazan u dolini šentflorijanskoj [Temptation in the Valley of St Florian] (comic op, 3), 1937; Sarajevo, 1968

Zlatna ribica [The Goldfish] (ballet), 1950

STANA ĐURIĆ-KLAJN/ROKSANDA PEJOVIĆ

Logier, Johann Bernhard (*b* Kassel, 9 Feb 1777; *d* Dublin, 27 July 1846). German pianist, teacher, author and composer. After early musical training from his father, he moved to England in 1791. In 1794 he joined the band of the Marquis of Abercorn's regiment and was later promoted from flautist to director of music. Having moved to Ireland, the band was discharged and he became organist at Westport, then director of the band of the Kilkenny Militia in 1807. He settled in Dublin in 1809 and was musical director of the Royal Hibernian Theatre for a year. In 1810 he left these posts and opened a music shop which flourished until 1817 at 27 Lower Sackville Street. He also taught the piano, and became interested in developing quicker and more thorough training methods. In 1814 he patented the chiroplast or 'hand-director'

mechanism, a laterally sliding frame for the hands fitted above the keyboard designed to control the position of the wrists and relation of the hand to the arm (see illustration). In addition, a board ruled with bass and treble staves could be placed on the music desk, so that each note was written above the corresponding key to aid the teaching of note-names. The inability of the system to accommodate the turning under of the thumb was later rectified by a modification introduced by Kalkbrenner, and further modification was made by Hawker. Having first designed it to aid the instruction of his daughter, Logier devoted himself to its promotion, especially for the simultaneous group use of pupils at different standards. He produced a series of explanatory publications and studies for its use, employed adroit publicity, and exploited his patent to draw high fees from the many teachers who used it in Britain and also in the USA. Academies were established in the provinces, and Samuel Webbe taught the system in London at an Institute set up with Logier and others. Webbe's pupils exhibited the method in London in 1817, providing the subject for Logier's *An Authentic Account of the Examination of Pupils* (1818). Kalkbrenner's improved version of the chiroplast was sold in England as late as 1877. Such marketing naturally brought criticism, and a series of increasingly combative publications from Logier and his opponents appeared, with rebuttals from influential professors whom he had asked to endorse the method. But, as well as Kalkbrenner, Spohr supported the invention on the grounds that it provided a disciplined method for the training of a large number of pupils.

Logier's 'hand-director' mechanism, or chiroplast: engraving from 'The First Companion to the Royal Patent Chiroplast' (London, 9/1819)

Though it attracted vast attention (Fétis ascribes it an entry as long as for a major composer) the mechanism was only part of a larger educational goal, through which he emphasized thorough teaching of harmony and musical form, including thoroughbass, hoping his ideas would provide the means for musical cultivation on the largest scale. To an extent, they did. Promotion in France failed (1819) but in 1821 the Prussian government, at Zelter's suggestion, invited Logier to Berlin. From 1822 to 1826 he taught the method there, whence it spread through Germany and neighbouring countries. From London Logier returned to Dublin in 1829 and continued to teach, write and manage a new music shop at 46 Upper Sackville Street. *Logier's Thorough-Bass* of 1818 does not build on traditional figured bass practice, but is a theory of harmony based on the harmonic series. Logier's presentation of the concept of chordal inversion and of the 'fundamental bass' influenced A.B. Marx, who translated the book (and wrote his first articles upon Logier's system); Logier's *Thorough-Bass* is recorded as the first textbook used by Wagner, in 1828. Logier later produced the *System der Musik-Wissenschaft und der praktischen Komposition* (1827), a textbook dealing with both harmony and form; it marks the earliest known use of the now standard German word for 'musicology': it is clear that Logier's sense of the term embraced the notion of 'music theory' more closely than that of 'music history'. Logier's many compositions are mainly in salon style; as well as many arrangements, his works with piano include a Grand Concerto op.13, chamber music and songs; his military works were not published and appear to be lost.

DAVID CHARLTON/MICHAEL MUSGRAVE

Logische Form (Ger.). A form that relies on continuity and growth. *See* ANALYSIS, §I, 3.

Logothetis, Anestis (*b* Pyrgos, eastern Romylia, 27 Oct 1921; *d* Vienna, 6 Jan 1994). Austrian composer of Greek origin. In 1942 he settled in Vienna, where he studied mechanical engineering at the Technische Hochschule (1942–4) and composition at the Music Academy (1945–51). Later he attended courses in Rome, Darmstadt and elsewhere, and in 1957 he worked in the Cologne electronic studios. He received the Theodor Körner Förderungspreis in 1960. Before 1959 he composed a number of 12-note and serial works in traditional notation. Then, aiming at greater fluidity of form, he gradually turned to graphic methods, developing what he termed 'integrating' notation. The resulting scores, generally offering a degree of freedom in instrumentation as well as all other dimensions, are often captivating works of visual art. (*LZMÖ*)

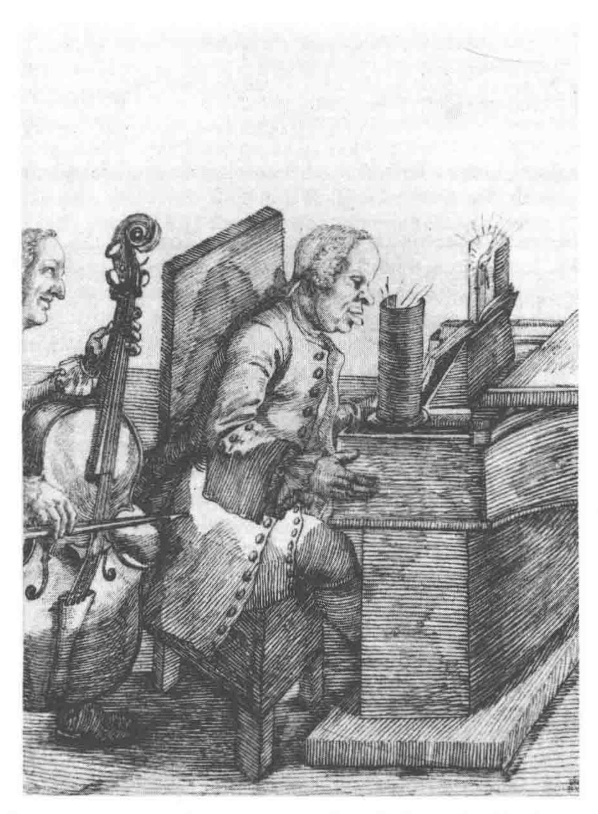
GEORGE LEOTSAKOS/KOSTAS MOSCHOS

Logroscino, Nicola Bonifacio (*b* Bitonto, bap. 22 Oct 1698; *d* ?Palermo, 1764/5). Italian composer. In June 1714 he and his younger brother Pietro entered the Conservatorio di S Maria di Loreto, Naples. On 1 October 1727 the conservatory expelled them both 'for bad traits of character'. Pietro was later readmitted (on the condition that he no longer consort with his brother), but Nicola was not. In May 1728 he became organist to the Bishop of Conza (Avellino) and stayed in this post until June 1731 when he returned to Naples, marrying a local girl there in November of the same year.



Logroscino's first known composition, the oratorio *Il mondo trionfante nella concezione di Maria sempre Virgine*, was performed near Brno in 1730 at the court of Cardinal von Schrattenbach. In 1735 his first known comic opera, *Lo creduto infedele*, was presented at the Teatro della Pace, Naples. In a statement written in October 1738 by one of the ministers of the King of Naples, in which he recommended Logroscino for an

opera commission for the Teatro S Carlo, the minister added that the composer had already 'set many comedies to music in the small theatres of the capital'. Two other comic operas reputedly by Logroscino may belong to this period: *Tanto ben che male* and *Il vecchio marito*. His first known full-length opera, *Il Quinto Fabio*, was written for the Teatro delle Dame, Rome. Thereafter he wrote numerous comic operas, sometimes in collaboration with other composers, most of which were for the 'small' Neapolitan theatres such as the Fiorentini and Nuovo. It is on these comic operas that his reputation is chiefly built.

Giuseppe Bertini, in his *Dizionario Storico-Critico* (1814–15), mistakenly implied that Logroscino was *maestro di contrappunto* at the Conservatorio de' Figliuoli Dispersi in Palermo from 1747, an error echoed in many subsequent biographies. Prince Corsini only approved the new constitution for the conservatory in that year and after the directors failed to secure Perez, Gregorio Sciroli was hired as *maestro di cappella*. Indeed, Prota-Giurleo cited documents confirming Logroscino's presence in Naples in 1753, and the popularity of his music in Naples throughout the 1740s and early 50s supports his continued presence there. Documentary evidence of Logroscino's move to Palermo comes from his nomination to replace Sciroli in September 1758. By January 1760 a serenata he wrote was performed in the gallery of the royal palace and about that time he completed a new third act for Galuppi's *La nozze* (staged in the S Cecilia theatre). In that year he also dated the autograph manuscript of his *Stabat mater*. He was apparently joined in Palermo by his brother, Pietro, in 1762. The administrative journals of the conservatory list pay records for Logroscino as late as 30 November 1764, but a gap in these records then stretches until September 1767. Nevertheless, the libretto for the serenata *Il tempio dell'onore*, dated 12 January 1765, refers to the composer as already dead.

Though Logroscino has always been considered an important composer of opera, especially comic opera, too many facts about his life and music are missing for a proper assessment to be made. It seems that his popularity as a composer of comic opera rose sharply in the years after 1738 and that he had no serious rival among composers of this genre in Naples between 1744, when Leonardo Leo died, and 1754, when Nicola Piccinni composed and presented his first comic opera to the Neapolitan public. By 1757–8 Piccinni had superseded Logroscino as the favourite composer among Neapolitan comic opera audiences. Logroscino's posthumous fame owed much to the statement of La Borde that 'he was the god of the comic genre, and has served as model for almost all composers of this type of work'. Later writers exaggerated his position in other ways. Gerber declared that he was the 'creator' of comic opera, while others, notably Framery (1791–1818), said that he instigated the practice of ending the acts of comic opera with an important vocal ensemble that gradually increased from one voice to two, three, four and up to nine singers, giving the ensemble finale. Although by 1900 it was clear to historians that he was not its inventor, Kretzschmar, in 1908, still gave him credit for inventing a new type of ensemble finale whose musical structure was determined solely by the action and the text. Even this view has since been exploded.

Modern opinion of Logroscino's comic operas must remain flexible until more of the music is discovered. At present this music is limited to one complete work, *Il governatore*, and the Act 1 finale to *Il Leandro*. There is no evidence here to suggest that Logroscino's finales were more advanced structurally than those of his predecessor Leo, who also composed finales with a freely evolving form to suit the words. *Il governatore* is weak melodically, but the dramatic characterization and instrumentation are strong. Other surviving music includes two heroic operas, *Giunio Bruto* and *L'olimpiade*, a few arias and ensembles in manuscript, and a small amount of liturgical music including two *Stabat mater* settings modelled on Pergolesi's.

Nicola Logroscino directing an opera from the harpsichord (and apparently beating time on the sides of the instrument): caricature by Pier Leone Ghezzi, pen and ink, 1753 (GB-Lbl)

WORKS

STAGE

3-act comic operas, performed in Naples, unless otherwise stated

Lo creduto infedele (A. Palomba), Della Pace, wint. 1735

Il Quinto Fabio (dramma per musica, 3, A. Salvi), Rome, Delle Dame, carn. 1738

Inganno per inganno (G.A. Federico), Fiorentini, aut. 1738

L'inganno felice (T. Mariani), Nuovo, wint. 1739

La violante (Palomba), Nuovo, carn. 1741; rev. of Auletta's L'amor costante

Amore ed amistade, Fiorentini, spr. 1742

La Lionora (Federico), Fiorentini, wint. 1742, collab. V. Ciampi

Il Riccardo, Fiorentini, carn. 1743

Festa teatrale per la nascita del R. Infante, pt.1, Naples, July 1743, pt.2 by G. Manna, unperf.

Il Leandro (A. Villani), Nuovo, spr. 1744, frag. *GB-Cfm*, modern copy *US-Wc*

Ciommetella correvata (P. Trinchera), Della Pace, aut. 1744; as Lo cicisbeo, Nuovo, aut. 1751

Li zite (Trinchera), Della Pace, spr. 1745

Don Paduano (Trinchera), Della Pace, wint. 1745

Il governatore (D. Canicà), Nuovo, carn. 1747, *D-MÜs*, modern copy *US-Wc*
La costanza (Palomba), Nuovo, aut. 1747
Giunio Bruto (dramma per musica, 3, M. Passeri), Rome, Argentina, Jan 1748, *D-MÜs*, 1 aria, *F*
La contessa di Belcolore (comic int, 2, N. Carulli), Florence, Intrepidi, carn. 1748
Li despiette d'ammore (Palomba), acts l, 2, Della Pace, carn. 1748, act 3 by N. Calandra
La finta frascatana (Federico), Nuovo, carn. 1751, rev. of Leo's Amor vuol sofferenza with addns by Logroscino and A. Ferradini
Amore figlio del piacere (Palomba), Nuovo, aut. 1751, collab. G. Ventura
Lo finto Perziano (Trinchera), Nuovo, carn. 1752, 3 arias re-used in G. Sciroli: Li nnamorate correvate, aut.–wint. 1752
La Griselda (Palomba), Fiorentini, aut. 1752
La pastorella scaltra (comic int, 2), Rome, Valle, carn. 1753
Elmira generosa (Trinchera), Nuovo, carn. 1753, collab. E. Barbella
L'olimpiade (dramma per musica, 3, P. Metastasio), Rome, Argentina, carn. 1753, *US-R*, 1 aria *AUS*
Le chiajese cantarine (Trinchera), Nuovo, carn. 1754, collab. D. Fischietti and G. Maraucci, rev. of Fischietti: L'abate Collarone, 1749

MICHAEL F. ROBINSON/DALE E. MONSON

Lohelius, Joannes. *See* OEHLSCHLÄGEL, FRANZ JOSEPH.

Lohet [Loxhay], **Simon** (*b* before *c*1550; bur. Stuttgart, 5 July 1611). Flemish composer and organist, active in Germany. He was the son of one Jean of Liège; the Walloon version of his surname, Loxhay, is common in the Liège area. On 14 September 1571 he was appointed organist of the Württemberg court at Stuttgart. When his older colleagues Utz Steigleder and H.F. Fries retired, he assumed sole responsibility for the chapel services. In 1594 Jérémias de la Grange, and later his own son Ludwig, joined him as assistants. He is known to have travelled three times to the Low Countries (in 1572, 1573 and 1576) and once to Venice to purchase instruments and music (in 1581). He retired on 19 December 1601, and remained in Stuttgart until his death. He trained many musicians, including his son Ludwig, W. Ganss the younger, G. Stammler and Adam Steigleder.

His 20 fugues are short pieces for four voices, often based on a single subject treated imitatively, the whole work usually consisting of a single section; a few, however, divide into two sections. He also composed two chorales, equally polished and in a typical south German style, and a canzona. These pieces, together with transcriptions of a motet and a chanson, are in RISM 1617[24] (ed. in CEKM, xxv, 1976); six of the fugues are also extant in *D-Mbs* Mus.ms.1581.

JOSÉ QUITIN/HENRI VANHULST

Löhlein [Lelei], **Georg Simon** (*b* Neustadt an der Heide, nr Coburg, bap. 16 July 1725; *d* Danzig [now Gdańsk], 16 Dec 1781). German theorist and composer. He was probably first taught music by his father Johann Michael Löhlein, organist and teacher in Neustadt. At the age of 16 he was conscripted into the Prussian army, where he was made to serve for 16 years. He then studied at the University of Jena (1760), where he was appointed director of the Academy Concerts and principal of the collegium musicum in 1761. In 1763 he continued his study of philosophy, ethics and poetry in Leipzig, and practised music under the direction of J.A. Hiller, who presumably made him musical director of the Grosses Konzert; he lived mainly, though, from the proceeds of private tuition. His *Clavier-Schule* (1765) and stage music brought him high regard in Leipzig, and in 1781, just before his death, he was appointed Kapellmeister of the Marienkirche in Danzig.

Under Hiller's influence and support Löhlein directed his career primarily towards teaching, which prompted his several successful theoretical works and many of his compositions. His widely imitated *Clavier-Schule*, which appeared in various new editions for almost a century, reworked the material of C.P.E. Bach's *Versuch* into a

graded order of difficulty for the benefit of the musical layman; its second volume, a dissertation on continuo playing, is to a great extent based on Sorge's *Compendium harmonicum* (1760). A violin method (1771), which was perhaps too dependent on Leopold Mozart's, met with less success despite a sympathetic revision by Reichardt. Löhlein's compositions are of secondary importance to his writings; much of his chamber and piano music was published by Breitkopf, and some occasionally shows originality in the handling of form. He also performed (in Hiller's Grosses Konzert) on the piano and violin.

LOTHAR HOFFMANN-ERBRECHT

Lohman, Alwina Valleria. *See* VALLERIA, ALWINA.

Löhner, Johann (*b* Nuremberg, bap. 21 Nov 1645; *d* Nuremberg, 2 April 1705). German composer, organist and singer. By the time he was 15 his parents had died, and he was adopted by his brother-in-law G.C. Wecker, under whose tuition he became a musician. From the scanty information available it appears that he was away from Nuremberg for only two of his 60 years. He played the regal at St Sebaldus from 1665 to 1670. He then served briefly as a tenor at Bayreuth and made a journey to Vienna, Salzburg (where he probably performed for the archbishop) and Leipzig (to hear Sebastian Knüpfer). In 1671 he was back in Nuremberg, where he was used as a tenor in various churches and perhaps as an organist at the Frauenkirche. In 1682 he was appointed organist of the Spitalkirche and in 1694 of St Lorenz, where he remained until his death.

Like Schütz, Löhner wrote no instrumental music. The more than 300 extant songs that he wrote as devotional music for the home are short strophic settings of sacred texts for one voice and a simple continuo accompaniment; a few include ritornellos for strings. The melodies are in a rather folklike style, like those of other members of the Nuremberg School, among whom Löhner showed perhaps the most pronounced melodic gifts. *Auserlesene Kirch- und Tafel-Music*, containing 12 works for solo voice, two violins and continuo, is of special significance among Löhner's works. He had set the texts earlier in *Der Geistlichen Erquick-Stunden*, as strophic songs; in the later settings the texts are through-composed so that, as Löhner wrote in his preface, 'one can . . . express them more clearly'. Seven are simply long single movements – solo concertos – of about 80 bars, while five have additional texts and are divided into separate movements forming biblical-ode cantatas, the earliest examples in Nuremberg. Löhner's last published work (1700) is a collection of 22 canons and two four-part motets. The brief canons, which range between two and four bars in length, usually outline the triad.

Only Löhner and S.T. Staden are known to have written operas in Nuremberg during the 17th century. Of the four by Löhner, only two collections of arias were known until 1975, when the missing organ tablature of *Die triumphirende Treu* (1679) was found. If Staden's *Seelewig* (1644) is discounted as an allegorical pastorale, Löhner's work can be credited as the earliest extant German opera. Its arias, like those of Staden and Johann and J.P. Krieger, are strophic songs in the same style as his sacred works in this form.

WORKS

all printed works published in Nuremberg

OPERAS

Die triumphirende Treu (C. Heuchelin and P. Keller), Ansbach court, 1679, ed. W. Braun, DTB, new ser., vi (1984); some arias in Keusche Liebs- und Tugend-Gedancken (1680); 4 arias ed. in Sandberger, 99–102 (see Sandberger, 87, and Sachs, 124)

HAROLD E. SAMUEL

Löhr, Hermann (Frederic) (*b* Plymouth, 26 Oct 1871; *d* Tunbridge Wells, 6 Dec 1943). English composer. Son of the composer Frederic Nicholls Löhr, he studied at the RAM where he won the Charles Lucas medal for composition. He made his name as a composer of ballads, which included *Chorus, Gentlemen!* (words by M. Ambient; 1899), *The Little Irish Girl* (E. Teschemacher; 1903), *Where my Caravan has Rested* (Teschemacher; from *Romany Songs*, 1909), *Little Grey Home in the West* (D. Eardley-Wilmot; 1911) and *Rose of my Heart* (Eardley-Wilmot; 1911). He also composed music for the stage, including *Our Little Cinderella* (A. Wimperis; 1911), and instrumental music including the suite *The Open Road* (1928). His main publisher was Chappell, by whom he was employed for over 30 years. He was a cousin of the actress Marie Löhr (1890–1975).

ANDREW LAMB

Lohr, Michael (*b* Marienberg, Erzgebirge, 23 Sept 1591; *d* Dresden, 17 Feb 1654). German composer. He is recorded in the Leipzig University matriculations for 1602. In 1612 he became Kantor at Frankenberg, Saxony, and probably in 1618 at nearby Rochlitz. From there he moved to Dresden in 1625 as Kantor of the Protestant Kreuzkirche and held this post until his death. Lohr was praised by Schütz as an excellent singer, and was also esteemed as an accomplished performer on lute, violin and other instruments. In nearly 30 years at Dresden he pursued various developments in the field of church music, especially accompanied polyphony. He published *Newe teutzsche Kirchen Gesänge* (Freiberg, 1629) and *Ander Theil Newer teutscher und lateinischer Kirchen Gesänge und Concerten* (Dresden, 1637), the former comprising one motet for seven voices and 14 for eight, the latter 24 for five, six and eight voices; settings for two choirs predominate. The motets can be sung unaccompanied, but Lohr encouraged the use of instruments to accompany or replace the voices. Only in one motet are specific instruments expressly requested and used independently in preludes and interludes. The continuo part throughout both collections is a *basso seguente*. Lohr intended his motets in the first instance for services at the Kreuzkirche, but they were also highly esteemed by his contemporaries in central Germany, where copies of individual pieces could also be found in manuscripts and organ tablatures. A setting by Lohr of Psalm cl (1644) has been lost.

KARL-ERNST BERGUNDER/GREGORY S. JOHNSTON

Lohse, Otto (*b* Dresden, 21 Sept 1858; *d* Baden-Baden, 5 May 1925). German conductor. He studied theory with Felix Draeseke, Rischbieter and Kretschmer, conducting with Franz Wüllner, the cello with Grützmacher and the piano with H.J. Richter. After playing the cello at the Dresden Hoftheater (1877–9), he began his conducting career in Riga. He was subsequently brought to the Theater am Dammtor in Hamburg by the impresario Bernhard Baruch, but he directed the 1894 German opera season in London before beginning his duties in Hamburg. The following year Damrosch called him to New York to direct the German opera season for two years; he was at the Théâtre Municipal, Strasbourg from 1897 to 1904, during the last three years of which he also directed the Royal Opera in London. He then became director of the Cologne Opera, where Martersteig was general director, for seven years; during that time he made guest appearances in Monte Carlo, Moscow, Paris, Brussels and London. His subsequent success as the director of the Leipzig Opera was even greater. He retired to Baden-Baden in 1923 but continued to conduct there until his death.

A specialist in the works of Wagner and Strauss and other contemporary German composers, Lohse exhibited extraordinary animation as an opera conductor. The Munich critics, however, found his style 'too angular', in contrast with the romantic style of Mottl; but in Brussels he was said to have conducted Charpentier's *Louise* 'like a Frenchman'. He composed an operetta *Der Prinz wider Willen* (1890) and many songs.

FRIEDRICH BASER

Lokshin, Aleksandr Lazarevich (*b* Biysk, 19 Sept 1920; *d* Moscow, 11 June 1987). Russian composer. At the age of six he began studying the piano and from 1930 he attended the music school in Novosibirsk; from 1936 he studied in Moscow at the school attached to the conservatory. He graduated from the composition class of Myaskovsky at the Moscow Conservatory (1944), and from 1945 he taught orchestration and score reading at the conservatory. A somewhat tragic and inauspicious character (he was expelled from the conservatory in 1939, and dismissed from his teaching position in 1948), Lokshin led a secluded life and composed in a dream-like world heightened by meditation. Many of his works have been interpreted by international conductors such as Mravinsky, Barshay, Rozhdestvensky and Jansons. Lokshin's music was highly regarded by Tishchenko, who had occasion to refer to him as his 'teacher'; similarly, Shostakovich described the First Symphony as a work of genius.

Lokshin's favoured genre was the vocal symphony. Typically, many of these works develop forms derived from the French *couplet*; they also display a predilection

for through-development. Of the symphonies, nos.5, 7 and 11 have been recorded and no.5 has been performed in London, New York and Amsterdam. The premières of his works were severely delayed (some of them were only performed posthumously) and the path to recognition as a composer was long and difficult. A frequent obstacle to the performance of Lokshin's symphonies in his homeland was the choice of texts that conflicted with official ideology. For this reason the première of his First Symphony in its unabridged form (with the original text) took place only after the composer's death and in Great Britain (Poole, 16 March 1988). The première of Symphony no.3 was given by the BBC SO and chorus in London in 1979.

YURY IVANOVICH PAISOV

Lolli, Antonio (*b* Bergamo, *c*1725; *d* Palermo, 10 Aug 1802). Italian violinist and composer. The death register of the church of S Ippolito gave his age as 77; F. Guelli's epitaph, written for his Requiem, gave his age as 75. Of the musicians and dancers cited in Mooser's putative genealogy of the Lolli family, only the cellists Luigi and Giuseppe Bichi-Lolli, also from Bergamo, may be related to Antonio. In 1758 he became solo violinist at the court in Stuttgart, an appointment he apparently owed to Padre Martini and to Jommelli, who identified him in a letter to Martini as the 'Bergamaschino'. As the successor to the brilliant Pasquale Bini, Lolli must already have been an extraordinary performer. His salary increased rapidly from 700 to 2000 florins by 1765, equalling the stipend of Nardini who was also at Stuttgart during these years. By May 1762 he had married the dancer Nanette Sauveur, sister-in-law of the court ballet-master and choreographer J.G. Noverre. The next few years, in which the Württemberg court reached its artistic apogee, brought a happy association of the two families. The soprano Brigida Lolli, Antonio's sister (not his daughter as Mooser conjectured), joined the *buffa* company in 1766 and married the dancer Joseph Anelli; Antonio's younger brother Gaetano, a journeyman violinist, played in the court orchestra from 1766 to 1772.

Allowances for extended leaves of absence gave Lolli ample time to tour. His first Vienna concerts may have taken place in 1760 (in 1761 or 1762 according to Hanslick); Dittersdorf (1801) described the lasting influence of Lolli's highly successful Vienna concerts in the spring of 1763. His burgeoning reputation was furthered in 1764 by his appearances in Paris at the Concert Spirituel (21, 23, 24 April; 31 May; 21 June), all reviewed in superlatives in the *Mercure de France*. The publication of his first concertos and other works date from this period. On 1 November 1766 he again performed at the Concert Spirituel.

During the next three years Lolli made no further tours, perhaps because of altered conditions at the Württemberg court, where economic and political pressure forced the dismissal of Noverre, with much of the musical and dance establishments (1767), and finally the cancellation of Jommelli's contract (March 1770). Negotiations in 1769 to re-engage Noverre, in which Lolli acted as intermediary, were unsuccessful. Despite Lolli's continuing annual stipend of 2500 florins and his wife's 2630 florins, they had fallen deeply into debt. Lolli was now granted leaves of absence to earn money to pay his creditors. In autumn 1769 he played in Frankfurt (14 and 24 September) and in Utrecht (14 November). In the summer of 1771 he toured Italy where he met the Mozarts, and at the end of 1773 he toured northern Germany with concerts at Hamburg, Lübeck and Stettin (now Szczecin). Early in 1774 he visited Dittersdorf in Johannisberg for a fortnight. Then, on 29 July 1774, while he was on tour, the Lollis' contracts were terminated. His wife and son Filippo (*b* ?Stuttgart, 1773) remained in Württemberg as hostages against the payment of the family's debts. By the summer's end Lolli was chamber virtuoso to Catherine the Great at a salary of 4000 rubles.

Throughout his Russian service (1774–83) Lolli continued his concert tours. A performance in Warsaw on 5 January 1776 marked the end of one tour. Then, to the chagrin of court officials, he extended another year's leave from the end of 1777 to early 1780. After concerts in Scandinavia and Germany, he again visited Dittersdorf early in 1778. He gave his health and the climate as excuses for not wanting to return to Russia, showed Dittersdorf 10,000 gulden in cash, and talked of retirement after one more tour which would include Vienna, Paris, London, Amsterdam, Hamburg, Berlin and the Papal States. A successful appearance in 1779 at the Concert Spirituel and a subsequent tour of Spain, both mentioned by Fétis, have not been substantiated. Lolli's affiliation to the Russian court ended at the close of 1783 after prolonged litigation; his successor was his former pupil G.M. Giornovichi. In 1784 he played at Stockholm,

Hamburg and Copenhagen (25 September). Early in January 1785, he arrived in London.

Lolli's London sojourn was neither as brief, nor his departure as sudden and mysterious, as Burney maintained. Since tickets for his first concert were available at Noverre's private residence, he probably stayed with his brother-in-law. An advertised concert of 4 February was apparently postponed. His first appearance 'For the Benefit of Signor Antonio Lolli' was on 18 February at Willis's: P. Salomon directed, and the 13-year-old pianist J.B. Cramer and the oboist J.C. Fischer took part. On 23 February Lolli played both at the Oratorio (where Burney heard him) and at the Hanover Square Grand Professional Concert. On 7 March he appeared in a benefit concert for Nina Salas. However, there are no further notices from 1785 nor from his visit in 1791, when, according to Haydn's first London notebook, 'Lolli and his son came from Stockholm'.

From 1785, information about Lolli is fragmentary. A Paris concert on 4 June 1785 may not have taken place because of a dispute over licensing. According to Gerber he visited Madrid where he received from the crown prince a gold snuff-box with 350 ducats, and also 2000 real for performing one concerto and two solos at public concerts. There are scattered notices of concerts in Italy in the late 1780s, in S Pier d'Arena (according to Gerber; now Sampierdarena), Genoa (14 September 1788) and Florence (March 1789). In 1791 he played in Berlin, Copenhagen, Hamburg (25 May, 2 August) and Stettin, assisted by his son Filippo, now an accomplished cellist. Lolli was in London in 1792 and Bertini heard him in Palermo in 1793 in probably one of his last public performances. Gerber identified him at Vienna in 1794 as first concertmaster of the King of Naples, but only Filippo played there in public and any official connection with the Naples court is still to be confirmed. When the Romberg brothers visited him at Naples (5 March 1796) Lolli played solos accompanied by A. Romberg on the violin. Lolli's last years were spent in impoverished retirement in Palermo.

Antonio Lolli: drawing by Hardrich (Staatsbibliothek zu Berlin, Preussischer Kulturbesitz)

Lolli had little if any formal training in composition, nor did he ever realize his intentions of studying counterpoint with Padre Martini. Such study might not have made him a better composer, but identification as a Martini pupil might have mitigated contemporary criticism of his works. Lolli's supposed ineptitude as a composer is not borne out by a study of his music, as Stoeving and Moser first pointed out; his works compare favourably with those of many other 18th-century violinist composers who, regardless of talent, were expected to provide their own repertory. The frequent reprinting of his sonatas testifies to the popularity of his music during his lifetime. Of these, the *Six sonates pour violons* op.9 (*c*1785) are of special interest, both in style and in technique. Their harmonic structure and design show his growing awareness of the Classical style. One finds passages for the G string only, examples of scordatura (nos. 1 and 6), harmonics, daring leaps and changes of register and cadenza-like interpolations. Of the published concertos, the most successful was no.7 in G, 'that played by Jarnovik at the Concert Spirituel' (Paris, 1775).

It was as a performer that Lolli made his mark. The very critics who belittled his compositions were euphoric in praise of his playing. C.F.D. Schubart, who called him 'the Shakespeare among violinists', wrote that his 'octave passage on the unwieldy instrument was as pure as if it had been played on the best-tuned clavichord', and that he played both octaves and 10ths with the greatest precision. The critic of the *Allgemeine musikalische Zeitung* wrote that 'the most dangerous leaps from depths to the uttermost heights were child's play for him'. The effect of his playing on Dittersdorf, reviews of Paris concerts and the many sonatas in the 'style of Lolli' all testify to his influence as a performer. The language of Lolli's reviews approaches the level of hyperbole usually associated with Paganini. But his music (while it may not reflect his performing style) does not show the transcendental technique, innovation and daring that make Paganini unique. Lolli, and contemporaries who shared his virtuoso bent, prepared the way, but the extraordinary art of Paganini required a musician of special imagination and genius. One cannot speak of a Lolli school, although Giornovichi, Woldemar and others are often cited as his pupils (there is no proof that either Giornovichi or Woldemar, who was not able to perform his own music, ever studied with him). Hanslick described Lolli fittingly as 'the forerunner and prototype of Paganini'.

WORKS

VIOLIN CONCERTOS

op.	
2	Deux concerto, E♭, C (Paris, 1764)
4	[2] Concerto, A, B♭ (Paris, 1766)
5	[2] Concerto, E, D (Paris, 1768)
—	Septième concerto, G (Paris, 1775)
—	Huitième concerto, D (Paris, 1776)
—	Huitième concerto (Paris, 1779) [different from that listed above]

ALBERT MELL

Lomakin, Gavriil Yakimovich (*b* Borisovka, Kursk province, 25 March/6 April 1812; *d* Gatchina, 11/21 May 1885). Russian choral conductor, teacher and composer. At the age of ten he joined Count Sheremet'yev's choir in St Petersburg (his father was one of Sheremet'yev's serfs); there he was taught music by Antonio Sapienza. When his voice broke in 1830 he became a singing teacher to the choir, and was later appointed director (1850–72). Under his leadership it became one of the most important musical institutions in Russia, giving concerts of traditional church music, folksongs and contemporary choral works. When the choir was disbanded in 1874 Lomakin conducted Sheremet'ev's male-voice choir, but ill-health soon compelled him to resign. In 1862 Balakirev invited him to help him found the Free School of Music, and for eight years Lomakin conducted the student choir. He also taught at the court chapel (1848–59), and at the drama school in St Petersburg. His pupils included the singers Mel'nikov and Karmalina and the conductor Prince Yury Golitsïn. Lomakin wrote two books on singing, and with Vorotnikov and L'vov published a collection of old Russian hymns arranged for four-part choir. He composed sacred music and a few other pieces.

JENNIFER SPENCER

Lomax. American family of folk music specialists.

(1) **John Avery Lomax** (*b* Goodman, MS, 23 Sept 1867; *d* Greenville, MS, 26 Jan 1948). Folksong collector. While studying for his MA at Harvard (1906–7) he was encouraged by his professors George L. Kittredge and Barrett Wendell to collect the folksongs of cowboys in Texas, where he had grown up. This work resulted in *Cowboy Songs and Other Frontier Ballads* (1910), one of the first important collections of American folksong. He collected and published only sporadically between 1910 and 1932, after which he undertook a nationwide lecture and collecting tour that produced *American Ballads and Folk Songs* (with Alan Lomax, 1934), hailed as the largest single collection of indigenous American song to that time.

Lomax became curator of the Archive of American Folksong at the Library of Congress in 1933 and played a major role in its development. With support from the library and other government agencies, he and his son Alan made field recording trips throughout the 1930s, mostly in the South and Southwest, pioneering the use of instantaneous disc recording equipment for that purpose and eventually depositing in the archive recordings of more than 4000 folksongs. Among their discoveries was the black folk-blues artist Leadbelly, whom they found in prison in Louisiana in 1934 and later took to New York for concerts and commercial recordings. Sometimes criticized for carelessness with sources and documentation, Lomax nevertheless performed an invaluable role in

preserving and transmitting the songs of the American people.

(2) Alan Lomax (*b* Austin, TX, 15 Jan 1915). Folksong scholar, son of (1) John Lomax. He was educated at Harvard University (1932–3), the University of Texas (BA 1936) and Columbia University (where he did graduate work in anthropology in 1939). In 1937 he began working under his father in the Archive of American Folksong, Library of Congress. He worked for the Office of War Information and US Army Special Services during World War II, and served Decca Records Inc. as Director of Folk Music (1946–9). He produced numerous educational radio and television programmes on folk music for use in the USA and Great Britain (such as the 'American Patchwork' series produced for PBS, 1990) and recorded and studied folksong in Great Britain, Haiti, Italy, Spain, the USA and elsewhere. He served on the boards of several American folk festivals and lectured at various American universities (Chicago, Columbia, Indiana, New York). In 1963 he became director of the cantometrics project at Columbia University, an international study of the folksong in its cultural matrix (*see* CANTOMETRICS); he also founded the Association for Cultural Equity at Hunter College, CUNY.

Lomax's search to find and record songs and singers took him on lengthy journeys through the rural southern USA to farms, churches, small night clubs and prison farms. Travelling when recording techniques were in their infancy, he and his father transported a 300-lb disc recorder in a station wagon on back roads and farm lanes. Lomax found and documented an American folk heritage in the blues steeped in African roots, and a Western heritage flavoured with cowboy lore. From the outset, his work among the creators of the vast tapestry of American and African-American folksong convinced him to urge a very broad view of the data to make possible a comprehensive study of the song in its cultural context. Working with a team of scholars and assistants, he sought to compare data on song melody and structure with ethnographic, political, economic, biological and sociological data. One result was a correlation of behavioural data with textual and musical song profiles. Working with the musicologist Bill Grauer, he reported the identification of ten regional song matrices applicable to the majority of some 400 world song traditions represented in the Lomax archives. His contribution to folksong scholarship is thus best considered in terms of his pioneering advocacy of a view of the particular within a panoramic ethnic context.

As a writer, Lomax has discussed the behavioural aspect of song performance and the place of folksong in society in his articles 'Folk Song Style' (1959) and 'Song Structure and Social Structure' (1962), and in *Folk Song Style and Culture* (1968). He has prepared biographies of the jazz musician Ferdinand 'Jelly Roll' Morton (*Mister Jelly Roll* 1950) and Rev. Renfrew and Nora Reed, a black American preacher and a blues singer (*The Rainbow Sign*, 1959), providing valuable insight into black American life and culture in the southern USA. The folksong collections he has compiled include *Folk Song USA* (1947), *Cowboy Songs* (1986) and *Three Thousand Years of Black Poetry* (New York, 1970, with R. Abdul), an anthology including composed poetry, song texts, African praise-poetry, and texts taken from oral tradition. His search for the roots of the blues is chronicled in *Land Where the Blues Began* (1993). He has also edited important collections of recorded traditional folksongs (*Columbia World Library of Folk and Primitive Music*), American folksongs (*Southern Journey*) and blues (including the Library of Congress recordings of Jelly Morton, Roll Leadbelly and Woody Guthrie, as well as the collection *Muddy Waters: the Complete Plantation Recordings*). The publication of Lomax's extensive library of field recordings began in 1997 and is projected to run to 100 CDs.

(3) Bess Lomax Hawes (*b* Austin, 21 Jan 1921). Folk music performer, scholar and arts administrator, daughter of (1) John Lomax. She was introduced to folk music and music scholarship at an early age and was educated at the University of Texas (1937–8), Bryn Mawr College (BA 1941) and the University of California (MA 1970). From 1941 to 1952 she was a member of the Almanac Singers and participated in the recording of such albums as *Talking Union*, *Citizen CIO*, *American Folk Songs* and *Songs of the Abraham Lincoln Brigade*. She continued her work in folk music after being appointed assistant professor of anthropology in 1963 at California State College, Northridge, where she rose to the rank of professor in 1974. In 1977 she became director of the Folk Arts Program of the National Endowment of the Arts; she is credited with establishing folk arts programmes in virtually every state and territory of the USA by the time of her retirement in 1992. Under her leadership at NEA, the National Heritage Program was begun, honouring traditional artists from across the nation. Her many publications have focussed primarily on childlore. Throughout her career she has served on numerous grant panels and taken an active role in the production of folk festivals, films and summer programmes. She was awarded the National Medal of Arts in 1993.

NOLAN PORTERFIELD (1 and 3), DARIUS L. THIEME (2)

Lomax, (Louisa) Emma [Emily] (*b* Brighton, 22 June 1873; *d* Brighton, 29 Aug 1963). English composer and pianist. She studied piano at the Brighton School of Music and composition and clarinet at the RAM, London (1904–10; Goring Thomas Scholar, 1907–10; Lucas Silver Medal, 1910; ARAM, 1910), where she was later a professor of composition (1918–38). She and Morfydd Owen were Frederick Corder's most distinguished women students. Lomax's manuscripts are lost, but the stage works on supernatural themes for which she devised music, librettos, props and lighting were considered remarkable (*The House of Shadows*, 1905, *The Wolf*, 1906 and *The Brownie and the Piano-Tuner*, 1907), but her opera *The Marsh of Vervais* was never fully performed, and a toy theatre provided the main focus for her dramatic gift in later life. The Brighton Municipal Orchestra premièred her instrumental scores, notably the *Toy Overture* (1915), a parody of Tchaikovsky's *1812* overture. She wrote the Gilbertian text for Walton O'Donnell's one-act comic opera *The Demon's Bride* (1909), and her recitation to music *The Prince in Disguise* (1908) featured during the RAM's centenary celebrations in 1922. She was active in the Society of Women Musicians and three times president of the Sussex Women Musicians' Club. Her enthusiasm, wit and patience made her an ideal and respected teacher and she taught until the day she died.

WORKS

Dramatic: The House of Shadows (allegorical dramatic phantasy, 2, Lomax), 1905; The Wolf (psychological sketch, Lomax), 1906; The Brownie and the Piano Tuner, or the Piano Tuner and the Brownie (fairy play, Lomax), 1907; The Marsch of Vervais (op, Lomax); incid music for toy theatre
Orch: Ida's Flowers, 1903; Ruminations on a Quaint Theme, 1910; Toy Ov., 1915
Recitations to music: The Prince in Disguise, 1908; Bishop Hatto; 4 Nursery Rhymes; The Mother; The Sisters
Other works incl. cants. for female vv The Stormbird, The Whirlpool; partsongs; solo songs; pf works
Principal publisher: Charles Avison

RHIAN DAVIES

Lomazzo, Filippo (*fl* 1600–30). Italian printer, bookseller and publisher. He came from a family of scholars, artists and publishers in Milan. (Giovanni Paolo Lomazzo had sponsored the publication of treatises by Gaffurius and Bonaventura da Brescia in the years 1492–1500.) He entered into partnership with the Tini family in 1603 and until 1612 they produced much music, primarily the work of local composers. From 1613 to 1630 Lomazzo worked on his own; a number of his publications appeared from the presses of other printers. He appears to have been musically literate, for he selected the contents of some of his numerous anthologies himself: they include sacred and secular music by many composers, including Ghizzolo, G.S.P. de' Negri, Orfeo Vecchi, Gastoldi and Riccardo Rognoni. He also published treatises by Scaletta and Rognoni.

His son Francesco Lomazzo was also a printer. He published about a dozen books between 1603 and 1619, mostly in collaboration with the heirs of Simone Tini, including music by Orfeo Vecchi and a basso continuo part for Palestrina masses.

STANLEY BOORMAN

Lombard, Alain (*b* Paris, 4 Oct 1940). French conductor. He studied at the Paris Conservatoire. His first appointment was at the Lyons Opera (1961–5), as assistant and then as principal conductor. At the instigation of Régine Crespin he was engaged to conduct Massenet's *Hérodiade* for the American Opera Society at New York in 1963. He won the gold medal at the 1966 Dimitri Mitropoulos competition, and made his Metropolitan Opera début with *Faust* in 1967. He held appointments with the Greater Miami SO (1966–74) and the Strasbourg PO (1972–83), and from 1974 to 1980 was director of the Opéra du Rhin where he earned recognition for his artistic

enterprise while sharing a modest budget between the three centres served by the company at Strasbourg, Colmar and Mulhouse. He was appointed music director at the Paris Opéra (1981–3), then of the Opéra-Comique (1983), extending his guest engagements to include the Hamburg Staatsoper and his South African début with *Turandot* (1985, Johannesburg). In 1988 he became musical director of the Bordeaux Opéra and the Bordeaux-Aquitaine Orchestra, and in 1990 became director of the Grand Théâtre. His recordings include Gounod's *Roméo et Juliette* (1968) and *Faust* (1977), Delibes' *Lakmé* (1971), and orchestral works by Berlioz and Debussy (with the Strasbourg PO). He is a brilliant technician and has a dynamic personality in performance.

CHRISTIANE SPIETH-WEISSENBACHER/NOËL GOODWIN

Lombardi, Luca (*b* Rome, 24 Dec 1945). Italian composer. He began his composition studies with Armando Renzi, Roberto Lupi and, at the Pesaro Conservatory, Boris Porena (diploma, 1970). He went on to write a thesis on Hanns Eisler as a musicology student at the University of Rome. He lived in Cologne (1968–72) where he studied with Stockhausen, Pousseur, Kagel, Schnebel and Rzewski at the Kölner Kurse für Neue Musik, and with Zimmerman at the Hochschule für Musik. In 1973 he became a pupil of Dessau at the Akademie der Künste.

Under Zimmerman's influence, Lombardi experimented with serialism in *Proporzioni* (1968–9), a work in which the durations are derived from intervallic relationships. He went on to develop his own personal style, which aims to recapture freedom and spontaneity of expression and a richness of stylistic levels within a framework governed by rigorous construction, economy in the use of musical material and techniques of varied repetition. This style, which he termed 'exclusive', is exemplified by works such as *Wiederkehr* (1971), *Variazioni* (1977) and *Klavierduo* (1978–9). His work on the music of Eisler subsequently caused him to react against what he saw as the avant garde's indifference towards communication, by developing an 'inclusive' style, which harnessed the stylistic plurality already characteristic of the 'exclusive' method in an even more wide-ranging expression of the complexity and multiplicity of reality. The polystylism of these scores makes use of montages of popular materials (Symphony no.1, 1974–5) and the juxtaposition of stylistically differentiated textual fragments (e.g. *Tui-Gesänge*, 1977; *Majakowski*, 1979–80 and *Mythenasche*, 1980–81). In other pieces, as *Albumblätter* (1967–8), *Gespräch über Bäume* (1976) or Symphony no.2 (1981), stylistical inclusion co-exist with a more spontaneous proliferation of the original, basic material. The integration of tonality and modality followed on from his Eisler research and marked a reaction against what he saw as the indifference of the avant garde toward communication.

Overcoming a mistrust of the notion of historical progress (already implicit in the cyclical character of *Wiederkehr*) and a sense of existential emptiness (expressed in the rarified language, tense silences and Webernian resonances of *Sisyphos I-III*, 1984–5) Lombardi attained a new equilibrium in *Faust* (1986–90; awarded the Societá Italiana degli Autori ed Editori prize for music theatre) and in the Symphony no.3 (1992–3). In the Faust opera a series of poetic-philosophical opposites – life/death, empathy/estrangement, scepticism/passion and comedy/tragedy – co-exist with parallel stylistic techniques involving spontaneity/construction and complexity/simplicity. From 1980, Lombardi's highly individual mixing of elements has also led him to explore the tension between the individual and the collective as reflected in the relationships mankind/cosmos and history/human existence, in such works as *Einklang* (1980), *Framework* (1982–3), *Ai piedi del faro* (1986) and the Viola Concerto (1995) and *Vanitas?* (1999).

MARINELLA RAMAZZOTTI

Lombardic rhythm. Reversed dotting, that is, a succession of dotted figures whose short notes are on the beat. It is difficult to trace any rational origin for this name, which is found in the treatises of both Quantz (1752) and J.F. Agricola (1757). *See* SCOTCH SNAP and NOTES INÉGALES.

Lombardini, Antonio (*b* ?Montagnana, nr Padua; *fl* 1688–9). Italian composer. The libretto of his opera *Imperio deluso, ovvero La Dorice* (A. Schietti; composed for Palmanova in 1688), reported in Allacci, describes him as a native of Montagnana and as a parish priest at Pozzuolo del Friuli, near Udine. He also composed *Il trionfo di Amore e di Marte* (P.E. Badi) for the Teatro S Moisè, Venice, in 1689. (*AllacciD*; *EitnerQ*)

□

Lombardini, Maddalena Laura. *See* SIRMEN, MADDALENA LAURA.

Lombardo, Bartolomeo (*b* Messina; *fl* Tropea, Calabria, 1578). Italian composer. The title-page of his only surviving work, *Il secondo libro dei mottetti a cinque voci* (RISM, 1578[2]), describes him as a 'gentleman from Messina' and '*maestro di cappella* of Gerolamo de Rusticis, Bishop of Tropea', to whom the volume is dedicated. It contains 24 motets by Bartolomeo (and one by his son Gerolamo) which make effective use of large-scale sonorities; expressive homophony alternates with strict counterpoint, both richly ornamented. An earlier book of motets is lost (Bianconi; *MischiatiI*). Lombardo also composed a volume of five- and six-voice madrigals, *Trionfo de la victoria navale de la Santa Lega*, now lost, to commemorate the Christian victory at the Battle of Lepanto in 1571 (Bianconi; *JoãoIL*).

The motet by his son Gerolamo (1578–1604) in Lombardo's *Secondo libro*, is one of the finest in the collection, with its expressive use of dissonance and suspensions. Gerolamo, who has been confused with the Venetian Gerolamo Lombardi (*FétisB*, *EitnerQ*, Tiby), is also the composer of the first setting of the title text in *Le risa a vicenda* (1598[8]; ed. MRS, xii, Florence, 1993). Lombardo's setting was given as a model to the other eight composers who contributed settings of this text to the volume. He also contributed one madrigal to *Infidi lumi* (Venice, 1603), now lost.

PAOLO EMILIO CARAPEZZA, GIUSEPPE COLLISANI

Lombardo, Guy [Gaetano] **(Alberto)** (*b* London, ON, 19 June 1902; *d* Houston, 5 Nov 1977). Canadian bandleader of Italian descent. He organized his first group around 1917 in London, Ontario. By 1923 they had begun to play in the USA, and a year later made their first recordings for Gennett as Guy Lombardo and his Royal Canadians. After a successful engagement at the Granada Cafe, Chicago (1927–8), the group went to New York and in 1929 began a record-breaking engagement of more than 33 years at the Roosevelt Grill. From this time on Lombardo and his band prospered and their records sold well. They appeared on radio, in films and on television, and they toured extensively, always playing in major hotels, ballrooms and nightclubs. For years CBS broadcast the band's New Year's Eve performances nationwide from the Roosevelt Grill (later from the Waldorf-Astoria).

Lombardo's band was among the most popular and long-lived dance orchestras in 20th-century American musical life. His music was always pleasant and accessible as Lombardo aimed for, and reached, the broadest possible audience. The fairly stable membership of his band over the years assured continuity of style and performance. This was partly due to the participation of family members: Lebert (trumpet), Victor (clarinet and saxophone), singer Rose Marie, and especially Carmen (*b*

London, ON, 16 July 1903; *d* Miami, 17 April 1971), who composed for the band, sang, played the saxophone and served as music director. The band's emphasis on melody, its perfectly gauged tempos, its 'sweet' sound (from the saxophone section's heavy vibrato, the rippling two-piano accompaniment, and the unobtrusive rhythm section), its carefully crafted arrangements (many by Dewey Bergman), and its choice of popular material all added up to a formula that continued to please audiences – particularly dancers – year after year, despite changes in musical style and the demise of many similar ensembles.

MARK TUCKER

Lomon, Ruth (**Margaret**) (*b* Montreal, 7 Nov 1930). American composer and pianist. She studied at McGill University and the Quebec Conservatoire. Her composition teachers included Francis Judd Cooke and Lutosławski. In addition to composing and teaching, she has performed with Iris Graffman Wenglin as a piano duo (1971–83) specializing in the standard repertory and in music by women composers. Founding president of American Women Composers Massachusetts (1984), she has also served as vice-president of the organization's national board (1985–9), and was resident scholar in the Women's Studies Program at Brandeis University. Her honours include Yaddo (1977) and MacDowell (1983) fellowships, and awards from the Massachusetts Council on the Arts and Humanities (1985) and the National Federation of Music Clubs (1993).

Lomon's output includes orchestral, chamber and vocal works, as well as multimedia compositions. *Terra incognita* for orchestra (1993), written in an atonal musical language, features instrumental recitatives and extended performance techniques in a predominantly chamber-like texture. The cycle *Songs of Remembrance* (1995–6), composed during her tenure as a fellow of the Bunting Institute, Radcliffe College, sets poems written by Holocaust survivors and death camp victims. The trumpet concerto *Odyssey* (1997), commissioned by the Boston Pro Arte Chamber Orchestra, was inspired by her reading of Nikos Kazantzakis's poem *The Odyssey* and a requiem composed earlier in her career.

SHARON PRADO HOWARD

Lomont [Lumon], **Johannes** [Zanin] (*d* ?Milan, 1493). Franco-Flemish singer. *See* BARRA, HOTINET.

Lonati [Lunati, Lainati, Leonati], **Carlo Ambrogio** [Ambrosio] (*b* Milan, *c*1645; *d* Milan, *c*1710–15). Italian composer, impresario and singer. Baptized Giovanni Ambrogio Leinati, he is first heard of during the period 1665–7 as a violinist of the royal chapel in Naples, where in 1667 he also sang the comic role of Lesbo in a production of Cavalli's *Scipione africano*, whose libretto refers to him as 'milanese'. The records of the Congregazione di S Cecilia show that by 1668 he was in Rome, where he participated in several Roman oratorio productions and festivities in churches such as S Luigi dei Francesi, S Francesco, S Marcello, S Giovanni dei Fiorentini and S Giacomo degli Spagnoli. At least from 1673 he also served the expatriate Queen Christina of Sweden as leader of her string orchestra. At this time he acquired the sobriquet 'Il gobbo della regina' ('the queen's hunchback'), by which he became widely known. In 1673 he sang the comic role of Vafrindo in Pasquini's *Amor per vendetta* at the Teatro Tordinona. Similar roles that call for a 'gobbo' or 'nano' in operas for the Tordinona (*Il novello Giasone*, 1671; *Eliogabalo*, 1673; *Massenzio*, 1673–4) may also point to his participation, and there may be an allusion to him in one scene of the Roman score of Borzio's *Narciso* (in *I-Rvat*). Much speculation about his friendship with Stradella and the scandalous involvement which might have precipitated their departure from Rome in 1677 is based on Giazotto's romantic biography of Stradella (1962), which must be read with caution. In the 1677–8 season he acted as impresario and composer at the Teatro del Falcone in Genoa, where Stradella joined him. There he produced Pasquini's *dramma per musica L'Amor per vendetta* under the title *Amor stravagante* (1677), perhaps with additional music of his own, and his *Amor per destino* to a libretto by Minato. In 1682, after the murder of Stradella and the ensuing investigations, he was deported from Genoa; he applied unsuccessfully to return in 1683. A violinist named 'Gobbo' or 'Gobbetto' figures on the expenses list of S Luigi dei Francesi, Rome, in 1682–3. He was definitely in the service of the dukes of Mantua as a 'virtuoso' between 1684 and 1686, when he wrote his *Ariberto e Flavio regi de' Longobardi* for the Venetian Teatro S Salvador and two works for the Modenese court, the opera *I due germani rivali* and the oratorio *L'innocenza di Davide*; he may also have been responsible for the revival there of Stradella's *Il trespolo tutore* in

1686. He collaborated in several Milanese productions in the 1680s and 90s. The additional arias in the Veronese score of Marc'Antonio Ziani's *Tullo Ostilio* may hint at an activity as reviser of others' operas in that period and region. He seems to have accompanied the famous castrato G.F. Grossi on his visit to England early in 1687.

Lonati apparently spent his late years in Milan but may also have had some contact with Vienna, since he dedicated a volume of cantatas and the set of 12 violin sonatas (1701) to the Emperor Leopold I. According to F.M. Veracini's *Il trionfo della pratica musicale* he spent some time in prison. In a letter from Milan (dated 2 January 1701, in *I-Bc*), the famous castrato Pistocchi mentions a 'scolara del Gobbo del Violino', so Lonati probably worked as a singing teacher also. The traditional view, based on the work of Burney and Hawkins, that he was the first violin teacher of Geminiani has not yet been ascertained. He should not be confused with Antonio, Angelo or Ascanio Lonati, who signed several Milanese librettos in the 1670s. William Corbett acquired his violin, which he offered for sale in London in 1724 (see Hill).

Lost works and uncertain attributions hamper a balanced view of Lonati as a composer, but certain traits are clear enough. The solo sonatas of 1701 pursue ranges up to the 7th position and display prominent double stopping as well as scordatura, features that link him with Biber and Matteis; no.6 is written for a five-string instrument tuned a–e′–a′–e″–a″. His nine extant trio sonatas – all called *simfonie* – follow the general style of the pre-Corellian Roman sonata used by his contemporaries Colista, Stradella and Mannelli. He nevertheless treats them in an individual manner, developing such features as extended contrapuntal working, especially in the fugal movements, virtuoso and idiomatic writing, and the use of melodic and harmonic sequences more typical of the Bolognese sonata. His cantatas command admiration and are worthy to rank with those of Stradella and Alessandro Scarlatti. They are basically Roman in style. Consisting of several sections or movements, they are remarkable for their length, variety, force of expression and range of tonal relationships.

Although Lonati was noted for his violin playing and his instrumental composition, he also made a significant contribution to opera, as both a performer and a composer. Whereas his activity as a singer was primarily in comic roles, his dramatic output belongs to the more serious branch of *dramma per musica*. His Genoese operas seem not to have been very successful despite fine musical writing, especially in those arias accompanied by string orchestra. Notwithstanding their lengthy da capo arias and a penchant for *stile concitato*, his later operas display skilful writing for such obbligato instruments as trumpet, violin and cello, thus revealing the adoption of some stylistic peculiarities developed in northern Italy.

NORBERT DUBOWY

Lonchampt, Jacques (Marie Léon) (*b* Lyons, 10 Aug 1925). French music critic. He took a degree in philosophy at the University of Lyons, but was self-taught in music. He was the Lyons delegate of the Jeunesses Musicales de France in 1945, and began his career as a music critic the same year: he wrote for the *Lyon-libre* until 1947, then became editor of the *Journal musical français* (1947–60); from 1961 he wrote for *Le monde*, whose music critic he became in 1965, succeeding Dumesnil. He retired in 1990. He is of a line of French critics whose single-minded and obvious approval of avant-garde music has earned more than a few opponents.

CHRISTIANE SPIETH-WEISSENBACHER

Loncin, Jean de (*b* Liège, *c*1575; *d* Madrid, bur. 27 Aug 1593). Flemish composer and singer. He was one of 14 boy sopranos aged between seven and 12, including Géry Ghersem, Mathieu Rosmarin (Mateo Romero), Philippe

Dubois, Jean Dufon and Nicolas Dupont, who were recruited in the Netherlands in 1585 to serve in the chapel of Philip II of Spain. He sang in the Flemish chapel at the court at Madrid from the beginning of January 1586 and was taught by Philippe Rogier until 1593. The catalogue of the library of King João IV of Portugal, destroyed in the Lisbon earthquake of 1755, records eight pieces by him, all to French texts and six of them known to have been for five voices.

PAUL BECQUART

Londariti, Francesco [Frankiskos Leontaritis, detto il Greco] (*b* Iraklion; *d* Crete, 1572). Cretan composer, active mostly in Germany and Italy. By 1535 he had been ordained priest, and between 1537 and 1544 served as organist at the cathedral of S Titus in Iraklion. It may have been the destruction of the cathedral by fire in that year that caused Londariti to move to Venice, where he was employed as a singer at S Marco until about 1556. In the following year he served briefly as a singer at Padua Cathedral, after which he is next heard of in 1562 as a member of the Bavarian ducal chapel in Munich. There he remained until about 1566, and by 1569 he had returned to Crete. Londariti's two books of published motets contain a number of occasional pieces including two in honour of the second marriage of the banker Johann Jacob Fugger. The six-voice collection opens with an encomiastic piece, *Custos Aonidum*, to an obscure mythological text that implicitly praises Albrecht V, Duke of Bavaria, as a patron of music and the arts. Another piece in the collection, with its somewhat contrived opening line *Lucas luce sua Grimaldi gloria lucis* is canonic. Many of the 38 pieces in the *Modulationum liber primus* show a fondness for sections in contrasting mensurations, most notably *Laetare Kierusalem*, which passes through no fewer than five changes in the course of a comparitively short work. Of Londariti's three parody masses, one is based on Josquin's chanson *Aller mi faut*, the other two on unidentified models.

WORKS

2 napolitane, 3vv, 1565[12]

IAIN FENLON/MENTZOS

London (i). Capital of Great Britain. The 'City of London' is a small (about 3·2 km²) commercial area, north of the River Thames; but 'London' (or 'Greater London') is taken to apply to a much larger region, comprising (at the beginning of the 21st century) 33 boroughs, two of which are the Cities of London and Westminster (the seat of national government). It is by far the largest city of Europe.

London has ancient musical traditions, deriving from its many ecclesiastical institutions (including St Paul's Cathedral and Westminster Abbey), its importance as a court and centre of government, and its commercial prosperity. It has been a magnet for musicians from Europe (and more lately the rest of the world, especially the British Commonwealth and the USA) since the 17th century; from the 18th century onwards many leading composers settled in or visited London to compose for the rich and appreciative audiences – Handel, J.C. Bach, Mozart, Haydn, Spohr, Weber, Chopin, Mendelssohn, Verdi, Wagner and almost every composer of note since. Through its concert life, opera and musical theatre, as well as its espousal of popular and world music of all kinds (not least within the recording industry), it has maintained its reputation as a leading centre of musical activity.

I. Religious institutions

1. Royal abbeys and chapels.

(i) Chapels royal. See §II, 1, below.

(ii) Westminster Abbey. The Abbey of St Peter, Westminster, was founded by Edward the Confessor on the site of an older monastery in 1065 and rebuilt by Henry III in the 13th century. It was a Benedictine abbey but became a national church through its proximity to the royal palace of Westminster. William I was crowned there in 1066 out of veneration for the Confessor, and every subsequent coronation has been held there. Henry VII's chapel, the largest of a number of side chapels and chantries, was built 1503–19. At the Dissolution in 1540 the Abbey became a cathedral with a bishop, but in 1550 the diocese was returned to the see of London. In 1560 it was refounded as a collegiate church, which it has remained.

The Westminster Customary (*c*1260) describes the use of three-part polyphony at the Abbey. The Lady Chapel had an organ as early as 1304; references to an organ in the choir are found in 1387–8, and a new one was built in 1441–2. The choir of the building was walled off from the nave and was used by the monks; the nave was used by the lay members of the community, servants, pilgrims etc, and had an altar below the rood screen, with a large organ nearby. Several of the chantries and side chapels may have had small organs of their own. The chantry priests assisted the monastic choir in the performance of polyphonic music. Towards the end of the 15th century a song school was organized to maintain services outside the monastic choir, in the nave or Lady Chapel. The first recorded Master of the Choristers was William Cornysh the elder, from 1479 to 1491. There were ten choristers at the Dissolution, and the same number in the new foundation, with 12 lay clerks and 12 vicars. At the beginning of Elizabeth's reign there were three organs – in the choir, in Henry VII's chapel, and a 'great wooden organ' on the screen, which was thenceforth used to

1. Preaching at Paul's Cross: painting, 'Farley's Dream', by John Gipkym, commissioned 1616 (Society of Antiquaries, London)

accompany metrical psalms sung by the congregation in the nave. From 1599 there are references to the use of cornetts and sackbuts in the Abbey. After the Interregnum the nave organ was rapidly restored; it was heard by Pepys on 4 November 1660. A long series of famous musicians was associated with the Abbey. Edmund Hooper, Master of the Choristers from 1588, was made the first officially appointed organist in 1606. Parsons, Orlando and Christopher Gibbons, Blow, Purcell and Croft all served their turn. There followed a decline in the fame of the organists, perhaps reflecting a drop in ecclesiastical support for the music of the Abbey.

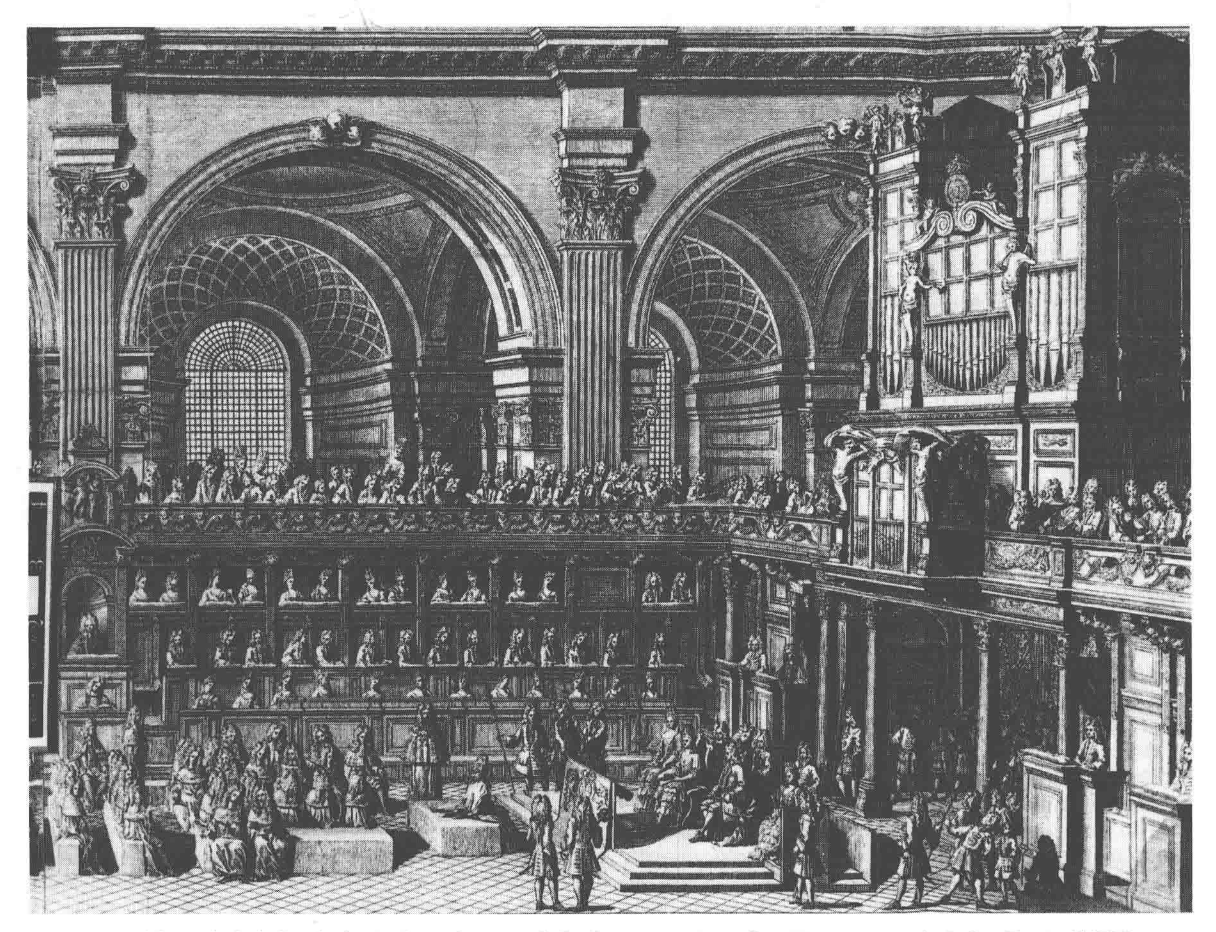
At various national occasions temporary organs were installed, usually at the west end, where they played with other instruments. This was the case at coronations from James II's (1685) to Victoria's (1838). The one for George II's coronation (1727), specially built by Shrider, was afterwards erected permanently on the pulpitum and screen, and opened on 1 August 1730. It was replaced by a Gothic organ in 1831. In 1845 the organ was divided and placed in the north and south choir aisles, with the choir organ over the eastern arch of the pulpitum. A fourth manual was added in 1868, and a fifth in 1895.

The Abbey came into its own as a national church with the Handel Commemoration (see §V, 2) given in 1784 with 525 performers on a special grandstand at the west end, surmounted by an organ that had just been built for Canterbury Cathedral (*see* ICONOGRAPHY, fig.11). The unprecedented scale and splendour of this event can be recaptured in Burney (1785). It was repeated in the three following years and in 1791, each time with more performers. A similar 'Royal Musical Festival' took place in the Abbey in 1834, and another in 1838 after the coronation. The regular choral services, however, remained 'degenerate' (in the words of John Jebb) for longer than most cathedral services in the 19th century. James Turle, organist for more than 50 years, was succeeded in 1882 by Frederick Bridge, who was by no means the equal of Stainer at St Paul's in reforming zeal. It was not until well into the 20th century that the Abbey services were again worthy of the venerable building that housed them.

(iii) Temple Church. Built in 1185 by the Knights Templars, the church was taken over by the Society of Lawyers after the suppression of the Templars in 1312. It is a 'royal peculiar'. Musically it has been notable in two ways: for its association with John Playford, who was clerk there from 1653 until his death in 1686–7 and may have developed his psalm tune harmonizations there; and for its high reputation in the 19th century, when under Edward Hopkins (organist 1843–98) it developed, for the first time, a choral tradition, which became a model for many cathedrals and parish churches.

2. CATHEDRALS.

(i) St Paul's. The Norman and Gothic cathedral, replacing a Saxon building on the same site, was built between 1087 and about 1285. It was governed by a 'great chapter' consisting of the bishop, dean and 30 canons. Plainchant was performed according to a special use, the *usus Sancti Pauli*, until it was largely replaced by the Sarum Use in 1414. Polyphony was introduced about 1228–30, when a book of polyphony (first explicitly attested in an inventory of 1255) was donated by William de Fauconberg. The dean in 1289 forbade the innovation of singing polyphony ('cantus organicos') in the pulpitum and ordered that it should be sung in the presbytery ('ubi Epistola de more legitur'). There was presumably an organ to accompany this music. St Paul's was unusual among secular cathedrals in having 30 vicars-choral (who were deacons or sub-deacons) in addition to 12 minor canons (endowed and incorporated in 1394, but established long before). One of the minor canons was chosen as a sub-dean and was in charge of the choir; the second and third in precedence were called 'cardinals' (a term peculiar to St Paul's in this context), and were responsible for discipline. Choristers were trained in a song school under the supervision of an almoner, mentioned in Colet's statutes (1509). From the later 15th century the choir was supplemented by chantry priests. In 1507 Henry VII incorporated a new foundation at St Paul's, the Guild of Jesus, which was to provide payments for the additional attendance of the 12 minor canons, eight chantry priests, six vicars-choral and ten choristers for certain special services, to be sung 'solemnly by note' in the crypt. The boys were frequently engaged by other churches in the City, and they also performed in mystery plays and pageants.



By the 16th century the choir was second in importance only to that of the Chapel Royal. John Redford (*d* 1547) was choirmaster and Philip ap Rhys organist: much of their music, including that in the Mulliner Book, was probably composed for St Paul's. The only surviving English *alternatim* organ mass (in *GB-Lbl* Add.29996) is by Rhys and was doubtless in use there. The organist was not on the foundation as such, deriving most of his income from being a vicar-choral. The first organist who was not a vicar-choral was George Martin, appointed in 1888.

Paul's Cross, in the north-east angle of the cruciform church, was for many centuries London's great pulpit (fig.1). After the accession of Elizabeth I the reformers

frequently celebrated their triumph by assembling at Paul's Cross after cathedral service and singing a metrical psalm – 'six thousand persons, old and young, of both sexes' according to John Jewel, Bishop of Salisbury, in a letter of 1560. Metrical psalms were sung in the cathedral also, especially after the sermon; the new liturgy was sung by the choir, whose numbers remained constant (12 minor canons, six lay clerks and ten choristers). Throughout Elizabeth's reign the choristers continued to perform in plays and pageants. The last engravings of Old St Paul's, published in Dugdale's *History* of 1658, show a large organ apparently still intact in the north aisle of the choir.

After the destruction of the cathedral in the Fire of London (1666), the new building was begun in 1675 and completed only in 1711. The Smith three-manual organ was built in 1694–7 at a cost of £2000, and (against Wren's wishes) was placed centrally on the choir screen (fig.2). The choir was reopened for service on 2 December 1697. The organ has been steadily enlarged since that date. Shrider added a Swell box and toe pedal pull-downs in 1720–21. For many years they were the only organ pedals in England, and Handel frequently took advantage of them, as Mendelssohn later availed himself of the 'German' pedals introduced in 1826. The organ was moved to the north side of the choir in 1859, and rebuilt as a divided organ on both sides of the choir in 1871–2 (with a fourth manual added). A fifth manual followed, with other enlargements, in 1897–1900. Among famous organists of the new cathedral were Jeremiah Clarke (1695–1707), Greene (1718–56), Attwood (1796–1838) and Stainer (1872–88).

The music at St Paul's shared in the general decline in cathedral music of the 18th and early 19th centuries, and was in a disgraceful state by Attwood's time. The first improvement was in the treatment and training of the choristers, thanks to the energies of Maria Hackett. They were soon much in demand for concerts of all descriptions, and took part in many musical events to the profit of the almoner, William Hawes, who was in sole charge of them. The standard of the services remained low, however; Goss, organist 1838–72, did little to improve it in spite of mounting criticism. Reform began in 1868 with the appointment of Robert Gregory to a minor canonry. Under his lead, and after 1872 with Stainer's support, choir processions, rehearsals, weekly choral celebrations, and festival services were soon introduced. The numbers were increased to 20 boys and 18 men (1872), and the men's salaries raised; discipline was enforced, and standards quickly improved. The musical emphasis drastically changed, replacing a predominantly Georgian repertory with one emphasizing 16th- and 19th-century music. The mid-Victorian style, under Martin, remained in favour at St Paul's after it had declined elsewhere, according to Fellowes.

2. 'Prospect of the Cathedral Church of St Paul's on the General Thanksgiving, 31 December 1706': engraving by Robert Trevitt (d 1723) reprinted in Thomas Pennant's 'Some Account of London', xi (1801); the organ is by 'Father' Smith

In modern times the tradition of choir singing at St Paul's has been almost unbroken, the building having miraculously escaped heavy damage in World War II. It has tended to become increasingly a national rather than a merely diocesan church, and a great number of special services are held there, from the annual Festival of Carols to jazz and folk masses.

The annual service of the Festival of the Sons of the Clergy was held in St Paul's in 1655, the year of its inauguration, and every year from 1697, to raise funds to help needy clergymen and their dependants. Music by Purcell, Handel or Boyce was repeated with little innovation from year to year; an orchestra was added to the choir and organ from 1689 to 1843, and from 1873 onwards. From 1801 to 1877 St Paul's was also the site of the annual meeting of the charity children (see §4).

(ii) Southwark. An Augustinian priory of St Mary Overie was founded at Southwark in 1106. The church (rebuilt 1207) contained within itself a second church of St Mary Magdalene for the use of the parishioners. Nothing is known of the music before the priory was surrendered to Henry VIII in 1540. It was then converted into a parish church and renamed St Saviour. As early as 1562 the rules of the local grammar school required the children 'to go to church in the choir on Sundays, holy days and other festival days, with their psalm books, and books of prayers, and on Wednesdays, and Fridays in Lent, to be present at the Litany'. St Saviour thus early became dependent on 'charity children' for its psalmody. There is no record of any organ before 1705, when a relatively large two-manual instrument, probably by Jordan, was erected by subscription; in 1728 a third manual was introduced with Swells. The chancel had fallen into disuse, a new altar being erected in front of the screen in 1703; the children sang from the organ gallery, which was above the altar and between the transepts. Though the chancel was restored in 1821–2, the nave rebuilt in 1839, and the organ moved to the west end in 1841, the old-fashioned musical tradition continued; in 1884 there was still only a choir of children leading the singing of hymns, with no anthems or choral music. The nave was again rebuilt in 1897 in greater harmony with the Early English choir. In 1905 St Saviour became the cathedral of the new diocese of Southwark. A full cathedral foundation was constituted in 1937, with provision for choral services. The tower, which dates from about 1520, contains an outstandingly fine peal of 12 bells.

(iii) Westminster. The Roman Catholic diocese and province of Westminster was established in 1850. In the later 19th century the only adequate Catholic music was performed at Brompton Oratory, Kensington. The present cathedral was built between 1895 and 1903, and its acoustics were soon discovered to be difficult. Nevertheless, on 6 June 1903 the first London performance of Elgar's *Dream of Gerontius* was given there, conducted by the composer. R.R. Terry, organist 1901–24, trained the large choir of men and boys, and used it to revive for the first time much of the great Latin church music of English composers before and after the Reformation. Vaughan Williams's Mass in G minor, for solo quartet and double choir *a cappella*, had its first performance in liturgical use at the cathedral in 1922. The choir has continued to perform traditional church music despite the reforms of the Second Vatican Council.

The present 'grand organ', with four manuals and pedals, was built in 1922–3 on classical lines; it is housed in a gallery against the west wall. It can also be played from the console of the apse organ, about 100 metres away at the extreme east end. The apse organ also has two independent manuals for accompanying the choir. The double control is well suited to *alternatim* singing by choir and congregation.

3. Other choral foundations.

(i) Bermondsey Abbey. A Cluniac monastery, founded in 1082, it became an abbey in the 14th century, and probably sustained polyphonic music in the century before the Dissolution. The church survives as the parish church of St Mary Magdalen, rebuilt in 1680.

(ii) Guildhall Chapel. This was a collegiate church founded in 1299 and dedicated to Our Lady, St Mary Magdalen and All Saints. It contained a number of chantries and there was considerable musical activity before the Reformation. The building was demolished in 1822.

(iii) St Anthony's Hospital. A choir school existed there before the Reformation; the choir sang in the parish church of St Benet Fink.

(iv) St Katharine-beside-the-Tower. Founded as a hospital in 1148 by Queen Matilda, this body was refounded several times before the Reformation; chantries and endowments were added, and by 1535 it was an establishment with six choirmen, six choristers and a choirmaster performing daily services. It escaped the general dissolution and later Puritan attacks, surviving, though in a decayed state, until 1825. The church was then pulled down, and a new Gothic chapel of St Katharine erected in Regent's Park. The collegiate foundation was revived and choral services resumed in Victorian times.

(v) St Mark's College, Chelsea. Founded in 1841 as the first training college for teachers in Church of England schools. The vice-principal, Thomas Helmore, assisted by Hullah, was charged with training the student body to perform a choral service in the college chapel, which became a model for the revival of choral music throughout the church. Services were sung *a cappella* until an organ was installed in 1861; choristers were trained in the attached Model School. Gregorian chants and a wide range of early polyphonic music were performed.

(vi) St Stephen's, Westminster. This was one of the more important medieval choral foundations, established by Edward III in 1348 with a dean and 12 secular canons, 13 vicars, four clerks and six choristers. There was considerable musical activity, encouraged no doubt by the proximity of the royal palace. Several masses by Nicholas Ludford, a member of St Stephen's from about 1520 until its dissolution in 1547–8, were no doubt performed there: one is the five-part *Lapidaverunt*, based on an antiphon for the feast of St Stephen.

(vii) Whittington College. Richard Whittington, Lord Mayor, founded a hospital and college in 1424 in connection with the church of St Michael Paternoster Royal. It consisted of five secular priests, two clerks and four choristers, with choir school attached. Some polyphonic music was performed there, and the choir by custom sang an antiphon of the Virgin at nightfall, 'when the poor artisans and neighbours living around the church

came from their work and duties'. It was dissolved at the Reformation.

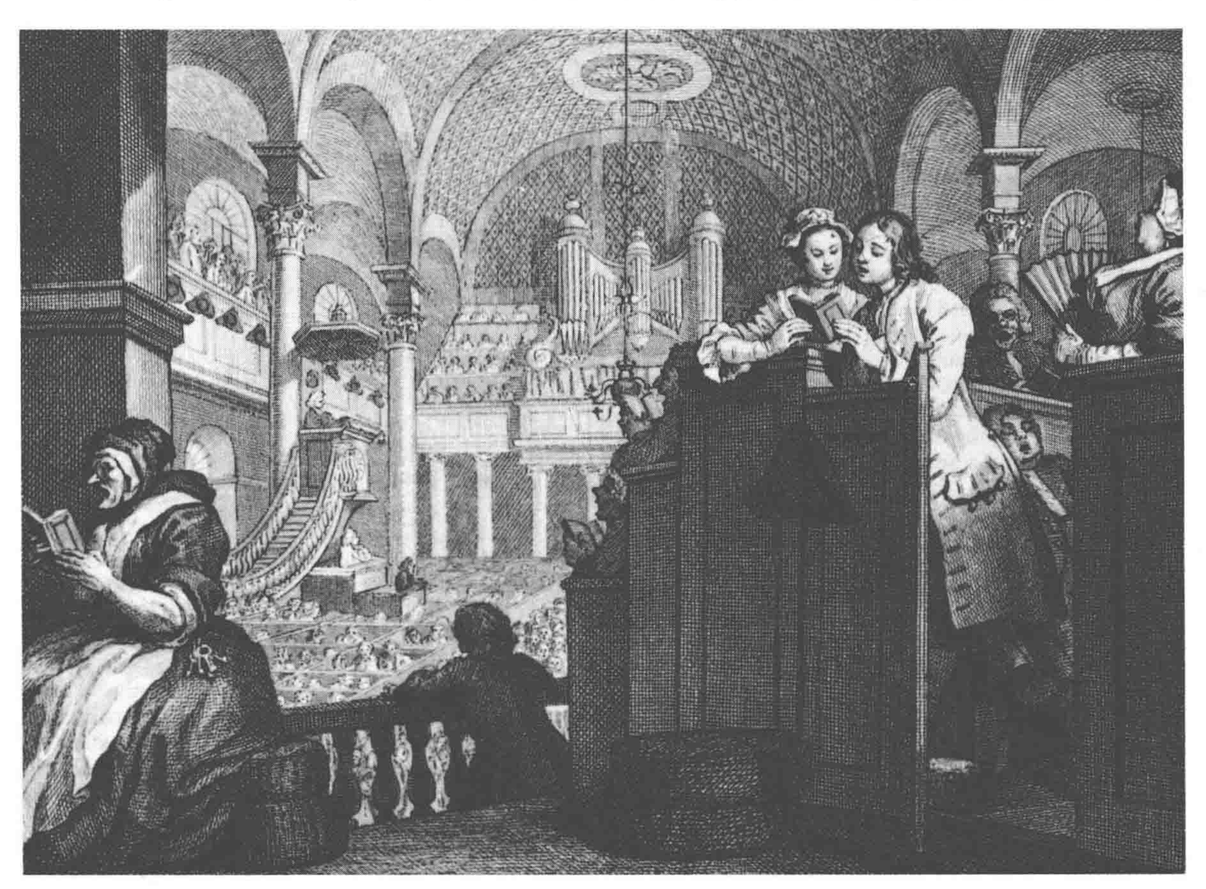
4. Parish churches.

(i) City. In Norman times London had over 100 parish churches, of which not more than a dozen were outside the city walls. 96 returned inventories of their possessions in Edward VI's reign. 35 were destroyed before or in the Great Fire of 1666 and not rebuilt; 25 were demolished between 1666 and 1939. 38 were still in use in the mid-1990s. The Guild Churches Act (1952) set aside 16 as weekday churches for the use of workers in the City and as centres for special branches of the church's work.

The music of these churches in medieval times is unlikely to have consisted of anything more than plainchant, sung by the priest with responses by the parish clerk, with faburden where there were additional singers. In the 15th century parish churches began to acquire organs, for the support of which rood-lofts were built; the earliest recorded in a London parish church was at St Peter Cheap in 1433. At first the function of the organ was merely to accompany chant in unison. Towards the end of the 15th century, however, polyphonic music was introduced in a number of churches, by means of additional singers ('conducts') engaged at the great church festivals and the feast of the church's patron saint. By about 1500 many of the wealthier churches were beginning to acquire a staff of full-time musicians who worked under the parish clerk. Many of these were chantry priests who were paid from the funds of an endowed chantry in the church to sing Mass at various times for the soul of the donor, but who were also expected to contribute to the general musical activity of the church. About 280 chantries were founded in London in the 14th century, 120 in the 15th, and 13 in the 16th; but it was only in the last century before the Reformation that the chantry priests played an important part in the music of the parish churches. Other musicians belonged to minor orders or were laymen. Some churches had choristers placed under the care of a conduct. Church musicians belonged to the Company of Parish Clerks, also known before the Reformation as the Fraternity of St Nicholas (*see* Parish clerk).

The early 16th century was a period of remarkable expansion in the music of City parish churches, paralleled only in the later 19th century. The growing popularity of the elaborate Lady Mass called for greatly increased resources, including a second, portative organ (usually housed in the Lady Chapel), an organist skilled in polyphonic playing, conducts, choristers, and books of music. Baillie has found documentary evidence of the use of polyphony at 26 churches in this period, and has estimated that nine out of ten churches heard polyphony on major feasts, while a few had it on most days of the week. St Mary-at-Hill had a particularly ambitious musical establishment: payments were made in the 1480s for a 'prickid song Booke' and for wine for singers 'at Easter and at many other festes'; in 1521–2 Kyries, alleluias and sequences are mentioned; five-part polyphony was practised as well as the normal four-part, and there were collections of masses and motets. From 1523 the church had a choir school, probably the first of its kind attached to an ordinary parish church. Musicians from the Chapel Royal also sang there from 1509 to 1554, including Tallis, William Mundy and Philip ap Rhys. Other churches noted for their music were St Michael Convent, St Mary Woolnoth, and St Margaret Pattens. Towards the end of Henry VIII's reign a new note was introduced in some churches in the form of regals. Plays were performed annually in many of the churches by the clerks and choristers, sometimes aided by waits and minstrels. Lavish music was used in processions.

The suppression of chantries in 1547 ended the careers of many professional musicians, but some churches retained enough singers to maintain polyphony. Though many organs were taken down with the rood-lofts in Edward VI's reign, some were re-erected in side chapels or in the chancel; at least 12 London churches retained two organs, and therefore presumably continued to practise polyphony. Latin motets may have continued in use, alongside anthems in English and such adaptations of plainchant as Merbecke's *Book of Common Prayer Noted*; there is no evidence that metrical psalms were sung at this date. After the restoration of Latin rites under Mary I and the accession of Elizabeth I in 1558, some London churches still retained something of the polyphonic tradition. St Botolph Aldersgate maintained a choir until 1570, St Michael Cornhill until 1579, St Dunstan-in-the-West until 1585. Many churches kept their organs in repair until about 1571, when the organ builder John Howe died; after that many organs were dismantled and sold or allowed to fall into disuse. No new organs are known to have been built in London churches during Elizabeth's reign (1558–1603). Such choirs as there were probably sang anthems and chanted the psalms and responses in adapted forms of plainchant with faburden harmony. The new music, the metrical psalm, was first introduced at the little church of St Antholin in September 1559, and soon spread to other City churches. For the first time in memory, the whole congregation, men, women and children, could sing together. London was the centre of the Puritan movement, and for this reason the older traditions were rapidly obliterated in most of the City churches. Soon unaccompanied metrical psalms were the only music to be heard in all but a few. The parish clerk, by the end of the century, was the sole survivor of the large musical staff of former times.



This situation prevailed throughout most of the 17th century. During the late 1630s Archbishop Laud, through John Lambe, put pressure on some churches to restore their organs, but with little apparent success. The few remaining church organs were destroyed by order of parliament in 1644, and only two London churches are known to have had organs built between the Restoration (1660) and the Great Fire (1666). After the Fire many churches were not rebuilt, and it was long before others acquired organs. The shift of the wealthy classes to the West End was already far advanced, and City parishes were left with meagre financial resources. Of 76 City churches existing in 1700, only 18 had organs; 17 had still not acquired them by 1800. Where organs did exist they were used for accompanying metrical psalms and for playing voluntaries before, after, and in the middle of Morning and Evening Prayer. Normally the organist's contract required playing only on Sundays and Christmas Day. Organs were rarely purchased out of parish expenses, as they were not considered necessary for worship; if a donor could not be found, a subscription was raised. At All Hallows, Barking-by-the-Tower, a Harris organ was bought in 1675 'for the improvement of the psalmody of

this church', subscribed to by about 80 persons for a total cost of £220. At St Bride's 186 subscribers contributed to the organ erected in 1693. At St James's, Garlickhithe, the organ in 1718 was paid for by the 'publick Tax upon Coals'. The well-known organ at St Magnus's, built by Jordan with the novelty of the Venetian Swell, was given by Charles Duncombe, alderman, in 1712. Between 1741 and 1814, 11 churches obtained an organ by agreeing to pay an annuity, out of parish funds, to a person who would provide one: such was the arrangement at St Katharine Coleman (1741), St Vedast-alias-Foster (1774), and at St Mary-le-Bow (1802).

The music in this period reached a certain uniformity not found in other periods. London churches did not adopt the voluntary choirs and bands that were popular in the country, but maintained congregational singing led by the organ (if there was one) and by the charity children who formed a small choir, usually in the organ gallery. The tradition of teaching the children in the local school to lead the singing in church can be traced back to the 16th century in some places; in the 18th century it became a normal feature of City churches. From 1704 the charity children of London came together for an annual festival service, at St Andrew's Holborn (1704), St Sepulchre (1705–37), Christ Church, Newgate Street (1738–1800), and finally St Paul's Cathedral (1801–77). Another festival service was held on St Cecilia's Day, beginning in 1683 and continuing with decreasing frequency in the 18th century. It began with a service, usually at St Bride's church, and continued in the Stationers' Hall with a specially composed ode for the occasion (*see* CECILIA).

In other churches, however, the custom of singing was left entirely to the parish clerk, or was allowed to die out altogether, being replaced by long organ voluntaries. The organ, where there was one, became an increasingly prominent partner in the psalm tunes, adding turns, shakes, and interludes between every line of the tune, until in many churches the congregation fell silent.

Reform was initiated by the Evangelical party. A new, livelier, and more congregational style of singing was introduced, first at proprietary chapels, and then at parish churches. The first City church to be captured by the Evangelicals was St Andrew-by-the-Wardrobe, where William Romaine was installed as rector in 1764. He presented an organ in 1774 and took a keen interest in the psalm singing – an extraordinary thing for a parson at that date. But he objected to the introduction of hymns. Other Evangelicals gradually introduced hymns to replace the metrical psalms; the words of Watts, Wesley, Newton and Cowper were more inspiring than those of Tate and Brady, and were sung with more spirit. The new style of singing was faster and less densely ornamented than the old; the newly earnest clergy would not allow the clerk, charity children or organist to usurp the place of the congregation. But the majority of City churches continued in the old way until well into the Victorian period. The vast programme of church building in the 19th century, and the opportunities it brought for musical innovation,

3. 'The Industrious 'Prentice Performing the Duty of a Christian': engraving by William Hogarth from the series 'Industry and Idleness', 1747; the interior is believed to be that of St Martin-in-the-Fields

naturally centred on areas of increasing population. The City, by contrast, was becoming rapidly depopulated. 18 churches were demolished in the last third of the 19th century. Others remained, but with their music in a debased state. The more prosperous churches, however, increasingly catered for a congregation outside their own boundaries. The charity children were gradually replaced by surpliced choirs of men and women, sometimes paid, sometimes voluntary; and in a number of churches chanted psalms, anthems, and finally a fully choral service along cathedral lines were successfully introduced. Three City churches had fully choral services in 1858; by 1882 the number had risen to 30. Specially noted for their music were St Mary Woolnoth, St Margaret Pattens, St Mary-le-Bow, St Michael Cornhill, and St Nicholas Cole-Abbey.

These tendencies have continued in the 20th century. City churches have increasingly served commuters rather than residents, and weekday lunch-hour services and organ recitals have become standard. The principle was recognized in 1952 with the creation of 16 guild churches. The continuing usefulness of the churches is indicated by the fact that most of those destroyed in World War II have been rebuilt and are now in use.

(ii) Westminster. The Abbey was used as a parish church until the building of St Margaret's church in the 12th century; there were two ancient Middlesex parishes to the north, St Clement Danes and St Martin-in-the-Fields, which later became part of the City of Westminster (formed in 1900). St Margaret's has a more continuous musical tradition than many City churches, through its proximity to the Abbey. In 1484–6 singers from the Abbey were paid to perform at the church; the same was true in 1642, when anthems were sung at Christmas, Easter and Whitsun. In 1596 the churchwardens paid £13 3s. 4d. for the re-erection of the old organ from the Abbey. After the Restoration, St Margaret's was again one of the first parish churches to acquire an organ, in 1675; 'Father' Smith, who built it, was the first organist. For a short time after this the psalms were chanted, but this was stopped by order of the vestry on 7 August 1676. A new organ was built by Avery in 1804.

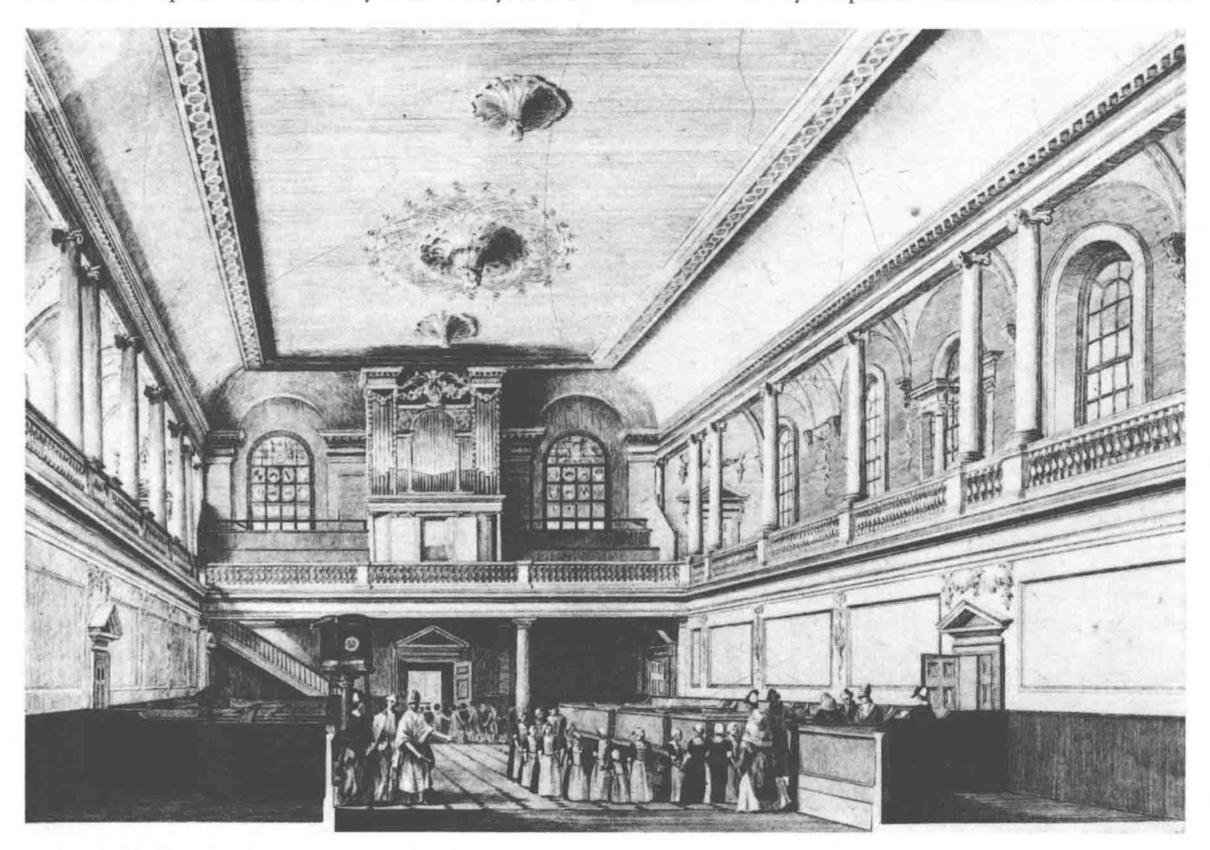
In the 17th century Westminster was the principal seat of wealth and fashion, and several new parishes were formed: St Paul's, Covent Garden (1645), St James's, Piccadilly (1684), and St Anne's, Soho (1686); St George's, Hanover Square, followed in 1724. The patrician congregations of these churches subscribed lavishly for organs, organists, charity children and privately printed books of metrical psalms and hymns; but they had no wish to take part in the singing themselves. At St James's in Queen Anne's time, the rector (Dr Tenison) was Archbishop of Canterbury, while the parish clerk (John Scattergood) was in priest's orders; both were normally represented by deputies. The organ had been presented by Queen Mary in 1691. The psalm tunes in use, printed in a special collection in 1697, were all of the plain, traditional variety, including one ('St James') specially composed by the organist, Raphael Courteville. They were sung by the 'psalm clerk' (the parish clerk's deputy) and charity children with ornate organ accompaniment. This tradition continued in the fashionable churches of Westminster for 200 years. It was said of St George's, Hanover Square, in 1882:

> although this church is regarded as the most fashionable in the Metropolis, especially for marriages, its services partake in no degree of the fashionable and ambiguous character of too many in that locality and elsewhere. The ceremonials at St. George differ but slightly from those of the last generation.

The 'fashionable and ambiguous' type of service had been prominent at two of the newer Westminster churches, St Paul's, Knightsbridge (built 1843), and St Barnabas's, Pimlico (1850). Both had Gregorian chanting with elaborate ceremonial, processions and a large surpliced choir; St Barnabas's was the scene of disastrous riots in November 1850 which led to the resignation of the vicar, W.J.E. Bennett (*see* OUSELEY, FREDERICK ARTHUR GORE, and HELMORE, THOMAS). St Barnabas's was remarkable in that its foundation included a small community of priests and a choir school, the first of its kind since the Reformation. A somewhat different tradition was established at St Anne's, Soho, after 1871, when Barnby was appointed organist: a large and semi-professional choir sang a fully choral service, with sumptuous service settings and anthems often adapted from masses by Haydn, Mozart and Gounod.

(iii) Greater London. The steady growth of the metropolis brought within its boundaries a number of ancient country churches, whose conservative musical traditions were often maintained. Before the 19th century little was done to accommodate the greatly increased populations in suburban areas. From the time of the Church Building Act (1818) a vast programme of church building was undertaken; and the new churches, with no traditions to hamper them, were often the scenes of innovations in church music. Many were furnished with harmoniums until greater prosperity permitted the purchase of a pipe organ. It was at Margaret Chapel, St Marylebone (later to be replaced by the church of All Saints, Margaret Street), that Frederick Oakeley in 1839 inaugurated the tradition of Tractarian worship. In 1858, among 20 London churches listed as having 'choral' services, only four were in central London, and several were in newly developed suburbs: St Philip's, Dalston; Holy Trinity, Brompton; St Paul's, Walworth; St Matthias's, Stoke Newington. In 1876 Mackeson remarked that St Alban's, Holborn, was 'almost the only church in the centre of London where ultra ceremonial is the rule', but he was able to list 19 suburban churches in this category.

In recent times the trend has moved away from choral and back to congregational worship. The typical service in many suburban churches is now the Sunday morning parish Communion, with the altar in the nave, and many new churches express this emphasis in their architecture. Canon Dearmer's church at St Mary's, Primrose Hill, Hampstead, was the scene of pioneering work in the development of a new and more congregational type, drawing on the resources of folksong; Martin and Geoffrey Shaw were the musical leaders there.



5. CHARITIES AND PROPRIETARY CHAPELS. In the 18th century many innovations in church music originated in private chapels, which were established for charitable or profit-making purposes, licensed for public worship, but not under the direct control of a bishop or other authority. They were thus free to try out liturgical and musical experiments that were impossible in consecrated churches, and some of them attracted the support of the wealthy and fashionable portion of London society. They occupied a position midway between the Church of England and the dissenting bodies, and often came under strong Methodist influence.

The Foundling Hospital, properly the Hospital for the Maintenance and Education of Exposed and Deserted Young Children, was founded by Thomas Coram in 1739. In 1745 a permanent site was obtained at Lamb's Conduit Fields. The chapel was built in 1747, and from 1749 onwards Handel gave an annual performance of his music in aid of the foundation. He presented an organ in 1750. The chapel was long noted for its music, in which the children sang specially composed hymns (fig.4). In 1760 the Hospital published a small book of tunes, of which a larger edition appeared in 1774. The Lock Hospital, for venereal patients, was founded in 1746. MARTIN MADAN was appointed chaplain, and in 1762 a new chapel was built for him; his *Collection of Psalms and Hymns* appeared in 1760, with an accompanying tune book beginning in 1762. The Asylum or House of Refuge for Female Orphans (1758), on the Surrey side of Westminster Bridge, had as its organist and choirmaster William Riley, a notable reformer of psalmody, who also compiled collections. Most fashionable of all was the Magdalen Hospital for penitent prostitutes, opened in 1758: here the inmates sang from behind a canvas screen, following the precedent set by the *ospedali* in Venice. The first chaplain was William Dodd (hanged for forgery in 1777). A new building was opened at St George's Fields, Southwark, in 1769. Thomas Call published the first 'Magdalen Collection' in 1762, and a later pirated edition achieved wide circulation.

The services in these four institutions, both in themselves and through the popularity of the printed collections based on them, led the way towards the Evangelical type of service that prevailed in the early 19th century. A new fervour was brought into the sermons and prayers and, naturally, into the singing also; congregations were encouraged to stand up and sing, hymns of Watts and Wesley were brought in to replace the metrical psalms. Following the example of the Methodists, tunes borrowed from secular and even operatic sources were used, to the scandal of some. A new type of anthem, for children's or women's voices and figured bass, became popular. Several hymns and tunes originating in these collections have entered the repertory (*see* PSALMODY (ii), §I).

The proprietary chapel was a feature of London worship from the early 18th century to the later 19th; it was a commercial speculation, either by the clergyman himself or by his patron, and seats were sold to the public. These chapels, too, were often centres for advanced Evangelicalism. Musically the most important was Surrey Chapel, Blackfriars Road, where Rowland Hill was minister from 1783 to 1833. He is credited with the maxim that the Devil should not have all the best tunes. Benjamin Jacob, organist from 1794 to 1825, published in 1815 the usual *Collection of Hymn Tunes* for the chapel, and in it are found many adaptations of popular melodies, including *Rule, Britannia* set to a hymn of Hill's. Set-pieces (anthem-like compositions with metrical texts) were a popular feature of the music, and were sung by the entire congregation of more than 2000. By the late 19th century, though the music at the chapel was still highly regarded, it had become largely choral, while the tenuous connection with the Established Church had been severed.

6. EMBASSY CHAPELS. The significance of the Roman Catholic embassy chapels in London was that until the

4. Chapel of the Foundling Hospital: engraving by John Sanders, 1751

Catholic Relief Acts of 1778 and 1791 they were the only places in England where Catholic services could legally be conducted. After 1791 they declined in importance as Roman Catholic parish worship began to be established, although their tradition of elaborate music continued. The chapels with the most extensive musical establishments were those of the Bavarian, Sardinian and Portuguese embassies. Plainchant alone appears to have been used until the introduction of Charles Barbandt's *Hymni sacri* (London, 1766) at the Bavarian chapel. In the 1770s the repertory of the chapels came to include masses and other service music by Arne, Stephen Paxton, Francesco Pasquale Ricci and Samuel Webbe (i), the organist of the Sardinian and Portuguese chapels, and the most influential figure in London Catholic church music in London at the time; much of it was published in the 1780s and early 1790s in collections assembled by Webbe. In 1797 or 1798, at the age of 16, Vincent Novello was appointed organist of the Portuguese chapel. Under his direction it became one of the most fashionable chapels in London, where Catholics and Protestants alike came to hear the masses of Haydn and Mozart. Novello's Portuguese chapel appointment also led him into publishing: his first venture, in 1811, was *A Collection of Sacred Music as Performed at the Royal Portuguese Chapel in London*, soon followed by other collections of Catholic church music. From about 1811 Novello was assisted at the Portuguese chapel by his friend Samuel Wesley, whose conversion to Roman Catholicism in 1784 had been brought about largely by his admiration for the music at the embassy chapels. Plainchant continued to decline in the chapels in the early 19th century as the use of modern church music increased, until in 1823 a writer in the *Quarterly Musical Magazine and Review* could remark that it was 'now almost wholly discontinued in England'.

7. NONCONFORMIST PLACES OF WORSHIP.

(i) Foundery Chapel. John Wesley in 1739 bought an old government building in Moorgate Fields and used it as his first headquarters. Here it was that the Methodist style of hymn singing, which was eventually to sweep aside the old Puritan tradition of metrical psalmody, was first developed. The 'Foundery Tune Book' (*A Collection of Tunes set to Music*, 1742) was the first publication of tunes of the new style, and it broke tradition by including adaptations of operatic music. Wesley moved his headquarters to a new chapel in City Road in 1778.

(ii) Union Chapel, Islington. This became perhaps the leading nonconformist chapel in London for music. Improvement was begun by Dr Allon, the great Congregationalist preacher, who went there in 1843. He instituted a psalmody class in 1847 or 1848, and appointed HENRY JOHN GAUNTLETT as organist and teacher of psalmody in 1852. In 1856 Allon and Gauntlett published *The Congregational Psalmist* and in the same year Anglican chanting, on a strictly congregational basis, was introduced in the chapel. A choir was first formed in 1859, with about 25 singers; the number reached 60 by 1880.

(iii) Weigh House Chapel, Eastcheap. This chapel became the centre of an interesting movement for the improvement of Presbyterian psalmody in Queen Anne's reign (1703–14) (*see* PSALMS, METRICAL, §III, 2(i)). A second period of outstanding singing at this chapel was during the ministry of Thomas Binney. Taking advantage of Hullah's sight-singing methods, Binney issued a 'Weigh-house Tune-book' in 1843 and had it taught to some 300 members of his congregation. It was superseded in 1852 by *Congregational Church Music*, prepared with the help of the visiting American musician Lowell Mason. Truly congregational singing was achieved of a kind that was imitated in many other nonconformist chapels.

II. Music at court

1. The Chapel Royal. 2. Secular music.

1. The Chapel Royal.

(i) Introduction. In standard usage the term 'Chapel Royal' denotes a special group of personnel maintained by successive sovereigns of England within the royal household, to whom is deputed the duty of ordering and performing divine service in the sovereign's presence in an appropriate manner. The term may also occur in its original sense, in which it denotes the service books, vestments, relics, plate, vessels and utensils used by this organization at divine service.

Until comparatively recently the Chapel Royal observed constant attendance on the sovereign. It had no permanent base, therefore, but travelled with the royal household and discharged its duties in the chapel of whatever palace, manor house or castle in which the king then happened to be resident. Its personnel is separate from the choral staffs of certain permanent collegiate institutions that happen to enjoy royal associations – for example St George's Chapel, Windsor Castle – but which in every other respect are organizations entirely distinct from the Chapel Royal.

(ii) Beginnings to 1558. As a specialized body of liturgical musicians, the Chapel Royal took shape during the reigns of Edward I (1272–1307) and Edward II (1307–27). For centuries before this period, a group of selected chaplains had always formed part of the royal household, but since they constituted probably its only genuinely literate element, they were employed principally as top administrators and advisers, and their importance was primarily political rather than musical. Nevertheless, as priests they also ministered to the king's spiritual needs as necessary, and by the 13th century they were assisted at the ceremonial occasions known as 'crown-wearings' by some three or four *clerici*. These appear to have been men in royal service who possessed good singing voices and were drafted into the chapel on such occasions to sing the acclamatory litany *Christus vincit*. One *clericus* in 1261 was Henry Blacksmith, later commended by Anonymus 4 as one of the few singers in England worthy of comparison with the singers of Notre Dame, Paris.

Between 1272 and 1318 these rather impermanent and ad hoc arrangements for observing divine service in the royal presence ceased to satisfy the needs of successive monarchs and were replaced by the provision of a self-contained department of the household called the *capella regis*. Its personnel included chaplains, clerks of the second form and choristers, who thus were able to perform the daily celebration of Mass and the Canonical Hours (or as much of them as was practicable for an institution that was largely peripatetic) according to some secular liturgical rite – Sarum Use by the 15th century. The composition of its staff was plainly derived from that observed at certain collegiate churches. By 1318 its working personnel consisted of a chief chaplain (later given the title of dean), five chaplains, six clerks and three or four choristers, besides the necessary ancillary staff. Among its repertory were two volumes of polyphonic music, possibly drawn from the *Magnus liber* of Leoninus and Perotinus.

From these modest beginnings, the chapel eventually developed into one of the foremost secular liturgical choirs in Europe. As a demonstration of their wealth and piety, the ostentatious promotion and cultivation of the Chapel Royal became for successive kings an eloquent medium for projecting the public and diplomatic image that seemed appropriate. By 1360 Edward III (1327–77) had stabilized the personnel of the chapel at 16 'Gentlemen' (chaplains and clerks) and four 'Children' (boy choristers). Between 1394 and 1396, probably as a royal counterblast to Lollard criticism of elaborate household choirs, Richard II (1377–99) increased the number of Gentlemen to 24. Henry IV (1399–1413) maintained the chapel at these numbers while streamlining its duties, and Henry V (1413–22), mindful of his eminence as both King of England and King-designate of France, enlarged it to the exceptional size of 32 Gentlemen and 16 Children.

Henry VI (1422–61) and Edward IV (1461–83) maintained a chapel that sporadically approached similar dimensions – 36 Gentlemen and ten Children. Two valuable accounts of the composition and duties of the chapel, written in 1449 and 1471 respectively, are extant. The latter occurs in a comprehensive volume of household regulations known as the 'Black Book of the Household of Edward IV'; the former occurs as the *Liber regie capelle*, an account of the constitution of the chapel and of certain ceremonies peculiar to it, compiled by the dean, William Say, and sent to King Alfonso V of Portugal at his request. Henry VII (1485–1509) was satisfied with a chapel consisting of 26 Gentlemen and ten Children; Henry VIII (1509–47), Edward VI (1547–53) and Mary (1553–8) maintained 32 Gentlemen and 12 Children.

This extensive provision of some 40–50 voices was designed to satisfy the king's need for a conspicuous display of the wealth, resources and creative talent at his disposal in the ordering of his daily and festal religious devotions. The chapel was a privileged and well-paid body of musicians, and at least from the late 14th century onwards it (and the aristocratic household chapels modelled on it) led the way in innovations both in performing practice and compositional technique. The Chapel Royal helped to pioneer the creation of the new class of professional lay clerks around the turn of the 15th century, and during the first half of that century it may well have utilized its large number of skilled executants to inaugurate both the practice of regular daily performance of composed polyphonic music at divine service and the practice of choral polyphony. It also played a leading part in introducing treble and bass voices in the performance of composed polyphony in the second half of the 15th century and in composition for the new vernacular liturgy in the mid-16th.

Although the composers of pre-Reformation church music in England were geographically too widely dispersed for any identifiable school of composition to be detectable at the Chapel Royal or any other single institution, there were nevertheless periods when the chapel nurtured numerous active composers. John Aleyn (1362–73), John Excetre (1372–97), Roger Gerveys (1376–7) and Robert Chirbury (1420–22, 1437–49) are possibly identifiable with composers who contributed to the first layer of the Old Hall Manuscript (compiled

*c*1418–19). Although not compiled for the Chapel Royal, it seems that this important manuscript was used by the chapel in the period *c*1421–30, when some 23 compositions by four of its members, present and past (Thomas Damett, Nicholas Sturgeon, John Burell and John Cooke) were added to it. Other chapel composers active at about this period were John Pyamour (1419–21) and John Plummer (1438–67). Between 1418 and 1421 the chapel accompanied Henry V to the wars in France, and continental observers admired its excellence. The chapel's further visits to France in the royal retinue during the first half of the 15th century may also have done much to transmit to the Continent an acquaintance with the English style, widely admired and emulated there.

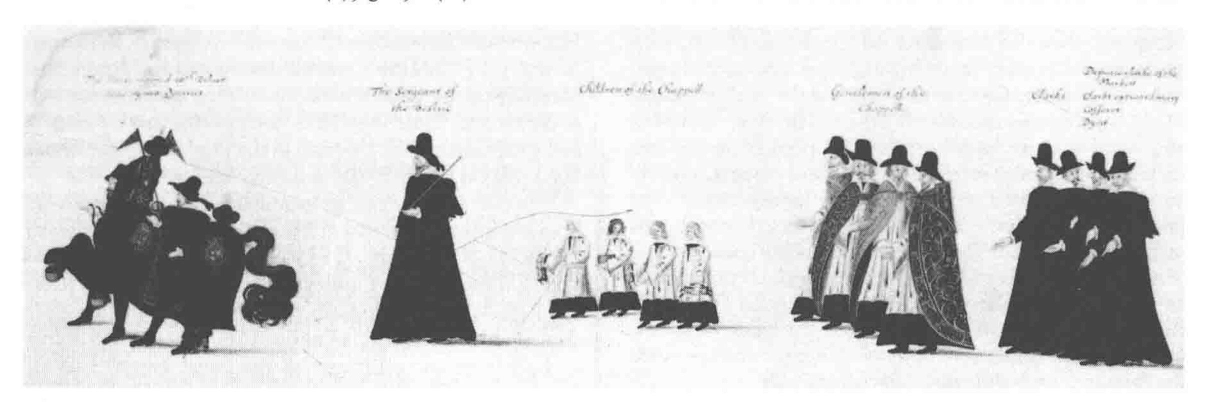
Composers known to have been members of the chapel up to the death of Queen Mary include Robert Fayrfax (1496–1521), William Cornysh (1496–1523), Thomas Tallis (1542–85) and John Sheppard (1552–9), and there is little doubt that the bulk of their larger-scale compositions for the Latin rite were written for performance by the Chapel Royal. Under the patronage of sovereigns as knowledgeable about music and as concerned for ceremony as Henry VIII and Mary, the chapel enjoyed a particularly fruitful and distinguished existence.

(iii) From 1558. Under Elizabeth I the Chapel Royal flourished as never before. Not only was the choir the largest and by far the finest of its kind in the country but conditions of service were also outstandingly good, with salaries more than three times the national average. The queen's love of music, shared to some extent by her immediate successors, James I and Charles I, was reflected both in the excellence of the chapel's performance and in the compositional attainments of its members, who included almost every important English church musician of the period. Elsewhere, in provincial cathedrals and collegiate choirs especially, things were very different: rapid inflation and growing Puritanism, coupled with a waning of interest in church music generally during the second half of the century, had an adverse effect on both standards and resources, and it was in the Chapel Royal alone that the so-called golden age of Elizabethan church music occurred.

As a 'royal peculiar', the chapel is exempt from episcopal jurisdiction. Since the Reformation, however, its chief officer, the dean (appointed by the sovereign), has nearly always been a bishop (since 1748 the Bishop of London). Under him, the sub-dean (also a clergyman and in effect a precentor) is responsible for the daily routine and administration of the choir, whose members, like most royal servants, are also subject to the general authority of the Lord Chamberlain. Under Elizabeth, as under Henry VIII, Edward VI and Mary, the choir comprised 32 Gentlemen (of whom roughly a third were priests, the rest lay clerks) and 12 Children. While the latter were permanently on duty, the full body of men appeared only on special occasions. At other times a rota system of alternate months of waiting applied; for ordinary ferial services, therefore, there were probably never more than about 16 men in the choir. Over the years the size of the establishment has gradually decreased, and now stands at six Gentlemen and ten Children.

Next in importance after the sub-dean was the Master of the Children, who until 1923 (when the choir school was closed) was responsible not only for the boys' musical training but also for their general education, maintenance and welfare. He also had power – regularly exercised, at any rate in the early days – to impress promising choristers for service in the Chapel Royal, and apparently even as late as 1684 occasional visitations were still made for this purpose. A warrant of 1626 seems to have put a stop to the longstanding tradition whereby Chapel Royal children were also involved as actors in dramatic productions at court and, from 1597, in plays at the Blackfriars theatre. In the 18th century, however, they were once again frequently employed outside the chapel, most notably perhaps in Handel's oratorio performances. Originally, as in all cathedrals of the Old Foundation, there was no established post of organist as such, and organ playing was normally shared by those members of the choir with a particular gift for it. It was only towards the end of the 16th century that the organist's special function came to be acknowledged officially. From then on there were three positions of organist; by the beginning of the 18th century these had been reduced to two, and since 1867 there has been only one. The organists, like the Master of the Children and the sub-dean, came from the ranks of the Gentlemen, and other special officers drawn from among them included the Confessor of the Household and the Clerk of the Cheque (who kept the books and acted as secretary). Salaries were £30 a year under Elizabeth and were raised to £40 in 1604 and to £70 in 1662; during the 18th century they stood at £73 but by 1860 had fallen again, to only £58.

On the restoration of the monarchy in 1660, services were quickly re-established, and under Henry Cooke it was not long before the Chapel Royal had regained much of its former glory. Charles II, though he was chronically short of money and salaries were thus frequently in arrears, nevertheless took a keen interest in the music of his chapel, and by bringing its members into regular association with a small nucleus of the royal band of 24 violins he greatly encouraged the development of the large-scale verse anthem with strings, to which such leading chapel members as Purcell, Blow and Humfrey made notable contributions. Although under subsequent monarchs the practice of mounting such performances whenever the king was in attendance lapsed, choir and orchestra were still combined from time to time, chiefly in the twice-yearly court odes and on a variety of other ceremonial occasions, sacred as well as secular.



Under William and Mary, Anne, and the Hanoverians especially, the Chapel Royal, like all other royal musical institutions, went into decline. Even so, there were a few interesting additions to the establishment during this period, particularly the creation in 1700 of an official post of composer, held first by Blow and later by Handel. A second such appointment was subsequently added, and the expectation was that each composer would produce a new anthem on the first Sunday of every month of waiting. At the same time – the date usually given is 1715, but that is at least two years too late – two further appointments, of a lutenist and a viol player, were also made. The twin offices of composer survived until 1872, when they were reduced to one and combined with the post of organist. From 1777 to 1846, when the place of lutenist finally became defunct, the emoluments of the post were added to those of the Master of the Children; the post of viol player, by then also a sinecure, was not abolished until 1860.

Since 1702 the home of the Chapel Royal has been the smaller of the two royal chapels in St James's Palace (fig.5). During most of the 17th century services were sung mainly in the Chapel Royal at Whitehall (destroyed by fire in 1698); earlier still, they often took place at Greenwich, where Elizabeth I seems most frequently to have held court. The choir went to Scotland with James I and Charles I (in 1617 and 1633 respectively), but its occasional later perambulations have seldom taken it further afield than Windsor, Hampton Court and Richmond, where for at least two centuries the English court usually spent the summer months. Various other chapels, serving the needs of individual members of the royal family, have from time to time employed a separate body of musicians. The Dean of the Chapels Royal has in his charge the chapels of St James's Palace, Hampton Court and (since 1966) St Peter ad Vincula in the Tower of London; in all of them choral services are performed on Sundays only. The Queen's Free Chapel of St George in Windsor Castle, often cited in this context, is, like Westminster Abbey, a wholly independent collegiate body.

Source materials for the history of the Chapel Royal after 1558 are extensive. Most important is the Old Cheque Book, published by Rimbault in 1872 (supplemented by *GB-Ob* Rawl.D.318; see Hillebrand); a second

5. Frontispiece to John Weldon's collection of anthems 'Divine Harmony' (London, 1716): the interior is thought to represent the Chapel Royal at St James's Palace

6. The Children and Gentlemen of the Chapel Royal (centre) forming part of the funeral procession of Queen Elizabeth I: miniatures, early 17th century (GB-Lbl Add.35324, f.31v)

(the 'New') Cheque Book, seemingly little known, covers the years 1721–1910. Much valuable information is to be found in the Lord Chamberlain's and Treasury records in the Public Record Office (for the period up to 1714 see *AshbeeR*). While the modern period is adequately covered by the *Royal Kalendar* and the *British Imperial Calendar*, the earlier publications of E. and J. Chamberlayne (*Angliae notitia* and *Magnae Britanniae notitia*, 1669 et seq.) and Miege (*New State of England*, 1691 et seq.) must be used with caution. A painting of about 1603 (*GB-Lbl* Add.35324) shows members of the Chapel Royal forming part of the funeral procession of Queen Elizabeth (fig.6). Nearly 100 partbooks in use between about 1677 and 1810 survive, and are kept in the Royal Music Library (*GB-Lbl*; see Laurie). From 1712 onwards a series of official Chapel Royal wordbooks of anthems was also issued.

2. SECULAR MUSIC.

(i) Early minstrelsy. Minstrel entertainers existed in England in Saxon times, but only after the Norman Conquest are they recorded as being in the king's permanent employment. Taillefer, William the Conqueror's minstrel, died at the battle of Hastings juggling with a sword and singing a song of Roland at Roncesvalles; the Domesday Book names his successor as Berdic, *ioculator regis*. The number of royal minstrels must have increased in the 12th and 13th centuries: by the reign of Edward I (1272–1307) the king's large household included many minstrels playing various instruments, as did the households of the queen, the Prince of Wales and the king's younger sons.

Most minstrels were probably soloists, but there are indications of group performance. The royal trumpeters played in pairs by the 14th century, and as a group of six by the end of the 15th: numbers increased further during the 16th century. There is evidence of fiddlers and other 'still' instrumentalists playing in pairs. In the late 13th century the royal *vigiles* (household watchmen) formed a consort of shawms, and a century later the royal minstrels included the standard *alta capella* band of shawms and a trumpet. Throughout the 15th century 'the shawms' formed a mixed group, originally of three shawms and a trumpet but increasingly of two of each type. The brass instrument involved was the sackbut by the late 15th century. In 1492 Henry VII bought a set of flutes in a case, which suggests that a consort of matched flutes of different sizes was used from that date.

(ii) Secular music under the Tudors. The secular part of the Royal Music changed in two fundamental ways in the reigns of Henry VII (1485–1509) and Henry VIII (1509–47). First, the medieval distinction between *haut* and *bas* instruments was intensified by the establishment in the 1490s of a distinction between the Presence Chamber, the public areas of the court, and the Privy Chamber, the private living and working areas of the monarch; it was eventually embodied in the Eltham Ordinances of 1526, the model for the organization of the Royal Household up to the Civil War and beyond. Loud wind instruments, such as the royal trumpeters and the shawm and sackbut players, were assigned to the former, while the players of soft instruments belonged to the latter.

Second, the solo or duet minstrelsy of the Middle Ages rapidly gave way to fixed groups playing sets of polyphonic consort instruments, creating further subsections in the structure of the Royal Music. Henry VII employed a group of shawms and sackbuts at least from 1495, and a group of 'styll shawms' (apparently a type of soft shawm with a cylindrical bore) is recorded at the beginning of Henry VIII's reign; to judge by their names, most of them came from Flanders and Germany, the areas that had led the way in the development of polyphonic consorts and consort instruments. Viols seem to have been introduced to Henry VIII's court about 1515 by three members of the Van Wilder family from the Netherlands, and a group of rebecs developed in the 1520s, presumably to play dance music. The rebec players apparently changed to flutes when Henry VIII recruited two new groups from Italy in 1539–40 as part of the preparations for his marriage to Anne of Cleves. The newcomers, five recorder-playing members of the Venetian Bassano family and six string players from Milan, Cremona and Venice, seem to have been Jews seeking refuge from the Inquisition. The string group played sets of violins as well as viols, and henceforth provided the court with dance music.

The structure of the Royal Music established in the 1540s remained largely unchanged until the Civil War and even beyond. The four instrumental consorts, shawms and sackbuts, recorders, flutes and violins or viols, served in the Presence Chamber alongside those who were functionaries rather than literate musicians, such as the trumpeters, the drummers and the fife players. It needs to be emphasized that they did not make up a single 'orchestra' but were separate groups, each with their own personnel, duties and sphere of operation in the palaces.

However, they did cooperate on special occasions, such as the productions of masques, and their autonomy began to be eroded after Charles I established the post of Master of the Music at his accession in 1625. The Privy Chamber employed a more loosely organized pool of musicians, including lutenists, viol players, keyboard players, harpers and singers, who taught the royal family music and provided them with a range of domestic vocal and instrumental music. They often received the courtesy title 'Groom of the Privy Chamber', and some of them, such as the keyboard players Mark Smeaton and Ferdinand Richardson, were more courtier than musician, heirs to a tradition that required such personal attendants to provide the monarch with informal entertainment.

The Tudor court was by far the largest musical institution in England, and employed most of its important composers, especially after the dissolution of the monasteries disrupted collegiate foundations around the country. Yet few surviving musical sources can be associated directly with it; it is likely that any collections of court music housed at Whitehall were destroyed in the fire that consumed the old palace in 1698. However, two early Tudor songbooks, the Fayrfax Manuscript (*GB-Lbl* Add.5465, *c*1500, ed. in MB, xxxvi) and the Henry VIII Manuscript (*GB-Lbl* Add.31392, *c*1518, ed. in MB, xviii) have close connections with the court, and the Henry VIII Manuscript contains songs and instrumental pieces, some attributed to the king, that are likely to have been sung in the Privy Chamber. Similarly, the French chansons of Philip Van Wilder (ed. in *Collected Works*, ed. J. Bernstein, New York, 1991) are widely distributed in Elizabethan manuscripts in textless versions or arrangements for lute or keyboard. They may have been performed by singers and instrumentalists working in the Privy Chamber under his direction in the 1540s and early 1550s.

Few connections can be established between surviving manuscripts and the Royal Music in the reigns of Edward VI (1547–53), Mary (1553–8) and Elizabeth (1558–1603), although the Lumley or Arundel Partbooks (*GB-Lbl* Roy.App.74–6) contain a group of four- and five-part dances (ed. in MB, xliv) of about 1560 that seem to derive in part from the repertory of the court violin consort. Much of the Elizabethan contrapuntal consort repertory (mostly ed. in MB, xliv, xlv) was composed by Chapel Royal composers such as Robert Parsons, Christopher Tye, Thomas Tallis and William Mundy, perhaps for court wind or viol consorts or for the instruction of Chapel Royal choirboys. Similarly, the Elizabethan consort song (selection ed. in MB, xxii) was usually written for a boy accompanied by four viols, and seems to have originated as a genre in the laments performed in choirboy plays produced at court. A more specific connection is between the group of lutenists established in the Privy Chamber in the 1570s and 80s and the developing Elizabethan lute duet repertory. Significantly, a popular treble and ground duet by John Johnson (served 1579–94) is entitled 'The Queen's Treble' in two sources.

7. Courtiers of Queen Elizabeth dancing to an ensemble of a lute and three viols: painting attributed to Marcus Gheeraerts the elder, a Flemish artist who spent the years 1568–77 in England

(iii) James I and Charles I. The main changes to the Royal Music in the reign of James I (1603–25) concerned the violin consort and the developing musical establishments in the households of Prince Henry (1610–12) and Prince Charles (1616–25). The violin consort, often under strength in the later years of Elizabeth's reign, was enlarged from seven to 12 between 1603 and 1612, effectively creating an orchestral violin band, possibly the first in Europe. Its members may have worked in small ensembles in their daily work at Whitehall, though the whole group regularly provided the dances for court masques, probably augmented by the court dancing-masters; a description of Ben Jonson's *Pleasure Reconcil'd to Virtue* (6 January 1618) mentions 'violins, to the number of twenty-five or thirty'. We know from John Adson's *Courtly Masquing Ayres* (London, 1621, ed. P. Walls, London, 1975–6) and a document of 1631 that the group played five-part music using a single violin part, three violas and bass; its establishment grew to 15 by 1629, remaining at that level until the Civil War.

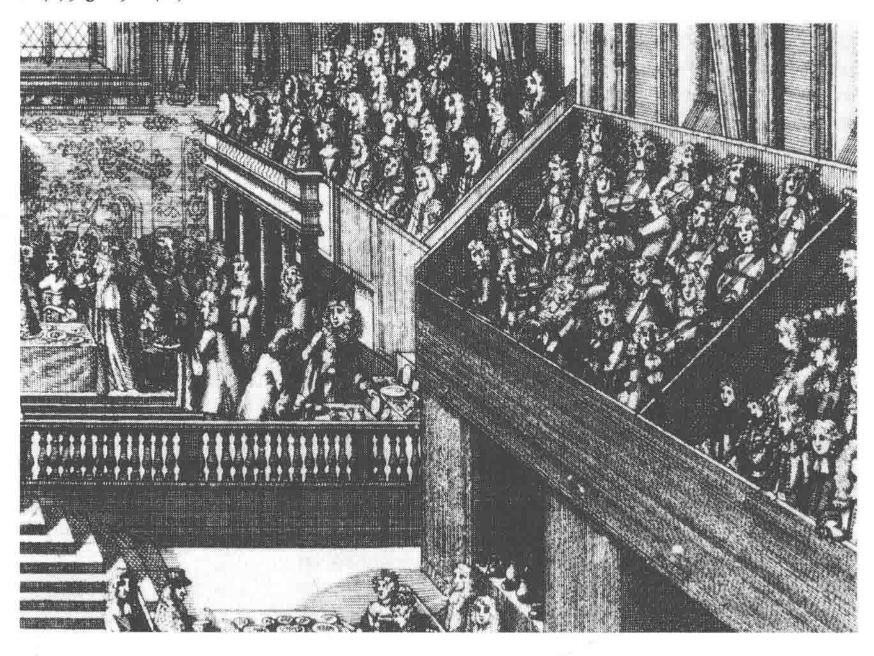
Prince Henry was the first adult male heir to the throne resident at the English court for a century, and the group of musicians he established in his household was something new. Instead of the separate consorts of single types of instrument in the main Royal Music there was a single group mixing violinists, viol players and an organist with a number of singer-lutenists. The group should be seen as part of Prince Henry's italianate cultural programme, for its mixture of voices, violins and continuo instruments was clearly designed for the performance of music in the early Baroque style, such as *Prime musiche nuove* (London, 1613) by the Paduan Angelo Notari, who joined the group in, probably, 1611. Significantly, a number of early composers of English continuo song, such as Robert Johnson, Alfonso Balls or Bales, Robert Taylor and Nicholas Lanier, were also employed by Prince Henry or Prince Charles.

Prince Henry's household was dispersed after his untimely death in 1612, though it was reconstituted after his brother Charles became Prince of Wales in 1616. Charles also employed many singer-lutenists, though he was a viol player himself and was most interested in consort music. Under his patronage four eminent composers of consort music, Alfonso Ferrabosco (ii), Thomas Lupo, Orlando Gibbons and John Coprario, developed new types of contrapuntal music for new combinations of instruments, including two and three lyra viols, two bass viols and chamber organ, and mixed consorts of violins, viols and organ. In particular, Coprario wrote two influential sets of fantasia-suites in the early 1620s specifically for one and two violins, bass viol and organ (ed. in MB, xlvi), the model for similar sets by William Lawes (ed. in MB, lx), John Jenkins and others.

When Prince Charles came to the throne in 1625 his musical establishment was combined with James I's Privy Chamber musicians to make a new group, the Lutes and Voices. William Lawes, Coprario's pupil, drew on its resources for his pieces for harp consort (violin, bass viol, theorbo and harp, selection ed. in MB, xxi) and his Royal Consort suites (two violins, two bass viols and two theorbos, ed. D. Pinto, *For ye Violls: the Consort and Dance Music of William Lawes*, London, 1995), and the group was deployed *en masse* to provide the vocal music for the lavish court masques of the 1630s. The other main innovation of Charles I's reign was the appointment of Nicholas Lanier in 1625 as Master of the King's Music, with authority for the first time over all the groups in the Royal Music. The reorganization in 1630 of the three existing wind consorts into a single group, apparently using the more modern and flexible combination of cornetts and sackbuts, can be seen as part of an attempt by Lanier to exercise authority beyond his own group, the Lutes and Voices.

8. Design by Inigo Jones for the costume of a Daughter of Niger in Ben Jonson's 'Masque of Blackness' performed at Whitehall, 6 Jan 1605 (Devonshire Collection, Chatsworth, Derbyshire)

The Royal Music dispersed at the beginning of the Civil War in 1642, and its members were forced to fend for themselves: some went into exile, a few joined in the fighting, but most resorted to teaching or just disappeared from view. However, between about 1654 and 1658 a small group of musicians served Oliver Cromwell at Whitehall under the Master of the Music, the organist John Hingeston. The group included string and wind players, and their repertory probably included Hingeston's fantasia-suites as well as a large fragmentary collection of his wind music in two autograph bass partbooks bound with Cromwell's arms in *GB-Lv*. According to Anthony Wood, Hingeston also trained two boys to sing Richard Dering's Latin motets, 'which Oliver was most taken with though he did not allow singing, or Organ in Churche'.



(iv) Charles II and James II. At the Restoration in 1660 the Royal Music was reconstituted exactly as it had stood in 1642, though changes soon began to be made to accommodate Charles II's personal preoccupations. He decided to license and patronize two commercial theatres instead of paying for extravagant court masques, which reduced the importance of the Lutes and Voices (now renamed the Private Music). Furthermore, in Roger North's words, the king had an 'utter detestation of fancys', which meant that he soon dispensed with the services of the 'Broken Consort', the group in the Private Music that played fantasia-suites and other contrapuntal consort music. Locke apparently wrote his 'Broken Consort' suites (two violins, bass viol, continuo, ed. in MB, xxxii) for the group in 1661, and suites for three violins, bass viol and continuo by John Jenkins and the virtuoso German violinist Thomas Baltzar can also be associated with it, though it seems to have ceased its activities after Baltzar's untimely death in 1663.

Instead, the pre-Civil War violin band was enlarged to 24 places in imitation of the French court 'Vingt-quatre Violons du Roi', and was given a much more prominent role in court musical life (fig.11). A section of it, the 'Select Band' under John Banister, was granted access to the Privy Chamber; groups from it were soon accompanying anthems in the Chapel Royal, eventually ousting the established wind musicians (it took part in the performance of court odes); and in 1664, divided into two for the purpose, it began to provide orchestral music for the two London theatres. The dominant position of the Twenty-Four Violins at court was formalized in 1666 when the Catalan Luis Grabu, a violinist, succeeded Nicholas Lanier, a singer-lutenist, as Master of the Music. Grabu was dismissed in 1673, apparently because the Test Act of that year banned Catholics from the court. But he was replaced by Nicholas Staggins, another member of the Twenty-Four Violins, and by the end of Charles II's reign the Wind Music and the Private Music had virtually been reduced to sources of places for yet more violinists.

John Banister and Matthew Locke seem to have provided the Twenty-Four Violins with most of its early repertory. Their orchestral dance music, collected particularly in *GB-Och* Mus.1183 and *US-NYp* Drexel 3976

9. Painting traditionally called 'The Cabal' (by unknown artist; attributed to J.B. Medina) but more likely to show members of the King's Private Music in the early 1660s, shortly before they were disbanded (Nostell Priory, West Yorkshire)

10. String orchestra (probably members of the King's 24 Violins) playing at Westminster Hall during the banquet celebrating the coronation of James II on 23 April 1685: detail of engraving from Francis Sandford, 'The History of the Coronation of . . . James II' (London, 1687)

('The Rare Theatrical', facs. in MLE, A4, 1989), shows that the group was by then playing in four parts, with a single violin part, two violas and bass, although it seems to have gone over to the more modern italianate 'string quartet' scoring in the middle of the 1670s. Not much court orchestral music survives from succeeding decades, though we have many court odes by Pelham Humfrey, John Blow, Henry Purcell and others. They are scored for solo voices, choir (presumably the Chapel Royal), strings and continuo; recorders, oboes and trumpets were increasingly added in the 1680s and 90s. Blow and Purcell also seem to have composed a good deal of vocal chamber music for the court in the 1680s, particularly using the genre of the 'symphony song', usually scored for several voices, two violins or recorders, and continuo. Some of them celebrate the spring, and may relate to informal court ceremonies on 1 May.

James II embarked on a thorough reform of the royal household after his accession in 1685, the first since the reign of Henry VIII. The existing groups were replaced by a single Private Music of 35, based on the places available to the Twenty-Four Violins at the end of Charles II's reign. It consisted of an up-to-date orchestra of strings and wind instruments, five solo singers (probably retained to sing the solo parts of court odes), a continuo group of bass viol and harpsichord (Charles Coleman and Henry Purcell), a composer (John Blow) and a Keeper of the Instruments.

(v) Decline. In 1689 William and Mary initially retained James II's Household, although on 2 May 1690 the king ordered that the 'musicians be presently reduced to 24 and an instrument keeper'. It soon became apparent that they would only have to serve on an occasional basis, and the court's central place in England's musical life was soon overtaken by the burgeoning activity in London's commercial theatres and concert rooms. Purcell's career illustrates the change. Before 1690 he was essentially a court composer, writing anthems for the Chapel Royal, court odes and other secular music for the Private Music. After 1690 he continued to provide odes for Queen Mary's birthday, but was mainly a theatre composer, writing music for nearly 50 plays in little more than five years. By 1700 the duties of the royal band were probably already not far removed from those summarized in an article in *The Daily Graphic* for 20 July 1903:

> Throughout the eighteenth century, besides their ordinary duties [? court balls], the band was employed, together with the gentlemen and children of the Chapel Royal, in the performance of odes, annually composed for their Majesties birthdays, for New Year's Day, and to celebrate victories, but since the discontinuance of the production of such odes [in 1820] their duties have been reduced to attendance on Royal Weddings, baptisms, State banquets, and State concerts.

Towards the end of the 18th century the 24 places in the royal band gradually became sinecures, often given to non-musicians, and in the 19th century its function was supplanted by other groups, including the Prince Regent's private wind band (called the King's Household Band after his accession in 1820), and Queen Victoria's private band, later developed by Prince Albert into a small orchestra that played at concerts at Buckingham Palace and Windsor Castle. The 'Private Band' and the official 'State Band' were amalgamated in 1893, although the group effectively went out of existence during World War I, despite being listed in *The British Imperial Calendar* until 1924.

The court was essentially a musical backwater after the 17th century, and its continuing decline is reflected by the appointment of several obscure Masters of the Music in the 19th century, although the prestige of the post revived in the 20th century. Walter Parratt was the last Master to have any practical duties, and since then the post has honoured a distinguished composer. The successors of Nicholas Staggins (*d* 1700) were John Eccles (1700–35), Maurice Greene (1735–55), William Boyce (1755–79, but sworn in only in 1757), John Stanley (1779–86), William Parsons (1786–1817), William Shield (1817–29), Christian Cramer (1829–34), Franz Cramer (1834–48), George Frederick Anderson (1848–70), William George Cusins (1870–93), Walter Parratt (1893–1924), Edward Elgar (1924–34), Walford Davies (1934–41), Arnold Bax

(1942–52), Arthur Bliss (1953–75) and Malcolm Williamson (1975–).

Nevertheless, many famous musicians were welcomed at court in the 18th and early 19th centuries. Handel wrote a number of works for royal occasions and was appointed music master to the princesses in 1723; J.C. Bach was music master to Queen Charlotte, and was a member of her Chamber Band; the eight-year-old Mozart played at court with his sister in 1764; Haydn was frequently patronized by members of the royal family during his two visits to London; Rossini was summoned to Brighton by George IV within hours of his arrival in London in 1823; and in 1842 Mendelssohn was invited by Queen Victoria and Prince Albert to play to them and make music with them at Buckingham Palace. Queen Victoria continued to patronize music after Albert's death in 1861, but she lacked the prince's breadth of interest and enthusiasm, and gradually royal interest and encouragement of music declined. The members of the present royal family are not overtly interested in musical matters, except as patrons, and music at court is restricted to ceremonial functions.

III. Inns of Court

At the Inns of Court, England's 'Third University', students continue to study common law; during the 16th and 17th centuries the Inns fostered a broader humanist education, encouraging and commissioning literary and musical entertainment. The earliest surviving records, the 'Black Books' of Lincoln's Inn, begin in 1422; however, a school of law with moot exercises flourished in or before the time of Edward I, although legal training was not based in London until the 1340s when the king's law courts ceased to travel about with their peripatetic monarch. A recently discovered contract of 1323 assures a young man four years' support among the apprentices at the king's court of Common Bench, 'wherever the said Bench should be in England' (Baker and Thorne, 1990, p.xxvi). The 'ancient' Christmas customs of Lincoln's Inn, Gray's Inn and the Middle and Inner Temples for which 15th-century records survive may in fact be coeval with the earliest moots, held annually and adapted to whatever hall was available en route. The right of the revellers to share their Christmas sports with the monarch may date from this time. Sir John Spelman, writing in the reign of Henry VII, describes the election, carols and dancing of the King of Christmas and his court at Gray's Inn as 'the rules used in old time'. In the words and music of a polyphonic carol 'Nowell, nowell, out of your slepe' from Lincoln's Inn moot book (*c*1485–1508) we find fresh evidence of the carolling tradition at the Inns and vestiges of medieval court life from which a picture of life in the school of law may be reconstructed. One of the butlers of Lincoln's Inn transcribes in the same manuscript book 'The howe of the howse'; perhaps the only authentic directions for the courtly hove dance, mentioned by Gower (Baker, 1986, p.28).

In the 15th and 16th centuries the law students were housed in semi-collegiate institutions. By the mid-16th century, if not earlier, the law students were supplemented by gentlemen who used the Inns as schools of manners. Christopher Hatton and Henry Helmes danced their way from the Inns to offices at the court of Elizabeth. Extra-legal education came to a seasonal climax in the Christmas revels. Sir George Buc claimed these revels required knowledge of grammar, rhetoric, logic, philosophy, history, music and mathematics. By this time students were expected to take private instruction in music and dance and to perform in plays, revels and masques presented at the Inns and occasionally at court. The annual festivities could (depending upon the Inn) last from Halloween until the feast of the Purification. Records of music and payment to musicians belong chiefly to the custom of revels and post revels: there were 'solemn revels' performed by the 'whole House' and then by the utter and inner barristers, followed by 'post revels' danced by the gentlemen of the inner Bar (Dugdale, 1666, p.161). Some of the music of these dances from the 16th and 17th centuries has been identified by Cunningham. Dances appropriate to the solemn revels in the early records are 'the measures'; in the 18th century they became 'minuets'. The Middle Temple Brerewood Manuscript (*c*1635–8) suggests that the lawyers concluded solemn revels processing round the hall singing psalms. Typical dances of the post revels were galliards, branles and country dances; the latter continued to the 18th century. Most of the pieces are anonymous.

Choreographies and music survive for an important suite of dances known as The Old Measures (a late 16th-century derivation of the French basse danse), comprising the Quadran Pavan, Turkelony, the Earl of Essex' Measure, Tinternell, the Old Almain, the Queen's Almain and Cecilia Almain/the Black Almain. These were performed at the inns into the late 17th century by couples ranged in a file; the musical accompaniment was probably strings. The characteristic beauty of these dances lies in the many patterns or 'changes' made by dancers from a small repertory of steps. Robert Mullally concludes that choreographically the almains and pavans in this suite are barely distinguishable; the distinction between them must be sought in the music.

In addition to amateurs, composers at the Inns included professionals such as Richard Edwards (1525–66), Master of the Chapel and an honorary member of Lincoln's Inn. Thomas Campion (1567–1620) lived at Gray's Inn during the period 1586–95. Payments to musicians first appear in records of Lincoln's Inn for 1446 and occur regularly thereafter. Feasting and music are closely linked in the Elizabethan Inns. Lincoln's retained 'musicians of the house' on a yearly stipend: at least one musician performing throughout the year, supplemented by other regulars who earned most of their annual fee playing during the Christmas season. The two Temples, whose lavish revels began at All Saints and ended at Candlemas,

habitually paid more for musicians than did the larger Grays's Inn. It is possible to trace named musicians in the 16th and 17th centuries: Lincoln's Inn's Anthony Tyndall was a London wait from 1557 to 1597, as was Henry Field at the Inner Temple; John Dowland was King's lutenist when he performed for the Middle Temple in 1612. Jeffrey Collins, who signed for an annual payment at the Middle Temple in 1640, was also a member of the Globe and Blackfriars band.

The Inns took masques to court for Henry VIII at Christmas in 1526 and 1527; fuller records, texts and songs survive for the late Elizabethan, Jacobean and Caroline entertainments. The principal surviving source of masque dances (*GB-Lbl* Add.10444) contains a number of dances that can reasonably be attributed to particular Inns of Court masques, and others whose names indicate that they were used at the Inns, though the precise context is uncertain. Sir Nicholas L'Estrange, the compiler, was at Gray's Inn in 1617, and admitted to Lincoln's Inn in 1624. It was usual for the lawyers to write their own entertainments until the end of Elizabeth's reign. Under the Stuarts the Inns often commissioned their scripts and engaged court musicians to compose and perform the musical accompaniment to the masques. The lawyers themselves continued to perform as dancers; they usually offered a costumed danced entry, a main dance, then invited members of the audience to dance with them, and performed a final patterned dance. Songs often separated these danced sections.

Throughout the 17th century revels flourished; the Inns presented Charles II with the masque *Universal Motion* in 1662. The last record of dancing as regular custom at the Inns occurs in 1733. Little music from the early revels and later masques has been identified. Most of the music in the Brerewood manuscript cited above was composed from 1612 to 1618 and several dances are by John Coprario. Masque music from 1633 to 1636 is included in Lefkowitz, and a good selection of extant music is in Sabol.

IV. Musical life: up to 1660

Throughout the Middle Ages London was a major European musical centre but the scale of the activity that it embraced rose markedly in the late 15th century as the royal court made the capital its permanent geographic base and as London's booming economy brought real wealth to a population concerned to endow its churches. Court and capital worked in close symbiosis; new prosperity, directly or indirectly, supported an increasingly elaborate celebration at both civic and parish level. During the 15th century a large musical workforce emerged in the capital, and parish clerks in particular developed a strong professional linkage with the book trade.

A central factor was the concept of community which, coupled with a belief in purgatory, helped to enrich the city's churches and their music, while cementing relationships on the ground between groups of musicians who settled in particular locations. Endowments for post-mortem services expanded the numbers of singers, creating a sizable workforce available for a wide range of elaborate celebration; they also provided income with which the general round of services could be enriched, and books and organs purchased. Parish communities endowed their churches, and by the late 15th century even small churches were paying regularly for the performance of polyphony as well as for its copying. Parish churches owned choirbooks containing polyphony; so did parish clerks, chantry priests and conducts, some of whose personal collections, as in other towns, were considerable.

The most striking feature of late medieval and early modern London was the close proximity of its ecclesiastical institutions. An area no larger than 1·6 km² accommodated 106 parish churches, the Cathedral of St Paul, numerous monasteries and hospitals. Small and rich parishes clustered around the main trading thoroughfares of Cheapside and Cornhill; near the walls parishes were larger and more sparsely populated. An inner ring of monasteries and hospitals lay near the walls; larger monastic foundations lay immediately beyond. Also important musically is the interaction between institutions that this proximity fostered. At St Paul's chantry priests (numbering 47 by the Reformation) were expected not only to perform post-obit services but also to sing in the cathedral choir and attend other services outside the cathedral.

The cathedral, parish churches and hospitals borrowed singers from one another. On occasion parishes used singers from the royal household chapel and from neighbouring parishes. They also drew on the services of parish clerks, whose own guild statutes (from the mid-15th century) explicitly defended a trade monopoly in cross-parish activity. The activities of secular musicians also display a high degree of integration within the urban fabric, again stimulated by the presence of the court and

other national institutions. Ethnic and professional factors conditioned residence, as generations of minstrels settled in the parishes in the east of the city and outside its eastern wall, preferring these areas to Westminster. Their musical contribution to the life of the capital was also driven to some extent by changes at court, whose changing spatial organization in the 16th century gave rise to new groups of performers and facilitated the importation of new generations of internationally renowned musicians.

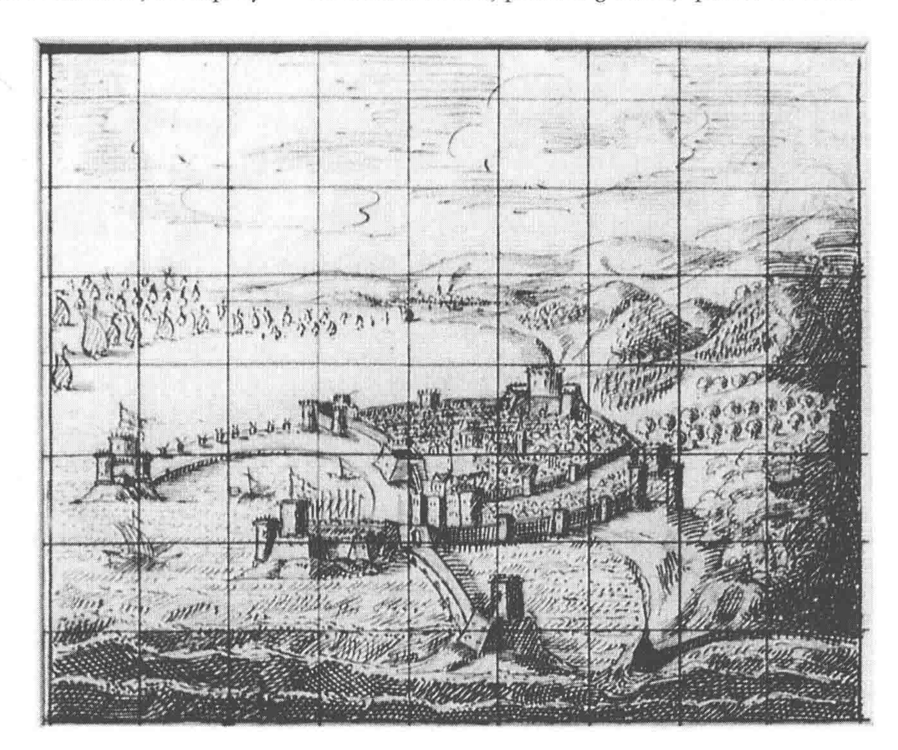
V. Musical life: 1660–1800



1. The Stage.

(i) Introduction. The early history of opera in London encompasses a double tradition. In 'English' form, opera finds its origins in the Stuart court masque and its first flowering in the half-sung, half-spoken 'semi-opera' that reached its zenith in the work of Henry Purcell in the early 1690s. By 1708 the transition to all-sung opera in English was well under way, but a government order temporarily separating operas from plays, along with the importation of high-priced Italian castratos, led rapidly to a tradition of performance in Italian. Unlike inhabitants of most other major opera centres in Europe, Londoners after 1710 saw their main form of opera in a language they could not understand.

A second major peculiarity of opera in London is its commercial basis. The Civil War and the execution of Charles I in 1649 terminated large-scale royal patronage. George I countenanced the establishment of the Royal Academy of Music in 1719 and provided a small subsidy, but his £1000 a year never supplied even as much as 10% of the company's costs. Opera therefore remained the province of commercial theatres and individual impresarios – aided by shaky season subscriptions and occasionally by individual patrons (notably Lord Middlesex in the early 1740s, Bedford and Salisbury in the early 1790s).

For more than a century from 1708 the regular season consisted of twice-weekly performances, starting in December or January and totalling about 50 in all. The venue was almost always the King's (or Queen's) Theatre in the Haymarket. Against the grand and very expensive Italian opera, the straight theatres – Lincoln's Inn Fields (Covent Garden after 1732) and Drury Lane – offered more popular fare in English. The ballad opera boom inaugurated by Gay's *The Beggar's Opera* (1728) was followed by a craze for burletta afterpieces, and eventually by a tradition of native light opera that virtually dominated the English theatre in the late 18th century and early 19th.

(ii) The masque tradition and Davenant. Most authorities treat William Davenant's *The Siege of Rhodes* (1656) as the first real opera in London, but it clearly derives both from continental influences and native English developments, particularly the court masque in which Davenant was heavily involved before the Civil War. The court masque itself apparently evolved out of an ancient mumming tradition that merged with elaborate continental entertainments, presenting dance, spectacle and alle-

11. Design by John Webb for Davenant's 'The Siege of Rhodes' (1656) (Devonshire Collection, Chatsworth House)

gorical-poetical compliments to a king or noble patron. The masque rose to dizzying heights of spectacle and expense under James I and Charles I (1603–42). The most famous examples are those devised by Ben Jonson and Inigo Jones, notably *The Masque of Queens* (1609), in which the antimasque was first introduced, and *The Gypsies Metamorphosed* (1621). When Jones broke with Jonson in 1631, others filled the place of poet, including Davenant.

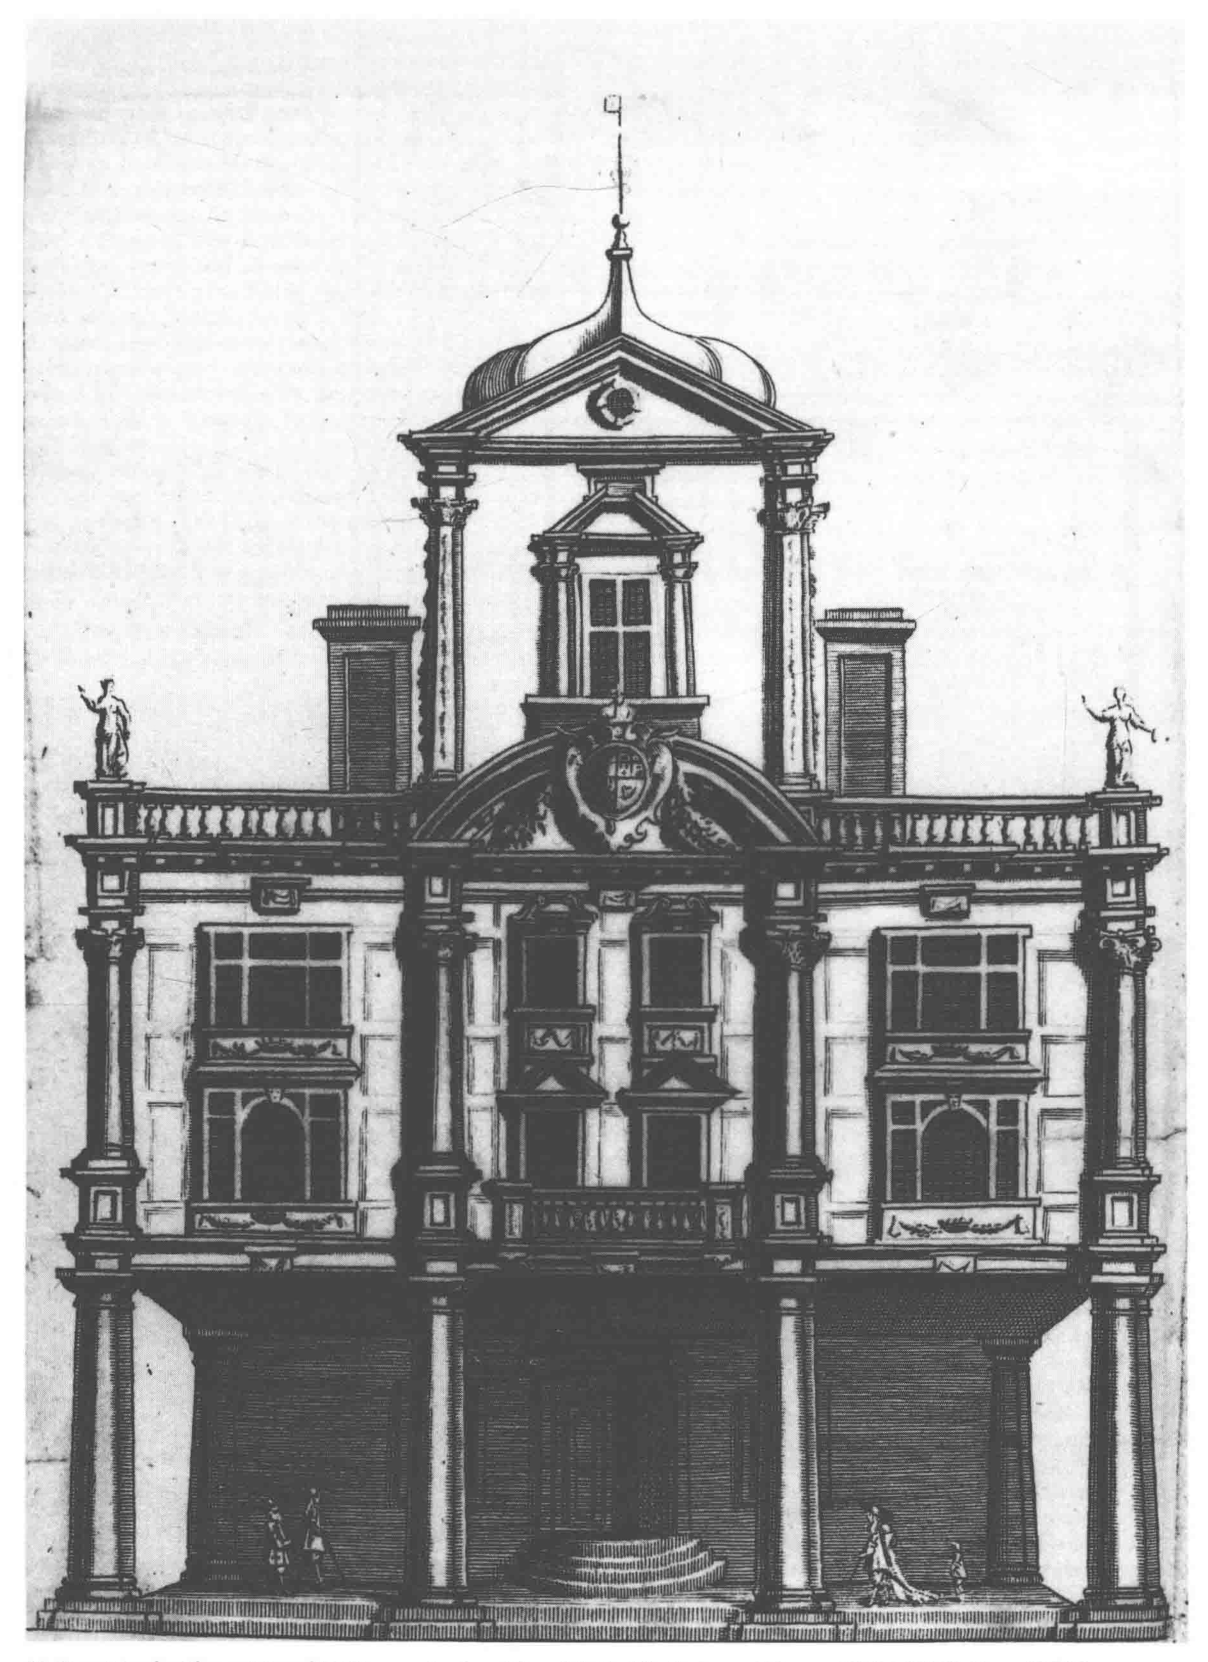
Masques are mixed entertainments stressing elaborate scenery, costumes and machines but generally lacking much in the way of plot coherence and characterization. Had the Civil War not intervened, such entertainments would probably have been transplanted into the public theatre. In 1639 Davenant received a royal patent permitting him to build a playhouse and to perform not only plays but also 'musical Presentments, Scenes, Dancing or other the like'. Obviously he hoped to present music and spectacle in a fully equipped theatre, but the Civil War delayed his experiment.

During his Civil War exile, Davenant evidently saw some Italian court operas and *tragédies à machines* at the Théâtre du Marais in Paris. In May 1656, evading the Puritan ban on plays, he offered 'The First Dayes Entertainment at Rutland-House, by Declamations and Musick; after the manner of the Ancients' on an improvised stage at his home in Charterhouse Yard, Aldersgate Street. The following September he mounted *The Siege of Rhodes* in the same venue, with music by Charles Coleman, Henry Cook, Henry Lawes and George Hudson (see fig.12). Following the Restoration he obtained authority from Charles II and converted Lisle's tennis court in Portugal Street into a public theatre capable of scene changes, the first Lincoln's Inn Fields theatre, called the Duke's Theatre. It was small, with exterior dimensions approximately 23 metres by 9 (recent estimates of capacity vary from 350 to 500), and admission ranged from 1s. (gallery) to 4s. (boxes). The building opened in June 1661 with an expanded version (possibly without music) of *The Siege of Rhodes*, a triumph that forced the rival King's Company to abandon their non-scenic Vere Street theatre and build a theatre in Bridges Street (May 1663), on whose site Drury Lane was constructed in 1674 after a fire.

(iii) 1671–1704: semi-operas and masques. In November 1671 the Duke's Company opened their lavish new Dorset Garden Theatre, a multi-purpose building designed to accommodate scenic spectacle and operatic extravaganzas (fig.12). The theatre was on the river's edge, bordering Salisbury Court off Fleet Street; its exterior dimensions were about 17 metres by 45 (recent estimates of capacity hover around 820), and the construction cost amounted to £9000. Interior details have been hotly disputed from minimal evidence, but patterns of use by the United Duke's and King's companies in the 1680s and 90s show that Dorset Garden was a machine house very different from the £4000 Drury Lane of 1674 (about whose interior virtually nothing is known).

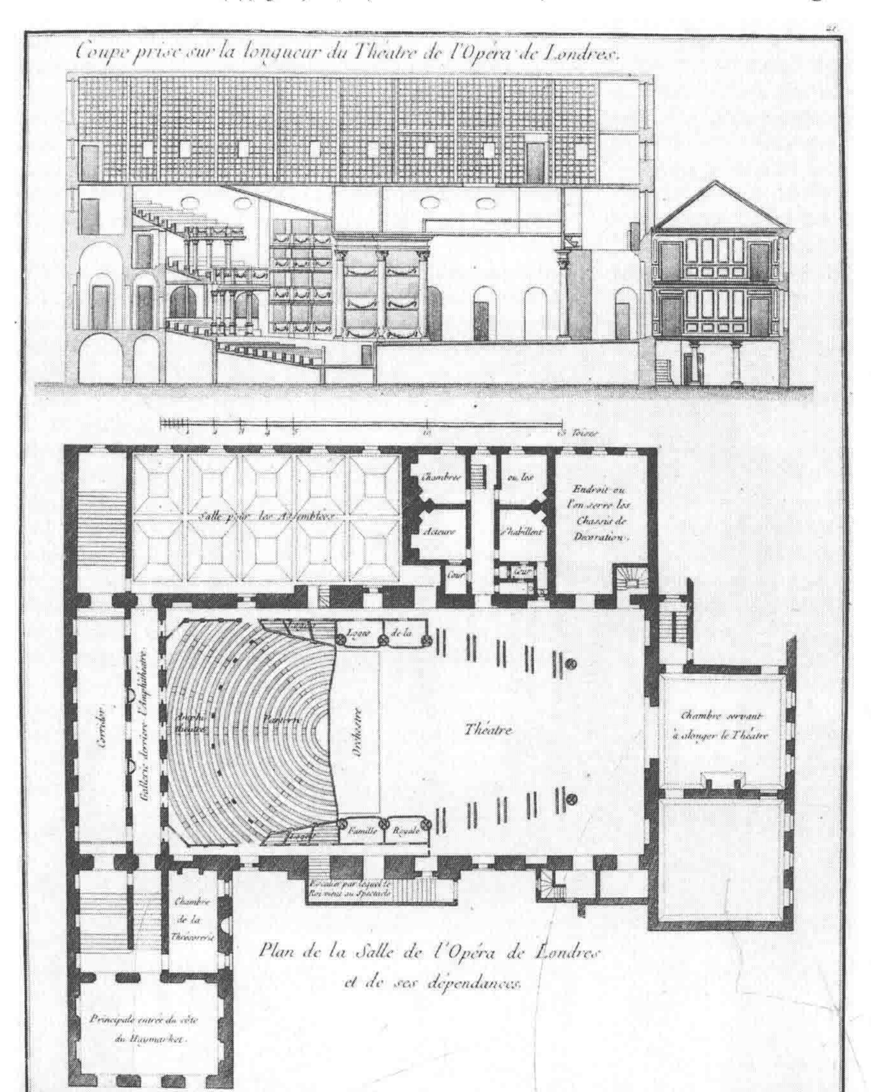
At least 90% of the repertory at Dorset Garden consisted of ordinary plays; semi-operas were a special effort and an occasional treat. The fancy ones required many months to prepare and investment totally beyond ordinary budgets (up to £3000–4000 against a total annual income of some £8000–10,000). The famous 1670s productions are *The Tempest* (1674), the Shadwell-Locke *Psyche* (1675) and *Circe* (1677).

Theatrical hard times during the period 1678–83 delayed further extravaganzas until the Dryden-Grabu *Albion and Albanius* (1685), which was interrupted by Monmouth's invasion. Though it failed, *Albion and Albanius* is in fact the first full-length opera in English that survives. In 1690 the United Company mounted the triumphant Betterton-Purcell *Prophetess*, in 1691 the Dryden-Purcell *King Arthur* and in 1692 Purcell's *Fairy Queen*. The last two were successful but not sufficiently so to justify their enormous costs.



The semi-opera tradition received a dire setback with the early death of Henry Purcell in 1695. In the same year, the actors' rebellion removed Thomas Betterton (the great champion of operatic spectacle) to the cramped old Lincoln's Inn Fields Theatre, reconverted from a tennis court. These two events contributed substantially to the decline of semi-opera. The idea that new operas disappeared from the London stage until the advent of Italian opera and Handel is, however, entirely false. More than 20 new 'operatic' works were staged in this decade.

Between 1695 and 1701 the Patent Company under Christopher Rich mounted a series of semi-operas at Dorset Garden and Drury Lane – *The Indian Queen* (1695; Purcell's last opera), *Brutes of Alba* (1696), the long-popular *Island Princess* (1699), and a pair of original extravaganzas concocted by Elkanah Settle, *The World in the Moon* (1697) and *The Virgin Prophetess* (1701). Betterton fought back as best he could at Lincoln's Inn Fields with a series of musical masques by Peter Motteux and John Eccles, notably *The Loves of Mars* and *Venus* (1696), on which he collaborated with Godfrey Finger, and *Europe's Revels for the Peace* (1697). More theatrical hard times precluded new opera offerings between 1701 and 1704, but a rising tide of entr'acte songs and instrumental entertainments, and the growing popularity of concerts of all sorts in London, gave promise of renewed interest in opera as soon as an innovatory entrepreneur seized the opportunity. All-sung opera had flourished on the Continent; its importation into London could only be a matter of time.



(iv) 1705–19: Vanbrugh's theatre and Italian opera. In spring 1703 John Vanbrugh started plans for a new theatre of his own design, the Queen's (from 1714 the King's) Theatre in the Haymarket. His plan was to reunite the two theatre companies at his own theatre. As previously in London, opera would be mounted as an occasional treat by a company devoted primarily to plays.

The theatre had outside dimensions of about 18 metres by 40, with a normal capacity of about 760; packed full, it may have held as many as 940 (attendance estimates of up to 2000 in the 1730s were for oratorios, with stage and backstage space used for seating). Vanbrugh's architectural grandiosity and eccentricity were severely modified by alterations made in 1709 for acoustical reasons. With relatively minor changes, the 1709 building (fig.13) was to be London's principal opera house until it burnt down in June 1789.

Vanbrugh intended to open in early 1705 with Clayton's all-sung opera *Arsinoe* (in English), but Rich stole this novelty and mounted it successfully at Drury Lane. Vanbrugh countered with Jakob Greber's *Gli amori d'Ergasto* (in Italian), which struggled through five performances in April 1705. During 1705–6 Rich enjoyed a major triumph with Giovanni Bononcini's *Camilla* (in

12. Dorset Garden Theatre (opened 1671): engraving from Elkanah Settle, 'The Empress of Morocco' (1673, GB-Ob Douce SS.385)

13. Plan and cross-section of the first King's Theatre: engraving from G.-P.-M. Dumont, 'Parallèle des plans de plus belles salles de spectacles d'Italie et de France' (Paris, 1774)

English); Vanbrugh riposted with two semi-operas (George Granville's *British Enchanters* was a moderate success) and one all-sung pastoral. Convinced that all-sung opera would prove a goldmine, and unable to arrange the 'union' he desired, Vanbrugh wangled an order from the Lord Chamberlain, restricting plays to Drury Lane under Rich and opera to the Haymarket (31 December 1707). Thus in spring 1708 a company tried for the first time in London to offer nothing but opera. The results were a fiasco: Vanbrugh was bankrupt within four months. He was offering translated pasticcios of no distinction, had a wholly inadequate repertory and owed large salaries to imported castratos who could not perform in English.

The operatic history of the next decade was stormy and complex, as managements transmogrified themselves in bewildering ways. Owen Swiney took over for 1708–9, gambling on a star system by bringing in expensive Italian singers. This led, inevitably, to performances given entirely in Italian, starting with *Almahide* (1710) – a practice attacked by Addison in the *Spectator* but impossible to discard if star singers were a *sine qua non*. The major event of the 1710–11 season was the arrival of Handel in London and the première of his *Rinaldo* (24 February 1711). Handel's first London opera was a considerable success, but management was acutely unstable and arguments over responsibility for debts to tradesmen wound up in Chancery.

The opera company limped along from season to season until 1717, but extant records show woefully short-paid salaries. The first few performances of a new production were usually offered as a 'subscription', but even if fully taken up such subscriptions could not pay for an elaborate new production. Managers were caught in a double-bind: to attract a fashionable audience, fabulous salaries had to be paid to foreign stars (Nicolini got 800 guineas a season, plus a benefit), yet the prices necessary to support such salaries proved prohibitive. Meanwhile, the opera suffered from musical competition at the playhouses. The Lord Chamberlain never formally rescinded his prohibition on musical entertainments at Drury Lane, but it soon fell into disregard. Especially after 1714, when Lincoln's Inn Fields was reopened, the straight theatres competed

aggressively with each other and with the Haymarket opera, using musical works to do so.

During 1716–17 the Italian opera under Heidegger managed only 31 performances (including six by subscription and eight benefits), and his cashbook (now in the Essex Record Office) makes clear why he abandoned the cause as hopeless. Meanwhile, at Lincoln's Inn Fields, John Rich presented, besides plays, 36 performances of full-length operas (in English). The works included *The Island Princess*, *The Prophetess* and *Camilla* – that is, both semi-opera and all-sung opera in the new 'Italian' manner. Lincoln's Inn Fields' singers were not the biggest stars (though Margherita de L'Epine, Jane Barbier and Richard Leveridge were far from negligible), but at bargain rates they attracted audiences. Drury Lane, meanwhile, countered with musical masques as afterpieces, notably Pepusch's *Venus and Adonis* and *Apollo and Daphne*.

As of spring 1717 when Heidegger's company closed, the taste for Italian opera appeared to be a fad that had run its course. The logic of the situation suggested that 'serious' opera should migrate back to the regular theatres, which could use it as an occasional treat in English. The actual course of events was to be entirely different.

(v) 1719–38: the Royal Academies and their competitors. By January 1719 plans were afoot to re-establish Italian opera by obtaining letters patent for incorporating a joint-stock company under royal charter devoted to that purpose. George I granted a subsidy of £1000 a year and by July some 60 persons had taken at least one share of £200. Handel was dispatched to the Continent to hire singers. The patent (now in the Public Record Office) spells out the unique governance of this company, which was an odd amalgam of royal household entertainment and publicly held joint-stock company. The 'Governor' was to be the Lord Chamberlain, who held veto power in all matters, but each November stockholders were to elect between 15 and 20 directors, on whom operational responsibility devolved. The company would have £10,000 in pledged capital (it actually obtained about £15,000 in pledges), but hoped to call no more than 20% of it. (The prospectus suggests that a subscriber might have to put up £40 and could expect a 25% annual return – a calculation reflecting prevalent South Sea speculative fever more than reality.) 'General Courts' of stockholders would be held at least every three months.

The company rented Vanbrugh's Haymarket theatre. Its normal ticket price settled at a startling 10s. 6d. (5s. for the gallery); subscribers for season tickets paid £15 (later £20) for 50–60 nights, while boxes, generally rented for the season, were extra. Performances were given twice a week from roughly December to June, on Tuesday or

14. 'Masquerades and Operas' (or 'The Bad Taste of the Town'): engraving (1724) by Hogarth satirizing the prevailing taste for Italian music and architecture. On the left a fool leads an audience into the King's Theatre where Italian operas and masquerades were performed (the impresario J.J. Heidegger leans out of the window); in the foreground traditional works of English drama are wheeled away in a barrow. On the right crowds throng to a pantomime (the allusion is probably to 'Harlequin Dr Faustus', first performed at Rich's Lincoln's Inn Fields Theatre in 1715). The three figures in front of Burlington Gate link these examples of debased taste with the fashionable world of aristocratic patronage; one of them, Lord Burlington, patron of the new Palladian architecture, was also a patron of Handel and much involved in Italian opera.

Wednesday and Saturday. Members of the royal family attended regularly.

The era of the 'First Academy' (1720–28) was artistically probably the pinnacle of opera in London. From 1720–21 to the collapse of the bankrupt company in 1728 Senesino was its principal performer. Francesca Cuzzoni joined in 1722–3 and Faustina Bordoni in 1725–6, giving the company three reigning international stars in addition to Handel. Unfortunately, rivalry between the two women and their supporters created severe tensions and even public disruption during a performance. Administration by dilettante committee proved inefficient. The company quickly ran through all the pledged capital it could collect: financially it was probably doomed from the start. But all such matters of infighting and insolvency pale into insignificance when considered against the artistic achievement of the company, however short-lived. The dozen operas Handel wrote for its eight and a half seasons represent one of the great achievements in the history of opera. Some of the highlights were *Radamisto* (1720), *Floridante* (1721), *Giulio Cesare in Egitto* and *Tamerlano* (1724) and *Tolomeo* (1728). By no means was the company devoted entirely to Handel's work: it opened in April 1720 with Rolli and Porta's *Numitore*, and in its early years both Handel and Bononcini had partisans among the directors.

No Italian opera was performed in London in 1728–9. A session of the remaining Royal Academy shareholders voted in January 1729 to let Handel and Heidegger have the use of their scenery and costumes for five years, and the so-called Second Academy opened in December 1729 – initially without Senesino, an effort at cost-cutting. The nature of its financial backing is unknown. The king continued his £1000 subsidy, and private patrons probably helped as well. The reconstituted company operated less lavishly, but artistically much as before. Handel's *Poro* (1731) and *Orlando* (1733) were among its offerings. What little is known of the number of performances and of box-office receipts is unimpressive. The venture had 170 subscribers in 1731–2, and only 140 in 1732–3 (of whom 122 seem to have paid in full). None the less, losses incurred by the Second Academy were probably not more than patrons could bear; its demise came about for other reasons.

Handel and Senesino came to an unfriendly parting of ways in June 1733, and mounting personal hostility to Handel in society circles produced one of the oddest developments in the chequered history of opera in London – the establishment of the Opera of the Nobility, a rival Italian opera company. If one company could not make ends meet, a second was definitely a bad idea, and both companies were to go dismally broke in the course of the next three seasons.

The Opera of the Nobility opened at the third Lincoln's Inn Fields Theatre (vacant since 1732) in December 1733 with Porpora's *Arianna in Nasso*; Handel riposted at the King's Theatre, Haymarket, with *Arianna in Creta* in January 1734. During this season Handel mounted 60 performances (including oratorios), his rivals 52, with both companies insisting on performing on Tuesday and Saturday nights in direct and destructive opposition to each other. At the end of the year, in circumstances that remain mysterious, the Opera of the Nobility took over the King's Theatre, Haymarket, and Handel became a part-time tenant of John Rich's at Covent Garden. In 1734–5 the Opera of the Nobility hired the glamorous Farinelli and Handel was virtually beaten from the field – though he probably lost a lot less money. By the spring of 1737 the great opera war was over. Handel joined Heidegger and the remnants of the Opera of the Nobility at the King's Theatre, Haymarket, during 1737–8, but attempts to raise a subscription for 1738–9 failed, and the Italian opera collapsed for the third time in just over 20 years.

While Italian opera was experiencing artistic triumph but financial ruin, musical entertainment in English was for the most part flourishing. The popular English musical forms of the 1710s continued to thrive in the 20s, and *The Beggar's Opera* (fig.15) had a totally unprecedented success at Lincoln's Inn Fields in 1728, changing the whole face of London entertainment. Gay's oddity enjoyed a staggering 62 performances in its first half-season and spawned a tremendous boom in ballad opera in both mainpieces and afterpieces. Music virtually flooded the legitimate stage, mostly in decidedly popular forms. The suggestion that serious opera might improve its position by returning to English was put forward more than once. Aaron Hill urged Handel to 'deliver us from our *Italian bondage*' in a famous letter of 1732. Others had similar ideas, and the prospective availability of Lincoln's Inn Fields in 1732 helped generate some attempts at the establishment of an English opera company. Thomas Arne senior, styling himself 'Proprietor of the English Operas', staged several works including Lampe's *Amelia* (1732), J.C. Smith's *Teraminta* (1732) and his own son's *Rosamond* (1733). These experiments attracted little support: plenty of music was available at Drury Lane and Covent Garden, and English opera could not compete with the Italian in social glamour.

(vi) 1739–78: Italian versus English. Handel abandoned Italian opera in 1741, and for the next 40 years the history of the form in London is a dizzying sequence of changing managements and a tale of artistic mediocrity. Throughout this period the King's Theatre in the Haymarket continued to serve as venue and the basic season remained as before – performances on Tuesday and Saturday from December to June, with a total of roughly 50–60 nights. Ticket prices remained at half a guinea, but managers could not afford the fabulous fees that had brought the likes of Senesino, Cuzzoni and Farinelli to London. Artistically the pasticcio reigned supreme. The King's Theatre company rarely mounted more than ten operas a season, and a large majority were never revived. No more than 15% were newly composed for London, and as time went on, comic opera and ballet loomed increasingly large in the company's operations.

In this period, management was acutely unstable. In 1741 30 gentlemen pledged £6000 as a subsidy for four years, but the company lost about £3800 each season and survived only two. This venture was headed by Lord Middlesex, who tried to carry on by himself and did manage to bring Gluck to London for 1745–6. Middlesex's venture had collapsed by the end of 1749 and there was a hiatus until 1753, when Domenico Paradies and Francesco Vanneschi organized a company, surviving two years. 12 separate opera managements can be identified between 1741 and 1778, when the opera house, bought by Richard Brinsley Sheridan and Thomas Harris, entered on an even more unstable phase of its stormy history.

Meanwhile at Covent Garden and Drury Lane, musical entertainments in English were proving very profitable indeed. Although the Licensing Act of 1737 produced a lengthy drought in new works of all kinds, the enormous popularity of the Carey-Lampe afterpiece *The Dragon of Wantley* (1737) foreshadowed the English opera boom of the 1760s. This was inaugurated, ironically, by T.A. Arne's *Artaxerxes* (1762), an all-sung English version of Metastasio's *Artaserse* that was regularly revived well into the 19th century. It was followed by lighter fare, with many of the librettos provided by Isaac Bickerstaff. *Love in a Village* (1762) was a pasticcio arranged by Arne from more than 15 sources, with some original music of his own. Other great successes at Covent Garden were the Bickerstaff-Arnold *Maid of the Mill* (1765, fig.16; a charming musical treatment of Richardson's *Pamela* of 1740) and the Bickerstaff-Dibdin *Lionel and Clarissa* (1768). Sheridan's *The Duenna*, with music by the Linleys, ran a startling 75 times in 1775–6. Such works had plenty of 'serious' Italian music in them, but were offered as part of the regular six-days-a-week theatrical repertory at the patent theatres, always in English and at less than half the price of Italian opera. In the third quarter of the 18th century opera was flourishing in London – but at the King's Theatre, Haymarket, it had become a decidedly sickly and uninspiring venture.

(vii) 1778–92: the end of the first King's Theatre and the Pantheon. In 1778 Thomas Harris and R.B. Sheridan, the principal owner-managers of Covent Garden and Drury Lane respectively, bought the King's Theatre for £22,000 (of which £12,000 was mortgaged). Their plans were not clear: reportedly they intended to use the dormant Killigrew patent of 1662 to authorize a third playhouse. As events fell out, their purchase was the first step into legal snarls from which neither the first King's Theatre nor its successor was to recover for more than half a century. G.A. Gallini bought the mortgage and tried to take over the theatre in 1780; Sheridan bought out Harris and then sold his interest to William Taylor, who was to remain the evil genius of Italian opera in London until 1815. Gallini and Taylor spent the 1780s fighting for control of the theatre.

In 1782 Taylor had the interior of the building virtually gutted and rebuilt by Michael Novosielski. The result was a shallower working stage, a large pit and an auditorium with five shallow tiers in horseshoe form; the capacity was just over 1800. Taylor's artistic policy was not markedly different from that of his predecessors, but he was the first manager in many years to spend freely and promote aggressively. The immediate outcome was bankruptcy: the affairs of the King's Theatre in the mid-1780s are a tangle of recriminatory pamphlets and Chancery actions no one has ever yet quite sorted out. Gallini managed the theatre from 1785 to 1789, despite Taylor's determined efforts to evict him.

When the King's Theatre burnt down on 17 June 1789 the situation became even more chaotic. Taylor and Gallini both wanted to rebuild but could not agree to cooperate. During summer and autumn 1789 at least four more schemes were proposed for the future of Italian opera in London. The one that found royal favour was officially put forward by an impecunious law clerk and amateur architect named Robert Bray O'Reilly; in fact he was simply front man for a cabal of nobles headed by the Duke of Bedford and the Earl of Salisbury (who happened to be Lord Chamberlain). The plan was to erect a glamorous new theatre along French architectural lines on the north side of Leicester Square. (An architectural plan, of disputed authorship, is now in Sir John Soane's Museum, London.) The theatre was designed to hold only about 2300 people and had a staggering projected cost of £150,000. The scheme fell through because Taylor and shareholders in the King's Theatre violently protested at being deprived of the opera licence, and the Lord Chancellor refused to let the patent grant pass the Great Seal.

15. Ticket for a performance of 'The Beggar's Opera' at Covent Garden (possibly on 15 March 1737) for the benefit of Thomas Walker, who had created the role of Macheath at Lincoln's Inn Fields in 1728: engraving by J. Sympson (the younger) after Hogarth

16. Scene from Arnold's pasticcio 'The Maid of the Mill'; Covent Garden, 1765: painting by John Inigo Richards (Yale Center for British Art, New Haven, CT)

In summer 1790 affairs took a bizarre turn. Taylor scrounged up backers and commissioned Novosielski to rebuild the King's Theatre on a grand scale. Opened in February 1791, it measured about 28 metres by 52 and had a capacity of over 3000 (fig.17) – even though Salisbury awarded a four-year opera licence to O'Reilly for performance at another venue. This was the Pantheon in Oxford Street, erected by James Wyatt in 1772 as an elegant exhibition space and now hastily altered for use as an opera house at a cost of some £22,000. London had not managed to keep its one opera house out of bankruptcy and now it was going to have two expensive modern theatres built for the purpose, only one of which would have a licence. For the new King's Theatre Taylor hired dancers and Joseph Haydn, used his new building as a concert hall, and bided his time. Haydn even composed an *opera seria* for London, *L'anima del filosofo* (though in the event it was never performed).

Until the discovery of the company's papers in the Bedford Estates Office, London, little was known about the rival Pantheon operation beyond the works it performed and the names of its principal performers – a strong company including Mara and Pacchiarotti. In fact the enterprise was a deliberate attempt to change the nature of the opera establishment in England. The Pantheon was conceived as a kind of 'court opera', in which more of the financial burden was to be borne directly by noble patrons, thus freeing the company to pursue innovations in opera and ballet and to hire the best performers in Europe. To compete against Haydn at the King's, the Pantheon tried (unsuccessfully) to hire Mozart. Artistically its backers were committed to the old-fashioned *opera seria*, costly and tending to appeal to only a small, élite audience. But as the hastily mounted season of 1790–91 demonstrates, they were willing to support this preference with a second company devoted to *opera buffa*. Unfortunately very little went right. The company gave 55 performances during 1790–91 and lost a startling amount of money.

Four performances into the season of 1791–2, the Pantheon burnt to the ground under highly suspicious circumstances, and the venture finished the spring in makeshift conditions at the Little Theatre in the Haymarket. The highlight of the season was Paisiello's *La locanda*, specially composed for London. Evidence in the Bedford papers suggests that the Pantheon's backers killed it off when they realized that not even a princely subvention would be adequate to support *opera seria* in the fiercely competitive London theatre world. The Pantheon was a doomed experiment, and it seems to have lost more than £40,000 in its two seasons.

(viii) 1792–1800: opera at the end of the 18th century. The burning of the Pantheon solved the city's two-opera-house problem, and on 24 August 1792 a General Opera Trust Deed was signed, a kind of peace treaty intended to restore amity and fiscal responsibility. It did not work on either count. Trustees were to be appointed and any

17. Interior of the second King's Theatre, Haymarket, designed by Michael Novosielski and opened in 1791: aquatint by J. Black after A.C. Pugin and T. Rowlandson from 'The Microcosm of London', ii (London: Ackermann, 1809)

profits of the new King's Theatre in the Haymarket used to pay off the Pantheon's debts, but Taylor somehow succeeded in evading the trustee provision and the company remained mired in debts and lawsuits. Taylor managed the theatre while technically in a debtors' prison (except between 1797 and 1802, when he was MP for Leominster). Exciting performers, composers and librettists were hired (B.G. Banti, Martín y Soler, Lorenzo Da Ponte), but chaotic management kept the company at the brink of disaster. Ticket prices were high, standards shaky. Competition from Covent Garden and Drury Lane was damaging, for those theatres increasingly featured such popular English operas as Stephen Storace's *The Haunted Tower* and *The Siege of Belgrade* (fig.18) – better staged, easier to follow and well sung. The ineffectuality of the competition put up by the King's Theatre is only partly attributable to the innate unprofitability of full-fledged opera. Much of the problem must be imputed to the impresario system and the horrible financial snarls from which the King's Theatre was never able to extricate itself – a tangle that was to haunt the Italian opera in London for decades yet to come.

2. Concert life. The burgeoning of London's concert life around 1700, a development unparalleled elsewhere in Europe, resulted from a confluence of many different factors. With the end of the Commonwealth in 1660, music could be more openly promulgated as a legitimate

18. Title-page of Stephen Storace's 'The Siege of Belgrade' (London: Joseph Dale, 1791), showing Thomas Greenwood's design for Act 1 scene i in the original production at Drury Lane, 1 January 1791

leisure activity, whether an amusement of the idle rich or a learned pursuit of the connoisseur. Growing wealth and the expansion of mercantile interests contributed to the rise of an urban élite that was itself constantly changing and enlarging. There was, therefore, ready patronage for music in a leisured class of aristocratic and bourgeois enthusiasts, who yet lacked the means or inclination to maintain their own musical establishments (James Brydges, later the Duke of Chandos, was to prove a notable exception in the 1710s). London's musical life was untrammelled by restrictions, dominated neither by opera nor by the court; for while the Restoration of Charles II had initiated a rich and vibrant musical culture, the role of the monarchy as a patron soon waned. As royal finances lapsed into chaos, the court lost its central place in musical life – a decline accelerated by the Glorious Revolution – and court musicians were forced to supplement their income elsewhere. Musicians nurtured in the new urban milieu developed an alert sense of commercial potential, their emerging professionalism reflected in increasingly virtuoso technique and public projection of their art. Foreign violinists such as Nicola Matteis captured the imagination of London connoisseurs with their dazzling virtuosity and flights of fancy, transporting listeners with expressive powers to match the latest Italian singers. There was also a growing sense of the autonomy of instrumental music, especially orchestral music, around which programmes could be structured. At the same time, lively amateur music-making encouraged the foundation of numerous musical societies without a commercial interest – though often with professional strengthening, a blurring of boundaries characteristic of this early period. One such society, the Academy of Ancient Music, was even inspired by professional musicians themselves, altruistically dedicated to their particular cause. London's concert life therefore developed from a mixture of functions, motivations and patronage; and as these various factors jostled and coalesced, its structure remained extremely fluid until the later decades of the 18th century.

The birth of the public concert is usually equated with John Banister's initiative in 1672, but his concerts were clearly founded on some kind of indigenous tradition. Taverns produced a natural venue for music-making, especially during the Puritan closure of the theatres: according to Evelyn and Pepys, organs removed from churches during the Civil War were rebuilt in tavern music rooms, and many theatre musicians were forced to try their living here.

> Our music, which was held delectable and precious, that they who scorned to come to a tavern under twenty shillings salary for two hours, now wander with their instruments under their cloaks – I mean, such as have any – into all houses of good fellowship, saluting every room where there is company with 'Will you have any music, gentlemen?'

Little is known about the standards and social status of tavern performers, partly because the Commonwealth government classed freelance musicians as vagabonds, to preserve the privileges of musicians' guilds. Anthony Wood mentioned a music meeting in 1648 at the Black Horse, Aldersgate Street; Pepys, 17 years later, referred to 'the King's Head, the great musique-house' at Greenwich; and Ned Ward gave an entertaining account of a visit to the Mitre Tavern in Wapping:

> we had heard of a famous Amphibious House of Entertainment, compounded of one half *Tavern* and t'other *Musick-House* … we no sooner enter'd the House, but we heard *Fidlers* and *Hoitboys*, together with a Humdrum *Organ*, make such incomparable Musick … we were Usher'd into a most Stately Apartment, Dedicated purely to the Lovers of *Musick*, *Painting*, *Dancing*.

Ward made it clear that no charge was made for the music, but that patrons sometimes tipped the players. Other music houses were more convivial and depended on amateur music-making: Roger North recalled a tavern near St Paul's where 'some shopkeepers and foremen came weekly to sing in consort, and to hear, and injoy ale and tobacco; and after some time the audience grew strong'.

London's concerts therefore developed from East London roots, through a mixture of professional and amateur music-making. Indeed societies in the City continued to play a major part in London's musical life for many decades, providing a model for a quite different development: the rise of public concerts (promoted and performed by professional musicians), and their eventual acceptance as part of fashionable West End culture. For in essence the public concert was to carve a commercial niche that lay somewhere between bourgeois amateur societies and tavern concerts on the one hand, and the salons of the court and aristocracy on the other.

The year 1672 saw a milestone in the history of public concert promotion, with the first recorded example not only in London but also in Europe. John Banister, a disaffected court musician, brought the experience of court music to the indigenous tradition, advertising a series of daily public concerts in the *London Gazette* in December 1672. The venue – a room at a Whitefriars tavern, 'rounded with seats and small tables alehouse fashion' – was unprepossessing, and the atmosphere informal (a shilling each, 'call for what you please'). But by engaging top professionals he attracted such large audiences that he was soon able to move westwards to Lincoln's Inn Fields (where his ensemble numbered as many as 50) and finally in 1678 to Essex Buildings in the Strand.

Another concert initiative similarly moved westwards, transformed from an amateur club into a professional undertaking. Starting as a private diversion for a group of gentlemen, the club moved to the more formal surroundings of a tavern in Fleet Street; but when the taverner started to charge for entrance, the amateurs gradually fell away, to be replaced by professionals who spotted the commercial potential and eventually (*c*1689) transferred their meetings to a room in Villiers Street, York Buildings. This large and commodious hall, specially fitted out for music, quickly became London's first fashionable concert venue, 'for a long time the resort of all the idle and gay folk of the towne', according to Roger North; and the concert series there during the 1690s were attended by 'all the Quallity and *beau mond*'. Such was its success that a rival venue was built in nearby Charles Street (the Vendu), and at both venues enterprising musicians such as J.W. Franck and Gottfried Finger fully exploited the growing market with subscription series advertised in the daily press.

The concept of a weekly subscription series was more than a way of raising advance income, for the high prices also ensured social exclusivity: 'at *Consorts* of Note the Prices are extravagant, purposely to keep out inferiour People', as a journalist wrote in 1709. Similar factors underlay the benefit system, whereby well-placed musicians would promote their individual Consorts of Vocal

19. Concert at Montagu House: drawing (1736) by Marcellus Laroon (British Museum, London)

and Instrumental Musick: this was to become a routine end-of-season ritual for leading performers at subscription series and musical societies. The practice mingled the unashamed commercialism of expensive tickets and alluring advertisement with more traditional patronage, for the benefitee was expected to deliver tickets to his patrons in person. Another money-making exercise for court musicians was the annual performance of an ode in honour of St Cecilia, normally held on 22 November at Stationers' Hall. The first was perhaps that of 1683 (Purcell's *Welcome to all the pleasures*), and the tradition lasted for some 20 years; often the odes (as well as those performed at court) were repeated at the York Buildings room or elsewhere.

These well-publicized events were shadowed by an array of more private music-making, often including amateur performance. One series of weekly concerts, begun by Thomas Britton in 1678, achieved prestige and fame well beyond its apparent status. The venue, a 'bung hole' above his coal warehouse in Clerkenwell, was cramped and uncongenial, yet among those 'willing to take a hearty Sweat' were aristocratic patrons and celebrated musicians including Banister, Pepusch and possibly Handel. The concerts were more or less open to the public (admission at first was free); and despite the increasing formalization of London's concert life, they persisted until Britton's death in 1714. Other societies were purely for amateur instrumentalists. Roger North described one such musical society 'of gentlemen of good esteem ... that used to meet often for consort'; and at another, led by a ubiquitous amateur violinist named Henry Needler, Corelli's concerti grossi were first introduced to London, to such enthusiastic response that the musicians played them through at a single sitting.

By 1720, therefore, London had developed a lively concert life, but it was as yet relatively unstructured and certainly did not provide a secure basis for musicians' careers. Subsequent decades witnessed not only a quickening of pace but also regularization through the development of musical institutions and a concert season that ensured a measure of continuity from year to year. Several long-lived amateur music societies were founded in the 1720s, and the benevolent Society of Musicians in 1738; subscription series were formalized at Hickford's Room, and Handel developed his Lenten oratorio seasons during the 1730s; while music was also put on a new footing at the reconstructed pleasure gardens later in the decade. Concert programmes, as well, became more rationally

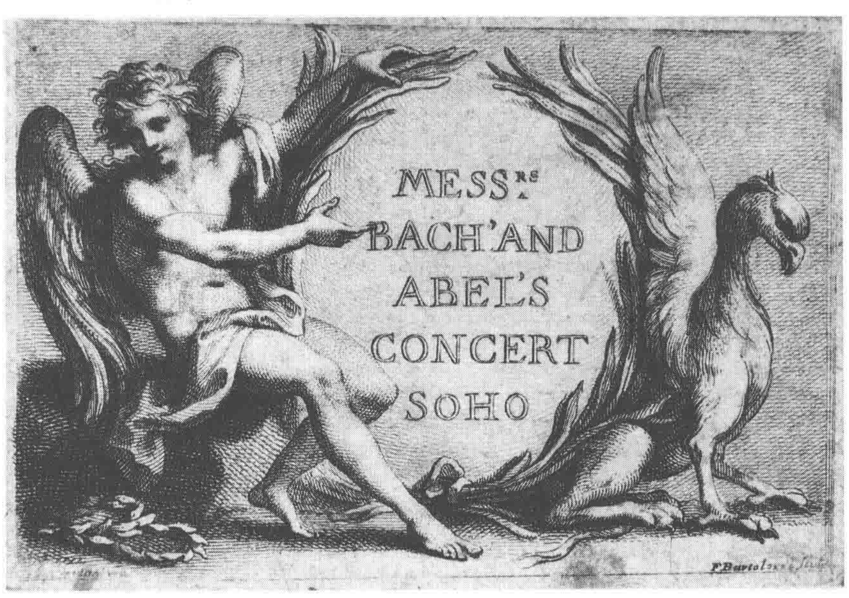
ordered. Whereas North had complained about the 'consorts, fuges, solos, lutes, Hautbois, trumpets, kettle-drums, and what Not, but all disjoynted and incoherent', gradually a regular two-part plan evolved in which half a dozen instrumental works – concertos, overtures, solos – alternated with songs and other vocal pieces.

Concert life coalesced, therefore, around two principal formats, still not entirely distinguishable: musical societies for the amusement of gentlemen amateurs, mostly based in or near the City; and public concerts (subscription series, benefits and oratorios), generally held at the theatres or at West End halls. Almost all of these events took place between October and May, advertised public concerts being mainly restricted to the spring months when 'the quality' came to London. As the pleasure gardens became more regularized, these too provided concerts of a good standard during the summer hiatus.

The most significant of the musical societies was initiated towards 1720 by Maurice Greene and an amateur violinist named Talbot Young. Its development followed a characteristic pattern. Originally meeting at Young's father's house in St Paul's Churchyard, and later at the nearby Queen's Head, in 1724 the society moved to the Castle Tavern: as the Castle Society it was to become formalized under a committee of amateur directors, with a published constitution. The performers were mainly gentlemen instrumentalists, who met regularly for rehearsals and concerts on a weekly rotation, the earnest tone enforced by strict rules and fines for talking or walking around during the concerts. But there were also 'auditor members' as well as lady guests, and as numbers increased the society moved to larger venues, including Haberdashers Hall, before its demise around 1775. Another important City society met in Cornhill at the Swan Tavern (later at the King's Arms), and both boasted leading professionals such as John Stanley among the performers.

Quite different in its agenda was the Academy of Ancient Music, founded as the Academy of Vocal Music in 1726 to revive the glories of 16th- and 17th-century sacred music and madrigals. Again, though, it was the music itself rather than profit that provided the inspiration, the founders a mix of leading professionals and aristocratic enthusiasts; and again the society was formalized and admitted larger audiences as the century progressed – although these changes brought their own problems, with an increasing partiality for later Baroque music (including Handel's oratorios), and a gradual decline in missionary zeal for the older repertory.

The Academy met at the Crown and Anchor in the Strand, and many other societies met at London taverns, which often contained substantial 'long rooms' for such purposes. Newspaper advertisements and subscription lists contain many references to these societies, which included the Apollo Academy founded by Greene on his secession from the Academy in 1731; and a significant masonic society directed by Geminiani at the Queen's Head from 1725 to 1727, the 'Philo-Musicae et Architecturae Societas'. On a lower level, clearly distinguished by Hawkins from such 'select meetings', were the 'alehouse clubs, and places of vulgar resort in the villages adjacent to London, [where] small proficients in harmony ... were used to recreate themselves', and where the price of admission was only sixpence.



At the other end of the spectrum, fashionable public concert life shifted to a new hall in the West End, Hickford's Room in James Street, which was rebuilt in 1714. Details of subscription concerts here are sparse, but they seem to have taken place on a regular basis at least from 1728, when L.C.A. Granom promised an ambitious series of concerts for 6 guineas; the series in 1731–2 was under the management of Geminiani. In 1739 Hickford removed to Brewer Street, and the series the following year featured oratorios and other works by J.C. Smith, a rare example of an extended concert promotion by an English musician. Concert series continued at Hickford's Room for many years, and it remained a popular venue for benefits, but the room lost its predominance after the death of the leader Festing in 1752.

Still more important than Hickford's, both artistically and for the future of British musical life, was the establishment of Handel's Lenten oratorio series. Originating in 1732 more by accident than by design, when the Bishop of London banned a staged performance of *Esther*, Handel's oratorios at first made an ad hoc contribution to London's calendar; but as his operatic career declined, oratorio came to dominate his activities, eventually settling in 1747 into a regular annual pattern of around a dozen performances at Covent Garden during Lent, on days traditionally forbidden to staged performance. Though not liturgical in intent (and presented in theatres), the powerfully dramatic Old Testament stories tapped into an emerging moralistic streak and sense of British nationhood. Furthermore, Handel succeeded in reaching a large and socially variegated audience at the playhouses, especially when he abandoned the high-priced subscription system in 1747 – a move that coincided with a belated rush of popular nationalism after the suppression of the 1745 uprising.

Handel also became directly involved with charitable causes. The link between concerts and charity was not as strong in London as in other cathedral cities, and the Sons of the Clergy charity, for example, promoted only an annual church service with elaborate music. But Handel's *Messiah* performances at the Foundling Hospital (see fig.4) in 1750 began an annual tradition that lasted until 1777 and was imitated by other institutions, notably the Lock Hospital. Handel was also a supporter and benefactor of the Society of Musicians, a benevolent fund for indigent musicians and their families, which began an annual series of benefit concerts in 1739.

The second half of the 18th century saw not only a proliferation of concerts in London, but also their propulsion to the centre of London's musical life, at times even rivalling the Opera in terms of both artistic and social prestige. There was an increasing demarcation between prestigious professional concerts and mere amateur societies, and the regularized season assumed a continuity and impression of permanence from year to year. The rise in the status of public concerts was focussed around two main pillars: 'modern' subscription series (dominated by foreign visitors such as J.C. Bach and Haydn) and appreciation for 'ancient' music, including the remarkable continuing vogue for Handel.

In the early 1750s Hickford's Room was eclipsed by a rival room in Dean Street, which hosted in 1751–2 London's most ambitious and publicly fêted subscription series to date. A series of 20 concerts was given under the artistic direction of Felice Giardini, a newly arrived virtuoso violinist and exponent of the modern pre-Classical style. Taking advantage of the temporary demise

20. Ticket for a Bach-Abel concert at Carlisle House, 1765

of the Italian Opera, and of the availability of top opera singers, this series initiated a brief period of intense concert activity until the Opera reopened late in 1753 (in that year there were as many as three subscription series at the Dean Street Room). Yet the renewed activity proved short-lived, and it was not until 1764 that the vital step towards a permanent concert structure was taken – and this from an unlikely source.

The essential catalyst was Teresa Cornelys, a former singer and self-proclaimed society hostess, who projected her lavish entertainments at Carlisle House (Soho Square) as *de rigueur* for London's high-society hedonists. Exclusivity was intrinsic to her plan, entrants being socially screened and including many of the highest nobility. Her subscription concerts featured the latest German symphonic music and Italian operatic arias, the combination that was to dominate London's premier concert programmes for over a century. In 1765 she engaged J.C. Bach and C.F. Abel, whose annual series up until 1781 formed the first regular subscription concerts in London (fig.20). After three seasons the composers themselves took over the management, transferring the concerts in 1775 to their new purpose-built Hanover Square Rooms. Yet social exclusivity remained a priority, not only through high-priced subscription tickets, but also by continued social screening; and advertising discreetly forbore to list programmes or even performers. By contrast with the silent ranks of the modern concert hall, the atmosphere was more that of an elegant drawing-room, with sofas around the sides and the freedom to walk around and converse during the performance. Concerts thus joined the Opera as an established part of the fashionable week – an élite, prestigious entertainment with expensive performers of international reputation and the best new instrumental music from abroad.

The Bach-Abel Concerts soon attracted rivalry, most notably from the Pantheon, Wyatt's splendid palace of pleasure in Oxford Street, where major series were first promoted in 1774. Focussing at first on Italian and English music, and later introducing symphonies of the Viennese school, these provided formidable competition for Bach and Abel, criticized for the somewhat unvarying programmes of their own music.

After Bach's death in 1782, the Hanover Square concerts were carried on by a variety of successors, notably the Professional Concert (1785–93). This cooperative venture succeeded both in attracting patronage from the highest levels of society and in filling the hall with musical enthusiasts captivated by the latest craze – the symphonies of Haydn, which dominated programmes from 1783 onwards. The success of the Professionals coincided with a period popularly characterized in the press as 'the rage for music', when concerts featured strongly in the frenetically paced London season.

Again there was strong competition from the Pantheon and from rival promoters such as Salomon and Madame Mara; and it was Salomon who finally toppled the Professionals, with his coup in bringing Haydn to London in 1791. Haydn's four seasons in London (1791–2 and 1794 at Salomon's concerts, 1795 at a new coalition named the Opera Concert) represent a high point in the musical life of the capital – not only for the works Haydn created, including the twelve last symphonies and six quartets for Salomon, but also for the intensity and vitality of these concert seasons (fig.21). This was also a period of great productivity and individuality in piano music – the 'London Pianoforte School' of Clementi, Cramer and Dussek, inspired by the technological advances of Broadwood's pianos – and of Viotti's distinctive contribution to the violin repertory. Another striking success was the Vocal Concert, founded in 1792 by Samuel Harrison and Charles Knyvett, who unprecedentedly attracted a *beau monde* audience for English songs and glees, essentially a sociable male after-dinner repertory.

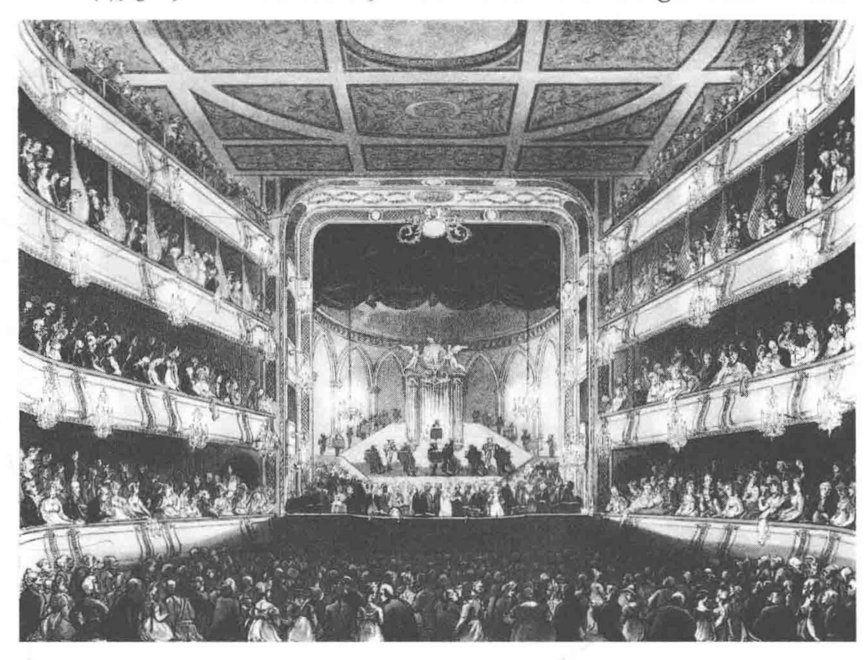
The prevailing fashion among cognoscenti for the latest modern music belies Britain's reputation for musical conservatism during this period. Yet London did also foster the preservation and active revivalism of earlier music, making an important contribution to the concept of an exemplary musical canon. The Academy of Ancient Music has already been mentioned in this connection, though with increasingly eclectic programming the society became more of a regular City subscription series before

its demise around 1796. More significant at this time was a new institution, the Concert of Ancient Music, which adopted some of the aspirations and organization of the old – the elevation of neglected masterworks, the reverence for learned music, the selection of programmes by an amateur director in rotation – yet maintained a quite different clientèle. Founded and directed by the upper ranks of society, it had an explicit artistic policy (a prohibition of music less than 20 years old) which deliberately linked traditional social values with the learning and understanding needed for the appreciation of old music – in outright opposition to the perceived ephemerality of frivolous modern music. Unusual and demanding works of the Renaissance and earlier Baroque were sought out, in a pioneering spirit that recalls the early days of the Academy; but a preference for Handel in some quarters came to overlay the repertory, and even during the 18th century programming began to fossilize around increasingly hackneyed Handel selections.

This connection was secured still further by the involvement of the directors (in collaboration with the Society of Musicians) in the Handel Commemoration of 1784 (*see* ICONOGRAPHY OF MUSIC, fig.11) – a pivotal event in London's musical life, which celebrated Handel's supposed centenary through an elaborate festival at Westminster Abbey and the Pantheon. With forces unprecedented at the time – a total of 525 in the choir and orchestra – this massive celebration, attended by the entire royal family, took on the ceremonial role of a coronation and played an important part in redefining the role of King George III after a period of political unrest. Further festivals followed in subsequent years (Haydn attended the last in 1791), with the active support of the King; in 1785 he also began to attend the Concert of Ancient Music, which accordingly gained a high social profile as a court institution.

The Handel festivals also brought reviving succour to the Lenten oratorio series (fig.22), which had, perhaps surprisingly, survived the composer's death in 1759. His followers and their rivals – Stanley, Smith, Arne, Arnold, Linley – no doubt hoped to emulate Handel's success in their own works; but commercial prosperity proved dependent on continued performances of Handel, and his most popular works at that. One way to capitalize further was to paste favourite numbers from Handel oratorios on to new librettos; and after the Commemoration publicly validated concert selections, the 'Lenten oratorios' became further divorced from complete works (*Messiah* always excepted). Favourite songs by other composers, even secular showpieces by Arne, found their way into the programmes; and John Ashley's selections at Covent Garden were essentially popular concerts for commercial gain (though he was also responsible for introducing *The Creation* to London in 1800).

HANOVER-SQUARE.
MR. SALOMON moſt reſpectfully acquaints the Nobility and Gentry, that his
FIRST SUBSCRIPTION CONCERT
Will be on Friday the 11th of February, and continue every ſucceeding Friday.
Mr. HAYDN
Will preſide at the Harpſichord, and will compoſe for every Night a new Piece of Muſic.
The Principal Vocal Performers already engaged are:
Signor DAVID—and Signora CAPPELDETTI,
The Miſs ABRAMS,
And Signora STORACE.
Principal Inſtrumental Performers:
First Violin, Mr. Salomon | German Flute, Mr. Graeff
Violoncello, Mr. Breval | Clarionet, Mr. Ely
Piano Forte, Mr. Duſſeck | Baſſoon, Mr. Holmes,
Oboe, Mr. Harrington | AND
Pedal Harp, Madam KRUMPHOLTZ;
Beſides other diſtinguiſhed Singers and Inſtrumental Performers who will be occaſionally produced in the courſe of the ſeaſon.
Subſcriptions at Five Guineas for the Twelve Nights, are received at Meſſrs. Lockharts, Bankers, No. 36, Pall Mall.
*** Tickets transferable, Ladies' to Ladies, and Gentlemens' to Gentlemen.



21. Advertisement in 'The Times' (26 January 1791) for Salomon's concert series at the Hanover Square Rooms, commencing 11 February; after various delays the series, in which Haydn made his first London appearances, opened on 11 March

Superficially London's lively concert life in the late 18th century suggests a modern concert structure, but it would be misleading to interpret this 'commercialization of leisure' as middle-class emulation of aristocratic amusement. On the contrary, public concert life was strongly influenced by discerning and influential patrons such as the Prince of Wales, while the City remained suspicious of the affected pleasures of the West End, preferring sober and frugal organizations like the Castle Society. It was regarded as worthy of comment during the 1780s that the 'rage for music' was spreading eastwards to the City, and in truth the top professionals rarely ventured here: it is significant that concerts at the Anacreontic Society (an aristocratic glee club) were used as a trial ground for new music and performers, while the transformed Academy of Ancient Music overreached itself and did not survive into the new century.

Furthermore, much of London's concert activity carried on relatively unnoticed in the houses of the aristocracy and royalty, from small-scale soirées featuring the finest performers of the day to the elaborate ode in Buckingham House gardens with which Queen Charlotte surprised George III in 1763. During the 1780s there was even a vogue for large-scale private concerts, partly a reflection of the current enthusiasm for the concert *per se* but also a reaction against the discomforts and increasingly mixed company of public venues. Indeed, two private series, the Nobility Concert and the Ladies Concert, actually mirrored the programmes and performers of the public concert, but now rotating around the houses of the wealthy élite (the latter even took place on the same evening as the Salomon-Haydn series during 1791).

On the one hand, therefore, the development of public concerts in London was closely allied to emerging commercial values, resembling other aspects of the music business such as publishing and instrument dealing, with which activities public concert promotion was indeed closely connected. Yet at the same time it remained highly dependent on personal contacts and patrons, as part of an interlocking web which included both private concerts and family teaching. For an individual professional musician, public concerts were merely one cog in a complex set of interrelated business activities, and we should not assume that it was the ambition of every instrumentalist to appear on the concert platform (witness the reluctance of Geminiani to appear on the public stage).

Though on the surface flourishing and energetic, London's concert life was open to several criticisms: its apparently indiscriminate encouragement of foreign musicians; its submission to commercial pressures and

22. Performance of an oratorio at the Theatre Royal, Covent Garden: coloured aquatint after A.C. Pugin and Thomas Rowlandson from 'The Microcosm of London' (London: Ackermann, 1808–10)

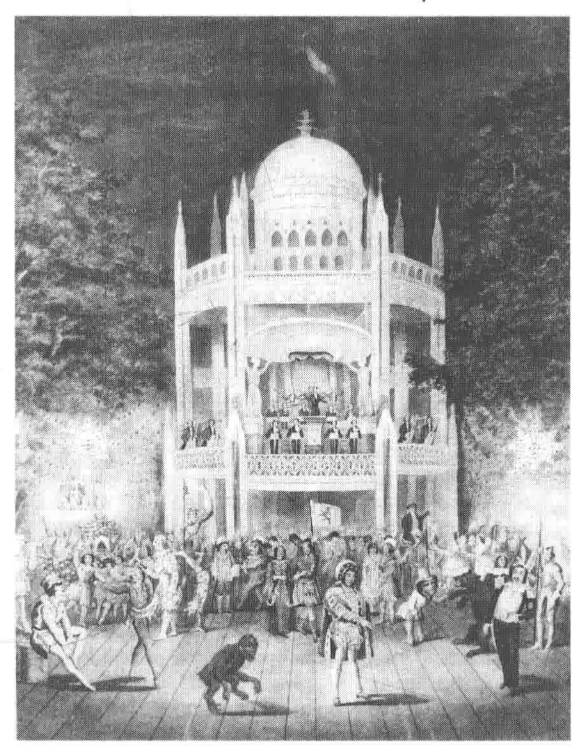
attendant ephemerality (which in turn resulted in the ancient–modern schism); and its indifference towards the British school of composition. During the first half of the century programmes had mixed British and foreign music, but increasingly programmes at the more prestigious concerts concentrated on Austro-German symphonies and Italian opera extracts, with British composers relegated to lesser venues and pleasure gardens (and occasionally the Lenten oratorios). In defence it may be argued that this parochial view downplays London's patronage of resident foreign composers – from Handel and Geminiani, through J.C. Bach and Abel, to Clementi and Dussek. Nevertheless, it is inescapable that during the 1780s and 90s London concert programmes were dominated by two colossi largely *in absentia* – Handel and Haydn – and that little of lasting consequence was being produced by native composers, their main artistic contribution limited to the glee, which was optimistically elevated to a national art form.

After Haydn's departure in 1795, London's concert life lost some of its vitality, with a decline in the number of concerts, institutional cutbacks and (to judge from press coverage) diminishing public interest. In part this reflected political and economic pressures and a reaction against ostentatious luxury; but there was also some sense of exhaustion after the 'rage for music', which had translated concerts into the centre of London's social life and unprecedentedly elevated two concert composers into national icons.

3. Pleasure gardens. London's parks and gardens have been open to the public at least since Stuart times. Hyde Park was perhaps the earliest example of this, access being granted by Charles I in 1635. Later in the century emerged the organized 'pleasure gardens' which levied a small entrance fee and supplied refreshments, music and other forms of entertainment. Marylebone (*c*1659–1778) and Vauxhall (1661–1859) originated respectively in a popular tavern and a Thames-side country house; others, like Lambeth Wells (*c*1697–*c*1829) and Sadler's Wells (1684–*c*1879), began their lives as supposedly medicinal springs.

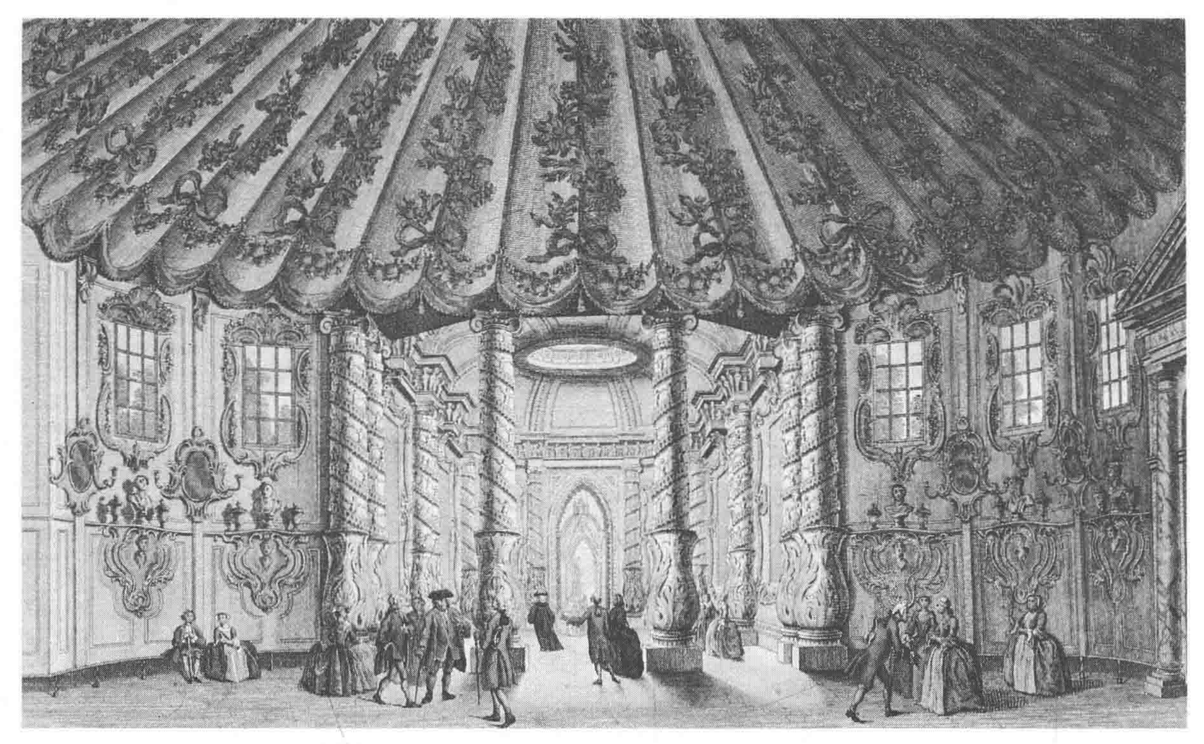
The gardens enjoyed their heyday in the 18th century, especially after both Vauxhall and Marylebone were refurbished by new owners during the 1730s; while Ranelagh, more illustrious than either, was entirely a Georgian creation. Yet their tradition was to persist well into the next century, with Cremorne Gardens (Ranelagh's natural successor in Chelsea) and the Eagle Tavern among those most frequented by the Victorians. Of the 631 recorded, the following gardens are known to have provided musical entertainment:

Adam and Eve Tea Gardens, Tottenham Court Road (*c*1718–before 1811)
Albert Saloon, Shepherdess Walk, City Road (before 1838–*c*1857)
Apollo Gardens, Westminster Bridge Road (1788–93)
Bagnigge Wells, King's Cross Road (1759–1841)
Balty's Hippodrome, Kensington (1851–2)
Belvidere Tea Gardens, Pentonville Road (*c*1664–1876)
Bermondsey Spa (1770–1804)
Brunswick Gardens, Vauxhall (1836–45)
Cremorne Gardens, Chelsea (1836–78)
Cromwell's Gardens, Brompton (*c*1762–97)
Cuper's Gardens, Lambeth (1691–1752)
Eagle Tavern, City Road (*c*1822–82)
Finch's Grotto Gardens, Southwark (1760–*c*1777)
Flora Gardens, Camberwell (*c*1849–57)
Flora Tea Gardens, Westminster Bridge Road (*c*1796–before 1800)
Islington Spa (1784–*c*1840)
Lambeth Wells (*c*1697–*c*1829)
Lord Cobham's Head, Cold Bath Fields (1728–*c*1744)
London Spa, at the corner of Rosomon Street and Exmouth Street (*c*1685–1754)
Manor House Baths and Gardens, Chelsea (1838–41)
Marble Hall, Vauxhall (1740–1813)
Marylebone Gardens (*c*1659–1778)
Mulberry Garden, Clerkenwell (1742–52)
New Globe Pleasure-Grounds, Mile End Road (*c*1827 – after 1854)
New Wells, near London Spa (*c*1737–50)
Panharmonion Gardens, King's Cross (1829–97)
Pantheon, Spa Fields (not to be confused with the more famous Pantheon in Oxford Street) (1770–76)
Ranelagh Gardens, Chelsea (1742–1803)
Rosemary Branch, Hoxton (*c*1830–53)
Sadler's Wells, Clerkenwell (1684–*c*1879)



23. 'Ranelagh: Interior of the Rotunda' by Canaletto, 1754 (National Gallery, London)

St Helena's Gardens, Rotherhithe (1770–1881)
Sir John Oldcastle Tavern, Faringdon Road (*c*1744–6)
Surrey Zoological Gardens, between Kennington Road and Walworth Road (1831–77)
Temple of Flora, Westminster Bridge Road (1789–96)Vauxhall Gardens, Lambeth (1661–1859)Weston's Retreat, Kentish Town (*c*1858–65)
White Conduit House, Penton Street (*c*1745–1849)
Yorkshire Stingo, Marylebone Road (*c*1770–1848)



The style of the various pleasure gardens varied considerably. Vauxhall became the quintessential 18th-century venue after its refurbishment by Jonathan Tyers in 1732: an idealized rural paradise on the edge of London, it brought together a wide cross-section of London society in the summer season (indeed it was one of the few places in London where one might rub shoulders with the likes of Dr Johnson or the Duchess of Devonshire). The gentility of those promenading around the bandstand, or taking cold suppers in alcoves decorated by Francis Hayman and Hogarth, contrasted with the shadier reputation of the 'dark walks' and last-night rowdyism. Ranelagh was higher-priced and altogether more genteel: essentially an indoor venue, the enormous rotunda (1742) contained an amphitheatre of supper-boxes and a huge central stove around which the visitors perambulated in sober succession (fig.23).

Marylebone, a dangerous journey across the fields, never quite came into fashion, but a series of enterprising managers (including Thomas Lowe and Samuel Arnold) devoted consequent energy to the musical entertainments. Many other gardens and spas dotted around the periphery of the city had their Long Rooms, where a particular attraction was organ music on Sundays when families visited them in large numbers.

Characteristic evenings were described by many contemporary diarists (Pepys), essayists (Addison) as well as novelists (Fanny Burney, Smollett, Thackeray) and depicted by artists, notably Canaletto, Samuel Wale and Rowlandson. Concerts became an established part of the entertainments in the late 17th century. At first the

24. The 'Moorish-Gothick' Orchestra at Vauxhall Gardens: watercolour (c1840) by an unknown artist (private collection)

25. Rococo music room at Vauxhall Gardens: coloured etching by H. Roberts after Samuel Wade, 1752

outdoor bandstands (or 'orchestras') were simple pavilions, and the audience listened from the promenade and supper boxes: the 'Moorish-Gothick' temple at Vauxhall (1758) was a particularly elaborate example (fig.24). Later, buildings provided protection for listeners as well as performers, not only the Ranelagh rotunda but also, less grandly, Vauxhall's rococo music room aptly called the 'Umbrella' (1752; fig.25).

Programmes were sometimes advertised, but the most comprehensive information is provided by the 'Vauxhall Lists' for 1790–93 (see Cudworth, 1967, and McGairl, 1986). The general pattern – some 12 to 20 items distributed between two acts – was common to all the gardens. The vocal items ranged from solo songs through duets, glees and choruses to vaudeville and small-scale operas; the instrumental works are mainly overtures, symphonies and concertos. All tastes were catered for, with no division between the 'ancient' style (Corelli, Handel) and the 'modern' (J.C. Bach, Haydn), between serious and popular, or sacred and secular. Many of the composers and performers were English; in fact the pleasure garden was one of the chief institutions in 18th-century England where native music was fostered. Some gardens had accredited composers. In 1745 Jonathan Tyers, the founder of Georgian Vauxhall, secured the services of Thomas Arne (and thus of many of his family and pupils); after him James Hook officiated until 1820, and Henry R. Bishop directed in the 1820s and 30s.

Though at first the gardens offered only instrumental music, it was through songs and extended vocal pieces composed between the 1730s and 1830s that the gardens made their most important contribution to English music (fig.26). The surviving repertory is extensive: for instance, four of the Vauxhall composers – Arne, John Worgan, Hook and Bishop – produced between 1745 and 1834 no fewer than 33 collections of songs in manuscript or print. The solo songs were generally in the simple ballad form evolved in the late 17th century, which was later heightened with dramatic devices derived from the Italian

VAUXHALL GARDENS.
THIS EVENING, Friday, the 11th of Auguſt, will be performed
A Concert of Vocal and Inſtrumental Muſick.
Act I.
Occaſional Overture—Handel.
Song, Mr. INCLEDON.
Symphony—Bach.
Song, Miſs LEARY.
Overture with the Chacome—Jomelli.
Song, Mrs. WRIGHTEN.
Grand Symphony—Haydn.
Song, Mrs. MARTYR.
Organ Concerto.—Mr. Hook.
Song, Miſs BARNETT.
GLEE——"When Sapho tuned the Lyre."
CATCH——"Who was it ſat under the Mulberry ſhade."
Act II.
Song, Mr. INCLEDON.
Concerto Oboe.—Mr. Parke.
Song, Miſs LEARY.
Grand Finale.
Doors to be open at half paſt Six o'Clock.
The CONCERT to begin at Half paſt Seven.
Admittance ONE SHILLING as uſual.
To-morrow evening, in honor of the Prince of Wales's birth-day, the Temple and Temple Walks will be elegantly illuminated; alſo ſeveral Tranſparencies will be put up for that evening. A new occaſional chorus Song, compoſed by Mr. Hook, will be ſung by Mr. Incledon.

26. Advertisement for a concert to be given at Vauxhall Gardens on 11 August 1786

27. 'Concert at Vauxhall Gardens' by Thomas Rowlandson; pen and watercolour over pencil, 1784 (Victoria and Albert Museum, London); Mrs Weischel sings from the 'Moorish-Gothick' Orchestra, while Dr Johnson, Boswell and possibly Mrs Thrale eat in the supper box below

opera. Sometimes the texts were by contemporary writers such as John Lockman in the 18th century or Edward Fitzball in the 19th; others were by earlier authors such as Shakespeare in the case of Arne, or Herrick in the case of Horn's *Cherry Ripe*. Some texts reflect the surroundings (elegant pastorals or artificial rusticities, hunting and drinking songs), some are national (imitation Scots or Irish), some reflect contemporary taste (Gothic morbidity and medievalism), others indicate topical interests (Hook's *The Rights of Women*, 1801, and Bishop's heroic recitative and aria *The Emancipation from Negro Slavery*, 1834); and many are patriotic, especially in time of war.

More ambitious were cantatas based on the Italian model (but sometimes including strophic songs); and dialogues for soprano and tenor, directly descended from the 17th-century prototype and almost invariably on rustic or pastoral topics. Larger concerted pieces brought together all the soloists to conclude an act; and after 1750 these were sometimes specially written, such as Hook's Vauxhall finales or Bishop's cantata *Waterloo* for a 'Magnificent Military Fete' (1826). Opera at the gardens began in 1730, when *The Prisoner's Opera* formed part of a variety programme at Sadler's Wells; and during the 1770s cockney dialogues by Dibdin were a popular attraction here (he also wrote short operas for Ranelagh). At Marylebone a small theatre was built for performances of Italian operas or 'burlettas': the elder Storace put on an English version of Pergolesi's *La serva padrona* in 1758, and Arnold promoted an ambitious programme of light operas by Barthélemon and others in the early 1770s. Vauxhall introduced pastiches in the 1820s, but was staging Rossini by the end of the decade, and Bishop's own five operas for Vauxhall (1830–32) owe not a little to that composer.

Most of the popular London playhouse singers appeared at the gardens, and some became sufficiently associated to be identified in title pages, such as J.C. Bach's *Second Collection of Favourite Songs Sung at Vaux Hall by Mrs Pinto & Mrs Weichsell*. The vocal music of the gardens is a valuable source of information about orchestral accompaniment of English song (particularly for the later 18th century, where there is little evidence from theatre music), since much survives in full score, both in manuscript and in print, or in reduced score with instrumental cues.

Less of the purely instrumental music performed at the gardens was written specially for them, being mainly drawn from current repertory: overtures and concertos by Handel and his Italian contemporaries, symphonies from the Mannheim and Austrian schools (including Haydn), theatre overtures by English composers such as Arne, Arnold and Fisher. The one distinctive instrumental genre was the organ concerto. Organs were installed as the gardens expanded (Vauxhall 1737, shown in fig.27; Ranelagh 1746), at the same time as they were becoming popular between the acts of oratorio performances: their carrying power and ability to stay in tune made them the most practical keyboard instruments for outdoor performance. The organist was an important figure, playing continuo and often acting as offical composer and musical director. At Vauxhall the first organist was probably Thomas Gladwin, succeeded by James Worgan and in 1751 by John Worgan, who according to Burney performed 'every evening' one of Handel's concertos prefaced by 'an extempore prelude, *alla Palestrina*' and a fugue by

Handel. The only noted garden composers whose organ concertos survive are Arne and Hook, who is said to have played one of his own concertos every night that Vauxhall opened from 1774 to 1820.

Much other instrumental music was provided outside the main concert by wind bands or smaller peripatetic groups hired for supper serenades, especially from the 1760s onwards. The most famous band performance was one of the earliest, the public rehearsal of Handel's *Music for the Royal Fireworks* at Vauxhall (21 April 1749); and Handel's music was again used for fireworks displays at Ranelagh from 1767 onwards. During the late 18th century military music became increasingly popular, particularly during the wars with France: from 1790 to 1816 Vauxhall had the services of the military band formed by the Duke of York for his regiment, the Coldstream Guards. In 1800, on the occasion of 'a most superb Oriental Gala' celebrating recent successes in India, the band performed 'in a most Magnificent Triumphal Car ... several favourite Hindostan Airs'.

The decline of the pleasure gardens began in the later 18th century, as musical taste began to change and the sites were gradually swallowed up in housing and industrial development. Vauxhall tried to adapt with a more populist programme of displays, but after many years of financial difficulty it succumbed in 1859; Marylebone had closed as early as 1778, and Ranelagh followed suite in 1803. Some new gardens did, however, open in the 19th century, such as Cremorne and the Eagle Tavern. Their music followed traditional lines, with concerts (mainly of dance music) and operatic performances: the Eagle staged *Don Giovanni*, *Il barbiere di Siviglia* and *La sonnambula* in the 1840s; and Cremorne in the 1870s presented works by Boieldieu, Auber and Offenbach. But there was also such up-to-date fare as *Villikins and his Dinah*, *Pop goes the weasel* and other Cockney ballads, as well as the 'Nigger melodists', which appropriately link the story of the later pleasure gardens with that of another Victorian institution, the MUSIC HALL.

For further information on institutions and venues, see *Grove6*

VI. Musical life, 1800–1945

1. The stage: (i) Opera (ii) Popular music theatre. 2. Concert life: (i) 1800–1850 (ii) 1850–1900 (iii) 1900–1945.

1. The stage.

(i) Opera. The financial and managerial entanglements that had afflicted the King's Theatre during much of the 18th century continued seriously to hamper London's Italian opera house well into the 19th century. William Taylor was forced to sell part of his interest in the King's to Francis Gould in 1803–4, but after Gould's death in 1807 Taylor and Edmund Waters, Gould's executor, fought so viciously for control that they virtually paralysed the theatre. The King's was dark in 1813 while the rebuilt Pantheon tried to regain the Italian opera. Waters eventually bought and sued his way into control of the King's but went irretrievably bankrupt in 1820. Management was then assumed by John Ebers, whose artistically creditable but financially disastrous reign is chronicled in detail in his *Seven Years of the King's Theatre* (1828/*R*).

During this period the King's became ever more reliant on the staging of imported works. The presence of Lorenzo Da Ponte, house poet at the theatre from 1794 to 1804, promised much; but while he wrote a few original librettos for Martín y Soler, Bianchi and Winter, most of his work was focussed on the production of substitute arias and pasticcios. Adaptations of successful foreign operas increasingly came to dominate the Italian stage in London. To the operas of Paisiello, Cimarosa and M.A. Portugal were added Mozart and Rossini: *La clemenza di Tito*, *Così fan tutte*, *Die Zauberflöte*, *Le nozze di Figaro*, *Don Giovanni*, *Il barbiere di Siviglia*, *Elisabetta, regina d'Inghilterra*, *L'italiana in Algeri*, *La Cenerentola* and *Tancredi*. Leading singers continued to appear, including Banti, Michael Kelly, Josephina Grassini, Giuseppe Naldi, Angelica Catalani, Nicholas Levasseur, Giuditta Pasta, Giuseppe Ambrogetti, Carlo Angrisani, Violante Camporese and Gaetano Crivelli. Even under Ebers's solid management, however, no

important new operas were commissioned as the production of imported foreign operas took precedence. The emphasis was on Rossini – *La gazza ladra* was a successful novelty in 1821 – although in 1815 Ebers's director, William Ayrton, mounted the first Meyerbeer opera to be heard in London, *Il crociato in Egitto*. Among the singers in this period were Marietta Brambilla, Giuseppe de Begnis, Giuditta Pasta, Malibran and the castrato G.B. Velluti.

Throughout these three decades the Italian opera was hamstrung by its own endless internecine disputes and crippling mortgages: the wonder is that it kept going at all. Until the mid-1820s English-language opera was generally in a stronger financial position, though the competitors of the King's had their own troubles. Within the space of one year both Covent Garden and Drury Lane burnt down (in 1808 and 1809 respectively) and were replaced at enormous cost. Robert Smirke's vast 1809 Covent Garden cost £188,000 and turned out to be a white elephant.

Both the patent theatres continued to feature music in their offerings that included newly commissioned English operas and, ever increasingly, English adaptations of foreign operas. Their approach is typified in the work of Henry R. Bishop, who was musical director of Covent Garden between 1810 and 1824 and later worked at Drury Lane. His wholesale rewritings of Mozart and Rossini have made him the target of much derision in later histories of music, but they were highly successful at the time (fig.28). Bishop's work was guided by the conventions embodied in the pasticcio and contemporary English opera, as well as the need to adjust these works to local performance conditions. He popularized good music, and for his achievement Bishop was knighted by Queen Victoria in 1842 – the first English musician to be so honoured.

Technically the Licensing Act remained in force, but after 1800 the authorities became more lenient about tolerating various fringe and musical enterprises. Of the dozen or so new theatres that were built during the first three decades of the 19th century, many presented programmes which placed them in direct competition with Covent Garden and Drury Lane. Two theatres are particularly important. The Lyceum was licensed for musical works in 1809 and rebuilt in 1816 as the English Opera House, a function it served until it burnt down in 1830 (rebuilt again in 1834). The Royal Coburg (which was to become the Old Vic) opened in 1818; it served primarily as a venue for melodrama.

The early history of *Der Freischütz* in London shows how the theatres competed. In February 1824 a version of it was given at the Coburg as the 'legendary melodrama' *The Fatal Marksman*, without mention of Weber in the playbill. The Lyceum mounted it in July as an opera, translated as *Der Freischütz, or The Seventh Bullet*, the music adapted by William Hawes. In August and September it was given in different forms at the Royal Amphitheatre and the Surrey Theatre. Covent Garden mounted it in October in an adaptation by J.R. Planché with the music arranged by Barham Livius; Drury Lane's version, with additional music by Bishop, was presented in November. The popularity of all the adaptations led to Charles Kemble's invitation to Weber to compose an English opera for Covent Garden. Weber was too ill to accept Kemble's additional offer to become music director,

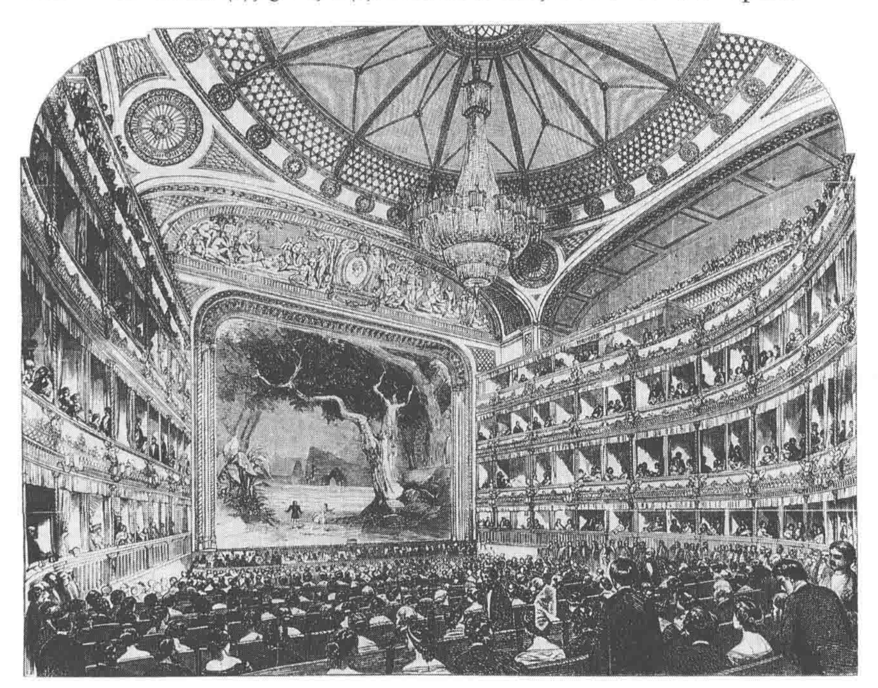
Never Acted.

THEATRE ROYAL, COVENT-GARDEN
This present SATURDAY, March 6, 1819,
Will be acted a Comick Opera, (in three acts) called The

Marriage of Figaro

[Founded on BEAUMARCHAIS's Comedy '*La Folle Journée*,' & on '*the Follies of a Day*.']
The OVERTURE *and* MUSICK *selected chiefly from* MOZART'S *Operas.*
The new Musick composed, & the whole arranged & adapted to the English Stage, by *Mr. BISHOP*
The Scenery painted by Mess. Phillips, Whitmore, Pugh, Grieve and Sons.
The Dresses by Mr. Palmer and Miss Egan.
Count Almaviva by Mr. JONES,
Fiorello by Mr. DURUSET,
Figaro by Mr. LISTON,
Antonio *(the Gardener)* by Mr. FAWCETT,
Basil, Mr. J. ISAACS, Sebastian, Mr. COMER,
Cherubino *(the Page)* Miss BEAUMONT,
Countess Almaviva by Mrs. DICKONS,
Susanna by Miss STEPHENS,
Barbarina, Mrs. LISTON, Marcellina, Mrs. STERLING,
In act III.
A SPANISH FESTIVAL,
In which will be introduced
A PAS DE DEUX by Mr. NOBLE, and Miss LUPPINO,
The Villagers by
Mesdames Chipp, Louis, Mori, Newton, Robinson, Twamley, Vedy, Wells.
Mess. Collet, Goodwin, Gouriet, Grant, Heath, Louis, Platt, Vedy
The Dances composed by Mr. NOBLE.
The CHORUSES by
Mess. Crumpton, Everard, George, Guichard, Healy, Lee, Montague, Norris, G. Pyne, I. S. & C. Tett, Watson, Williams
Mesds. Appleton, Baggs, Bologna, Chipp, Coates, Corri, Green, Grimaldi, Healy, Herbert, Hibbert, Iliff, Norman, Parrin, Port, Sexton, Shaw, Smith, Tokely, Watts, Whitmore, Wood.
After which, the Farce of

BON TON.



Lord Minikin by Mr. JONES,
Sir John Trotley Mr. W. FARREN,
Col. Tivy, Mr. ABBOTT, Jessamy, Mr. FARLEY,
Davy, Mr. EMERY, Mignon, Mr. MENAGE
Lady Minikin by Mrs. GIBBS,
Miss Tittup, Miss BRUNTON, Gymp, Miss GREEN.
☞ *NOT AN ORDER can be admitted.*
A Private Box may be had for the Season, or nightly, of Mr. Brandon at the Box-office
VIVAT REX.

28. Playbill advertising a performance of Henry Bishop's arrangement of Mozart's 'Marriage of Figaro' at the Theatre Royal, Covent Garden, on 6 March 1819

although he wrote *Oberon* and conducted the première; he was frustrated by the demands of 'English' form, but still gave London its first important opera première in a very long time.

There is no precise dividing line between 18th- and 19th-century opera production in London, but by the end of the Ebers administration at the King's Theatre quite different circumstances prevailed from those at the turn of the century. Despite the importation of Mozart and Rossini by the Italian opera company, activity at the King's remained in many respects extremely old-fashioned and indeed derivative. New venues sprang up, and the English theatres were aggressive in mounting current continental works as well as offering their own home-grown brand of opera. Yet as the King's seemed unable to mount any potent opposition or to resolve its ongoing financial crisis, the patent theatres, too, were hamstrung by their own financial liabilities and increasingly unable to withstand the greatly intensified competitive climate.

During the 1830s competition from the so-called minor theatres caused grave financial problems for the patent theatres, both of which were still encumbered by the rebuilding costs incurred at the beginning of the century. Frequent management changes, bankruptcies and accusations of poor artistic standards inevitably raised questions about their financial and artistic viability. Alfred Bunn's attempt to unite the two theatres under his management between 1833 and 1835 was financially

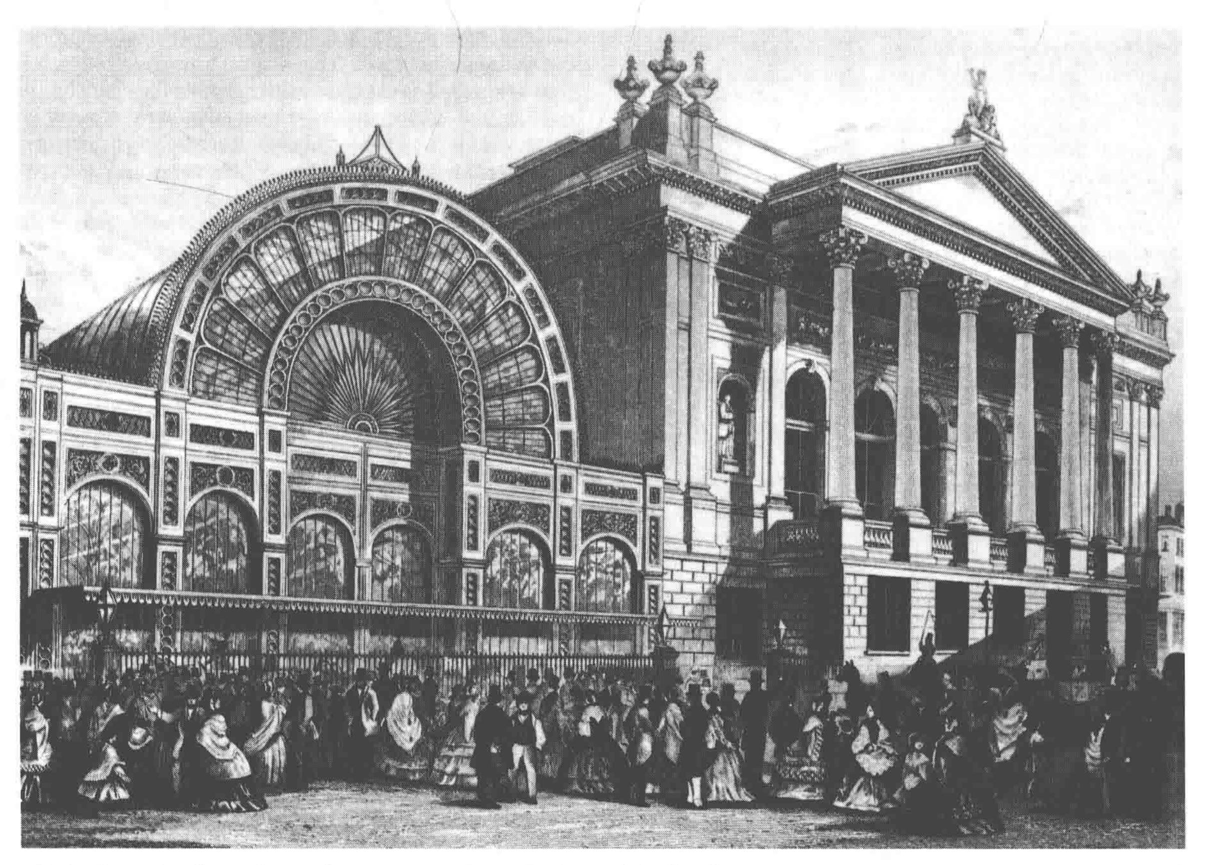
disastrous and earned Bunn stinging criticism over his apparent preference for foreign opera. His production of Auber's *Gustave III* (1833), one of several French operas to be staged at Covent Garden during his tenure, received 100 performances during its first season. At Drury Lane Bunn presented Malibran in English versions of *Fidelio* and *La sonnambula* and later in Balfe's *The Maid of Artois* (1836); between 1835 and 1849 Bunn gave more than 20 new British works at Drury Lane, including Balfe's *The Bohemian Girl* (1843) and Vincent Wallace's *Maritana* (1845). For a time the rebuilt Lyceum Theatre (opened in 1834 as the English Opera House) was a potent competitor: works by Loder, Balfe and others were given up to 1840.

The 1843 Theatre Regulation Act, which provided new legislation for the licensing of all theatres, in effect abolished the patent theatres' monopoly over dramatic and musical presentations. In 1845 Covent Garden was forced to close as no permanent lessee could be found; over the next two years the theatre hosted, among others, touring foreign opera companies and concerts. Drury Lane continued to be used for English opera, concerts, plays and other theatrical ventures.

Amid the familiar financial difficulties at Her Majesty's (known as the King's Theatre until Queen Victoria's accession in 1837) disagreements between Benjamin Lumley, manager from 1842 to 1858, and his principal artists, together with the demise of Covent Garden, brought about a drastic change in London's theatrical landscape. In 1847 the composer Giuseppe Persiani and another business associate established the rival Royal Italian Opera at Covent Garden. Almost instantly, however, the new venture was plunged into deep trouble: high start-up costs and the conversion of the theatre into an opera house (costing about £30,000) were inadequately financed; fierce competition with Her Majesty's left the company still further weakened. It was only under the management of Frederick Gye (1848–78) that the Royal Italian Opera eventually supplanted Her Majesty's as London's premier Italian opera house. Gye never made any significant profits (his early seasons showed substantial losses), but his financial acumen ensured the company's long-term viability. At Her Majesty's heavy losses led to the closure of the theatre between 1853 and 1856; Lumley reopened the theatre for two seasons while Covent Garden was rebuilt after having been destroyed by fire in 1856 (figs.29 and 30). Financially, J.H. Mapleson, who took over at Her Majesty's in 1862, was hardly more successful and after the destruction of Her Majesty's by fire in 1867 he joined forces with Gye until 1870. On Gye's death in 1878 the management of the Royal Italian Opera passed to his son Ernest until 1884.



Under the pressures of competition the managers of both opera houses were forced to diversify the repertory beyond the presentation of the standard works of Rossini, Bellini and Donizetti. In an extension of 18th-century production procedures all operas, including French and German works, were performed in Italian and many were adapted to conform with italianate musical and dramatic structures. Her Majesty's continued to feature ballet as part of its programme, but at the Royal Italian Opera financial constraints resulted in the abandonment of full-length ballets in 1849. At the Royal Italian Opera Gye regularly presented French and German works, as well as Verdi's operas. All of Meyerbeer's most recent operas were staged, notably *L'étoile du nord* (1855) and *Dinorah* (1859), both produced under Meyerbeer's supervision. *Benvenuto Cellini* had a single, disastrous performance in 1853 (conducted by Berlioz); Gounod's *Faust* became a staple repertory work (1863; British première at Her Majesty's that same year). Spohr reworked his *Faust* (1851) and returned for *Jessonda* in 1852. Following the closure of Her Majesty's in 1853, Gye acquired Verdi's more recent operas, including *Rigoletto* (1853), *Il trovatore* (1855) and later *Don Carlos* (1867) and *Aida* (1876). The programming of Wagner's operas owed much to the influence of Emma Albani, who was cast in *Lohengrin* (1875), *Tannhäuser* (1876) and *Der fliegende Holländer*

(1877, first staged at Drury Lane in 1870). Competition with Her Majesty's over novelties was fierce: rival productions and disputes over performance rights were commonplace. Lumley distinguished his theatre's repertory by the periodic inclusion of newly commissioned operas and Verdi's early works. The former included Halévy's *La tempesta* (1850), Thalberg's *Florinda* (1851) and, most importantly, Verdi's *I masnadieri* (1847). Many of Verdi's early operas, such as *I lombardi*, *I due Foscari* (both 1847) and *Attila* (1848), were first staged in London at Her Majesty's, as was *La traviata* in 1856. Despite competition from Gye, Mapleson continued to champion Verdi and was able to present the British premières of *Un ballo in maschera* and *La forza del destino*.

Both Italian opera houses were still dependent on attracting star names and fought intensely over artists. The defection of Mario, Grisi, Ronconi and Antonio Tamburini from Her Majesty's in 1847 laid the foundation of the powerful ensemble, which was to become the hallmark of the Royal Italian Opera. Other notable singers joined over the next two decades, including Viardot, Tamberlik, Lablache, Lucca, Patti and Albani. Lumley countered with the sensational engagement of Jenny Lind in 1847; after her retirement in 1849, however, Lumley's troupe was consistently less effective. Mapleson mounted a more vigorous defence with the engagement of singers such as Tietjens, Christine Nilsson, di Murska, Santley and Gassier. The conducting rested principally in Italian hands, notably those of Michael Costa and Arditi. Costa is credited with the firm establishment of the baton-conductor's command in London opera. His decision to depart from Her Majesty's in 1846 was a major factor in the establishment of the rival company; with Costa, almost the entire orchestra left for the Royal Italian Opera. Balfe replaced Costa at Her Majesty's, but neither he nor the newly assembled orchestra was a match for Costa. Arditi, appointed music director for Her Majesty's in 1858, was to be closely associated with most of Mapleson's operatic ventures both in London and the USA.

The performance of French and German operas in their native tongues rested almost entirely on visits by foreign companies. London's first season of German opera, managed by Bunn, took place at the King's in 1832 with performances of *Fidelio* (with Schröder-Devrient) and *Der Freischütz*. In 1842 Bunn hired Covent Garden for a short season of German and French opera (including *Les Huguenots* and *La vestale*), performed by a German company. The Brussels Opera Company presented French operas (including works by Meyerbeer and Auber) at Covent Garden and Drury Lane in 1845. Short seasons of French opera were independently promoted at the St James's Theatre (1854), the Gaiety Theatre (1885, with the first London performance of Delibes's *Lakmé*), and Her Majesty's (1886). Wagner in German arrived with the *Ring*, given at Her Majesty's in May 1882 by a German company under Anton Seidl, followed in the same month by another German company with performances of *Lohengrin*, *Der fliegende Holländer* and *Tannhäuser* at Drury Lane, with Richter conducting.

The promotion of opera in English continued to be pursued by various managements. The history of these

30. The Theatre Royal (now the Royal Opera House), Covent Garden, and Floral Hall: engraving, 1861

schemes has been set out by White (1951, 1983): the more important are mentioned here. The Pyne-Harrison management (as the Royal English Opera) presented winter seasons of opera in English at Covent Garden from 1858 until 1864 (fig.31). Its repertory consisted mainly of new or recent British composers, including the first production of Julius Benedict's *The Lily of Killarney* (1862), supplemented by such works as *Martha* and *Il trovatore*. The possibility of a state subsidy for this company was shelved after the death of its most important patron, the Prince Consort, in 1861. The Carl Rosa Opera Company gave its first London season in 1875 (at the Princess's Theatre). Its repertory ran from Mozart to Massenet, the first British performance of *Manon* being included in its Drury Lane season of 1885. Up to Rosa's death in 1889 new works were commissioned from composers such as Cowen, A.G. Thomas, Mackenzie and Stanford. The company was to remain a chief national purveyor of opera in English until after World War II, its significance being that its basis was national touring with regular London visits.

In 1875, on Mapleson's initiative, the foundation stone was laid of a new 'Grand National Opera House', which was specifically to promote 'the works of English composers, represented by English performers'. It was never built, the site eventually becoming that of New Scotland Yard. In the same year *Trial by Jury*, with a libretto by W.S. Gilbert and music by Sullivan, was produced at the Royalty Theatre (under Richard D'Oyly Carte's management). A succession of further pieces made Sullivan the best-known British theatrical composer, established the D'Oyly Carte Opera Company, and led to the building of the Savoy Theatre and Hotel (fig.32). *The Mikado* (1885) became the most-travelled English opera (or operetta) between *The Bohemian Girl* and *Peter Grimes*. Offenbach's operettas, which had been presented in London in both French and English since 1857, remained popular; his *Whittington* was written for the Alhambra Theatre (1874). The so-called comedy opera *Dorothy* (1886, Gaiety Theatre) by Sullivan's associate Alfred Cellier outstripped with 931 performances even the run of *The Mikado* and heralded the theatrical genre now known as musical comedy.

Throughout the first half of the 20th century Covent Garden remained London's pre-eminent international house. Intermittent challenges came, however, from other theatres as well as other managers renting the opera house outside the main season. Under the management of Augustus Harris (1888–96) performances in the original language now gradually displaced the previous Italian, or italianized, performances (since 1889 performances in languages other than Italian had been admitted). In 1892 that displacement was marked by a change in name from Royal Italian Opera to Royal Opera. From Harris's death in 1896 until 1924 the opera house was governed by a succession of managers on behalf of the Grand Opera

32. Interior of the Savoy Theatre during the opening run of Sullivan's 'Patience', 1881, showing the newly installed electric lighting: engraving by J.R. Brown

Syndicate and operated under a similar scheme until 1939.

Singers heard during Covent Garden's so-called 'grand seasons' up to 1914 included Lilli Lehmann, Tetrazzini, Melba and Caruso, the last two a famous leading pair in *La bohème* (first staged by the Carl Rosa company in 1897). Puccini's works increasingly gained the public excitement that those of Verdi had formerly attained (with the first British performances of *Tosca* and *Madama Butterfly* in 1900 and 1905 respectively), but this was also a period when the prestige of French opera was sustained in repeated performances of works by Bizet, Gounod, Massenet and Saint-Saëns. Both Debussy's *Pelléas et Mélisande* and Charpentier's *Louise* received their first London performances (at Covent Garden) in 1909. Exceptional in the grand seasons was the first production in English of the *Ring* in 1908, at the instigation of the conductor, Hans Richter; the first London *Ring* (in German) had been given at Covent Garden in 1892 by the Hamburg Opera, conducted by Mahler.

A public plea by Stanford in 1908 for the foundation of a new national opera house supported by public subsidy gained no official backing. But in 1911 London unexpectedly acquired a new opera theatre when the impresario Oscar Hammerstein I built the London Opera House (renamed the Stoll Theatre in 1916). Two short seasons in 1911–12, with a roster of artists less lustrous than Covent Garden's, were financially disastrous and ended Hammerstein's venture.

In 1910 Beecham started to present his own seasons at Covent Garden on either side of the grand season. His productions included the first performances in Britain of Strauss's *Salome* and *Elektra* and of Delius's *A Village Romeo and Juliet*. Already in 1909 he had given the first British performance of Smyth's opera *The Wreckers* at His Majesty's (as that theatre had been renamed). In 1910, between his own two Covent Garden seasons, he went back to His Majesty's for a summer season that embraced the first British performance of Strauss's *Feuersnot*, Stanford's *Shamus O'Brien* (1896) and three Mozart operas including *Così fan tutte*, then a considerable rarity. Beecham's 1913 season at Covent Garden brought the first British performance of *Der Rosenkavalier*, and a later season at His Majesty's saw the first British performance of *Ariadne auf Naxos*.

On Beecham's initiative Diaghilev brought a Russian opera company to Drury Lane in 1913, Chaliapin opening the season in the title role of *Boris Godunov*, followed by *Khovanshchina* and *The Maid of Pskov* (as *Ivan the Terrible*). Although Russian opera was not absolutely new to London (*A Life for the Tsar* had been given at Covent Garden in 1887 and *Yevgeny Onegin* at the Olympic Theatre in 1892), there had been nothing like this. Not only Chaliapin, but 'the whole company with its wonderful chorus and completely revolutionary style of operatic acting ... made an impact on London such as had not been experienced since the first performances in England of the *Ring* and *Tristan* in the 1880s' (Rosenthal, 1958, p.378).

At Covent Garden the vicissitudes of operatic management between the wars were interlocked with the various enterprises of Beecham, including the British National Opera Company and the Imperial League of Opera. Under the latter's auspices at Covent Garden (and not in the grand season), Beecham gave the first British performance of Delius's *Koanga* in 1935. Among international conductors Walter became a much-loved figure; Melba, Ponselle, Turner, Gigli and Pinza were adored stars in the Italian repertory and Lotte Lehmann, Elisabeth Schumann, Flagstad, Melchior and Richard Tauber in the German. After Puccini's death (1924) Strauss became the only living composer whose works were regularly featured. (In 1936 Strauss himself conducted the visiting Dresden company in performances of *Ariadne auf Naxos*.) The British composer and conductor Eugene Goossens was given the honour of writing a new work in George VI's coronation year, 1937 – but neither this work, *Don Juan de Mañara*, nor Goossens's earlier *Judith* (1929) won success.

Various companies continued to promote opera in English. For the launching of Sullivan's one 'serious' opera, *Ivanhoe* (1891), D'Oyly Carte constructed a new theatre, the Royal English Opera House. He introduced to that genre the principle of uninterrupted nightly performances (with changing casts), which hitherto had applied only to plays and operettas. Yet not even a run of 160 performances nor a subsequent English-language version of Messager's *La basoche* repaid D'Oyly Carte's investment, and in 1892 he sold the theatre, now the Palace Theatre, to Harris. Two decades later two remarkable ventures ran successfully on the principle of uninterrupted nightly performances. Rutland Boughton's opera *The Immortal Hour* achieved 216 performances at the Regent Theatre, King's Cross, in 1922–3; *The Beggar's Opera* in a new musical edition by Frederic Austin opened at the Lyric Theatre, Hammersmith, in 1922 and broke records with its 1463 performances.

While the Carl Rosa company continued its activity, giving the first performances in Britain of Humperdinck's *Hänsel und Gretel* at Daly's Theatre in 1894, another touring enterprise, the Moody-Manners Company, led a shorter but vigorous existence from 1898 to 1916; it occasionally occupied Covent Garden for its London seasons. The most enduring of all ventures into giving opera in English was begun in the 1880s at the Old Vic, where operatic performance was at first confined to extracts and tableaux. With the succession of Lilian Baylis as acting manager from 1898 (and sole manager from 1912) came full operatic presentations, albeit with reduced orchestra. Edward J. Dent was one of its governing body and provided outstandingly successful translations; his influence continued when an expansion of the enterprise in 1931 took in the newly rebuilt Sadler's Wells Theatre. During the years 1931–5 the operation was known as the Vic-Wells Opera company. At first opera and spoken drama were given at both theatres, but opera became concentrated at Sadler's Wells. The repertory of Sadler's Wells Opera embraced several Russian works, the original version of *Boris Godunov* receiving there its first performance in Britain (1935). Here too Holst's *Sāvitri* and Vaughan Williams's *Hugh the Drover*, though not new, encountered their first regular audiences, in a repertory which in the first six years extended to more than 50 operas.

(ii) Popular music theatre.

(a) 1800–1920. London has long acted as a hub for musical theatre interchange, whether as the natural focus for visiting performers and theatrical companies from elsewhere in the country and overseas or as a source of

new material for tours and productions within the country and abroad. A clear musical stage identity was not established for London, however, until the second half of the 19th century, when various dramatic forms that interpolated music gained a distinct repertory (and hence character) for development and a sufficiently wide audience base to support experimentation. Early forms in the first half of the 19th century included pantomime, extravaganza, burlesque and revue, usually incorporating scores assembled from pre-existing material rather than specifically written numbers. From the 1830s burlettas, burlesques and extravaganzas became popular and were particularly associated with the Olympic Theatre; by the 1850s the broad caricature that marked burlesque had become its most prominent feature; in the 1860s the Royal Strand Theatre mounted burlesques that drew upon operatic subjects, such as *Der Freischütz or A Good Cast for the Pieces* (1866); later still the newly built Gaiety Theatre came to be considered the centre for burlesque, with examples such as *Faust up to Date* (1888) and *Carmen up to Date* (1890).

Offenbach, whose work was first seen in London at the St James's Theatre (1857), provided the immediate catalyst for an identifiable British popular musical theatre style – indeed, French influence had been formative earlier in burlesque, revue and comic opera. It was not until ten years later, however, that an explosion of popularity of his works occurred: *Orphée aux enfers*, for example, was seen in seven productions between 1865 and 1877, and other pieces were regularly in the repertory of the Gaiety Theatre from 1869 until around 1885. Comparison of Offenbach's *Les brigands* (1869) and Gilbert and Sullivan's *The Pirates of Penzance* (1879) clearly shows the influence of the former on the style of the latter, a style which equalled and then outstripped the popularity of Offenbach from around the 1880s onwards. The worldwide influence of Gilbert and Sullivan is most apparent with the American reception of *HMS Pinafore* (1879), which led to large numbers of touring companies and the establishment of many local amateur operatic societies; the general global reception of Gilbert and Sullivan is shown by the opening of *Patience* in Sydney (representing the colonial sphere) some seven months after London and the simultaneous opening in New York and London of *Iolanthe* (25 November 1882). Other British composers benefited from the high profile that Gilbert and Sullivan had established for London's musical theatre; the most notable of these was Edward Solomon, whose *Vicar of Bray* opened in both London and New York in 1882.

Gilbert and Sullivan gained the epithet of the 'Savoy operas' for their canon through the presentation of their new works from the transfer of *Patience* (1881) onwards at the Savoy Theatre, newly built by Richard D'Oyly Carte, who also made it the first theatre in London to use electric light (see fig.33). D'Oyly Carte later constructed his Royal English Opera House (1891), but without great success: it became the Palace Theatre of Varieties in 1892. It was only with the management of C.B. Cochran (1923–46) and the world première of *No, No Nanette* (1925) some six months prior to an American opening that the Palace was established as one of the most important London theatres for musicals, a reputation sustained for the rest of the century.

The new style of 'musical comedy' dominated London musical theatre from the 1890s through to World War I. Initially identified with the productions of George Edwardes at the Gaiety Theatre arising out of burlesque and beginning with *On the Town* (1892), it introduced popular songs and contemporary and exotic locations and fashions into a light dramatic narrative. These works put London at the centre of world musical theatre, continuing the patterns of dissemination established by the Savoy operas: examples include Ivan Caryll and Lionel Monckton's *A Runaway Girl* (1898, Gaiety), Sidney Jones's *San Toy* (1899, Daly's) and Leslie Stuart's *Florodora* (1899, Lyric). The reputation of the Gaiety survived the demolition of the original theatre due to road widening in the Strand (closing on 4 July 1903), and reopened in a new building (26 October 1903; 1267 seats), under the management of Edwardes until 1916. Edwardes also managed Daly's Theatre (constructed 1893), whose notable successes include Jones's *A Gaiety Girl* (1893, Prince of Wales; 1894, Daly's) which opened at Daly's in New York (1894) and then toured to such places as Boston, Washington, Chicago and San Francisco, and *The Geisha* (1896), which received productions as far afield as Russia and Australia.

Imports to the West End are consequently of minor significance in this period, although they included Kerker's *The Belle of New York* (1898, Shaftesbury) and Will Marion Cook's *In Dahomey* (1903, Shaftesbury). In the opening decade of the 1900s American interest in West End productions is seen through the continued interest of the American Charles Frohman – a producer active in both New York and London – in adapting new material for Broadway, retaining Jerome Kern in London to secure songs and shows for American use. Kern also began to contribute his own works to London shows (for example his song 'Rosalie' was interpolated into *Spring Chicken* (1906, Gaiety), but it was not until 1916 that Kern received his first billing as a composer in the West End, shared jointly with Ivor Novello, for *Theodore & Co.* While musical comedy continued with such successes as *A Country Girl* (1902, Daly's), *Miss Hook of Holland* (1907, Prince of Wales), *Our Miss Gibbs* (1909, Gaiety), *The Arcadians* (1909, Shaftesbury) and *The Quaker Girl* (1910, Adelphi), European influence in the form of Viennese operetta exerted a strong if temporary hold after the first production of *Die lustige Witwe* (1907, Daly's), followed by Oscar Straus's *Ein Waltzertraum* (1908, Hick's) and Leo Fall's *Die Dollarprinzessin* (1909, Daly's). New theatres built at the start of the century included the Apollo and Adelphi (both 1901), the Coliseum (1904) and the Palladium (1910).

The revue gained greater prominence in the second decade of the century, through such series as those of Albert de Courville (at the Hippodrome), André Charlot (Alhambra), Alfred Butt (Palace) and the versions by Oswald Stoll (New Middlesex Music Hall) modelled on those of the Folies-Bergère. These shows provided an outlet for performers from the declining music hall and variety circuit, eventually incorporating them into personality-led 'musicals': the career of Cicely Courtneidge provides a good example of this progression. The gradual hybridization of musical theatre forms produced *Chu Chin Chow*, a potent combination of spectacle, pantomime and musical comedy which opened at His Majesty's on 31 October 1916. Through clever marketing, including the regular addition of new scenes and costumes, and a desire for escapism generated by World War I troops on

leave, the show established a record run of more than 2000 performances, closing on 22 July 1921.

(b) 1920–45. The 1920s saw a large increase in the interchange between Broadway and the West End. Performers, through the greater ease of travel, were able to establish careers in both theatrical centres, while producers could draw on the talent and expanding repertories of both cities for their new productions. London received a series of imports from New York: Fred Astaire, for example, made his West End début in *Stop Flirting* (10 May 1923, Shaftesbury Theatre), and later with the George and Ira Gershwin shows *Lady Be Good* (1926, Empire) and *Funny Face* (1928, Prince's Theatre, later transferring to the Winter Garden). The impetus for this increasing acceptance of American musical comedy in London was for the most part due to the influence of GEORGE GROSSMITH (ii) and his partners J.A.E. 'Pat' Malone and Edward Laurillard. Grossmith had been a leading West End comic performer, and had drawn on American writers in the previous decades to find material unknown in the West End to interpolate into his own performances. Apart from introducing the performances of Astaire and the music of Gershwin to the London stage, he also produced Kern's *Sally* (1921) and commissioned from him the score for *The Cabaret Girl* (1922). With his partners, Grossmith was also associated with management and musical comedy production at many of London's largest venues, including the Gaiety (1920–21), Apollo (1920–21), His Majesty's (1923–6) and the Winter Garden (with Laurillard, 1919–21; with Malone, 1921–6), formerly the New Middlesex Music Hall, and whose change of function and name marked the loss of one of the last major venues associated with music hall and variety in London. Particularly since *Die lustige Witwe* there had been a continual operetta presence; however, it had been dominated in the 1920s by the American-derived versions at Drury Lane, a change of emphasis in repertory assisted by the refurbishment of the theatre (1922) to create a new auditorium of 2283 seats. Such large-scale operettas included Romberg's *Rose Marie* (1925), *The Desert Song* (1927) and *The New Moon* (1928), and Kern's *Showboat* (1929).

London also generated material for major New York success, but this came less from musical comedies than from revues, particularly from those of C.B. COCHRAN (whose influence was to extend right through to the important collaborations of Vivian Ellis and A.P. Herbert in the 1940s) and of ANDRÉ CHARLOT. Most notably through the revues *London Calling!* (1923, London; 1924, New York), and *Charlot's London Revue* (1925, New York), Noël Coward, Beatrice Lillie and Gertrude Lawrence launched transatlantic careers, as did Jack Buchanan who, as a performer and producer, brought Kern's *Sunny* to London (1926). A virtually permanent reminder of musical comedy's roots, Gilbert and Sullivan continued to be a staple of the annual repertory, now mostly at the Prince's Theatre rather than the Savoy.

The 1930s were marked by a theatrical confidence that saw the fourth refurbishment of the Adelphi and the building of the Cambridge, Saville and Prince Edward theatres (all 1930). The Saville became associated with British musicals and revues (such as Vivian Ellis's *Jill Darling!*, 1934, and Billy Mayerl's *Over She Goes*, 1936), while the Prince Edward opened with *Rio Rita* but failed to achieve a consistent reputation as a theatre for musical productions; renamed the Casino it opened in 1936 as a cabaret restaurant, and later was also adopted for war service as the Queensbury All Services Club (1942). Several theatres at this time were converted to cinemas to supply a new popular demand, among them Daly's which was eventually demolished in 1937. His Majesty's Theatre became associated with a series of British works that balanced Broadway influence with a more European operetta-based approach: beginning in 1929 with Coward's *Bitter Sweet*, His Majesty's also saw productions of his *Conversation Piece* (1934) and *Operette* (1938), and Posford's *Balalaika* (1937) and *Magyar Melody* (1939). The Theatre Royal, Drury Lane, gambling on a return to musical theatre of Ivor Novello to reverse its declining fortunes, unwittingly launched his hugely successful series of musical romances *Glamorous Night* (1935), *Careless Rapture* (1936), *Crest of the Wave* (1937) and *The Dancing Years* (1939). The advent of World War II broke Novello's run of occupancy at Drury Lane: the show was moved out as London theatres were closed at the declaration of war. On the subsequent reopening of theatres weeks later, Drury Lane was adopted as the headquarters for ENSA. Novello's shows never returned to Drury Lane (although they continued in other London theatres to huge acclaim and long runs in the 1940s and early 1950s), but his name and works are still inextricably linked with the theatre.

The war affected the London musical stage in several ways: the repertory became isolated with the exclusion of new American shows for seven years; casts were limited through the military conscription of the youthful and fit; quickly mounted revivals had to take the place of many shows, while new shows tended to be light and distracting (frequently variety vehicles for star turns) or reflected strictly parochial concerns, such as Manning Sherwin's successful *Under the Counter*, a show about rationing. The provincial and military tours of London productions became a major part of boosting morale. Such isolation and introversion shifted the global appeal of London's new works so that in the first musical theatre transatlantic exchange after the war in 1947, *Under the Counter* was a disaster in New York, while *Oklahoma!* began the so-called American invasion of the West End.

2. CONCERT LIFE. The period 1800 to 1945 marks the gradual transition from a concert system based on the patronage of a socially exclusive class, with performers and repertory tied to this context, to a wide new consumer audience, vastly extended through broadcasting and recording, with international soloists and a repertory expanding fluidly around a standardized canon. Concerts of all types proliferated as the season lengthened, the subscription principle broadened and ticket prices came within the range of lower income groups. The predominant form of patronage shifted successively from private individuals through institutions to the music business and eventually state subsidy (including that of the BBC).

(i) 1800–1850. Though London's concert life burgeoned during the 18th century, it was still constrained compared to what the 19th would come to expect. The season was short (essentially February to May), and tickets could generally be afforded only by the upper echelons of society, usually known to each other and often to the performers as well. Only concerts at the pleasure gardens and, to some extent, the Lenten 'oratorios' were available for a more humble shilling or two. The regular season

based around subscription series was well established by 1800, but concert life still lacked durable foundations. Notably, there were no formally established institutions for either symphonic music or choral singing until the founding of the Philharmonic Society (1813; fig.33) and the Sacred Harmonic Society (1832). The British contribution to the concert repertory had all but dried up, through under-nurturing of symphonic roots and a declining choral tradition.

The first half of the 19th century was a period of flux and realignment. Increasing commercialism and proliferation contrasted with the development of classical concerts as temples of high art. While professional musicians themselves exploited the competitive marketplace for all it was worth, they also kept a wary eye on their image with traditional patrons, as Mendelssohn was quick to observe in 1829: 'Here they pursue music like a business, calculating, paying, bargaining, and truly a great deal is lacking . . . but they still remain *gentlemen*, otherwise they would be expelled from polite society'.

As the season became ever more congested after 1820, beginning before Christmas, the day was also extended by matinées. The audience base widened through more middle-class access to subscription series and a gradual proliferation of cheaper venues – oratorios and benefits at first, later promenade and popular concerts. Already in the 1820s the changing nature of concert patronage was a matter for anguished debate in the periodical press. If traditional aristocratic patronage was turning back to the exclusive private salon, luring the most famous artists by money and flattery, what then was the future for public concert life? Was there a new role for the bourgeoisie?

UNDER THE IMMEDIATE PATRONAGE OF

His Majesty.

PHILHARMONIC SOCIETY.

THIRD CONCERT, MONDAY, MARCH 21, 1825.

ACT I.

Sinfonia Letter T. - - - - - - - - *Haydn.*
Terzetto, "Tutte le mie speranze," Madame CARADORI, Miss GOODALL, and Mr. VAUGHAN (Davide Penitente) - - - - - *Mozart.*
Quartetto, two Violins, Viola, and Violoncello, Messrs. SPAGNOLETTI, OURY, MORALT, and LINDLEY - - - - - - - - *Mozart.*
Song, Mr. VAUGHAN, "Why does the God of Israel sleep," (Samson) - *Handel.*
Quintetto, Flute, Oboë, Clarinet, Horn, and Bassoon, Messrs. NICHOLSON, VOGT, WILLMAN, PLATT, and MACKINTOSH - - - - *Reicha.*
Recit. ed Aria, Madame CARADORI, "Per pietà," (Cosi fan tutte) - *Mozart.*
Overture, Les deux Journées - - - - - - *Cherubini.*

ACT II.

New Grand Characteristic Sinfonia, MS. with Vocal Finale, the principal parts of which to be sung by Madame CARADORI, Miss GOODALL, Mr. VAUGHAN, and Mr. PHILLIPS (composed expressly for this Society) - *Beethoven.*

Leader, Mr. F. CRAMER.—Conductor, Sir G. SMART.

To commence at Eight o'clock precisely.

The subscribers are most earnestly entreated to observe, that the Tickets are not transferable, and that any violation of this rule will incur a total forfeiture of the subscription.

It is requested that the Coachmen may be directed to set down *and take up* with their horses' heads towards Piccadilly.

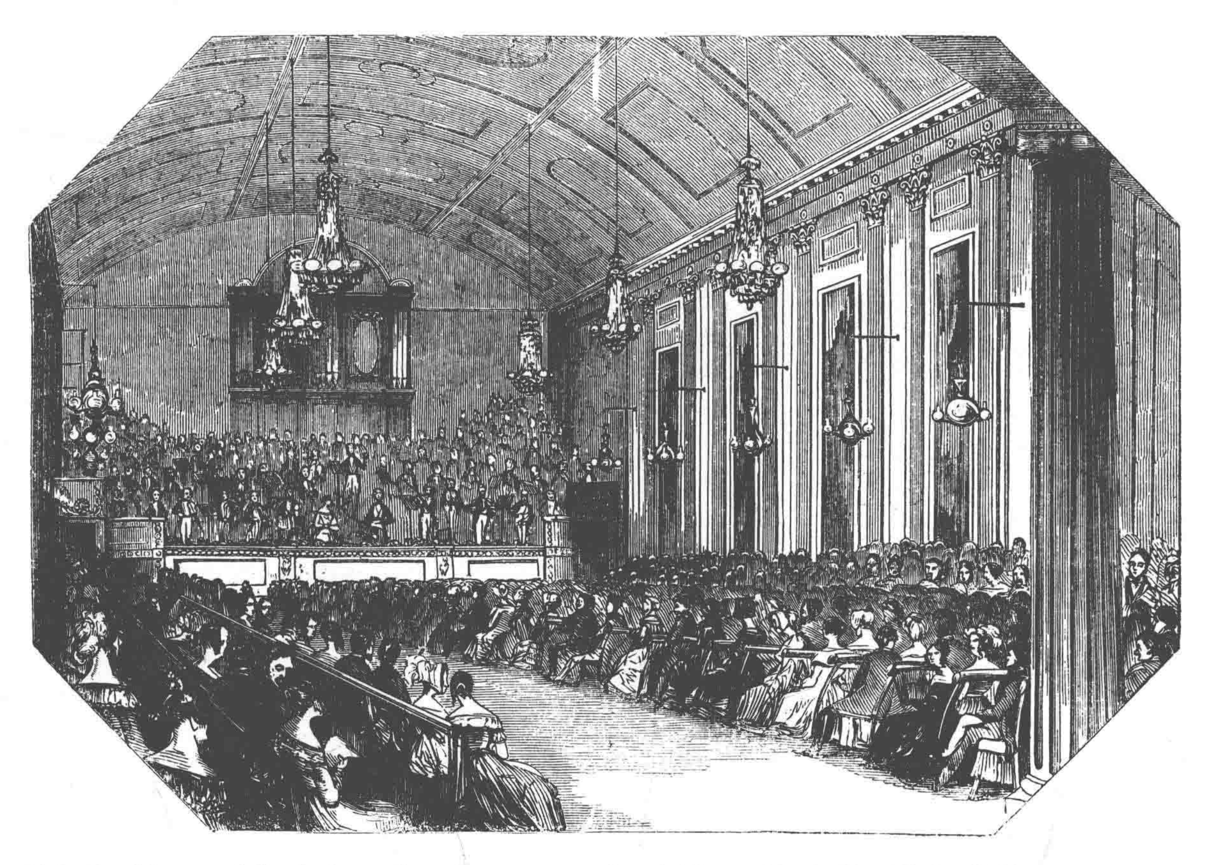
The door in Little Argyll-street will be open after the Concert, for the egress of the Company.

The next Concert will be on MONDAY, APRIL 11.

TERZETTO.—*Mozart.*

Tutte, le mie speranze
Ho tutte riposto in te!
Salvami oh Dio
Dal nemico feroce
Che m'insegue, e m' incalza
Oh Dio salvami.

RECITATIVE accompanied—Mr. VAUGHAN.
(Samson.)—*Handel.*



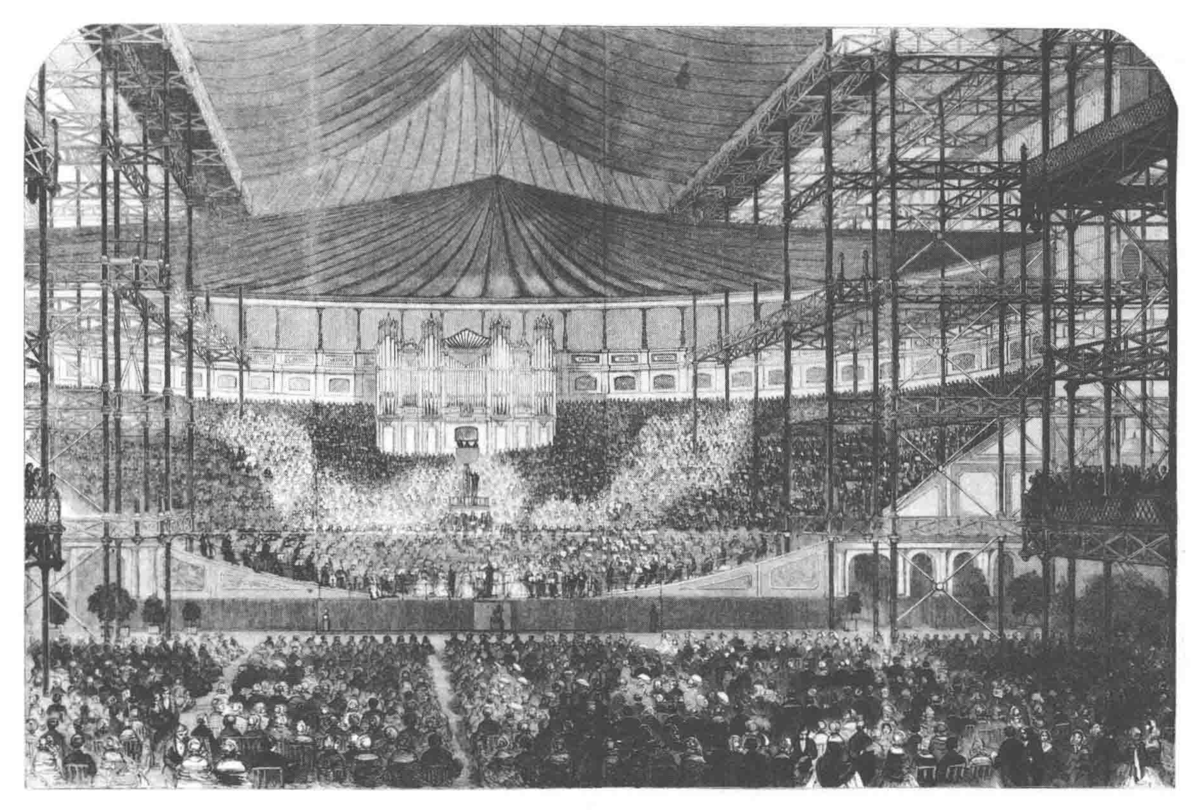
Justly these evils have befall'n thy son:
Sole author I, sole cause. My griefs for this

33. Programme of the Philharmonic Society concert, 21 March 1825, at which Beethoven's Ninth Symphony received its London première

While some *nouveaux riches* matched the aristocracy with ostentatious soirées, others preferred to cultivate a sober reputation as connoisseurs, while distinguishing themselves from the old guard of the Ancient Music by focussing on the Viennese classics. Amateur societies in the City, inspired by German merchants, promoted Mozart's *Don Giovanni* in about 1808, and the tradition persisted through two short-lived series of City Amateur concerts (both founded in 1818) and others on similar lines. Through their support of public institutions and the discerning programmes of their private concerts, the City bourgeoisie began a realignment of patronage that was only resolved in succeeding decades.

Social themes therefore intersected with differing musical tastes and repertories. Canonization was extended from 'ancient' music to the 'classical' music of Haydn, Mozart and Beethoven (and, for that matter, to new music of serious aspiration by Spohr and Mendelssohn). This high-minded reverence for art contrasted with populist ephemera as well as with the glitz of Italian opera and virtuoso pianism, regarded equally as shallow upper-class infatuations. The change was most clearly articulated by the formation of the Philharmonic Society in 1813. The previous decade, despite Salomon's advocacy of Beethoven, had been dominated by the Vocal Concerts and other series by such divas as Elizabeth Billington and Angelica Catalani; whereas the Philharmonic's agenda explicitly elevated modern symphonies alongside ancient music, eschewing vocal solos and even concertos at first (though both these restrictions were soon abandoned). Like the Professional Concert, the Philharmonic Society was founded by musicians, but differed radically from its predecessor in its high ideals and ostentatious disdain for profit. Subscribers were admitted on the basis of artistic credentials rather than social status, resulting in many fewer titled members than at the Concert of Ancient Music and a broader audience claiming artistic discernment based on the new Viennese repertory. Admittedly the path was not always smooth, with some members reviving their allegiance to the Professional Concert in 1815 and accusations of complacency and stasis during the 1830s. With a freelance orchestra and limited rehearsal, the standard of orchestral playing cannot have been high, and although Spohr introduced the baton at a rehearsal in 1820, a dual control system between violinist and pianist persisted for many years. Nevertheless, the Philharmonic was a dominant force for many decades, responsible not only for confirming Beethoven as the keystone of the repertory, but also for commissioning music from Cherubini, Spohr and Mendelssohn (see fig.34). If the latter's appearance at the Philharmonic in 1829 cemented his reputation and influence in England, his authority as a conductor began to encourage more precision of ensemble, an improvement much advanced by Michael Costa from 1846 to 1855.

In line with the artistic ideals of the Philharmonic was the rise of chamber music concerts. In 1835 a young violinist named Joseph Dando instituted quartet concerts in the City, soon transferring westwards to the Hanover Square Rooms (fig.34) and inviting competition from more distinguished players. Programmes were uncompromisingly based around the Viennese masters, including late Beethoven, despite an admixture of songs and other lighter items. Serious contemplation of masterworks was encouraged by seating in the round, and reflected in titles



34. Interior of the concert hall at the Hanover Square Rooms: engraving from the 'Illustrated London News' (24 June 1843)

such as *conversazione* or *soirée musicale*. Chamber series were sometimes held at patrons' houses, emphasizing a link with traditional modes of patronage; or at musicians' own lodgings, allying them with the artistic and literary community. At John Ella's Musical Union, founded in 1845, just three chamber works were performed by the finest artists to a rapt audience of cognoscenti, over whom Ella ruled with a rod of silence. The Beethoven Quartet Society, established by the critic T.M. Alsager in the same year, also presented three works – early, middle and late – with similar devotion, the audience following scores or detailed programme notes. Other instrumentalists also took up the classical torch: in 1838 Moscheles began a series of classical piano recitals (though again interleaving songs as well as chamber music).

The patrician Concert of Ancient Music exhibited a similarly reverential attitude towards choral music, but its petrified repertory and ambience were increasingly seen as a moribund relic of the 18th century; and it finally expired in 1848. At the 1834 Royal Festival at Westminster Abbey celebrating the 50th anniversary of the Handel Commemoration, sacred music of the Viennese school was included (in response to public pressure), but choral singing was already moving in quite a different direction. London had always lacked a major amateur society to match the provincial festivals: in 1832 the Sacred Harmonic Society was founded, soon to be transformed into a symbol of religious dissent as a coalition of nonconformist choirs excluded from the 1834 festival. Its membership largely drawn from the musically uneducated lower classes, the society maintained a high moral tone and social purpose, which extended also to its audiences. In 1836 it was granted the use of the larger Exeter Hall, focus of London's dissenting community and designed for religious and charitable meetings, enabling vast crowds of 2000 and more to attend for no more than a shilling. Amateur choral singing in London grew apace over the next few decades, invigorated by the rise of the sol-fa movement and the singing classes of Mainzer, Curwen and Hullah; and at the Handel Festival of 1859 (fig.35) the Sacred Harmonic choir numbered 2765. Artistic high-mindedness ensured that Handel oratorios were sung complete, and the society also performed the major new works of Spohr and Mendelssohn, including the London première of *Elijah* in 1847.

Changing artistic and social function encouraged a desire to redress continental domination of concert repertory. But only gradually was awareness of decline translated into active encouragement of British composers, with initiatives stemming more from musicians themselves than from their patrons: trials of new music at the Philharmonic Society (including symphonies by Cipriani Potter), public performances of student works from the new Royal Academy of Music (opened in 1823), and such initiatives as the British Concerts (1823) and the Society of British Musicians, founded in 1834. The latter was intended both as a forum for discussion and as a focus for publicity through full-scale symphonic concerts. Though foreign works were later admitted and the programmes reduced to chamber music, performances of Bennett and Macfarren during the 1830s and 40s formed

35. Handel Centenary Festival at Crystal Palace: engraving from the 'Illustrated London News' (2 July 1859)

a significant prelude to the emergence of a British school of composition.

Most concerts had less exalted aims, their upper echelons dominated by foreign virtuosos, who besides the occasional obligatory appearance at the Philharmonic were mainly to be heard at private soirées and benefits. Private concerts remained an essential feature of the soloist's diary, both lucrative and an entrée into further engagements, despite protests by such musicians as Spohr and Moscheles:

> Every time I am applauded at such soirées, I think it is because they are relieved that I have finished playing, and that the thing is over and done with. We sacrifice as little time as possible for such evenings and hurry home as soon as the rules of etiquette permit.

Soirée programmes generally mixed salon music and virtuoso showpieces with the latest Italian arias and ensembles, and sometimes English glees. Only rarely was more serious musical attention expected, though there were exceptions, such as concerts at Alsager's house, where Moscheles gave the London première of Beethoven's *Missa solemnis* in 1832.

The benefit concert, that stalwart of the 18th-century concert structure, was gradually transforming in function. Formerly regarded as a reward for good service, the benefit turned during the 19th century into a commercial catch-all, with diverse programmes presented by unknowns in ever-increasing numbers, as well as by international stars. Pianists such as Thalberg or Moscheles performed their fantasias on national airs and improvised on themes provided by the audience; singers contributed a mêlée of Italian showpieces and finales, extracts from Weber and Meyerbeer, English ballads and folksongs. Most extravagant of all were the annual Monster Concerts of Julius Benedict, beginning in 1841, when a roll call of stars – Grisi, Viardot, Mario, Vieuxtemps, Liszt – attracted large and fashionable crowds. But in general the profusion of concerts outran audiences, and halls were routinely 'papered' with free tickets for friends and pupils, despite the introduction of tiered prices. Economies resulted in piano accompaniment becoming the norm by 1850 – although this did allow classical works, a trend that was eventually amalgamated into the recital.

Some exploitation exceeded mere benefits. In the 1820s the soprano Catalani organized whole series around her virtuoso showpieces, only to be outdone in 1831 by Paganini's concerts at the King's Theatre, as frequent and as high-priced as the market would allow, followed by appearances at the London Tavern in the City (still regarded as problematical for an artist of his stature). Yet when Liszt arrived in 1840 even he cultivated a drawing-room ambience at Hanover Square for London's first solo piano recitals.

Like benefits, the Lenten oratorios appealed to a diverse audience through mixed programming, interspersing Handel with a jumble of Italian showpieces and English ballads; indeed, their 19th-century manifestations should be regarded more as popular potpourris than serious concerts. Liberalization of theatrical regulations caused the final downfall in 1843; but other organizations were already catering for large audiences at prices of a shilling or so. In contrast to the Sacred Harmonic Society's moral agenda, the promenade concerts initiated in 1838 clearly attempted to reach a new and uncultivated audience with populist programmes: the latest galops and quadrilles, cornet solos and every imaginable crowd-pleasing gimmick. Yet the great showman Jullien made a point of

including movements from Beethoven symphonies, albeit in his own garish arrangements.

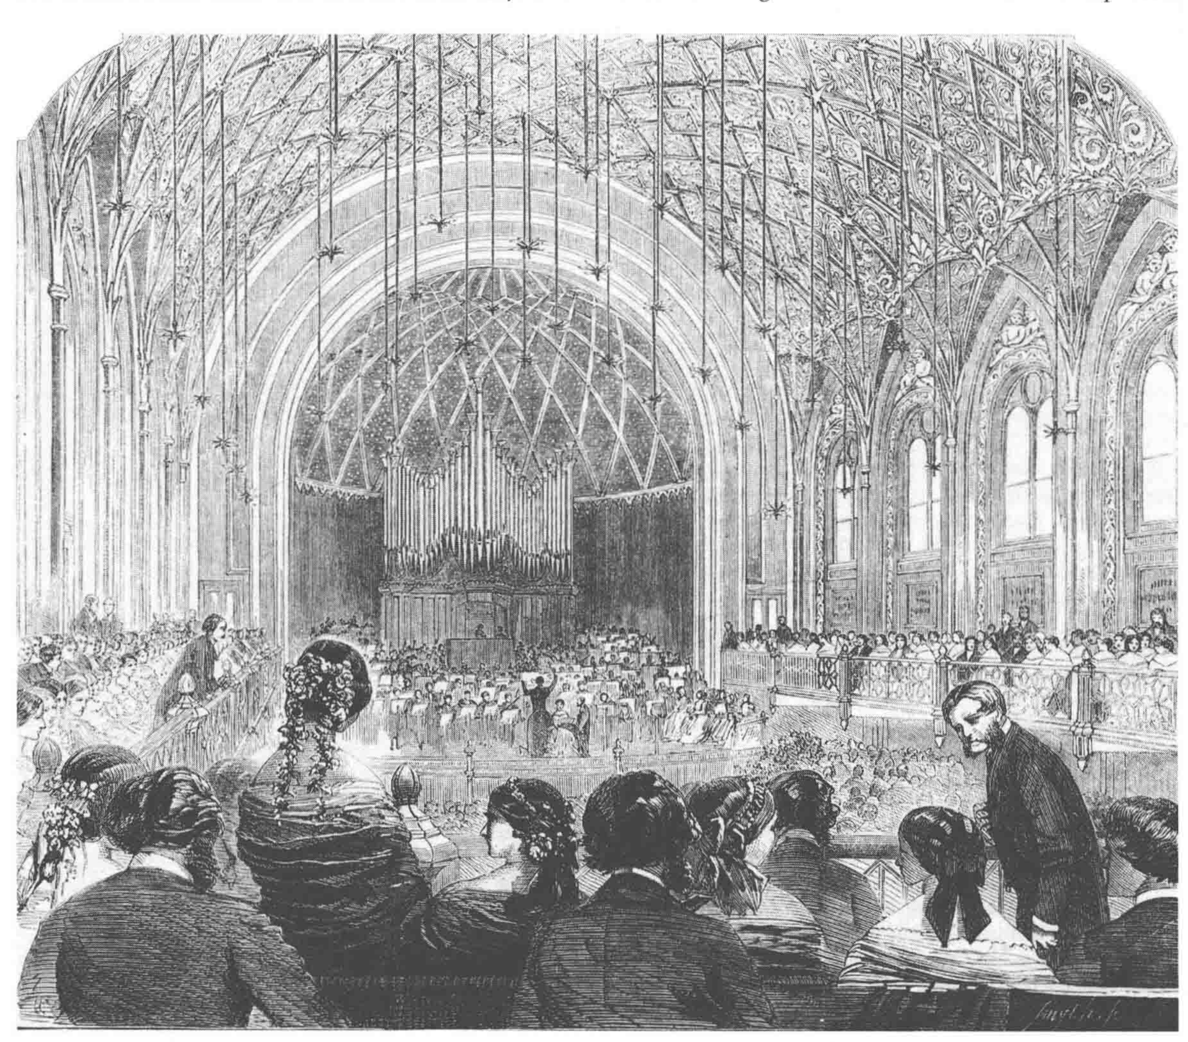
During the 1830s and 40s music began to spread outside the narrow confines of the central London concert hall, with the rapid growth of societies for self-improvement, entertainment or education. Dando's quartet concerts in the City paved the way for cheaper and more accessible concerts by challenging licensing restrictions, and also found an obvious way of economizing without losing artistic prestige. Leading professionals could be heard at literary institutions and musical societies in such outlying districts as Highgate, Islington, Mile End and Camberwell. At the same time, amateur instrumental and choral societies proliferated around London and in the City (where the long-lived Choral Harmonists' Society was formed in 1833); and music was one of the most striking successes of the Mechanics' Institutes, less artisan than their name implies, which made a strong cultural impact in less prosperous areas, both for amateur players and for the sizable audiences their concerts attracted.

(ii) 1850–1900. By the middle of the century London's main musical institutions had become established around a well-defined repertory. The number of concerts and size of audiences continued to increase. The 1851 Great Exhibition and subsequent resiting of the 'Crystal Palace' from Hyde Park to Sydenham, a south London suburb, had long-term significance; but that decade's most prominent musical event was the foundation of the Handel Festival there. The Sacred Harmonic Society provided the nucleus for the nationally represented choir of the Trial Festival of 1857 (numbering 2000, with an orchestra of about 400), prior to the Centenary Festival of 1859, which inaugurated the triennial Handel Festival (fig.37); by the 1880s this had a choir of 4000 and orchestra of about 450, with audiences of around 86,000 over four days. This quintessentially Victorian event was much imitated, notably in the USA, but was never fully respected by serious musicians, even within the Sacred Harmonic Society itself, and adverse comparison was made with the provincial choral festivals which were its most direct model.

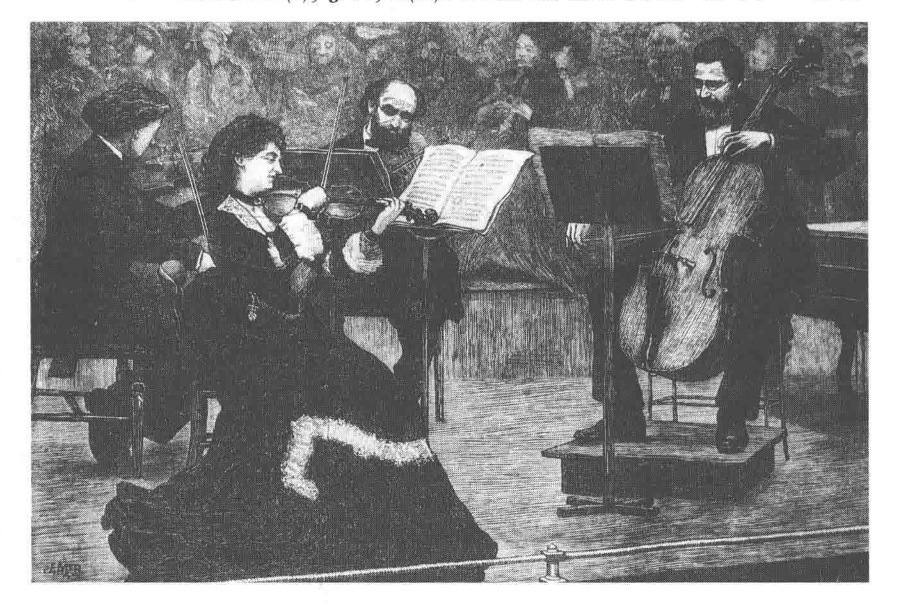
The desire for sensitive performance of historical repertory was manifest in the advent of several new groups. The Harmonic Union, a subscription society founded in 1852 'for the performance of sacred and secular music both of the Ancient and Modern Schools', began in December that year at Exeter Hall, the first programme including a Bach motet and C.E. Horsley's *Joseph*, and it performed other modern works until its demise in 1854. The Vocal Association (*fl* 1856–*c*1866) was conducted by Julius Benedict and modelled on the German Gesangverein for performance of such larger modern choral works as Mendelssohn's *Die erste Walpurgisnacht* and Spohr's *Hymn to St Cecilia*. The most successful small choir of the decade was the Henry Leslie Choir, which assimilated a previous choir, first with 60 voices intended for madrigals and partsongs; it increased to 240 for large works and explored a wide repertory to a high standard, flourishing until 1887. More convivial vocal activity continued in the Round, Catch and Canon Club, founded in 1843 to sing works of its members, first at the Anchor Tavern and later St James's Hall, finally folding in 1911.

In orchestral life, the chief innovation was the transformation of the Crystal Palace band into a full symphony orchestra in the year after the 1854 opening. Its second director of music, August Manns, provided two daily free concerts for visitors, and a Saturday concert with augmented orchestra and a more classical programme. The Palace also presented fashionable opera concerts in the summer of 1856, but the orchestral concerts were far more important in pioneering new repertory and raising performance standards. Manns' regular contact with his players and expert training, together with the support of George Grove, Crystal Palace secretary, resulted in the rapid creation of London's best orchestra. By the mid-1860s it was probably one of the best in Europe, and its bold expansion of repertory attracted musical connoisseurs from central London, who took specially scheduled trains. Longer seasons than the Philharmonic Society (two series through autumn and spring, later extended to summer), the participation of leading international performers and a distinctly educational ethos all gave the Crystal Palace Concerts a pre-eminence which overshadowed those of central London until the 1880s. Manns also made his concerts the leading forum for new British music, continuing until the official disbanding of the orchestra in 1900 when he was in his 70s.

Even before Manns' tenure at the Crystal Palace, the Philharmonic Society had reached a crisis point. Long criticized for its conservative programmes before Costa left, it was challenged by a breakaway group of members who created the New Philharmonic Society in 1852 to give 'more perfect performances of the great masters than



36. Promenade concert at Covent Garden: lithograph from Jullien's 'Annual' (1847)



have hitherto been attained and to bring the music of contemporary and British composers before the public'. Led by Henry Wylde, its committee consisted not of professional musicians but of wealthy amateurs. In its first season Berlioz performed part of his *Roméo et Juliette* and gave the first satisfactory performance in England of Beethoven's 9th Symphony. In 1856 the concerts moved from Exeter Hall to the Hanover Square Rooms, resulting in higher prices and a more exclusive audience. In 1858 Wylde became sole director and conductor at St James's Hall, and some members resigned to form the Musical Society of London whose wide aspirations included the provision of a good library, lectures, *conversaziones*, and chamber music at St James's Hall; the society lasted until 1867 when Clara Schumann played in its last concert. The New Philharmonic was effectively finished by 1879, although it continued for three years under Wilhelm Ganz.

The opening of St James's Hall, Piccadilly, in 1858, provided a much needed new venue in central London (fig.37). Established by the publishers Cramer, Beale & Chappell 'for concerts on a large scale and for public meetings', it comprised a large concert hall and a smaller hall which housed ballad concerts and minstrelsy. S.A. Chappell's Monday Popular Concerts (1859–76; fig.38) and later Saturday Popular Concerts (1865–1904) presented chamber music and solo performance. Leading organizations and soloists played there, beginning with Ella's Musical Union and the Henry Leslie Choir and followed belatedly by the Philharmonic Society in 1869, when the Novello oratorio concerts also took occupancy. The Hanover Rooms were thus overtaken and closed in 1874.

Although aimed at increasingly broad audiences, these concerts were all for the musically educated; other concerts were aimed at a more popular audience. The standard and musical respectability of promenade concerts gradually improved during the period, Louis Jullien's concerts (see fig.36) being taken over by Mellon at Covent Garden after his death in 1860; in 1850 Balfe had begun a series at the Surrey Gardens, then moving to Drury Lane and subsequently Covent Garden. Chappell began 'Ballad Concerts' in 1867 as a showcase for his publications, and was copied by others. Hullah's choral concerts (1850–60), based on highly popular classes in tonic sol-fa, were more didactic, taking place from 1850 at St Martin's Hall, Long Acre, which was built for him by supporters. Novello had generated a vast business in cheap vocal

scores for the Handel Festivals at the Crystal Palace, and in 1869 launched 'Oratorio Concerts' under Joseph Barnby. They lasted until 1872, when the choir was amalgamated with the Royal Albert Hall Choral Society, founded with the Hall (fig.39) in 1871 (from 1888 the Royal Choral Society). Its adventurous repertory included four successive performances of Bach's *St Matthew Passion* in 1873, the Verdi Requiem (under the composer) in 1875 and Dvořák's *Stabat mater* in 1884, also conducted by the composer. Barnby subsequently conducted the London Musical Society, founded in 1878, which flourished until 1887 'for the practice and performance of the works of composers which are not generally known to the musical public', given in St James's Hall. Another choir associated with a new building was the Alexandra Palace Choral Society, founded at the institution located on a north London hill site (analogous in function and location to the Crystal Palace). Directed from its opening in 1873 by Thomas Weist-Hill, its programmes included revivals of Handel's *Esther* and *Susanna* (with an orchestra of 42 and a choir of 300); it also ran a symphony competition for British composers.

If performances of Handel with large forces were popular, Bach demanded smaller and better-trained choirs and was comparatively little-known in the 1870s. The Bach Society had been formed in 1849 to collect compositions and relics, and to further understanding of his music. It gave the first English performance of the *St Matthew Passion* in 1854 under Sterndale Bennett, but was dissolved in 1870. The foundation of the Bach Choir

39. Opening of the Royal Albert Hall, 29 March 1871: engraving from 'The Graphic' (8 April 1871)

in 1875 was prompted by the desire to perform the B minor Mass, then unknown to English musicians; two performances took place at St James's Hall in 1876, conducted by Otto Goldschmidt. In addition to Bach it performed new choral music, such as the Brahms *German Requiem*, and achieved high standards under Goldschmidt and later under Stanford.

By the early 1880s there were already complaints by tired critics of concerts, the *Musical World* avowing that the receptive capacities of the 'professional worker and amateur student' were sorely overtaxed. But by then some of the older institutions were showing signs of age. The Sacred Harmonic Society collapsed after Costa's death and the Handel Festival passed into the hands of the Crystal Palace, with new standards and a wider repertory imposed by August Manns. In 1882 a large amateur choir and orchestra was formed as the Handel Society and dedicated to the revival of the composer's less familiar works and the practice and performance of other music, including all the Handel oratorios except *Joseph* and *Esther* and Mozart's C minor Mass. New interest in historical repertory is reflected in the Magpie Madrigal Society founded in 1866 to perform 16th- and 17th-century madrigals and contemporary works, some composed for it. It was closely associated with the Royal College of Music, and was active until 1911.

The growing popular audience for classical orchestral music was wooed by a series of concerts by leading German conductors. In 1879, Hans Richter's Orchestral Festival Concerts (later known as the Richter Concerts) began to offer the first sustained challenge to Manns. In 1884 Henschel, having resigned the position of first conductor of the Boston SO, began the London Symphony Concerts. For 11 years they introduced innovative repertory. Smaller-scale performances received a further stimulus with the opening by the piano makers of the 500-seat Steinway Hall (renamed Grotrian Hall in 1925) and, more significantly, Bechstein Hall in 1901.

By the 1880s broader audiences were introduced to classical music. Earlier educational initiatives had been concerned with choral music. A new phase in the popularization of instrumental music began with the People's Concert Society formed in 1878 with the aim of 'increasing the popularity of good music by means of cheap concerts'. The essential feature was the maintenance of high artistic standards and the programmes were closely modelled on those of St James's Hall. The concerts were held in various disadvantaged parts of London including the People's Palace in the East End and 1d charged for most seats. The operation relied on artists giving their services or taking nominal fees and was partly supported by subscription. The concerts lasted well into the 20th century. The Vocal and Instrumental Concerts of the South Place Ethical Institute, Finsbury, began in 1887 with free admission and a silver collection. In the first season there were seven concerts, in the second 13 and by the third season concerts were held weekly through the winter. When Conway Hall was built for its use in 1927–8 it was not licensed, so the South Place Concerts Society was formed for members only, thus breaking the tradition of free admission. It became an important showcase for young artists, soloists and chamber groups. The Oxford House Choral Society was founded in 1898 at Oxford House, the Oxford University Settlement in Bethnal Green, to give East Londoners the opportunity to take part in choral music. It gave regular concerts in the Excelsior Hall. In 1903 it appeared at St James's Hall and gave an annual concert at Queen's Hall from 1904 to 1921, and afterwards at St Martin-in-the-Fields.

(iii) 1900–1945. With a range of choral, orchestral, solo and chamber music firmly established at St James's Hall, the Royal Albert Hall, the Crystal Palace and smaller venues, central London still lacked a high-quality symphony orchestra performing a wider repertory, including new music. This came about through the opening in 1893 of the Queen's Hall (fig.40), comprising a large hall of 2500 and a smaller hall of 500. Its first licensee, Robert Newman, sought a popular audience for good-quality orchestral music and from 1895 arranged a series of promenade concerts with the newly formed Queen's Hall Orchestra in the summer at cheaper prices when other concert series were not available; the initiative reflected a new respectability for the promenade concept since the Monster Concerts of Jullien; admission to both the standing room and the body of the hall and to most of the seats was far cheaper than at any other concerts. With Henry Wood as conductor from 1895 until 1941, the concerts took over an educational role which connects 19th-century concert life to modern times. The first programmes still reflected the traditional mixed content, with a 'serious' first half and a popular second with ballads and instrumental solos, but gradually a modern structure emerged. Like Manns, Wood achieved his results by a combination of good training and regular contact

40. Programme for a concert at the Queen's Hall, 30 April 1921

with his players, who played every night of the week except Sunday for a ten-week summer season.

The new hall and concerts symbolize the beginnings of a new era. Following the disbanding of the Crystal Palace Orchestra and final closure of the Saturday Popular Concerts, St James's Hall closed in 1905. Henceforth, serious music lovers could choose from a cluster of venues in central London, custom built and often more efficiently managed than in the past as regards tickets, seating, ventilation and general facilities. It also reflected the growing interest in orchestral music, whereas no new choral venues appeared or societies were formed. Most prominent were the appearance of celebrity solo performers. With the piano culture now at its apogee, the new concert rooms of piano manufacturers offered frequent recitals enabling such houses as Broadwood and Erard to promote visiting celebrities. Thus concert life and the exploitation of brand names – concert instruments prominently labelled – were sustained almost continuously through the year at Bechstein Hall, Steinway Hall and Aeolian Hall (pianola makers). As the main source of concert hall income shifted from subscriptions to tickets for individual concerts, crass profitability was sometimes preferred to social exclusiveness. Chamber music, long the preserve of the most educated musical class, was dominated by the concerts of the Joachim Quartet until his death in 1907 (the concerts were held in St James's Hall until 1905). The work of the Joachim Quartet was continued by the Classical Concert Society (1908–22).

Documentation is still inadequate to chart the full range of music performed, types of audience, and locations during this period of rapid commercial development and population growth. The 19th-century obsession with Beethoven and Mendelssohn continued, along with the establishment of a limited core of Haydn and Mozart and of familiar operatic overtures and Wagnerian extracts 'in bleeding chunks'. Wood made his mark with exotic French and Russian additions and in difficult modern scores, most notably Schoenberg's Five Orchestral Pieces in 1912. Additionally, Richard Strauss was welcomed as a celebrated composer and conductor, and Elgar made strides as the outstanding representative of the English musical renaissance.

Choice of 'early music' still reflected acceptable 19th-century taste, and the later 20th century's emphasis on historical repertory such as Bach's Brandenburg Concertos or Mozart's piano concertos was still not apparent. Purcell, the bicentenary of whose death had been celebrated in 1895, was once again forgotten in performance as opposed to study, and Vivaldi was not yet known to the public. But programmes were beginning to relinquish Victorian excess, with shorter menus of overture, concerto and symphony, and perhaps a newly popular tone poem.

One sign of the broadening market is the fact that performances of serious music were not confined to conventional venues. For example, London's first encounter with *Parsifal*, in June 1913, was a truncated version without singers as part of the Coliseum's music-hall offerings. Beecham's innovatory Sunday concerts, with a new orchestra recently acclaimed in Berlin and such novelties as the violin concertos of Weingartner and Busoni, with Kreisler and Szigeti as soloists, took place at the Palladium. Throughout the year there were no longer significant gaps in the concert calendar. Some music was available at Easter, and the summer months were filled by a prodigious list of proms: 61 concerts between mid-August and late October. The *Annual Register* reported a prom season 'by far the most prosperous ever yet enjoyed . . . . Night after night the house was literally packed by enthusiasts'. Most popular was Wagner, whose 'emotional fervour & dramatic intensity . . . make a strong appeal to those who wage the fight of life' (*Athenaeum*).

In an age of cheap labour and large demand, impresarios and highly paid and promoted artists flourished. An impresario's largesse could be indulged in an orchestra where about 100 players was the norm for any music, regardless of period or style. All were men, except for an occasional harpist, though plenty of women players were available: hence an occasional indulgence in the novelty of a ladies orchestra. Top violinists and pianists (there were not yet stars on such other instruments as the cello) were recognizably new, despite superficial resemblance to the obvious precursors, Paganini, Liszt and Anton Rubinstein. The new breed, epitomized by Paderewski, performed with an extravagance of tone, interpretative flair, gesture and pecuniary expectation which was variously attributed to genius, national temperament, manipulation by grasping agents, transatlantic influence and the response of vulgar audiences. In similar mould there were new virtuoso conductors, with Nikisch as exemplar, whose interpretations of familiar classics brought profitable acclaim – even to the innovative extent that concerts could succeed without a soloist. All the same, visits by high-quality foreign orchestras stood out, such as Newman's invitation of the Colonne Orchestra and the appearance of the Meiningen orchestra under Steinbach in 1902. Smaller ensembles drew upon similar repertory in programmes which were usually a ragbag, even when carried by an artist of distinction. Few serious musicians could yet attract a sufficient audience without the 'assistance' of a singer or contrasting instrumentalist to provide diversity or light relief. The programme of a violin recital would normally include a concerto and 'solo' Bach, both with piano accompaniment. Singers rarely avoided Melba's sound advice to 'sing 'em muck' – and not only in the outback or provinces – along with morsels of lieder, opera and art song. The genteel parlour entertainments of a dominant piano culture, with its dependent economics of music publishing – royalty ballads and music-hall songs, 'effective' piano pieces, even recitations – were still common enough in Wigmore Street. Kreisler might play at Chappell's ballad concerts in Queen's Hall, but on the same occasion Gervase Elwes would sing a new setting of *Lead Kindly Light*.

The potential audience was immense: a vast metropolitan population, enjoying increased leisure and purchasing power, and a measure of recent emancipation from the Sabbatarian constraints which had until recently denied access to the pleasures of a 'continental Sunday'. Dispersal from workplace to suburbia was offset by the opportunity to return provided by cheap efficient public transport. Such new forms of public entertainment as the music hall already exercised a huge mass appeal, and hopes were expressed that serious music might be similarly marketed, for patronage and subsidy were virtually non-existent, in the guise of 'respectablizing' entertainment by raising its tone for family consumption. More central to music's need was Robert Newman's express intention, as he told Henry Wood, to recruit new custom 'by easy stages . . . raising the standard until I have created a public for

classical and modern music. Similar hopes for stable audiences, committed to music itself rather than to evanescent fashion, doubtless underlay a rapid proliferation of institutions and events during the first decade of the 20th century. A rash of orchestras, with misleading flags of stable identity, was one such excrescence. The London Symphony Orchestra (LSO, 1904) was founded as a players' cooperative in defiance of Wood's attempt to raise standards by challenging the deputy system in his Queen's Hall Orchestra (1895). Hans Richter conducted the orchestra's inaugural concert at the Queen's Hall on 9 June 1904. There followed, in rapid succession, the Royal Albert Hall Orchestra (1905), the New SO and the Beecham SO (1909), all with access to an overflowing pool of players. None could offer enough secure employment to guarantee that long-term commitment and regular rehearsals which would have been conducive to ensemble and style, as with the best continental and American orchestras. At symphony concerts a London tradition of inspired sight-reading became deeply entrenched, even a source of pride, with conductors learning to cope.

By 1913, the last year of peace, it was a journalist's commonplace to marvel at or deplore the excess of London's musical calendar, ranging from rapturously received first English performances of *Der Rosenkavalier* to polite interest in Dolmetsch's clavichord. It made 'the head swim' exclaimed the *Daily Telegraph*, which carried notices of 50 concert and opera performances in a week, declared that 'efforts to create audiences . . . are useless' and doubted that all this activity 'denoted a musical nation'. A typical week began on Sunday 18 May with two afternoon concerts. At the Palladium the National Sunday League provided 'light orchestral music' with Yvonne Arnaud, musical comedy star and conservatoire pianist, in the Grieg Piano Concerto, and an 'immense audience' invaded the Albert Hall to hear Maggie Teyte, Kreisler and Backhaus, the latter in Grieg's Piano Sonata. On Monday an afternoon recital at the Aeolian Hall was followed by evening concerts at the Queen's, Bechstein and Steinway halls. On Tuesday afternoon Bechstein Hall offered a piano recital by the newcomer Artur Rubinstein; Aeolian Hall a vocalist with harp; and at Queen's Hall Casals, Thibaud and Bauer attracted a small audience because trios were 'seldom played'. That evening vocalists at the Aeolian and Bechstein halls probably fared similarly, if only because the week's attractions at Covent Garden included Caruso in *Pagliacci* and Destinn and Scotti in the latest novelty, *Tosca*. On Wednesday there were three afternoon and four evening concerts of no great account (one conducted by Serafin), but on Thursday afternoon, in addition to a singer at the Bechstein Hall, Teyte was at the Queen's Hall for 'barely an hour' with two intervals, in Debussy 'perfectly sung' and 'paltry American songs only fit for a ballad concert' (*The Times*, 23 May 1913). That evening a Wagner centenary concert at the Albert Hall, a violinist at the Steinway, and vocalists at the Bechstein and Aeolian entertained those who could not attend Melba's 'rentrée' in *La Bohème* at Covent Garden. On Friday afternoon, while Isolde Menges played the Brahms Violin Concerto with Nikisch at Queen's Hall, the London String Quartet occupied Bechstein Hall; and that evening the LSO were in the large venue while Comtesse Hélène Mersztyn gave a piano recital at the Aeolian. Saturday afternoon offered only the Wessely String Quartet and a piano recital by Egon Petri.

When London's musical life was torn apart by war, a surfeit of musical events was followed by dearth. The open international market was disrupted by the removal of 'enemy' performers, and such leading contemporary composers as Richard Strauss got short shrift. But despite 'Hun-baiting' by some hitherto obscure piano makers and a measure of muck-racking journalism, with Bechstein Hall a significant casualty, there was remarkably little concession in repertory to nationalistic sentiment: the old masters, including Wagner, remained in central place. The return to peace in 1918 brought 'business as usual' back to music, with a flood of returning soloists seeking London platforms. But there was little sign of that loyal audience which Newman and enthusiasts for the musical appreciation movement had hoped to build. The rapidly growing suburbs provided their own centres of entertainment, one form of which, the cinema, soon engulfed all others. The omnipresent 'silent' cinemas were invariably accompanied by continuous music – much of it standard classics – and employed the overwhelming majority of professional instrumentalists. Their influence upon the education of future audiences held promise; but the immediate effects on concert life were less auspicious, notably in the quality of orchestral playing. The demand for rank and file players was buoyant as never before; but foreigners were excluded by work permit regulations, and women instrumentalists, who had entered and even led orchestras in wartime, were no longer welcome. When Newman died in 1926 it seemed likely that even the Queen's Hall would become a cinema. If that calamity, avoided only by the BBC's intervention, best symbolized the immediate crisis in concert life, its deeper malaise was recognized by many contemporaries in 1927, when a visit by Furtwängler's Berlin PO demonstrated what was lacking in routine London performances. Another notoriously public incident was when Schnabel explained in a letter to *The Times* that a Mozart concerto had been inadequately prepared and that his offer to subsidize rehearsals was nullified by the use of deputy players. Thus were London standards mocked until, quite suddenly, the rot was stopped.

Standards of orchestral playing in London were transformed within a few years by a transformation of the city's musical environment. The successive blows dealt by 'talking' cinema, the slump and long depression, and the slower but relentless collapse of the old piano culture, cumulatively destroyed employment opportunities for the vast majority of musicians. Henceforth orchestras could be selected with relentless discrimination, then rehearsed and disciplined as never before; and there were conductors with the skill and will to exert such command. Similarly unprecedented was the beginning of substantial patronage for music, with long-term commitment and lofty ideals, again for the spread and improvement of musical taste. In 1930 the BBC created Britain's first permanent symphony orchestra with full-time contracts, while a society for the promotion of contemporary music was founded in London in 1931 as the Macnaghten Concerts. The following year Beecham established the London Philharmonic Orchestra, with contracts less exclusive, but sufficient to ensure stability for the decade. Its legendary first concert – Berlioz's overture *Le carnaval romain*, Mozart's Prague Symphony, Delius's *Brigg Fair*, Strauss's *Ein Heldenleben* – took place after 12 rehearsals and, as Ernest Newman wrote, informed 'you Londoners. . .

what an orchestra ought to be like'. Beecham's patronage came in part from the traditional but short-lived support of wealthy friends, its departure demonstrating the evanescence of such funding. Far more significant, for this enterprise and for the whole future of professional music-making, was the recording industry, now firmly based in London and, with the new electrical process, capable of financing, exploiting and documenting London's orchestral revolution: gramophone records amply demonstrate the new quality of playing. London concerts generally became more selective in repertory with less resort to the ragbag and second-rate; many recitals attempted some kind of austere balance; ballad concerts abandoned the metropolis, and even remnants of the Victorian parlour culture began to fade into oblivion.

With the disruption of war in 1939, cultural euphoria became fashionable with images of Myra Hess at the National Gallery and ordinary men and women uplifted by Beethoven's Fifth Symphony. The permanent audience for concerts, long coveted, was now thought to be attainable through the influence of responsible broadcasting and the gramophone. A plethora of concerts – in cinemas as well as the Queen's Hall until its destruction in 1941 and the Albert Hall thereafter – may have consisted mostly of a handful of Classical and Romantic works (the repertory of piano concertos now including ersatz cinema products) read at sight by scratch orchestras. But, it was claimed, indulgent repertory and performance could be attributed to wartime exigencies. The peace would offer utopia with, at long last, commitment from government and adequate licence.

For further information on institutions and venues, see *Grove6*.

VII. Musical life since 1945

1. Introduction. 2. Opera. 3. Concert life: (i) Postwar consolidation, 1945–60 (ii) New repertories, 1960s–mid-1980s (iii) Diversity and marketing initiatives from the mid-1980s. 4. Contemporary music. 5. Early music. 6. Popular music theatre: (i) Theatres and associated genres (ii) Influences on repertory (iii) International significance.

1. INTRODUCTION. The determined resumption of London's musical life after World War II re-established the pattern of mainstream professional concert and opera performances that had been in place during the inter-war years. This was maintained throughout the second half of the 20th century, despite the fact that during this period the musical environment changed radically. In that time the cultural assumptions on which the traditional pattern of musical life was based, together with the social, intellectual, economic and technological circumstances from which it developed, were subject to continuous challenge and modification. Yet the consequences of this process have largely been accommodated within traditional concert protocols, suggesting that the very familiarity of these conventions may have been a significant factor in their retention. London's musical life in this period was marked by two separate cultural upheavals, each associated with very different economic circumstances. The first of these occurred in the early 1960s, a period of radical thought at a time of public prosperity, as a strong reaction against the British musical status quo, characterized by a surge of interest in the alternatives offered by the avant-garde and historical repertories. The second, a postmodernist reorientation that gathered pace during the 1980s, asserted the principle of cultural relativism. By the early 1990s the canonical works of the traditional concert repertoire had lost their customary pre-eminence and were increasingly obliged to vie for audience attention with works from other musical traditions. The stock-market reversal of October 1987 initiated a deep economic recession in Britain; following abruptly from a period of growth and financial optimism, this generated a strong sense of economic deprivation and inequality in parts of London, spurring some minority ethnic groups to reassert their cultural identity through various art forms. The new climate of cultural pluralism encouraged the higher profiling of these and other popular traditions, so undermining long-held assumptions as to the appropriate beneficiaries of arts subsidy.

The postwar introduction of public subsidy for the performing arts was perhaps the most important single innovation of the period for music provision in London. The ARTS COUNCIL OF GREAT BRITAIN was established in 1946 to provide government subsidy at arm's length from government control. The Council's function followed from the morale-boosting work of the Council for the Encouragement of Music and the Arts (CEMA) and the Entertainments National Service Association (ENSA), whose sponsorship of orchestral and operatic performances during the war had generated an important new audience for classical music. The Arts Council's Royal Charter specified that it should 'increase the accessibility of the fine arts to the public' and 'improve the standard of execution of the fine arts'. For the first time, some of London's opera and ballet companies and orchestras received continuous public funding in place of sporadic private patronage, and the Arts Council provided the funds to establish a permanent opera company (later the Royal Opera) at Covent Garden, retrieving the building

from its wartime role as a dance hall. Also important was the 1948 Local Government Act, which enabled discretionary arts expenditure by local government; this helped to fund the London orchestras (channelled through the London Orchestral Concerts Board) and allowed growth in the range and scope of London's music festivals. Some 40 years later, however, the growing diversity in the city's artistic and musical culture generated public debate about the basis on which the Arts Council subsidized the arts. The agreement to broaden criteria for grants to the arts came just at the time of imposed constraints on public sector spending. One consequence was increased reliance by music organizations, especially the four contract London orchestras (the LSO, the RPO, the Philharmonia and the LPO) on business sponsorship as a primary source of funds. Such sponsorship is subject to changing circumstances and thus less secure in the long term.

The permanence and quality offered by the recorded format in the late 20th century effectively changed the economic basis of London's concert life. Where the financial basis of the commercial aspect originally lay in the inseparability of the performers' action and the musical sound, technology has made the performance into a vendible commodity completely independent of the point of origin. This produced the paradoxical situation where royalties generated from the sales of recordings were needed by London orchestras to subsidize their concert appearances; box-office revenue was simultaneously being reduced because the repertory was more cheaply and conveniently available in recorded form. Although this was a universal situation, London's abundance of professional performances accentuated its impact on concert life. For example, in 1993–4, recordings accounted for 28% of the four London contract orchestras' total schedule, with concert performance at 27% Another factor at play was the technology of the transistor radio and the electric guitar that had fuelled the rise of the pop youth culture of the 1960s; musical taste was fragmented away from the popular orchestral classics, an important element of CEMA and ENSA programmes. However, recording and broadcasting also affected concert life in directly musical ways, particularly in the higher standards they set for live performance, and the influence they exerted on musical fashion. The BBC's London presence (continually expanding from its pre-war basis), in the form of its orchestras, particularly the BBC SO, the Henry Wood Promenade Concerts and its studio recordings, made it a major contributor in London's music provision overall, and the single most influential arbiter of taste there in the late 20th century.

2. OPERA. World War II silenced opera at Covent Garden from 1940 until 1945. Sadler's Wells Opera continued presentations at the New Theatre and returned to its own theatre in 1945 with the historic first performance of *Peter Grimes* (under Reginald Goodall, with Peter Pears in the title role). Covent Garden had a visit from the S Carlo Opera of Naples before its own combined opera and ballet companies presented Purcell's *The Fairy Queen*. Ballet and opera henceforth shared the theatre equally. The new financial factor in British operatic promotion was the steady provision of state subsidy to opera through the Arts Council. Both the Covent Garden Opera Company (as the postwar company was called until its change in 1968 to Royal Opera) and Sadler's

41. Open-air audience at a BBC Prom in the Park, staged in Hyde Park in September, concurrently with the Last Night of the Proms at the Royal Albert Hall

Wells Opera (in 1974 renamed English National Opera) remained dependent on it. A continuity of management was established for both companies, which henceforth dominated the London opera scene.

There was hardly any challenge from speculative impresarios between the Stoll Theatre seasons of Italian opera of 1946–8 and the arena-style performances of *Aida* (1988) and *Carmen* (1989) presented by Raymond Gubbay at Earls Court to audiences exceeding 14,000, and later similarly at the Royal Albert Hall. There were also a few short-term productions of a more specialized nature, including transfers from New York of Menotti's *The Medium*, *The Telephone* and *The Consul* (Aldwych Theatre, 1948; Cambridge Theatre, 1951), and Gershwin's *Porgy and Bess* (Stoll, 1952).

The Sadler's Wells repertory established a firm foothold for opera in English, while at Covent Garden a brief foray into opera in English translation gave way to the pre-war ideal of international opera in (mainly) the original languages. Among composers whose new works were given at Covent Garden, from Vaughan Williams to Alexander Goehr, were Britten (*Gloriana*, *Billy Budd*) as well as Tippett, who with three operas established the most conspicuous presence; Birtwistle's *Gawain* was one of the very few contemporary English operas to be regularly revived. Sadler's Wells (later the ENO) gave new British works by Birtwistle, Peter Maxwell Davies, Bryars and others. Of non-British composers after Stravinsky, Henze was the best represented in London, from *Boulevard Solitude* (New Opera Company, 1962) to *We Come to the River*, a Covent Garden commission produced in 1976, and *Der Prinz von Homburg* (ENO, 1996). The Royal Opera also presented the first British performances of Stockhausen's *Donnerstag aus Licht* (1985) and Berio's *Un re in ascolto* (1989). The ENO staged Ligeti's *Le Grand Macabre* (1982), Glass's *Akhnaten* (1987) and Schnittke's *Life with an Idiot* (1995).

Homage to the Second Viennese School was belatedly paid with the first British productions at Covent Garden of *Wozzeck* (1952), *Moses und Aron* (1965) and the complete *Lulu* (1981, under Colin Davis). Hindemith's *Mathis der Maler* (1995) and Pfitzner's *Palestrina* (1997, following the first British production by Abbey Opera in 1981) were also given at the Royal Opera. Russian opera of the Soviet era included Shostakovich's *Katerina Izmaylova* (Covent Garden, 1963), Prokofiev's *The Fiery Angel* (New Opera Company, 1965) and *War and Peace* (ENO, 1973).

Handel's operas, previously confined to rare and specialized revivals, now earned a more general exposure, from Covent Garden's *Alcina* with Sutherland (1962) to the ENO's *Semele* (1999). Until the mid-1970s, the heroic castrato parts were reallocated to tenors. Thereafter such roles, along with the castrato roles in Mozart's *Idomeneo*, *La clemenza di Tito* and *Mitridate*, were usually restored to original pitch, either by female impersonation of the male characters or by the employment of countertenors, among whom James Bowman won prominence. London was, however, slow to adopt the operatic use of period instruments. Covent Garden's first hearing of such instruments was a performance of Rameau's *La princesse de Navarre* in 1977 by the English Bach Festival. Under the musical direction of William Christie, Covent Garden staged a revival of Purcell's *King Arthur* (1995, including the complete spoken parts), as well as Rameau's *Platée* (1997).

An increased interest in Baroque opera by no means diminished the taste for Wagner. The *Ring* was regularly staged at Covent Garden (notably under Solti); Sadler's Wells Opera (since 1968 at the much larger and more central Coliseum) presented an important new production under Goodall. The appointment of Bernard Haitink as the Royal Opera's music director in 1987 brought renewed prominence to Wagner's works with an acclaimed revival of *Die Meistersinger* (with John Tomlinson as Sachs) and a controversial new production by Richard Jones and Nigel Lowery of the *Ring*.

In 1994 the Royal Opera launched a 'Verdi Festival' under the auspices of Edward Downes with the aim of presenting all of Verdi's operas by 2001. These included concert performances of rarely heard early works such as *Il corsaro* and *Giovanna d'Arco*, as well as a joint production with the Paris Opéra Bastille of *Don Carlos* (in French, with Roberto Alagna in the title role), both versions of *Simon Boccanegra*, and *Stiffelio* and Verdi's later reworking of this opera as *Aroldo*.

The postwar era brought stars such as Hotter (1947), Geraint Evans (1948), Christoff (1949), Gobbi (1950), Callas (1952), Sutherland (1952) and Bumbry (1963) to London. During the following decades a number of international stars regularly returned to Covent Garden, among them Pavarotti, Domingo and Kiri te Kanawa. The 1980s and early 1990s saw many British singers leading major productions at both opera houses, notably Felicity Lott, Ann Murray, Thomas Allen, Philip Langridge, Anthony Rolfe Johnson and John Tomlinson. Among conductors Carlos Kleiber, Solti, Kubelík, Kempe and Haitink exercised decisive authority, as did Colin Davis, Charles Mackerras, Mark Elder and Edward Downes, whose careers embraced both London opera houses. To Kubelík and Mackerras is particularly due the important British cultivation of Janáček, while Mackerras's conducting of *Le nozze di Figaro* (Sadler's Wells, 1965) was an early instance of an 'authentic' approach in such matters as articulation and ornamentation.

Above all, however, this was the era when the stage director took on an increasingly conspicuous role. At Covent Garden the arrival of Visconti (1958) and Zeffirelli (1959) had a notable impact, as did the work of Peter Hall from 1965. At the ENO David Pountney, Jonathan Miller, Jones and Lowery staged similarly distinctive, if perhaps more controversial, productions from the 1980s. The greater freedom claimed by the director (including the choice of stage designer) brought a widespread departure from the more or less literal staging that had previously been the norm. The importance of the director's 'concept' which overlaid the original libretto could result in drastic transformations of varying artistic cogency. At the ENO, an updated *Hänsel und Gretel* (Pountney) and a 'de-Japanned' *Mikado* (Miller) were successful, while the Napoleonic setting for Cherubini's *Medée* at Covent Garden in 1989 (London's first staging with authentic French spoken dialogue) was a much derided example.

The tightening of the national economy in the 1980s caused financial worries and an increased drive to find private sponsorship. By the mid-1990s financial mismanagement, the long-term reduction in government funding, and the image of opera as 'élitist' placed the future of the art form in London, and more particularly of the Royal

42. Interior of the Vilar Floral Hall, Royal Opera House, Covent Garden, March 2000, following the restoration by Dixon Jones BDP

Opera, in serious doubt. The institution of lottery grants to assist capital building projects only partly alleviated such uncertainty. The additional resources aided the redevelopment of the Royal Opera (commenced in 1997), provided the ENO with funds for a site feasibility study and a stabilization grant, and enabled the construction of the new Sadler's Wells Theatre (reopened 1998 for dance and opera). But they also engendered a greater degree of public scrutiny and calls for broader access to opera in return for continued subsidies. Changes in management at both the ENO and the Royal Opera in 1998 introduced some degree of financial and organizational stability. Throughout this troubled period opera remained richly varied. The Royal Opera, performing at several venues while its own theatre was being refurbished, mounted its first production of *Paul Bunyan*, as well as a revival of *I masnadieri* at the Edinburgh Festival and in Germany (the planned London production had to be cancelled), and various concert performances including *Parsifal* (with Domingo) and Boito's *Mefistofele*. The ENO staged new productions of *Parsifal*, *Der fliegende Holländer* and Musorgsky's *Khovanshchina* and *Boris Godunov*, as well as the first British staging of Zimmermann's *Die Soldaten* (1996). Repeat visits to London by the Kirov Opera under Gergiyev brought concert performances of works by Prokofiev, Tchaikovsky and Shostakovich.

3. CONCERT LIFE. Between 1945 and the end of the 20th century, London's concert life was transformed by a considerable expansion and diversification of repertory on one hand, and a progressive decline in concert attendance on the other. This evolution falls into three distinct phases. The first 15 years saw the determined resumption of pre-war patterns: performances of a narrowly-drawn orchestral repertory of canonical (or exemplary) and popular works, enhanced by the visits of major international musicians who were eager to resume their London appearances. In the second phase, initiated by the 1960 Henry Wood Promenade Concerts (the first season planned by William Glock, newly appointed as controller of music at the BBC), innovatory programming incorporated new repertory drawn from modernist and early music, complemented by the exploration of unfamiliar works by the central composers. In the third phase, from the 1980s, London's culturally diverse population began to generate alternative experiences in the shape of world musics, 'crossover' and new age concerts, while improvements in the quality and available range of recorded music meant that people relied less and less on the concert as their main means of enjoying music and expanding their knowledge of it. Musical organizations attempted to counter declining interest through programming and marketing initiatives designed to make concerts more attractive and informal to new and younger audiences.

(i) Postwar consolidation, 1945–60. After the war London's orchestras had to adjust to the return of players from the armed forces and to recruit new members. By 1949 there were three full-time concert orchestras – the LSO, the LPO and the BBC SO – and three giving occasional concerts: Walter Legge's Philharmonia (primarily an EMI recording orchestra), Beecham's RPO (initially making recordings and serving the Royal Philharmonic Society's concerts), and the ad hoc New London Orchestra (centred on the New London Opera Company). In addition, a few chamber orchestras presented Baroque or Classical repertory (the former still very little played and usually in performances of symphonic dimensions) and occasionally new works; these groups included the Jacques, the Kalmar, the Boyd Neel, the Goldsbrough (now the English Chamber Orchestra) and the newly formed London Mozart Players.

Some cinemas also doubled as concert venues immediately after the war. The bombing of the Queen's Hall in May 1941 had destroyed London's most important orchestral and choral concert venue. The Promenade Concerts were switched to the Royal Albert Hall, where they remained through the rest of the century. The Central Hall in Westminster provided the main alternative venue until the building of the Royal Festival Hall (1951), which was a principal site for the Festival of Britain. It was initially unpopular because of its location (on the south bank of the Thames), its overall appearance and its dry acoustic.

Writing in 1949, Ralph Hill argued that an overprovision of concerts featuring the standard classics and popular repertory meant that the average audience attendance for each was low, and that except for the Promenade Concerts the BBC SO should restrict itself to

specialist works beyond the financial scope of the commercial promoter. Hill also ascribed lower audiences to the high price of concert tickets for the younger and older age groups (the same groups that had been attracted by ENSA and CEMA's concerts during the war) and to the difficulty for suburban travellers of attending the inconvenient Royal Albert Hall location at the later starting time of 8 p.m. instead of the 6 or 7 p.m. of wartime concerts. Orchestral programmes of the period were conservative, relying on frequent performances of core works. The most performed composers in the 1948–9 season were Beethoven (including 15 performances of the 'Eroica' Symphony), Mozart, Tchaikovsky, Brahms, Elgar and Wagner; the menu of overture, solo concerto and symphony followed the pre-war pattern. Concerts in the 1950s virtually ignored the European and American avant garde and the work of the Viennese serial composers. (It is perhaps notable in this context that the rising generation of major British composers – Harrison Birtwistle, Peter Maxwell Davies and Alexander Goehr – and the new music enthusiasts John Ogdon and Elgar Howarth chose to study in Manchester rather than London.)

(ii) New repertories, 1960–mid-1980s. Musical modernism had its first real outlet in London when William Glock joined the BBC as controller of music in 1959, with responsibility for the Promenade Concerts from 1960 to 1973. Glock took a radical and innovatory approach to programming and repertory, encouraged a new generation of British performers in early and contemporary music, raised standards in the BBC SO and recruited Pierre Boulez as its chief conductor in 1971. The effect was to revitalize London's concerts, to bring the city's experience of the avant garde into line with that of European and American centres of musical culture, and to open up new opportunities to young British composers.

Several Arts Council reports in the 1960s and 70s alleged orchestral overprovision in London, though it was not until the 1990s that the question was seriously addressed and note taken of the decline in audience numbers that had by then gone on for decades. For example, the optimistic tone of Lord Goodman's Report of the Committee on the London Orchestras (1965) was in direct conflict with the decrease in audience size outlined in its statistical appendix. While Goodman acknowledged that 'too many concerts are played to halls which are half empty or worse', he was proud that London provided 'music on a scale befitting a great metropolis', and considered that the point at issue was 'whether the potential demand [of audiences] is fully exploited', rather than presenting concerts 'in the right places and in the right way'. However, the inescapable conclusion of the report was that 'present work available justifies the existence of rather more than three but less than four orchestras'.

The Royal Festival Hall (fig.43) became more central to London's concert life and accepted as an international venue. In 1967 came the addition of the Queen Elizabeth Hall and the Purcell Room to the South Bank site. As well as these and the Royal Albert Hall, concert venues in use in the 1960s included several cinemas, a variety of inner and outer London town halls and the Fairfield Hall in Croydon; open-air concerts were given at the Crystal Palace, at Kenwood House on Hampstead Heath and in other parks.

(iii) Diversity and marketing initiatives from the mid-1980s. Only 20 years after the Goodman report, London's concert life presented a very different face. The most exciting programmes were being given by new and revived chamber orchestras, specialist ensembles and choirs: the London Sinfonietta, the Nash Ensemble, the Fires of London and Lontano in 20th-century music; the Academy of Ancient Music, the English Concert, the Taverner Consort and Players, the London Baroque Orchestra, the Monteverdi Choir and the Tallis Scholars in historical performance and early music; the Academy of St Martin-in-the-Fields, the London Mozart Players, the City of London Sinfonia, the Orchestra of St John's, Smith Square and the English Chamber Orchestra in the mainstream repertory. Out of 1244 works performed in London in the 1991–2 season, only half were composed before 1900, while about 100 were written after 1982. The disadvantage of this diversification was that it tended to polarize the audiences attracted to different types of event; another threat to audience size was posed by small independent record companies taking advantage of the new, cheaper digital technology to broaden and diversify their repertoire. The cost of tickets and travel provided mounting disincentives to concert attendance, as did certain concerns of urban life: location, parking and personal safety.

The interaction of these factors meant that by the late 1980s a high priority had to be given to marketing concerts in ways that would attract specifically targeted audiences. The abolition of the Greater London Council and the winding up of the London Orchestral Concerts Board in 1986 left a vacuum in the capital's management structure. Greater London Arts (later the London Arts Board) was established, and the Arts Council also created an independent governing board with responsibility for artistic policy at the South Bank Centre as a whole. The centre, no longer simply a space for hire, became an integrated complex and the initiator in programming events and repertory around its resident orchestras and ensembles. This approach has been characteristic also of the Barbican Centre (opened 1982), which receives an annual subsidy from the City of London; both these venues have emphasized thematic programming of concerts and festivals, designed to link the work of the resident groups, a strategy that has helped to market the events and to generate audience interest. Major thematic festivals have included 'Mahler, Vienna and the 20th century' and 'Tender is the North' at the Barbican, and composer series at the South Bank. The significance of education for audience-building was boosted by the 1992 National Curriculum in music, with practical involvement in composition and performance replacing traditionally passive music appreciation. One technique has been to pair concerts and appropriate education projects, with children composing or improvising pieces under the influence of a programmed work, often supervised by orchestral players. Sometimes the results of these workshops were presented in conjunction with the concert performance.

In 1994 a *Review of National Orchestral Provision* was produced jointly by the BBC and the Arts Council, a conjunction that acknowledged the BBC's status in concert life. The BBC's role was now held to be not only the familiar one, 'to foster the growth of the art form', but also 'to keep the widest possible repertory of great music

43. Royal Festival Hall on the South Bank, designed by Leslie Martin and others, opened 1951

in performance'. While the review stated that 'orchestral music continues to dominate concert-giving in this country and draws larger audiences than any other [single] area of classical music', London's own musical diversification has made concert life there less reliant on symphony orchestra provision than any other city in Britain, and the question is less of provision and more of attendance. The fact that the growth in the Proms' audience during the 1980s and 90s was matched by decline at the Royal Festival Hall points to the special attraction of the Proms series (including its programming of new or unfamiliar works) and the significance of an identifiable profile for successful concert marketing. The location of the Barbican in the City of London confirmed the postwar shift in London's musical axis away from the surrounds of Oxford Circus, with only the Wigmore Hall and the BBC's Broadcasting House concert hall remaining in an area that had previously dominated the city's musical life since the 18th century. The Wigmore Hall, the traditional venue of solo and chamber music recitals, has experienced a revival because of its carefully themed concerts and choice of artists. It was managed by Westminster Council until it closed for refurbishment in the 1991–2 season and is now a trust. Meanwhile, individual promoters including Victor Hochhauser and Raymond Gubbay have met the niche market demand for 'spectacular' performances of such popular orchestral classics as Tchaikovsky's *1812* overture, many at the Albert Hall. Outdoor concerts, for example at Kenwood House, continue to attract strong support.

It has become clear that the single core audience for art music concerts which survived into the postwar years had ceased to exist by the century's end; it has been replaced by a variety of smaller audiences with more focussed areas of musical interest which may nonetheless sometimes converge, as for events featuring famous performers. It is probably the cheapness, convenience and variety of recorded and broadcast music that presents the biggest threat to the health of London's concert life; more pervasively than ever before, music faces questions about the relevance of live concert performance to its essence as an art form.

4. CONTEMPORARY MUSIC. The contemporary (or 'new') music spectrum in London in the late 20th century reflected in full the fragmentary nature of composition of the period, with its bewildering abundance and frequent interaction of written and improvised styles. While the contemporary mainstream has been able to define and develop itself largely within the existing concert and funding structures of musical life, other types of contemporary music such as experimental music, electro-acoustic and some 'crossover' or 'fusion' styles have tended to assert themselves outside these frameworks, showing their musical and sometimes political independence.

London concerts did not sustain ventures into the modernist and avant-garde music of Europe and North America until the 1960 Promenade Concert season, the first planned by William Glock (see §3 above). This contact was to change London's musical life in several important respects. First, it turned London from a provincial to an international centre of contemporary music. Secondly, the performance demands and different musical attitudes of the new music repertory generated a number of specialist ensembles, while injecting a fresh set of challenges for established orchestras. Third, it changed and revitalized the repertory given at London concerts. Fourth, interest in contemporary music was a prime mover in the rise in the number and quality of London's music festivals. All these factors established London as a productive centre for freelance composers. This helps to account for the fact that in London most contemporary music of the more traditional British kind was from the 1960s eclipsed under the welter of new musical influences, except for such specialist consumers as the Anglican Church.

Another factor that fuelled the work of both composers and performers was the strength of the patronage system for new music in London. This functioned not only at the institutional level (the BBC) and that of national subsidy for the arts (the Arts Council), but also among private individuals, trusts and commercial sponsors. The BBC played the single most crucial role in the dissemination of new music in London by means of its live concerts, as well as through a broadcasting schedule that allowed its audiences to catch up with not only the modernist repertory but also its polemics. The BBC implemented a commissioning policy that was intended to bring forward talented young composers, and employed some of them as producers. The shift in mainstream contemporary musical culture away from exclusively modernist preoccupations has meant that no controller of the BBC after Glock has been able, nor perhaps has needed, to take such a strong initiative over repertory. Contemporary music in London receives practical support from a wide range of musical and educational charitable trusts, festivals and concert series and musical organizations such as the London-based British Music Information Centre (a library resource and listening centre founded in 1967) and the Society for the Promotion of New Music. The latter runs a sophisticated information network, arranging concerts of works by emerging composers and educational projects. Festival and concert series such as those held at the Almeida Theatre offer a platform to composers and performers and act as a focus for the sponsorship that the festival culture encourages. Major concert series have included the Macnaghten Concerts (refounded in 1950), the Park Lane series (1956), which offers opportunities to young professionals, and the Redcliffe Concerts of British Music (1964). The 1980s also saw a rise in the number of composition options available on courses offered by universities and conservatories in London.

From the 1960s on, a number of ensembles were formed that specialized in the performance of contemporary music. Each of these groups established its own repertory, its own pool of specialist players (many of whom transmitted their skills through conservatory teaching) and its own audiences. The instrumental groups giving concerts of contemporary music in 1988 included the Fires of London, the London Sinfonietta, the Arditti Quartet, the Nash Ensemble, the Endymion Ensemble, Exposé, Gemini, the Grosvenor Group, Lontano, Metanoia, Music Projects/London and the Parke Ensemble. Important vocal groups were Electric Phoenix, Singcircle, London Sinfonietta Voices and the New London Chamber Choir. Some of these ensembles, such as the London Sinfonietta (1968), the Fires of London (1967, which ended under that name in 1987) and the Nash Ensemble (1964), achieved a particular stability in their different musical areas and so generated a significant corpus of late 20th-century concert works, with all the benefits to composers that this implies. The scoring of the Fires of London (which began as the Pierrot Players) was based on the instrumental ensemble of Schoenberg's *Pierrot lunaire*, plus a percussionist. The Nash Ensemble is a classically based chamber group with a commitment to new music. By 1993 the London Sinfonietta had given 216 world premières (including 98 commissioned works) and made 100 recordings. Its defining sound, characterizing much of its repertory, comes from a chamber orchestra formation of 14 players (with single strings) inspired by Schoenberg's First Chamber Symphony. The changes in concert life since the 1960s, together with current commissioning practice, have ended the traditional, concert-based process of repertory assimilation; contemporary works now tend to be established by means of recordings and broadcasts rather than repeated concert programming. Commissions usually provide for a first performance, and programmes often use premières to attract an audience, but, except for established composers, subsequent performances are usually difficult to secure.

Non-traditional concert venues came to be seen as stylistically more appropriate surroundings to hear new repertory. These have ranged from the expanse of Camden's Round House (an informal space, formerly a turning-shed for railway engines), the Conway Hall in Holborn and the Horticultural Halls in Westminster, to the bare-bricked intimacy of the Almeida Theatre in Islington. The Queen Elizabeth Hall in the South Bank complex offers a compromise in the form of a building that is modern in spirit, with a medium-sized, informal auditorium and an adaptable stage area. The flexibility of a venue is an important consideration both because of the importance of music theatre in post-1945 composition (see also §2 above) and because of the unique formations of instrumental forces which characterize many concert pieces.

The fragmentation of London concert audiences during the second half of the 20th century, which had an adverse effect on some aspects of London's concert life (see §3 above), worked to advantage in the area of contemporary music, where committed audiences were built up through astute thematic programming (designed to provide the listener with a sense of artistic context) sometimes combined with 'meet the composer' events, workshops and talks, all of which also developed a communal sense of musical interests. The compositional shift that has moved much contemporary music away from the avant-garde ground it occupied during the 1960s, towards the more listener- and performer-friendly idioms of 1990s' postmodernism, has fuelled an enthusiasm for high-profile contemporary premières that recalls the attraction that new works had for an 18th-century audience in the same city.

5. EARLY MUSIC. Even before 1945 early music, especially that of the Renaissance, had been a significant element in London's musical life. From the 1880s onwards Latin polyphony formed part of the Bach Choir's repertory, and the following decade saw Arnold Dolmetsch's first London concerts using old instruments. R.R. Terry's pioneering work at Westminster Cathedral before and during World War I brought much continental and English polyphony, including the masses of John Taverner, back into use, and at the same time the English madrigal repertory was being explored by groups such as Charles Kennedy Scott's Oriana Madrigal Society. The early 1920s experienced a short-lived but intensive wave of enthusiasm for 16th-century English music, commonly referred to as 'Elizabethan Fever', whose manifestations included widespread celebrations of the Byrd, Weelkes and Gibbons tercentenaries, an attempt to establish an Elizabethan Competitive Festival in London, the first notable early music recordings (of madrigals performed by the English Singers, who were the first professional vocal consort in Britain to specialize to some extent in this repertory), the first early music broadcasts and the foundation of the Haslemere Festival in 1925, as well as much scholarly activity.

For the first few years after 1945 live performances were less important to the development of an audience for early music than broadcasting. From its inauguration in 1946 the BBC Third Programme included much early music in its programmes, beginning with the monumental History in Sound of European Music, and continuing with many short series devoted to particular types of music, and exploring the then little-known medieval period as well as the relatively familiar 16th century. At the same time the widening of the recorded repertory that resulted from the development of the LP record led to a large number of early music recordings by groups such as the Deller Consort. There were a few professional lutenists and viol players, but many performances and recordings perforce used modern string and wind instruments.

In the later 1950s and early 1960s the growing popularity of Monteverdi's Vespers and events such as performances of *The Play of Daniel* and visits from distinguished foreign ensembles, including Noah Greenberg's New York Pro Musica, represented the first steps in the large-scale revival of interest in early music which began in earnest a few years later. For the first time reproductions of medieval and Renaissance instruments other than viols were being made and coming into professional use; it was a common criticism of many concert programmes and recordings in the later 1960s that the emphasis was more on exploiting the new instrumental sounds, especially those of the more exciting wind instruments, than on the quality of the music. Two of the most important ensembles that rose to prominence at that time were Musica Reservata and the Early Music Consort of London, whose director David Munrow did much not only to popularize early music but also to raise the technical standard of early instrument performance, as well as leading the move away from programmes based on dances and other short pieces to ones including a proportion of larger-scale works of greater musical significance. One of the most important ensembles was the Consort of Musicke, directed by Anthony Rooley, which specialized in a systematic exploration of the Italian madrigal repertory. Rooley was also a strong influence on the more general development of interest in early music, founding an Early Music Centre in London and encouraging the spread of amateur as well as professional activity; such was the growth of enthusiasm that in 1973 it was possible for Oxford University Press to found a specialist quarterly journal, *Early Music*.

During the last quarter of the 20th century the practice of using period instruments and performing styles was increasingly applied to later music, initially that of the later 17th and 18th centuries, as performed by such groups as the Academy of Ancient Music, founded by Christopher Hogwood, and the English Concert, directed by Trevor Pinnock, but more recently to much 19th-century music as well. The Tallis Scholars, directed by Peter Phillips, are one of the principal vocal ensembles to specialize in Renaissance polyphony, while the Gabrieli Consort, directed by Paul McCreesh, and The Sixteen, directed by Harry Christophers, are among the ensembles whose activities cover both Renaissance and later music, but there are many groups of all kinds performing and recording regularly.

6. POPULAR MUSIC THEATRE.

(i) Theatres and associated genres. As an international centre for popular musical theatre, London's identity in the first half of the 20th century combined elements that clearly reflected its position both geographically and culturally between Europe and the USA. Since 1945 the West End–Broadway axis has come to dominate the focus of attention, although European links have remained despite the huge decline in operetta performance. This emphasis is shown in the changing repertory of those main theatres most closely and continually associated with the genre, including the Theatre Royal (Drury Lane), His (later Her) Majesty's, the Palace, the Prince of Wales and the Adelphi. Drury Lane, for example, is typical in its swings between American and British shows and in its trend towards ever longer runs. In the 1930s and 40s it was occupied by the musical romances of Ivor Novello, and during the war acted as the headquarters for ENSA; it opened after the war with the much heralded but ultimately disastrous *Pacific 1860* by Noël Coward. This was followed by a series of American shows that began with *Oklahoma!* (1947) and continued through the 1950s with *The King and I*, and through the 1960s with *Camelot*, *Hello, Dolly* and *Mame*. In the 1970s a revival of *The Great Waltz* achieved success with its European flavour and the following new English musical *Billy Liar* gave a further British presence until the long occupation of David Merrick's Broadway stage version of *42nd Street* (1984–9), the classic American backstage story. From 1989 Drury Lane presented *Miss Saigon*, a show by the French writers Bloublil and Schönberg, produced by the British company of Cameron Mackintosh, and which closed ten years later.

Other West End theatres have had important but occasional associations with popular musical theatre. The Prince Edward had originally been opened in 1930 to house large musical shows and subsequently was renamed the London Casino (1936), but by 1954 its large scale made it ideal for conversion to a Cinerama screen; it was re-established as a theatre under its original name in 1974, subsequently staging the first productions of *Evita* (1978–86), *Chess* (1986–9) and *Martin Guerre* (1996–8), along with the Broadway production of *Crazy for You* (1993–6) and Hal Prince's production of *Showboat*

(1998). The Coliseum was the venue for the first London productions of *Annie Get Your Gun* (1947) and *Kiss Me, Kate* (1951), shows which, along with *Oklahoma!*, are significant in the postwar establishment of the sense of an 'American invasion' of West End musical theatre. *Kiss Me, Kate* was presented again at the Coliseum by the ENO in 1971, one of the isolated cases of a musical being absorbed by the opera house in London. Sadler's Wells saw the first major London production not by the D'Oyly Carte Company of a Gilbert and Sullivan work in *Iolanthe* (1962) and was home to several operetta revivals in repertory in the early 1970s. Gilbert and Sullivan has been a continually present if increasingly less consistent force through the various incarnations of the D'Oyly Carte Company (at the Savoy, Sadler's Wells, Prince's and Queen's theatres, among others), the ENO's *Patience* (1969), *The Mikado* (1986) and *Princess Ida* (1992), and occasional independent productions.

Although variety as a genre had effectively ended throughout most of the country by the late 1950s, personality-led variety maintained a longer presence in the capital, particularly at the Palladium and the Prince of Wales. Increasingly these limited runs were confined to single performances in concert format at venues such as the Royal Festival Hall and the Royal Albert Hall. The role of the television entertainer or pop star in the West End has become one of appearances in such musicals as *Joseph and the Amazing Technicolour Dreamcoat* and *Grease*, mutually beneficial to both the commercial success of the show and the public profile of the personality, and seldom requiring the suppression of the star's known public persona to dramatic requirements. The number of such popular personalities who have convincingly taken to West End theatrical roles is limited, and includes Tommy Steele (*Half a Sixpence* and *Singin' in the Rain*), Petula Clark (*The Sound of Music* and *Sunset Boulevard*) and Brian Conley (*Jolson*).

The role of intimate revue, prominent as sophisticated entertainment in the 1940s and 50s was finished as a mainstream theatrical force by the 60s, mostly through the greater ability of television satire to respond more quickly to current events. In its final few successful years it provided memorable platforms for performers such as Hermione Gingold, and was particularly associated with the Lyric Hammersmith and the Ambassadors theatres. While musical satire still appears occasionally in fringe shows, its West End appearances have been through limited concert-style engagements of specific groups whose audiences have been gained through radio and television. The Mermaid Theatre in the City of London, opened in 1959 with Laurie Johnson and Lionel Bart's musical *Lock Up Your Daughters* but only intermittently active in the last part of the 20th century, became particularly associated with compilation revues after its *Cowardy Custard* (after Noël Coward, 1973), which became a great Broadway success under the title *Oh! Coward*. It was followed by *Cole* (after Cole Porter, 1974) and *Side by Side by Sondheim* (1977), another Broadway success.

With the desire for spectacle at the heart of much musical theatre, there has been a premium on the occupancy of those few venues that could cope with large-scale effects. In particular, the expansion in the late 1970s and 80s through renewed interest in the form of the musical and the advanced technologies employed for its presentation (for example with *Time*, 1986) threw this into relief. The practical considerations that made Drury Lane appropriate to stage an earthquake or the sinking of an ocean liner for Ivor Novello in the 1930s were equally applicable to that theatre's choice for *Miss Saigon* in the 1980s. As the larger theatres increasingly became occupied with long runs (latterly of 'mega-musicals' which are resident for more than a decade), and the production costs rose to levels only within the management of the large-scale organizations, other venues began to present musical shows on a smaller scale, often of newer works that were denied access to the West End. Of these the Donmar Warehouse, a former venue for tours and the Royal Shakespeare Company, established a reputation after its 1992 reopening for introducing more chamber-style works such as Sondheim's *Assassins* (1992) and Yeston's *Nine* (1996). Also in the 1990s the fringe theatre the Bridewell – a modern conversion of an industrial space, like the Donmar Warehouse – has taken on a role of presenting new productions and revivals of lesser-known works, while many other small fringe theatres have hosted intimate musicals requiring only a few performers.

(ii) Influences on repertory. The immediate aftermath of World War II was significant in establishing an approach towards the role and status of West End musical theatre that still persists. There was already a strong audience base created by the wartime demand for escapist entertainment, although productions were often hampered by wartime strictures. When *Oklahoma!* arrived from Broadway in 1947 it was the first American production in the West End for seven years and its advance publicity and musical familiarity contributed to its great success. Alongside the arrival of *Annie Get Your Gun* within months of *Oklahoma!*, the profile of American shows was high, offering something positive and escapist in the face of a Britain of shortages and rationing; they also presented youthful energy, something inevitably absent from much wartime theatrical casting. West End producers exploited this enthusiasm for American shows both through productions from Broadway and through home-grown shows which played to elements of what was perceived as an American style of musical theatre presentation and construction, as with John Toré's *Golden City* (Adelphi, 1950) – a South African *Oklahoma!* – or Ivor Novello's last stage work, *Gay's the Word* (Saville, 1951–2), which took the stylistic debate between American and British musical theatre as its subject.

There has always been a symbiotic relationship between the repertory and fringe theatres and the West End, one in which new performers and new shows under development can be presented to agents and producers for potential West End exposure, while the gradual release of familiar West End successes to regional and fringe theatres maintains a living repertory and renews interest in the form. Sandy Wilson's *The Boy Friend* (Wyndham's, 1954–9) was developed from a single-act entertainment from the Players' Theatre, while *Salad Days* (Vaudeville, 1954–60) was written by Julian Slade as an 'end of term romp' for the repertory company of the Bristol Old Vic. Neither was conceived as a West End vehicle, yet both transferred there in 1954 to achieve runs of over 2000 performances, providing a temporary diversion from the American-dominated view of the West End.

Another source of innovation came from outside the West End, at London's Stratford East, where Joan Littlewood's experimental company was developing a theatre based on more recognizable everyday life, rather than the removed fantasies of a theatre essentially for an educated middle class. Their surprise success, *Fings Ain't Wot They Used t' Be* (1959), with music by Lionel Bart, incorporated slang and an unromanticized East End setting; it became a huge hit, also marking a contemporary move in theatre in general towards the presentation of greater realism. Mostly, however, there has been a limited role for London in receiving transfers of productions from regional theatres.

The focus of the theatrical producer has shifted substantially as economic demands have escalated. Whereas C.B. Cochran was able to cultivate the creative relationship of Vivian Ellis and A.P. Herbert through their three shows *Big Ben* (1946), *Bless the Bride* (1947) and *Tough at the Top* (1949), increasingly the tendency has been to find immediate and proven successes that minimize the risk of financial loss. This has led to an increasing number of revivals of the most familiar parts of the canon: the 1937 show *Me and My Girl* in a revised form achieved long West End and Broadway runs in the 1980s and *West Side Story* is a West End perennial. Also, the repackaging of familiar material has become common, as with the revue-style shows based round the output of a single composer; examples include the Mermaid Theatre shows of the 1970s and the use of songs by Louis Jordan in *Five Guys Named Moe* (Lyric, 1990) and by Leiber and Stoller in *Smokey Joe's Café* (Prince of Wales, 1997). The length of runs has also extended, increasing the potential of return to investors; whereas C.B. Cochran closed *Bless the Bride* (Adelphi, 1947–9) when still playing to capacity in order to try a new show, by the 1990s several mega-musicals had achieved the status of tourist landmarks and with a corresponding emphasis on merchandizing. Consequently, they seem assured of even longer runs; these include *Cats* (New London, 1981), *Les Misérables* (Palace, 1985) and *Phantom of the Opera* (Her Majesty's, 1986), all still running in 2000. The hold of a limited group of production companies behind such ventures has been further emphasized with the subsidies to the Royal National Theatre for the staging of selected musicals from Cameron Macintosh, the production company for *Miss Saigon* and *Phantom of the Opera* in London and around the world. Although the resultant stagings have been much acclaimed, the exclusive American bias has led to a debate about the role of the National Theatre programming in balancing the presentation of world theatre and works of British origin.

Although such a bias corresponds to that of much of the postwar commentary on London's musical theatre, the supposed domination of the West End by Broadway since *Oklahoma!* in 1947 is by no means so clear-cut. The postwar 'American invasion' was more a point of view than a tangible reality: those few American shows that did achieve long runs were for the most part outperformed by contemporary British shows: *Carousel* at Drury Lane (1950–51) was significantly outrun by its contemporary but now forgotten *Blue for a Boy* at His Majesty's (1950–52). However, the self-fulfilling prophecy resulted in a crisis of confidence, one which was not to dissipate until the start of the Lloyd Webber-Rice canon in the late 1970s. This attitude has also shown how London musical theatre has frequently aspired to the merits of Broadway, but underplayed both its own different demands and the sheer range and number of its own productions.

(iii) International significance. Several shows from 1945 onwards have gained success on Broadway and in film from the West End, such as Bart's *Oliver!* (New Theatre, 1960) and Heneker's *Half a Sixpence* (Cambridge, 1963). *The Rocky Horror Show*, which began in the Royal Court Theatre Upstairs (1973), transferred to several other theatres before reaching the Comedy Theatre (1979), and subsequently became an international cult hit through the film (1975). From 1935 to 1951 Ivor Novello was hugely successful, writing and composing to please the West End public through catchy melody and dramatic staging, and his name was sufficient to ensure high advance sales and long runs; his two large shows, *King's Rhapsody* and *Gay's the Word*, ran simultaneously in the West End in 1951. His mixture of artistic creativity and production control was potent and has parallels with Andrew Lloyd Webber, the instigator of many of the dominant musicals in the West End in the 1980s and 90s. Lloyd Webber has equally captured a public imagination and had even more shows running at the same time in the West End, but has also found global success commensurate with the increased cultural dissemination. With the international roles of the Really Useful Company of Andrew Lloyd Webber (whose shares were floated on the stock market for four years) and Cameron Mackintosh, productions that originated in London have been reproduced exactly in leading cities around the world, and the role of London as an originator and disseminator of musical theatre has never been as strong as at the end of the 20th century.

This influence is, however, severely restricted by the interests of these few production companies and the limited number of shows they represent. For example, Mackintosh's production of *Miss Saigon* opened at Drury Lane in 1989 and by 1999 had been seen in some 60 cities, including Toronto (1993–5), Budapest (1994 and 1995), Los Angeles (1995), Vancouver and Copenhagen (1996), and Melbourne (1999). The works of Lloyd Webber in particular have met with large continental success, where Hamburg has hosted long-running licensed productions of *Phantom of the Opera* and *Cats*, and new or newly adapted theatres dedicated to his works have been opened in Bochum (for *Starlight Express*), Basle (*Phantom of the Opera*) and Wiesbaden (*Sunset Boulevard*). Invariably, this move towards the pre-packaged musical has lead to a decline in the significance of the individual performer in already established shows and acted as a brake on the further evolution of the form of the musical through the reduced turnover of different shows and productions. The London theatres traditionally associated with the musical are now seldom free for new productions: at the start of 1999 runs of over a decade were occupying Drury Lane (*Miss Saigon*), the Palace (*Les Misérables*), the New London (*Cats*), the Victoria Apollo (*Starlight Express*) and Her Majesty's (*Phantom of the Opera*).

While many fundamental ideas on the role of popular musical theatre have remained much as they were at the time of their Gaiety Theatre inception in the late 1890s and 1900s, the scale of their financial significance has grown enormously. Indeed, the large part that tourism plays in the financing of London has made that city's theatre in general and musicals in particular of worldwide

commercial interest; coach parties of British and foreign tourists account for much of the ticket sales, and musicals are routinely included with holiday packages. The control of most of the main theatres through a limited number of companies, particularly those of Stoll Moss and the Really Useful Company, has lead to a scale of coordinated promotion not previously seen in the capital. Although such large company interests are sometimes in opposition to an art form that relies on individual creativity, by the end of the 20th century the number of productions and their public popularity had never been as strong.

VIII. Educational institutions

Until the Royal Academy of Music was founded in 1822 London, like most European capitals, had no specific institution for the professional training of musicians. For most of those who intended to make music their career, the medieval system of apprenticed or articled pupils still took the place of a central institution; in the case of organ pupils trained in a cathedral loft the system survived until the mid-20th century. The first general training-ground for musicians over the centuries was often provided by membership of a cathedral choir; many former choristers of St Paul's Cathedral and Westminster Abbey made music their profession. Above all, the Chapel Royal (see §II, 1, above), which had the power to impress talented boys as choristers, attracted gifted youngsters who received sound musical training and were encouraged to compose. During the 18th and 19th centuries, it became increasingly common to look on musical skill as exotic; when the RAM was eventually founded, most of the first professors were foreigners.

1. The Gresham Chair of Music. 2. Universities. 3. Conservatories. 4. Other institutions.

1. The Gresham Chair of Music. The seven Gresham professorships (in divinity, law, rhetoric, music, physics, geometry and astronomy) were established in the City of London in 1596 to provide free adult education under the will of Sir Thomas Gresham (1518–79): the holders were required to lecture twice weekly, free of charge, in Latin

for the benefit of foreigners and in English for citizens. John Bull was the first professor of music; having no Latin, he was permitted to lecture in English only. Another distinguished early professor was William Petty. Not until the appointment of Edward Taylor in 1837 were the Gresham music lectures again delivered with real competence; the use of Latin and the twice-weekly lectures had by then been abandoned, and lectures were only occasional. More recent professors have included Frederick Bridge, Walford Davies, Antony Hopkins, Iannis Xenakis and John Dankworth. In 1985 an eighth chair, in commerce, was instituted.

One reason for the failure to appoint musicians to the Gresham Chair during the 17th and 18th centuries lay in the lack of general education the articled pupil system imposed. Many able practical musicians lacked any wider culture until the last quarter of the 19th century. Indeed, the first proposal to introduce degrees in music at the University of London in 1865 failed because leading musicians protested that it was unreasonable to insist on the matriculation of music candidates.

2. UNIVERSITIES. The University of London, founded in 1837, did not confer degrees in music for its first 40 years. In 1876 the senate, on receiving a memorial from the council of Trinity College, agreed to institute the degrees of Bachelor and Doctor of Music. The first examinations were in 1877. The university nevertheless had no music faculty and no professorship until Frederick Bridge was appointed to the new King Edward VII Professorship in 1903 (Trinity College brought about this development by giving £5000 to found the chair). The preparation of candidates for examination, however, formed no part of the professor's duties. Up to 1964 the only internal candidates for the BMus degree were students in the colleges of music (the RAM, RCM and Trinity College), Goldsmiths College (at that time an independent college of the university with a music department preparing students for the BMus degree and education diplomas in music), and other institutions where there were teachers recognized by the university. External candidates prepared in other institutions or by private tuition were also admitted to the examinations. No facilities for the study of music existed within the university until an active teaching department of music was established at King's College under Professor Thurston Dart in 1964. King's College subsequently established two further professorships, one in 1992 in performance studies, later named after Thurston Dart, the second in 1994 in composition, named after Henry Purcell.

The taught degrees at the three colleges (King's, Royal Holloway and Goldsmiths) formerly conformed to a common syllabus and examinations but, since the mid-1980s, the undergraduate and, more recently, the postgraduate courses have been gradually devolved to the separate colleges which are in effect independent. Their degree programmes tend to be broadly based, covering a wide range of historical, technical and creative aspects of musical studies, offering opportunities for specialization at the higher levels. The university's distinguished School of Oriental and African Studies offers specializations in non-Western music.

By 1988 King's College had become an international community, each year attracting 35 undergraduates, over 20 masters students and about six research students working at doctoral level. A large lecturing staff supported by a team of assistant teachers not only covers all the periods of musical history, composition and analysis but also the requisite ancillary skills.

Music has played a prominent role in the life of Royal Holloway College (now Royal Holloway and Bedford New College) since its foundation as a university college for women in 1886; Emily Daymond, a pupil of Parry and the first woman DMus in the country, was the first director of music. Although practical music, and later history and theory, was taught as part of the general curriculum, a department of music was established only in 1969–70 under Ian Spink. In 1999 it had 12 academic staff plus postdoctoral research fellows covering music history, analysis, performance, composition and ethnomusicology. The annual intake includes some 50 undergraduates pursuing the BMus and BA degrees, and 20 postgraduates (MMus, MPhil, PhD). The department has taken the lead in developing teaching and research collaborations with partner institutions in the European Union and in Central and Eastern Europe.

In 1988 Goldsmiths College became a School of the University of London and assumed the same status as King's and Royal Holloway, offering the same range of degree courses. The college has a strong commitment to composition, performance (including jazz and experimental work) and ethnomusicology. It has developed a particular ethos for musical activities across a wide variety of idioms and genres and in creative and performing arts. This work is enhanced by its Centre for Russian Studies and the Stanley Glasser Electronic Music Studio. The College has close links with the community in south-east London, and through its department of professional and community education runs an extensive range of part-time courses.

The School of Oriental and African Studies (SOAS) is the leading centre in Europe for the study of Asia and Africa. Of a student body of some 3000 about 80 take courses in music, taught by seven academic staff and a variable number of performance teachers. The department of music offers a unique musical education through ethnomusicology and regional music studies.

Music has been a subject of research and teaching at SOAS since 1949 when a lectureship was created in Indian music. Since then the musics of Africa, the Islamic Middle East, South-east Asia and East Asia, the study of ethnomusicology as a discipline, and interests in Chinese and Jewish musics have been developed. In 1979 a centre of music studies was created and this became the department of music in 1998. Degrees offered in 1999 included a joint honours and a single honours BA, an MMus in ethnomusicology, and MPhil/PhD by research.

Other musical activities include concerts of Asian and African music, seminars, academic conferences and summer schools. The department enjoys a reciprocal teaching relationship with King's College and an academic exchange agreement with the department of music, Kathmandu University.

The University of Surrey, developed from Battersea Polytechnic in 1966, is located in Guildford. The music department was formally established in 1970 when the first professor was appointed. It offers bachelor and higher degrees and is especially noted for its unique and well-established BMus Tonmeister course in the theory and practice of sound recording. This four-year course allows students to spend their third year working in the

appropriate industries. The department has about 50 undergraduate students and a number of research students in musicology and composition.

City University is situated in London, between the centre of Islington to the north and the Barbican Centre to the south. There are 150 students in the music department comprising 80 BMus/BSc students and 70 full- and part-time postgraduates pursuing MA courses in ethnomusicology, composition, electro-acoustic composition, musicology and music performance studies; MSc/postgraduate diploma in music information technology, and research courses (MPhil/PhD and master/doctor of musical arts). There are eight full-time academic members of staff, one research fellow in music therapy, and specialist visiting lecturers in sound recording, composition, Indonesian music and African music. All individual performance tuition is provided by professors at the GSMD.

The research interests of the academic staff are reflected in the courses offered. The BMus/BSc honours degree in music is concerned with music in today's multicultural and technological society. It adopts a global and interdisciplinary approach to music, and includes the study of the traditional and popular musics of the world as well as classical traditions other than the Western. The department houses a wide range of ethnic instruments including three Indonesian gamelans from Bali, central Java and Sunda. It offers exciting new perspectives of the world of sound, interpreting music in its widest sense as part of our general environment.

Kingston University was developed from the former polytechnic and prior to that, Gipsy Hill College. The school of music offers the full range of bachelor and masters courses as well as supervision for research degrees. In addition, there is a secondary PGCE course, an MA in composition for film and television, and an undergraduate course taught in collaboration with the University of Hong Kong. The university also offers foundation and access courses for nearby colleges of higher education at Richmond and Merton respectively. Full-time student numbers in 1999 stood at 250, including 22 pursuing research. The school's research work focusses on world music, particularly Chinese music, music and mathematics, music technology, music education, performance and composition. The school is housed in four buildings on one site including a purpose-built professionally designed rehearsal hall/recording studio which has been used by EMI and the BBC.

Founded in 1887, the London College of Music has metamorphosed from an autonomous institution based in Great Marlborough Street to become part of what is now the Thames Valley University based in Ealing, west London. It has built on its original mission as a conservatory providing practical and theoretical studies in music. In 1997 it expanded to become the London College of Music and Media (LCM2) with its unique blend of music, media arts and creative technologies.

The merger between the London College of Music and the music department at Ealing College in 1991 saw the beginning of a new period of collaboration. The cultural enrichment from Ealing College with a new base in Ealing Film Studios offered opportunities for launching new courses to provide students with appropriate skills for the 21st century. A million-pound grant in 1997 enabled LCM2 to equip itself with the latest technology, mirroring its strong focus on contemporary music, performance and composition, developed since 1995. LCM2 stages over 100 performance events in the locality each year, reflecting its mission to involve the local community while providing students with vital performing experience.

The University of Surrey, Roehampton (formerly Roehampton Institute of Education), London is made up of what were four autonomous and historic colleges, Southlands, Whitelands, Frobel and Digby Stuart. In 1975 a collegiate structure was developed to form the institute whilst allowing each college to retain its own unique identity. All the music teaching is carried out at Southlands College. The music division has five full-time members of staff and several visiting lecturers engaged in research and performance in 20th-century music, acoustic and electro-acoustic composition, music in education, French music, cross-arts collaboration, music therapy, non-Western musics, music and gender, and west African drumming. Besides its undergraduate courses the division offers a graduate diploma and MA in music therapy which are recognized by the Association of Professional Music Therapists.

3. Conservatories. The first practical attempt to found a music school in London was made by Charles Burney in 1774. Impressed by the conservatories in Naples and Venice, where he had witnessed the remarkable effect of a longstanding tradition of providing musical training for orphans, Burney urged the adoption of a similar plan at the Foundling Hospital in London, already noted for the music of its chapel services. At first well received, his scheme was soon lampooned by a pamphleteer whose sarcastic criticism of the hospital governors for entertaining Burney's proposal aroused opposition which led to its defeat.

Two important conservatories no longer in existence are the London Academy of Music and the National Training School for Music. The London Academy was founded by Henry Wylde in 1861; in 1904 three other institutions were amalgamated with it: the London Music School (founded 1865), the Forest Gate College of Music (1885) and the Metropolitan College of Music (1889), under the direction of T.H. Yorke Trotter; in 1905 the Hampstead Academy was also incorporated. Under Yorke Trotter the academy became a centre for the training of teachers according to his own system of music education for children. Throughout its history the London Academy included elocution and dramatic presentation among its activities; in 1935, under the direction of Wilfrid Foulis, its title was extended to the London Academy of Music and Dramatic Art (LAMDA). It moved from London at the start of World War II in 1939 and training ceased; in 1945 it reopened solely as a drama school.

The National Training School for Music was founded in 1873 and represented the fulfilment of a proposal by Prince Albert to afford free musical training to the holders of scholarships awarded on a national basis. The scheme had been discussed as early as 1854 and was revived after his death by the (Royal) Society of Arts. The school was opened at Easter 1876 with Arthur Sullivan as principal. 82 free scholarships 'in favour of particular towns and counties' had been established by donation, and more were promised. In 1878 a proposal to amalgamate the new institution with the RAM was defeated; but in 1882, by which time John Stainer had succeeded Sullivan as principal, it was replaced by the present RCM.

The six principal existing conservatories in London are discussed below in chronological order of foundation.

(i) Royal Academy of Music (RAM). The RAM was founded in 1822 at the instigation of John Fane, Lord Burghersh (later 11th Earl of Westmorland), and opened in March 1823 under the patronage of George IV; the first principal was William Crotch. The foundation committee had intended that it should be supported by subscriptions and donations, and that there should be 80 resident students, half boys, half girls; but because of shortage of funds the academy opened with only 21 students, aged between ten and 15. It was housed in a building in Tenterden Street, Hanover Square. In 1827 the financial position was so disastrous that the academy's closure was avoided only by an appeal for donations and an increase in fees.

The academy received its royal charter on 23 June 1830. In 1834 William IV directed that a quarter of the proceeds of the Westminster Abbey music festival should be given to the academy. A board of professors was appointed in 1853 to advise the committee of management; it recommended that students should no longer be resident, and requested an annual grant from the government. £500 was granted under Gladstone in 1864, but Disraeli refused to continue the grant in 1867 and an attempt was made to close the institution. The professors were then able to insist on the formation of a new board of directors on which they were strongly represented. The grant was renewed in 1868 with the return of Gladstone's ministry, and from that year the academy began to prosper.

The academy moved in 1912 to its Marylebone Road premises, which were extended and enlarged in the 1960s and again in the 1970s. Concerts are given in the Duke's Hall, and opera performances in the Sir Jack Lyons Theatre (opened in 1977). On the appointment of Sir David Lumsden as principal in 1982, in succession to Sir Anthony Lewis, the academy embarked on its 'In pursuit of excellence' campaign, recruiting a number of internationally respected musicians, some of whom played an important part in shaping the academy's policy as well as its teaching. In 1991 the institution commenced its association with King's College in which a four-year BMus degree in performance was developed. This development displaced the GRSM diploma course that had been offered by the Royal Schools of Music for many years. Three years later the MMus degree commenced, thus allowing the principles and philosphy of the BMus course to be extended in a more specialized form. A redefinition of its relationship with King's in 1996 shifted the validation of the degree award to the University of London.

The academy marked its 175th anniversary in 1997, and with a grant from the National Heritage Lottery it was able to increase its overall space by a third with the purchase of 1–4 York Gate. This allowed for the rehousing of its collection of string instruments combined with the repair and manufacture of instruments. As a result of Government capping of funded places for home and European Union students since 1993, the institution was forced to reduce its student numbers. In 1999 these were 550.

(ii) Royal Military School of Music. British Army bands were officially recognized in 1803. They were equipped with instruments and uniforms by the officers of the individual regiments and trained by civilian bandmasters. The need to reform the system and to train bandmasters from within the ranks was first authoritatively expressed in 1856 by the Duke of Cambridge in a circular to commanding officers recommending the establishment of a Military School of Music. The school was opened in March 1857 at Kneller Hall, Twickenham. The first superintendent was a civilian, Henry Schallehn, a former bandmaster and director of the Crystal Palace Band, 1854–6; he had a visiting staff of four instructors. The school was acquired by the government in 1865. The first three superintendents were civilians, but in 1890 a bandmaster was commissioned and took charge of musical training at Kneller Hall, since when a commissioned officer has always held the post with the appointment of director of music. In 1998 the responsibility for musical training at Kneller Hall was vested in the chief instructor as head of department.

Five separate courses of training are provided: a foundation course in performance for new recruits to Army Music; two upgrading courses the first of which prepares junior non-commissioned officers in the musical management required for promotion to sergeant, and the second designed to train the more senior ranks in advanced musical and administrative skills; the honours degree course for bandmasters is a three-year course to train prospective bandmasters; and the advanced certificate of music is awarded to bandmasters who wish to be considered for promotion to the rank of captain and the appointment as a director of music.

(iii) Trinity College of Music (TCM). Founded by H.G. Bonavia Hunt in 1872 as a college of church music, this institution was incorporated with the title Trinity College, London, in 1875 (renamed Trinity College of Music, London, in 1904). Its activity was initially limited to the training of choirmasters, and the curriculum to an appropriate range of practical and theoretical studies: harmony and counterpoint, voice production, choir training and music history; but after 1876 all branches of music were included. In that year the college submitted a successful memorandum to the University of London urging the award of degrees in music, and for some years afterwards special provision was made in the college to prepare candidates for matriculation and consequent eligibility to proceed to the BMus. In 1902, after a petition to the university urging the establishment of a chair of music, the college endowed the King Edward VII Professorship, the first holder being Sir Frederick Bridge, then chairman of the college council.

Courses of training at undergraduate and postgraduate levels, including BMus and MMus degrees, are provided for performers and composers to a professional standard, with areas of particular interest including the pre-Baroque and improvised music. In 1999 there were more than 500 students undertaking undergraduate and postgraduate courses. Outreach courses are offered for teachers and professional musicians, with about 1000 teachers and performers registered in 1999. The college is also involved in community projects, and with the training of young musicians through its junior department, which was established in 1906.

A pioneer in the field of local examinations in music, the college instituted a system of certificate examinations in 1874 which includes speech as well as music and extends to over 1500 local centres throughout the world,

leading to the award of professional diplomas of fellow (FTCL) and licentiate (LTCL), and the associateship (ATCL).

The present buildings in Mandeville Place, off Wigmore Street, have been occupied since 1880, and extended in 1922 and 1964, and two other buildings in Marylebone provide practice and academic study facilities. The college has planned to relocate to the Royal Naval College at Greenwich in the year 2001.

(iv) Guildhall School of Music and Drama (GSMD). This institution was the first municipal music college in Great Britain, being founded in 1880 by the Corporation of London as the Guildhall School of Music and opened in a disused warehouse in Aldermanbury with an initial enrolment of 62 part-time students. The school quickly outgrew its first home and in 1887 moved to newly built premises in John Carpenter Street, Blackfriars. Further extensions became necessary in 1898, 1927 and 1970, and the school moved to new premises in the Barbican in 1977. In 1920 full-time courses were introduced and, in due course, departments of speech, voice and acting were established; in 1935 the school incorporated the two disciplines of music and drama. Stage management was introduced in 1970. A licentiate course in music therapy was introduced in 1968, jointly administered with the British Society of Music Therapy. This was superseded by the current postgraduate diploma in music therapy in 1987, validated by the University of York.

The school, which continues to be owned, funded and managed by the Corporation of London, has a typical annual full-time roll of some 650 students (about 520 music, 75 acting, 55 stage management) representing about 40 nationalities. There are in the region of 240 part-time students, a third receiving tuition as part of their music courses at City and Sussex universities.

Courses offered include: four year performance BMus (validated by the University of Kent); MMus in composition (one year, validated by City University); a postgraduate diploma in musical performance; advanced courses in opera, vocal studies, individual instrumental studies; orchestral training, jazz and studio music, and early music; and a diploma in continuing professional development (modular programme).

(v) Royal College of Music (RCM). Founded by royal charter in February 1882 under the presidency of King Edward VII, then Prince of Wales, the RCM took over the premises of the former National Training School for Music as well as continuing its policy of providing musical training for the holders of endowed scholarships awarded on a national basis. The governing body consists of the president and council; the president always being a member of the royal family. The college was opened in May 1883 under the directorship of George Grove, with 50 scholars elected by competition and 42 fee-paying students; Grove was succeeded by Parry, who was director until 1918. The rapid growth of its activities soon made the original building inadequate, and a new site in Prince Consort Road, to the south of the Albert Hall, was granted by the commissioners for the Great Exhibition of 1851; new and much larger buildings were opened there in May 1894 (the old building became the premises of the College of Organists, later the Royal College of Organists). A concert hall containing a fine organ, the gift of Parry, was added in 1901; in 1964 a further extension was added to the west of the original site, and the rebuilding of the opera school and the provision of a new recreation hall followed in 1973.

The college provides comprehensive training mainly for full-time students. Student numbers were reduced in the late 1980s, since when the RCM has aimed to offer places to 520 students (170 of whom are postgraduates). Courses are provided for composers and performers, providing opportunities for the development of professional skills, including teaching skills. Under the terms of its royal charter the college can confer degrees and diplomas in music. It offers a doctorate in music (DMus) which is available through full-time or part-time study. There are two masters courses in composition, one of which enables students to specialize in composition for screen. There is also a range of postgraduate diploma qualifications offered for those specializing in solo and ensemble performance, early music performance, orchestral playing, concert singing, opera and keyboard accompaniment. All undergraduates enrol for the four-year BMus (Hons) degree course. The associate diploma (ARCM) is awarded for instrumental performance and is available externally.

The college administers considerable scholarship endowments and several substantial special funds. It also possesses a valuable collection of musical instruments, housed in a purpose-built museum which opened in 1970, a fine reference library, a centre for screen music studies housed in the RCM studios which were relocated centrally in 1995, and a 400-seat theatre, the Britten Opera Theatre, opened in 1986.

(vi) London Opera Centre/National Opera Studio. Administered in collaboration with the Royal Opera House, the Opera Centre was founded in 1963 at a former cinema in the East End to provide 'advanced training for student singers, répétiteurs and stage managers'. It essentially continued the work of the National School of Opera, which had been in existence since 1948 under the direction of Joan Cross and Anne Wood. Humphrey Procter-Gregg, the centre's first director, was succeeded in 1964 by James Robertson. It accepted about 30 singers, six répétiteurs and six stage managers (half this number enrolling each year), usually for two-year courses. The centre gave stage performances in London at least twice a year. In 1978 it closed and was succeeded by the National Opera Studio, which is based at Morley College and provides one-year courses for advanced postgraduate trainees.

4. Other institutions. In addition to the universities and conservatories in London there are three other important colleges concerned with the study of music.

The Royal College of Organists (RCO), founded in 1864 as the College of Organists on the initiative of Richard Davidge Limpus, organist of St Michael Cornhill, was designed to provide a central organization for the profession, a system of examination for the church, opportunities for meetings and lectures, and encouragement for the composition of church music. Its headquarters were in Bloomsbury. After the Royal College of Music had moved into new buildings (1894), in 1904 the College of Organists was granted its former premises in Kensington Gore, next to the Albert Hall. Originally built in 1875 for the National Training School for Music, this curious building purports to be 'in the English style of the 17th century, with panels decorated with sgraffito'. The college was granted a royal charter in 1893 and became the Royal College of Organists. It is largely an examining body, not

a teaching one, though the organization of lectures and recitals has always formed part of its work; its examinations are theoretical as well as practical. The first examinations held by the college, in 1866, were for the diploma of fellowship; in 1881 an intermediate examination for associateship was introduced and one in choir training was added in 1924. Associateship (ARCO) must precede fellowship (FRCO), which may be followed by the choir training diploma (CHM); holders of that diploma may proceed to the Archbishop of Canterbury's Diploma in Church Music (ADCM), for which the examination is administered jointly with the Royal School of Church Music. The college's influence is reflected in the high esteem in which its diplomas are held.

The Royal School of Church Music (RSCM) was founded by Sydney Nicholson in 1927 as the School of English Church music, and at first was controlled by a provisional council with an advisory committee of members of the Church Music Society. It had a twofold purpose: to invite church choirs to seek affiliation; and to establish a College of St Nicolas for the study of church music and the training of church musicians. The College of St Nicolas was opened at Chislehurst in 1929 with ten resident choristers, a staff of tutors under Nicholson as warden, and resident students who generally combined their studies of church music, choir training and liturgical matters at Chislehurst with a general musical training at the RAM or RCM. In 1939 the college moved to Leamington Spa, then to Canterbury; in 1954 the headquarters of both the school and the college became Addington Palace, Croydon, a former seat of the Archbishop of Canterbury. In 1945, by permission of George VI, the school was renamed the Royal School of Church Music.

In 1974 it became necessary for financial and other reasons to close the College of St Nicolas. With the move from the headquarters at Addington Palace in 1996 to Cleveland Lodge, Westhumble, near Dorking, residential courses were no longer possible. Cleveland Lodge now operates as a regional centre for music training while continuing to place more emphasis on training organized at centres around the country, both on a residential and non-residential basis. It also offers a foundation certificate in church music linked to a series of training courses throughout the UK.

Morley College possesses one of the largest centres of adult education in Britain and has been celebrated for its musical activities since 1907 when Holst was appointed director; several other eminent composers, including Tippett, and celebrated performers have taught there. From September 1999 students have been able to study music as part of a BA combined honours programme offered by South Bank University.

IX. Commercial aspects

1. Music publishing. 2. Instrument making.

1. MUSIC PUBLISHING. London has always been the centre of music publishing in the British Isles, although the trade also flourished to a lesser extent in Edinburgh and Dublin during the late 18th and early 19th centuries. Compared with Italy and France, England was slow to exploit the development of music printing, and had no 16th-century printers of the stature of Petrucci, Attaingnant, Gardane or Ballard. In the first half of the 16th century, apart from occasional music in liturgical books from Pynson's Sarum Missal (1500) onwards, only isolated attempts were made to print music. These include two pieces printed by John Rastell (*c*1520–30) and the fine *XX Songes* produced by an unknown printer in 1530; the former were the earliest English examples of music printed from type by single impression, which became the standard method up to 1700. From the accession of Queen Elizabeth in 1558 the most common form of musical publication was the metrical psalter with tunes, issued under a royal patent first granted to John Day in 1559. It was a profitable enterprise, and several editions appeared most years for over a century. Other music printing was governed by a complex succession of patents, dating from Tallis's and Byrd's privilege of 1575, but the real stimulus to its development came from the printer Thomas East, whose publication of Byrd's *Psalmes, Sonets and Songs* in 1588 inaugurated the brief flowering of the English madrigal school, which, together with the appearance of lute-song books from 1597, produced a rich harvest of publications. The market for such music, however, was comparatively small and heavily dependent on aristocratic patronage; there was little profit to be made, and so music played only a minor part in the activities of those printers who produced it.

Changing fashions led to a rapid decline in output after 1615; musical works appeared only occasionally over the next 35 years, during which time the patent system fell into disuse and was eventually abolished in 1641. Only with the emergence of John Playford and his *English Dancing Master* (1651) did England produce a man whose chief interest lay in music publishing. Playford, who did not print his own publications, ensured commercial success by catering for a far wider range of tastes than his predecessors, with publications that included country dance books, instrumental tutors, theatre music, songbooks, catches and psalm books. Like most publishers over the next two centuries he also acted as an instrument dealer. For nearly 40 years he had a virtual monopoly, but soon after his death in 1687 his son Henry faced competition, especially from John Walsh, who set up in business in 1695. An important late 17th-century innovation was the development of printing from engraved copper or pewter plates; although occasionally found earlier from *Parthenia* (*c*1613) onwards, it now rapidly became the usual method of printing music, having considerable advantages of flexibility and cheapness. Thomas Cross was its first significant exponent; he continued to use pure engraving, whereas others soon found it more convenient to stamp the plates with punches as far as possible.

With engraving the single-sheet song quickly developed, and was produced in great quantity during the first decades of the 18th century; such songs were either sold singly or formed into collections with an added title-page,

often appearing as periodical publications like the *Monthly Mask of Vocal Music*. Their popularity lasted throughout the 18th century; they were apparently a speciality of the London trade, later imitated in Dublin but not on the Continent. The standard of engraving varied enormously, and is seen at its best in the superb illustrated songbooks, such as Bickham's *The Musical Entertainer* (1737–9).

With their shrewd business sense the John Walshes, father and son, dominated the London trade in the first half of the 18th century, although several rivals flourished and piracy was common owing to the lack of an effective copyright law for music until 1777. English publications took on a more cosmopolitan look, reflecting the new popularity of Italian music and the presence of Handel and other foreigners in London. The growth of music clubs and a general increase in musical activity meant that music of all kinds was in demand, from orchestral parts to flute airs; indeed, 18th-century England displayed a wider range of publications than any other country. Although most were undertaken at the publisher's expense, works were often issued 'for the author'; publication by subscription also played a significant part, especially in the case of volumes of sacred music. By about 1750 the Walsh pre-eminence was beginning to wane, and the latter half of the century saw the London trade divided between a number of important firms, such as John Johnson, Bremner, Welcker, Preston, the Thompson family and James Longman and his successors, as well as a host of lesser figures. Plates were frequently passed on from one firm to another and re-used with changed imprints.

The development of cheaper and smaller pianos in the early decades of the 19th century led to an increase in domestic music-making among the middle classes, resulting in a great demand for songs and piano music. Several still extant firms were founded at that time, notably Boosey, Chappell, Cramer and Novello. The majority of publications were ephemeral; sets of the latest polkas and quadrilles, operatic arrangements and variations on popular airs appeared by the thousand. Music for the burgeoning amateur choral movement, as found in both choral societies and church choirs, was provided cheaply by the firm of Novello from the 1840s, and the production of inexpensive music was aided by the repeal of paper taxes. Music printing by lithography, although known in England from about 1805, did not become common until the middle of the century; its possibilities for providing decorative music covers, often in colour, were then thoroughly exploited, especially for music-hall songs and ballads, upon which the prosperity of many firms depended in the latter part of the century. There were English editions of foreign operas, but such demand as there was for foreign chamber and orchestral music was largely satisfied by imported editions, although firms like Augener and Robert Cocks produced editions of the standard classical solo and duo repertory.

With the appearance of a line of notable English composers at the turn of the century a number of important new firms found work, including Stainer & Bell and the music department of the Oxford University Press, both of which also became involved in issuing scholarly editions of early music. London has also had longstanding branches of a number of important continental firms, including Schott (the oldest, going back to 1838), Breitkopf & Härtel, Simrock, Universal Edition and Bärenreiter. They have experienced various degrees of autonomy from their parent companies (particularly during the war years). The advent of the gramophone, radio and television led to a steady decline in the demand for popular sheet music. Since publishers, however, also collect a percentage of performing and mechanical right fees, the recording industry developed a strong interest in the music publishing trade, and after World War II a series of takeovers eroded the independence of most important London publishers, who increasingly came under the control of recording and other media companies. British popular music publishing is now dominated by two multinational companies, International Music Publications (owned by the Warner Music Group) and Music Sales, with their many subsidiaries. The concern of most publishers is now primarily with the exploitation of performance and recording rights, and the production of printed music often plays only a minor role in their activities. Many present-day London 'music publishers' are that in name only, being created solely for accountancy purposes. The unprofitability of most serious new music, together with increased costs of production, has had unsettling effects on the publishing trade in London, as elsewhere. A number of firms have moved out of the capital, or retain only a showroom there, and hire libraries and general stock have been reduced, though the range of publications remains impressive. In this regard the extension of copyright in British publications from 50 to 70 years, introduced in 1996 as part of European Community harmonization of regulations, has provided welcome relief to many firms.

2. Instrument making. Although references to organs in Westminster Abbey date back to the 13th century, the first important London organ builders were the Dallam family, who went to London from Dallam in Lancashire in the early 17th century. 'Father' Smith, who had left Germany in 1660, built his first organ in England at the royal chapel, Whitehall, and another in 1669 for the Banqueting Hall.

The Harris organ-building family flourished in the 17th century. Renatus Harris, grandson of the founder and the most celebrated member of the family, was a rival of 'Father' Smith, and when the two men entered into competition in the building of an organ for the Temple Church in 1683, there was so little to choose between their instruments that the ultimate decision of the benchers in favour of Smith's was delayed for nearly a year. John Harris (son of Renatus) completed the organ of St Dionis Backchurch (Lime Street) in 1724; he went into partnership with his brother-in-law John Byfield. Associated with this partnership were Richard Bridge, who built organs for the Priory of St Bartholomew-the-Great, Smithfield (1729), and Christ Church, Spitalfields (1730); and the Jordans, father and son, inventors of the Swell box, which was first applied to the organ they built for the church of St Magnus, London Bridge, in 1712.

Other organ builders at that time include Thomas Griffin (*d* 1771), who built the organ of St Helen's, Bishopsgate, in 1741; George England, who flourished between 1740 and 1788, and his son George Pike England, who probably built the first organ with pedals in London at St James's, Clerkenwell, in 1792; Gray & Davison, whose factory in London was established in 1774 by Robert Gray; Crang & Hancock, of whom the former

altered old Echoes into Swells (at St Paul's Cathedral and St Peter upon Cornhill); Bishop & Son, established about the end of the century by James C. Bishop; and John Snetzler, a German who settled in London in 1740 and from whom the firm of Bevington & Sons (1794) was descended by way of Snetzler's successors, Ohrmann and Nutt.

One of the earliest 19th-century organ builders was Benjamin Flight, who set up in partnership with Joseph Robson in 1806. The firm of William Hill & Son carried out some of its work in collaboration with Henry John Gauntlett, who advocated reforms in organ building including the adoption of the C compass organ. In 1916 the Hill firm was amalgamated with Norman & Beard of Norwich and London to form Hill, Norman & Beard. Other surviving firms of London organ builders established during the 19th century include those of Joseph W. Walker & Sons (1828) and Henry Willis & Sons (1845), both of which left London, in 1975 and 1968 respectively. N.P. Mander Ltd is the most important 20th-century firm of organ builders in London; it is also well-known for restoring old instruments.

The making of stringed keyboard instruments flourished in London from the 17th century. The early builders, who principally made spinets, include the Haward family, Stephen Keene and John Player. The Hitchcock family were important keyboard makers in the late 17th and early 18th centuries. Joseph Mahoon, 'harpsichord maker to His Majesty', and Hermann Tabel were two important early 18th-century figures. Tabel trained both Jacob Kirkman and Burkat Shudi, two men who subsequently dominated the harpsichord trade in London until almost the end of the 18th century. The few harpsichord and clavichord makers active in London in the 20th century included Thomas Goff, who was known particularly for his clavichords.

The piano found favour in London from the 1770s onwards. The Broadwood firm, which grew out of Shudi's harpsichord-making business, is the oldest firm of keyboard makers in existence. In the early 1780s John Broadwood made his first grand piano. Kirkman and his nephew Abraham Kirkman also made pianos, and the firm was carried on by the latter's descendants until 1896, when it was amalgamated with that of the Collards. The firm of Stodart (1776–1861) was founded by Robert Stodart, a pupil of John Broadwood. Stodart made grand pianos and also combined the principles of the harpsichord with those of the piano, an invention for which he took out a patent in 1777. Sébastien Erard went to London in 1786 and established workshops there in connection with those of his firm in Paris. The London factory was maintained until 1890. Longman & Lukey (1771), an offshoot of the music-publishing firm of J. Longman & Co. (1767; later Longman & Broderip), made numerous spinets, pianos and 'portable clavecins'. When Longman & Broderip went bankrupt in 1798, John Longman, the successor of the founder James Longman, became a partner of Clementi. Clementi then went into partnership with F.W. Collard in 1810 and remained in the firm until 1830; after Clementi's death in 1832 the firm was known as Collard & Collard. It was purchased by Chappell in 1929.

In 1800 John Isaac Hawkins of London and Philadelphia patented an upright piano a little over one metre in height; the younger Robert Wornum invented diagonally and vertically strung low upright pianos respectively in 1811 and 1813, and in 1827 brought out his 'piccolo' piano, about one metre high, the new crank mechanism of which he patented in 1829. He established a public concert room at his piano warehouse in Store Street, initiating a practice later followed by other firms who had warehouses in London: Steinway in Lower Seymour Street in 1878, Bechstein in Wigmore Street in 1901 and the Aeolian company in New Bond Street in 1904.

From the late 18th century London was one of the world's principal centres of piano making. Many early advances in piano technology were made by London builders before Americans took the lead in the second half of the 19th century. The main London firms founded in the 19th century and extant in the 20th include Chappell (1810) and Cramer (1824–1960), both of which were originally music publishers, Challen (1820; it ceased independent manufacturing in 1959) and Brinsmead (1835).

Among the many makers of string and wind instruments in London were Richard Hunt, who made viols and lutes dated from the 1660s; Thomas Urquhart, whose violins bear dates between the 1660s and 1680s and who also made flutes; the Stanesbys, who made wind instruments in the late 17th and early 18th centuries; Barak Norman, a maker of viols and one of the first English makers of cellos, active between 1668 and 1724, and in partnership with Nathaniel Cross from 1715; Peter Wamsley, a violin maker from 1725 onwards, one of whose apprentices, Joseph Hill (1715–84), became the founder of the firm of W.E. Hill & Sons still run by his descendants; Richard Duke, who copied Stainer and Stradivari violins (*c*1740–80); Thomas Cahusac, a publisher and maker of flutes from the 1740s to 1798; the elder Robert Wornum, publisher and maker of violins, cellos and of the guitar-lyre between the 1770s and 1815; the Milhouse family, who moved their wind-instrument-making business to London in 1787; Tebaldo Monzani, flute maker from 1790; George Astor, flute maker and publisher; John Köhler, a bandmaster of German birth, who settled in London in 1780 and founded a firm for making brass instruments which was carried on by his descendants for nearly 100 years; Edward Light, the inventor of the apollo lyre and the harp-lute (dital harp), about 1794; John Parker, maker of wind instruments in Southwark in the 1790s; G.H. Rodenbostel, trumpet maker in Piccadilly from 1761 to 1789; John Betts and his nephew Edward Betts, violin makers at the turn of the century and, like the contemporary Dodd family, also bow makers; Hart & Son, three generations of violin makers, the earliest of whom founded the firm in 1825; William Wheatstone, professor and manufacturer of the German flute in the 1820s; Charles Wheatstone, inventor of the concertina, for which his firm held the patent from 1829 for many years; Rudall, Carte & Company, makers of flutes from the early years of the 19th century; Georges Chanot the younger, a violin maker who left Paris for London in 1851 and, after working there with Charles Maucotel until 1858, established his own firm, which was subsequently carried on by his descendants; and Boosey, music publishers from 1816, and later manufacturers of all types of band and orchestral instruments. Hawkes & Son (1865), equally important makers of military band instruments, amalgamated with Boosey in 1930. Dietrich Kessler began to make viols in London in 1959.

London (ii). American record label. It was established by DECCA in 1947 to issue in the USA items recorded in Britain and elsewhere in Europe; the distribution territory was later expanded to include Canada. Its catalogue was one of the first to include LPs, which were pressed in Britain by Decca and released in the USA from August 1949. In the same year issue began in the UK of American recording sessions. London was, therefore, not a record company *per se* but a label which licensed the products of other firms. In the early 1950s London acquired the British rights to the American Essex and Imperial labels and was at the forefront of the rock and roll boom, releasing records by artists such as Fats Domino and Bill Haley and the Comets. London also acquired rights to Atlantic (1955), Chess, Specialty (both 1956) and Sun (1957) and by the end of the decade had become the pre-eminent label for introducing new American acts into the British pop market. However, by the mid-1960s many of those companies from whom London held licences, such as Motown, Liberty, United Artists, Imperial, Chess and Atlantic, had taken their catalogues elsewhere, some worried that London's eclectic roster of acts was becoming too cumbersome.

By the early 1970s London's most successful label was the Memphis-based Hi Records who released records by soul acts such as Anne Peebles and Al Green. However, London's stock, like that of Decca itself, continued to fall during the decade and in 1980 Decca was sold. In the 1980s British synthesizer acts such as Blancmange and Bronski Beat kept the London label in the public eye, but the most successful group was Bananarama, the most popular female act of the decade in Britain. By the late 1990s London was distributing records as diverse as the trip-hop of Bristol's Portishead and the mainstream pop of Ace of Bass and All Saints.

DAVID BUCKLEY

London, Edwin (*b* Philadelphia, 16 March 1929). American composer. He attended the Oberlin College Conservatory of Music, where he studied the french horn (BM 1952). He was a pupil of Schuller at the Manhattan School of Music in 1956 and studied composition with, among others, Dallapiccola and Milhaud. He also studied conducting with Izler Solomon. He gained the PhD in composition from the University of Iowa (1960). From 1960 to 1968 he taught at Smith College, Northampton, Massachusetts. He joined the faculty of the University of Illinois in 1968, where he taught theory and composition for ten years and founded and directed the Ineluctable Modality, a choral ensemble that presented much experimental new music. He served as visiting professor at the University of California, San Diego (1972–3). From 1978 he was chairman of the music department of Cleveland State University, and he founded and served as music director of the Cleveland Chamber Symphony. London has received awards from the Guggenheim Foundation (1969), the ACA (1992) and the AMC (1995) among others; he won a grant from the Hamburg Opera Contemporary Festival and has several times been a resident of the MacDowell Colony. From 1974 to 1981 he was chair of the National Council for the American Society of University Composers.

London's style is wide-ranging and at times lyrical. He juxtaposes intense drama with humour, yet manages to avoid the melodramatic effects characteristic of many composers with wide stylistic compasses. His control of pitch and rhythm owe much to a theatrical sense of timing.

WORKS
(*selective list*)

Dramatic: Santa Claus (mime op, e.e. cummings), solo vv, dancer, chorus, chbr ens, 1960; Portraits of 3 Ladies (W.R. Benét, S.V. Benét), nar, Mez, chbr ens, mixed-media effects, 1967; The Iron Hand (orat, after H. Melville: *The Martyr*), 1975 [incl. material from The Death of Lincoln]; The Death of Lincoln (op, Justice), 1976; Metaphysical Vegas (musical, E. London), solo vv, dancers, insts, 1981

Vocal: 3 Settings of Ps xxiii, solo vv, SSAA, TTBB, SATB, 1961; 4 Proverbs, S, female vv, 2 tpt, bn, 1968; Psalm of These Days I–V (Bible), various vocal ens, insts, 1976–80

Inst: Trio, fl, cl, pf, 1956; Ww Qnt, 1958; Sonatina, va, pf, 1962; Brass Qnt, 1965; Bottom Line, tuba, chbr orch, 1997; other works, incl. several large ens and several tape pieces

Principal publishers: European-American Music, Gun-Mar, MJQ, New Valley Music, Peters

DAVID COPE

London [Burnstein, Burnson], **George** (*b* Montreal, 30 May 1920; *d* Armonk, NY, 24 March 1985). American bass-baritone of Canadian birth. In 1941 he made his opera début, as George Burnson, singing Dr Grenvil (*La traviata*) at the Hollywood Bowl. His international career began in 1949 when he sang Amonasro in Vienna. Engagements followed at Glyndebourne, La Scala, the Metropolitan Opera, where he appeared from 1951 to 1964, Bayreuth and the Bol'shoy, where he was the first non-Russian to sing Boris (1960), a role he later recorded in Moscow. A long collaboration with Wieland Wagner culminated in London's singing Wotan in the complete *Ring* in Cologne (1962–4). His repertory also included Don Giovanni and Count Almaviva (both of which he recorded), Gounod's Méphistophélès, Escamillo, the multiple villains in *Les contes d'Hoffmann*, the Dutchman, Scarpia, Mandryka (which he recorded impressively under Solti) and the title role in Menotti's *Le dernier sauvage*. At the height of his career London's performances were distinguished by a rare dramatic individuality and vocal power, as the best of his recordings confirm. Perhaps his finest achievement was his commanding, anguished Amfortas, which he twice recorded under Knappertsbusch at Bayreuth. From 1968 he concentrated on arts administration, serving successively at the Kennedy Center, Washington, DC, the National Opera Institute and the Opera Society of Washington. He also staged the first complete English-language *Ring* in the USA (1975, Seattle).

MARTIN BERNHEIMER/ALAN BLYTH

London Academy of Music. London conservatory founded in 1861. It became the London Academy of Music and Dramatic Art in 1935 and its musical activities ceased in 1939. *See* LONDON (i), §VII, 3.

London Classical Players. British orchestra. Formed as a specialist period-instrument orchestra by ROGER NORRINGTON in 1978, it initially played repertory ranging from Haydn and Mozart through Beethoven and Berlioz to Brahms and Wagner. Later the orchestra revealed, too, the music of Bruckner and Smetana in its original colours, as Norrington's investigations of sources uncovered misconceptions about such fundamental matters as tempo and even instrumental registers. The orchestra was disbanded in 1997 and much of its work taken over by the Orchestra of the Age of Enlightenment.

GEORGE PRATT

London College of Music. London conservatory founded in 1887. *See* LONDON (i), §VII, 3(vi).

London Fellowship of Minstrels. English organization which in 1604 became the WORSHIPFUL COMPANY OF MUSICIANS.

London Mozart Players. Orchestra founded in 1949 by Harry Blech. *See* LONDON (i), §VII, 3.

London Music School. Institution founded in 1865 and amalgamated with the London Academy of Music in 1904. *See* LONDON (i), §VII, 3.

London Opera Centre. Training school founded in 1963 and closed in 1978. *See* LONDON (i), §VIII, 3(vi).

London Opera House. Theatre built in 1911 and renamed the Stoll Theatre in 1916. *See* LONDON (i), §VI, 1(i).

London Philharmonic Orchestra (LPO). Orchestra founded in 1932 by Thomas Beecham. *See* LONDON (i), §VI, 2(iii).

London Sinfonietta. Orchestra founded in 1968 to perform 20th-century music. *See* LONDON (i), §VII, 3.

London String Quartet. English string quartet. It was founded in 1908 and known until 1911 as the New String Quartet. The original members were Albert Sammons and Thomas Petre (violins), H. Waldo Warner (principal viola of the New SO) and C. Warwick Evans (principal cellist of the Queen's Hall Orchestra). Sammons was called up in 1917 and replaced by James Levey; Petre was absent from 1914 to 1918, and his place was taken successively by H. Wynn Reeves, Herbert Kinsey and Edwin Virgo; Warner was succeeded in 1930 by William Primrose. The quartet rehearsed for nearly two years before giving its first concert in London in 1910. It soon established itself in the forefront of British ensembles, with a strong public following and with a particular reputation for championing the music of living British composers. In 1920 the quartet made a three-month tour of the USA which was so successful that it was repeated four times in the next five years. Other visits abroad included Spain, the Netherlands, Scandinavia, Canada and South America, in each of which the quartet's programmes included modern British music. It gave many first performances of works by British composers, including Delius, C. Armstrong Gibbs and Howells, as well as by two of its own members, Sammons and Warner; three of its members also took part in the British première of Stravinsky's *Pribaoutki* in 1918. The quartet was internationally admired for its carefully rehearsed teamwork and for its sympathetic and unidiosyncratic performances of a wide repertory. It made several recordings in the 1920s, including works by Beethoven, Dvořák, Franck, Schubert and Vaughan Williams. It disbanded in 1934.

ROBERT PHILIP

London Symphony Orchestra [LSO]. Orchestra founded in 1904. *See* LONDON (i), §VI, 2(iii).

Long (Lat. *longa*: 'long' [note]). In Western notation the note that is twice the value of a breve. It was the longer of the two notes of early mensural music and theory, hence its name. It had its origins in the *virga*, one of the two single-note neumes of pre-mensural notation. It is first found in early 13th-century music. Before about 1600 its value was twice or three times that of a breve, and it was usually shown as in ex.1*a*. Its rest was usually shown as

Ex.1
(a) or (b) or

in ex.1*b*, the choice of form depending on whether its mensuration was binary or ternary. The long survived into the period of 'white' or 'void' notation (post-1450), and was frequently used for the final note of a composition, where it implied a pause. It is mentioned in writings as late as Christopher Simpson's *Compendium of Practical Musick* (1667), although by this date its existence was purely theoretical. Indeed, Simpson stated that 'The *Large* and *Long* are now of little use, being too long for any Voice, or Instrument (the Organ excepted) to hold out to their full length'.

See also NOTATION, §III, 2 and NOTE VALUES.

JOHN MOREHEN/RICHARD RASTALL

Long compass keyboard. An organ keyboard that descends below the *C* normally found as the bottom note on modern organs. *See* KEYBOARD and ORGAN §V, 8.

Long, Kathleen (*b* Brentford, 7 July 1896; *d* Cambridge, 20 March 1968). English pianist. She studied with Herbert Sharpe at the RCM (1910–16) and taught there from 1920 to 1964. Early in her career she performed a wide repertory of chamber works. An artist of enduring catholic tastes, she introduced music by, among others, Bloch, Bridge, Holst and Finzi. Her Mozart playing, for which she was particularly admired, showed a satisfying balance of just proportions and tender phrasing, and she gave notable performances of Mozart and Bach with the Boyd Neel Orchestra. French music was another speciality, and she made Fauré particularly her own; under the elegance of her playing the composer's elegiac note sounded clear. She also performed the more speculative of Beethoven's sonatas, such as opp.109 and 110, and played Scarlatti sonatas with swagger and intensity. Her tonal range, though not wide, was precise, but none of her recordings, among them Mozart's K491 with the Concertgebouw Orchestra under van Beinum, quite captured the bloom of her sound. Long founded her own quartet, the English

Ensemble, before World War II, and played on occasion with such artists as Casals, Sammons and Suggia; she also formed a partnership with the violinist Antonio Brosa (1948–66). As well as in Europe, she performed in Canada, the USA and South Africa. She was awarded the *palmes académiques* in 1950 and was made a CBE seven years later.

DIANA McVEAGH

Long, Marguerite [Marie-Charlotte] (*b* Nîmes, 13 Nov 1874; *d* Paris, 13 Feb 1966). French pianist and teacher. She studied with Henri Fissot at the Paris Conservatoire, where she won a *premier prix* in 1891, and later worked privately with Antonin Marmontel. Her performance of Franck's *Variations symphoniques* in 1903 was praised by Fauré, who wrote in *Le Figaro* (23 November): 'One could not play with better fingers, more clarity and taste, [or] a more natural and charming simplicity'. These qualities applied to her style even much later, as is evident from her recordings of Debussy's *Deux arabesques*, Fauré's Ballade (with André Cluytens conducting) and Ravel's Concerto in G (with Pedro de Freitas Branco conducting, not Ravel as frequently stated). She played the first performances of Ravel's *Le Tombeau de Couperin* and Concerto in G and also championed the music of Fauré, Milhaud and Roger-Ducasse. From 1906 to 1940 she was a noted teacher at the Paris Conservatoire, where her students included Annie d'Arco, Jacques Février, Samson François and Nicole Henriot-Schweitzer. In 1941 she opened her own school in Paris and in 1943 she and Jacques Thibaud founded the competition that continues to bear their names.

L'Ongaretto. Nickname of GIOVANNI BATTISTA PIAZZA.

Longaval [Longheval], **Antoine de.** *See* LONGUEVAL, ANTOINE DE.

Longfellow, Henry Wadsworth (*b* Portland, ME, 27 Feb 1807; *d* Cambridge, MA, 24 March 1882). American poet. After private schooling in Portland he completed his formal education at Bowdoin College, Brunswick, Maine. He spent a year studying general literature at Harvard University, learning French and Italian. At the age of 18 he was appointed to a new chair of modern languages at Bowdoin, which he assumed in 1830, having spent the intervening years travelling and studying in Europe. He settled in Cambridge in 1836 assuming a position at Harvard College, where he remained until 1854. He made further visits to Europe in 1842 and 1868–9.

Longfellow was probably the most frequently set American poet of the 19th century. There are over 1200 settings of his texts, by over 650 composers; many of them, primarily settings for solo voice and keyboard, were composed before 1890 and published in England. The text that has been most often set is 'Stars of the Summer Night' from *The Spanish Student* (1843). Choral settings include Rutland Boughton's *The Skeleton in Armour*, Dudley Buck's *Scenes from the Golden Legend* and *Paul Revere's Ride* (the latter for male chorus), and Elgar's *Spanish Serenade*.

Generally considered Longfellow's most enduring poem, *Hiawatha* (1855), on American-Indian themes and written in trochaic dimeters, has appealed to many composers, notably Samuel Coleridge-Taylor, whose cantata *Hiawatha's Wedding Feast* was particularly well received in England and the USA. It has also inspired several orchestral works, including symphonic poems by Louis Coerne, Delius, and Goldmark.

MIRIAM W. BARNDT-WEBB

Longman & Broderip. English firm of music publishers and instrument dealers, established in London. The business was founded in or before 1767 by James Longman and others, and was first known as J. Longman & Co. Its Harp & Crown sign, though not its premises, was apparently acquired from the widow of JOHN JOHNSON (ii). From 1769 to 1775 the firm was known as Longman, Lukey & Co., becoming Longman, Lukey & Broderip when Francis Fane Broderip entered the business in September 1775. Lukey withdrew from the business in 1776 and the firm remained as Longman & Broderip until its bankruptcy in 1798. From December 1782 it had a circulating music library and in 1786 a Mr Mann and Mr Russell were sent to Calcutta to open a music shop in Loll Bazaar, opposite the Old Harmonia, while in 1789 the firm advertised that it was opening branches at Margate and Brighthelmstone (now Brighton) 'during the watering season'.

Especially in its period as Longman & Broderip the firm ranked among the most enterprising of its time. In addition to its own wide range of publications, it claimed to be able to supply any foreign publication through its contacts with continental publishers. It had a particularly close association with Artaria in Vienna. Its own publications included English music by Arne, Avison, Shield, Storace and others, and much by foreign composers, among them J.C. Bach, Haydn (including the symphonies commissioned by Salomon), Mozart, Pleyel, Schobert, and Johann and Carl Stamitz, as well as the usual country dance books and sheet songs. From 1785 it was the official contracted publisher to the King's Theatre. Its keyboard music, some of it written two or more generations earlier, had a great influence on what English harpsichordists and organists played towards the end of the century. A number of works were published in conjunction with John Johnston, and the firm acquired some of his stock and plates as well as his trading sign

'The Apollo' when he ceased business in 1778. The firm was noted for the generous sums it paid composers for their works; perhaps this was a factor in its financial downfall.

Longman & Broderip sold a range of keyboard instruments, though the firm almost certainly relied on others to provide their stock-in-trade. Of the surviving plucked string keyboard instruments, four of the seven wing spinets and seven of the eleven harpsichords are by Thomas Culliford, while another harpsichord is by Baker Harris; the harpsichords owe much, both musically and stylistically, to Kirkman and Shudi. Though the workmanship of the Longman & Broderip instruments is not of the first order, Culliford's machine stop, in the case of some of the single-manual harpsichords, is more ingenious, and enables the instrument to achieve a greater degree of tonal flexibility from a 2×8′, 1×4′, lute specification than is the case with other makers. By the last quarter of the 18th century Longman & Broderip were turning to the piano, and particularly to the square. Clinkscale lists some 22 surviving squares bearing their name and a further 33 attributed to them. There are also two surviving grands and three 'organized pianos' (square pianos combined with an organ), while at least one combined harpsichord and piano is known to have been made. From advertisements it is clear that the ingenuity of the firm extended far beyond such curiosities to include 'Glove horns', 'Sticcado pastorales' (for which it also published a tutor), 'upright harpsichords with a curious new invented swell' (1786), 'pianofortes in commodes, sideboards & dressing-tables' (1786), and, from Paris, 'portable clavecins ... agreeable for travelling with, as they may be conveyed and even performed on in a coach' (1789).

After Longman & Broderip's bankruptcy, John Longman, who had succeeded James, went into partnership with MUZIO CLEMENTI until about 1801. He then set up for himself until about 1816, introducing a drawing-room barrel piano in about 1804 which was weight-driven and had no keyboard. Giles Longman, John's successor, was in partnership with James Herron as Longman & Herron until 1822. The other partner, Francis Broderip, entered into partnership with C. Wilkinson; as Broderip & Wilkinson they reissued many of the old firm's publications in addition to publishing new ones of their own, including *Broderip and Wilkinson's New and Complete Instructions for the Lute* (*c*1800). Broderip died in 1807, and the firm became Wilkinson & Co. until 1810, when it ceased business, the stock and plates being purchased by Thomas Preston (*see* PRESTON & SON).

PETER WARD JONES, PETER WILLIAMS, CHARLES MOULD

Longo, Alessandro (*b* Amantea, 30 Dec 1864; *d* Naples, 3 Nov 1945). Italian pianist and composer. After studying with his father, the pianist and composer Achille Longo (*b* Melicuccà, 27 Feb 1832; *d* Naples, 11 May 1919), he attended Naples Conservatory (1878–85), where he studied the piano with Beniamino Cesi, composition with Paolo Serrao and the organ; he took a diploma in all three subjects in 1885. After teaching the piano there, initially as Cesi's substitute and then as a regular member of staff from 1897, he taught briefly (1899) at Alfonso Rendàno's private school; he retired in 1934 but returned in 1944 as interim director. He was also pianist for numerous concert organizations, including the Società del Quartetto (1909–15). Longo's interest in the music of Domenico Scarlatti led to his founding a Domenico Scarlatti society at Naples (*c*1893) and to his publication of 11 volumes containing 544 sonatas and a fragment of Scarlatti's keyboard music. He arbitrarily organized the sonatas into key-related suites and felt compelled to adjust some of their harmonic implications, but the edition (*Domenico Scarlatti: Opere complete per clavicembalo*, Milan, 1906–10) was long the most complete and did much to awaken interest in Scarlatti. He also wrote *Domenico Scarlatti e la sua figura nella storia della musica* (Naples, 1913). Longo was a dedicated teacher; his pupils included such pianists as Franco Alfano, Guido Laccetti, Paolo Denza and Tito Aprea. In 1914 he founded the journal *Arte pianistica* (later *Vita musicale italiana*), which continued until 1926. For his educational writings, among which are piano methods and anthologies, he received a gold medal at the music-history congress held at the Paris Exhibition. His compositions (over 300), which have been described as combining a Germanic instrumental style with Italian vocal characteristics, include works for piano, for strings, and suites for various instruments. He was a member of the Accademia Pontaniana and the Società Reale di Archeologia, Lettere e Belle Arti.

CAROLYN GIANTURCO/R

Longueval [Longaval, Longheval], **Antoine de** (*b* ?Longueval, Somme; *fl* 1498–1525). French composer. A papal document refers to him as 'cleric of the diocese of Arras', so he probably came from the village of Longueval on the southern edge of the diocese. Ferrarese documents, however, call him 'Antonio d'Orléans', which may indicate an early place of employment. He was a member of the household of Queen Anne of Brittany in 1498,

when he was provided with a suit of mourning for the funeral of Charles VIII. From 1 June 1502 to 1 October 1504 he was at the court of Savoy (with a salary 50 per cent higher than any other singer), but while still listed as a member of that chapel he was paid for service to Alfonso d'Este in Ferrara between December 1503 and early September 1504; he was named as a member of the ducal chapel in the latter year. By 1507 he had become a *valet de chambre* to Louis XII – one of the king's private musicians rather than a member of the court chapel. He was made a canon of the Ste Chapelle in Bourges in 1510. Not long after he became king, François I made Longueval *maître de chapelle* of the royal chapel at the beginning of October 1515; like Ockeghem he was also the king's 'counsellor' and first chaplain, which made him supervisor of the *maîtrise* of the Ste Chapelle of Paris. Longueval, along with the rest of the royal chapel, accompanied François to Italy in late 1515, and on 17 December he and Mouton were made apostolic notaries by a *motu proprio* of Leo X. He was installed as a canon of Notre Dame, Paris, on 17 April 1517, resigning on 26 May 1519 to become abbot *in commendam* of the Benedictine priory of St Pierre, Longueville, a very lucrative benefice. In the same year he was approached again by Alfonso d'Este to serve in the Ferrarese ducal chapel. He is last recorded at the French court in 1525, and probably died towards the end of that year or at the beginning of the next.

Longueval's most important work, the *Passio Domini nostri*, may have been written in Ferrara for Holy Week 1504 (Heyink), though its earliest source, a Roman manuscript copied before 1508, ascribes the motet to an unknown 'Jo. ala venture' (the Toledo manuscript, copied in the Low Countries about 1520–35, also gives 'Alaventura'). Van den Borren's suggestion that 'à l'aventure' is a translation of the Dutch *ongeval* ('mishap') has nothing to recommend it, as Longueval's name was not Jean and he was not from a Dutch-speaking area. Heyink's prposal that Longueval adopted the alternative name in Italy is not supported by any evidence and is similarly unlikely because of the different Christian name. Tagmann's suggestion that 'Venturo detto Musini, soprano', a singer in Mantua in 1509–10, should be identified with Longueval is falsified by the frequent designation of Longueval as 'contrabasso' in Ferrarese documents. It must remain possible that Longueval was not the composer of this piece, although the ascriptions to La Rûe and Obrecht in later German sources are stylistically inappropriate. The motet's text is adapted from the Passion narrative according to Matthew, but incorporates passages (especially the words of Christ) from all the Gospels. The music continually varies its scoring and rhythmic and contrapuntal character (*see* PASSION, ex.5); the chanted recitation tone for the Passion is often present, but even when it is not the melodic patterning is dominated by recitation on a single note. The variety and expressiveness of Longueval's Passion made a strong impression in Lutheran Germany, where it was widely disseminated and served as a model for numerous 16th-century settings by other composers.

Longueval's other works are each transmitted in a single source. Like the Passion motet on a smaller scale, *Benedicat nos* (a setting of a prayer for Trinity Sunday) is varied in its textures. It gives impressive melismas to the word 'imperialis' in the opening (non-matching) duos, and brings the movement to an impressive halt at the invocation 'Alpha et O, Deus et homo' towards the end. *Benedicite Deum* is simpler and more declamatory, with a plainly French accentuation of the Latin. *Alle regres* is based on the tenor of Hayne van Ghizeghem's *Les grans regrets*, written at its original pitch but with the canonic instruction to be transposed up a step. The other three parts, in high clefs, are largely imitative; the subject at the beginning of the second phrase is related to the beginning of the second phrase of the tenor of Hayne's *Allez regrets*. The pacing of the chanson is varied, and the style is notably different from that of either Févin or Claudin, Longueval's royal chapel colleagues. In July 1518 a Ferrarese diplomat sent a mass and a motet by Longueval to Duke Alfonso d'Este; the works remain unidentified.

WORKS

Benedicat nos imperialis maiestas, 4vv, 1514[1]; ed. in Gehrenbeck
Benedicite Deum caeli, 4vv, 1535[3], *I-Rvat* C.G. XII 4; ed. A.T. Merritt, *Treize livres de motets parus chez Pierre Attaingnant, 1534–5*, xi (Monaco, 1962)

JEFFREY DEAN

Longy, (Gustave-)Georges(-Leopold) (*b* Abbeville, ?28 Aug 1868; *d* Moreuil, 29 March 1930). French oboist, conductor, educator and composer. He studied the oboe at the Paris Conservatoire with Georges Gillet, and in 1886 was awarded a *premier prix*. He played with various Paris orchestras, and from 1898 to 1925 was first oboist of the Boston SO. In 1900 he founded the Longy Club to give concerts of chamber music, principally for wind instruments and often by American composers. In 1916 he opened the Longy School of Music, which he directed for many years with the assistance of his daughter, Renée Longy-Miquelle.

He held several conducting appointments in Boston, including the Boston Orchestral Club (1899–1913), the MacDowell Club (1915–25) and the Cecilia Society chorus. From 1919 to 1921 he led the Boston Musical Association, which specialized in contemporary works. A dispute with Koussevitzky during the latter's first season as conductor of the Boston SO led to Longy's resignation as first oboe, and he returned to his native region of France.

When Longy died, invitations to a grand memorial concert in Boston were issued by a committee including, ironically, Koussevitzky. Longy's compositions have never been catalogued, but two works he is known to have written during his Boston years are a *Divertissement* for orchestra on folk tunes from Normandy and Picardy, and a *Rapsodie* for solo saxophone with an ensemble of two clarinets, bassoon, double bass, harp and timpani. Loeffler's *Deux rapsodies* for oboe, viola and piano (1905) were written for Longy and dedicated to him. There is a large amount of archival material on Longy in the Boston Public Library.

LEONARD BURKAT

Longyear, Rey M(organ) (*b* Boston, 10 Dec 1930; *d* Louisville, 20 Feb 1995). American musicologist. He attended Los Angeles City College and received the BA from Los Angeles State College in 1951. At the University of North Carolina he worked with William S. Newman, taking the MA in 1954. In 1957 he received the PhD from Cornell University, where his teachers included Donald Grout, William Austin and Denis Stevens. From 1958 to 1963 he taught at the University of Southern Mississippi. He was on the faculty of the University of Tennessee from 1963 to 1964 and he was professor of music at the University of Kentucky from 1964 until his retirement in 1994.

Longyear specialized in the Classic and Romantic periods, with particular emphasis on German literature and music. His monograph *Schiller and Music* (1966) examines musical imagery in Schiller's writings and gives a lucid exposition of his philosophy of music. He edited two collections of early-19th-century symphonies, five symphonies by Mattei and Pavesi's *Dies irae concertato*. He was also interested in the study of percussion instruments, and having studied percussion at the Peabody Conservatory and the Berkshire Music Center was a percussionist with several orchestras.

PAULA MORGAN

Lonquich, Heinz Martin (*b* Trier, 23 March 1937). German composer, conductor and organist. He studied at the Saarbrücken Musikhochschule (1954–7), where his teachers included Alexander Sellier (piano), Heinnich Konietzny (composition) and Philipp Wüst (conducting). Thereafter he was coach at the Städtische Bühnen in Münster (1957–61) and Kapellmeister of the Brunswick Staatstheater (1961–4). Between 1962 and 1964 he conducted the Jeunesses Musicales orchestra of Brunswick. In 1964 he was appointed music assistant at the Städtische Bühnen in Cologne; he also took a teaching post in coaching at the Musikhochschule while continuing his composition studies there with Bernd Alois Zimmermann and Herbert Eimert (1966–70). After completing private studies in church music (1973) he was appointed organist and choirmaster of St Nikolaus, Cologne-Sülz. He has broadcast frequently as a pianist and accompanist, and was a member with Humpert of the Gruppe 8. In 1968 he received Förderungspreise in composition from Netherlands Radio and North Rhine-Westphalia, and in 1971–2 he held a scholarship to the Villa Massimo in Rome. He became a member of the music committee of the Cologne archbishopric in 1986 and received the Lassus medal of the German-speaking Cäcilienverband in 1997. Proceeding from sensitive, predominantly lyrical tone structures, sometimes freely serial, he has come, by way of many monodic liturgical compositions, to a pithy language of distinct character. His later works show spontaneous melodic invention, as well as a very varied, floating rhythm.

WORKS
(selective list)

Choral: Kölner-Domfest-Messe (K. Lüchtefeld), Mez, Bar, children's chorus, chorus, 19 insts, 1980; Die Stunden (J. Guillén), men's vv, 2 va, 2 vc, 1983; Bei stiller Nacht (F. von Spee), S, chorus, ob/fl, org, 1985; 5 precationes ad Mariam, 1985; Und was will diese Sonne uns (E. Meister), 2 spkr, S, chorus, fl, hp, org, 1989; Namen-Gottes-Litanei (C. Spaemann), S, A, T, B, chorus, org, 1990; Magnificat, S, A, T, B, vn, 1991; Auf dem Rand der Mauer (orat, Lüchtefeld, Bible), 5 spkr, 10 solo vv, 2 mixed choruses, 18 insts, tape, 1992–3; Corpus Christi mysticum (G. von le Fort), chorus, str qnt, 1993; Johannes-Passion in der Liturgie des Karfreitags, 4vv, 1993; Kölner Dreikönigen-Messe, chorus, 2 3-pt children's/female choruses, 12 wind, perc, 1998; Laus Trinitati (5 motets, Hildegard of Bingen), 1999; many other liturgical works

Other vocal: Der Weg nach Tsin (Chin. poems), Bar, pf, 1963; Mondblüten (haiku), S, pf, 1966; 3 Gesänge an Gott (Bible, T. von Avila, G. von Nazianz), Mez, org, 1974; 3 Passionsgesänge (A. de Vigny, M. de Unamunu, P. MONIKA LICHTENFELD

Lonsdale, Christopher (*b* ?1795; *d* 1877). English music publisher. *See under* BIRCHALL, ROBERT.

Loomis, Harvey Worthington (*b* Brooklyn, 5 Feb 1865; *d* Boston, 25 Dec 1930). American composer. A pupil of Dvořák at the National Conservatory, New York, he composed over 500 works, but only a few were published before 1900. Some based on Amerindian melodies, such as *Lyrics of the Red Man* op.76 (1903–4), were printed by the Wa-Wan Press. He appears to have been most successful in composing stage music, including the one-act opera *The Traitor Mandolin*, first performed in 1898, the dramatic recitation *The Song of the Pear Tree* (1913), the melodrama *Sandalphon* (1896), which he described as 'musical symbolism', and two burlesque operas, *The Maid of Athens* and *The Burglar's Bride*. He also composed a cantata for children, *Fairy Hill* (1895), a violin sonata and many piano pieces of a descriptive nature. Most of his manuscripts are in *US-Wc*.

W. THOMAS MARROCCO

Loosemore, George (bap. Barnstaple, 12 Sept 1619; *d* Cambridge, before 11 Sept 1682). English organist and composer, brother of Henry Loosemore and John Loosemore. He was organist of Jesus College, Cambridge, in 1635, and of Trinity College from 1660 until his death. He took the Cambridge MusD degree in 1665. He may have been the 'Mr Loosemore' who played the organ and taught the choristers at St John's College, Cambridge, at various times during the 1660s. The majority of his works survive in one or other of two autograph manuscripts. The first, *GB-Lbl* Add.34203, is a book of organ accompaniments; it includes six of his own works and a further two by Henry Loosemore. The second, *GB-Ctc* R.2.58, is a medius partbook from a set of grace books copied by George Loosemore in 1664 and intended for use on feast days in the hall of Trinity College. It contains 11 full anthems by Loosemore, most of which are settings of Prayer Book collects for the major church festivals. A twelfth anthem, to the text of the Advent antiphon 'O sapientia', was apparently copied into the manuscript, although it is now missing. Loosemore's instrumental fancies, most of which also are now lost, were admired by Dudley, 3rd Lord North, at whose home at Kirtling they are known to have been played.

WORKS

SACRED

Gloria in excelsis, 4vv, *GB-Lbl*, *Ob*
Athanasian Creed, verse, *Lbl* (inc.)
12 full anthems, *Ctc* (inc.), 1 lost
3 full anthems, 4vv, *Ob*
6 verse anthems, *Lbl* (inc.)
2 verse anthems, *Cjc*, *Ckc*, *EL*, *Lbl*, *Lgc*, *Ob*, *Och*, *Y*

INSTRUMENTAL

4 almans, 2 curants, vn, lyra viol, b viol, *B-Bc*
Fantasy, a 3, *F-Pc* (inc.)
Corant, viols, *GB-Ob** (inc.) [b viol part]
Courant, hpd, *Och* [?by Henry Loosemore]

JOHN MOREHEN

Loosemore, Henry (*b* ? Devon, 1607; *d* Cambridge, bur. 7 July 1670). English organist and composer, brother of George Loosemore and John Loosemore. He was organist of King's College, Cambridge, from 1627 until his death. During the latter part of his life he was also closely associated with the North family, whose home was at nearby Kirtling. Together with John Jenkins he was a central figure at the private music meetings held there, and he was also music master to the North children. He took the Cambridge MusB degree in 1640. With the exception of two instrumental compositions, Henry Loosemore's surviving output consists exclusively of sacred music, more than half of which is incomplete. Although his music places him in the front rank of provincial composers, none of it appears to have achieved any wide currency during his lifetime. His anthems O *Lord, increase our faith* and *Why art thou so heavy, O my soul* were long thought to be the work of Orlando Gibbons. An important organbook which Loosemore copied probably between 1625 and 1635 survives (*US-NYp* Drexel 5469). It includes autograph organ parts to 17 of his compositions, some of which have not survived in any other known source.

JOHN MOREHEN

Loosemore, John (bap. Barnstaple, 25 Aug 1616; *d* Exeter, 8 April 1681). English organ builder and virginal maker. He was the son of Samuel Loosemore, also an organ builder, and a brother of George and Henry Loosemore, both organists and composers. The earliest references to John Loosemore are in connection with the organ at Hartland, Devon, where he carried out work between 1635 and 1638. A house organ built for Sir George Trevelyan survives in the minstrels' gallery at Nettlecombe Court, Somerset (*c*1665). His most important organ was built in about 1665 for Exeter Cathedral; the case remains. This instrument was heard by Francis North, 1st Lord Guilford, in 1675, during his circuits as Lord Chief Justice. His verdict suggests that in some respects it was more pleasing to the eye than to the ear. A chamber organ of six stops formerly in the Exeter Cathedral choir school was destroyed about 1935. A virginal built by Loosemore and dated 1655 is in the Victoria and Albert Museum, London (for plan view *see* VIRGINAL, fig.8). Loosemore is buried in Exeter Cathedral, where his tomb can still be seen.

JOHN MOREHEN, STEPHEN BICKNELL

Lootens, Willem (*b* Delft, bap. 9 Aug 1736; *d* Middelburg, 13 Jan 1813). Dutch organist, carillonneur and composer. He probably studied with his father. In 1754 he was appointed organist of the Grote Kerk in Maassluis. In 1760 he succeeded A.F. Grooneman as organist of the Grote Kerk in Zierikee, and after the death of Benjamin Bouchart was appointed organist of the Nieuwe Kerk and carillonneur of the abbey bell-tower in Middelburg, a position that he held from 1763. Zierikee, and after the death of Benjamin Bouchart was appointed organist of the Nieuwe Kerk and carillonneur of the abbey bell-tower in Middelburg, a position that he held from 1763.

As an organ adviser Lootens occupied a prominent position in the Dutch field of organ building during the 18th century. His writings on the organs of the Grote St Lievens Kerk in Zierikzee and on the De Rijckere organ of the Oostkerk in Middelburg contain valuable information concerning contemporary Flemish and Dutch organ building. Several of Lootens's compositions survive. He was one of the supporters of the movement to improve psalm singing, to which he contributed *De 150 psalmen en gezangen*, a collection containing newly composed music. His *Choraal in IV stemmen* for the funeral oration of Professor J. Willemsen (Nieuwe Kerk, Middelburg, 17 May 1780) was rediscovered in 1990.

ALBERT CLEMENT

Lopardo, Frank (*b* New York, 23 Dec 1957). American tenor. He studied at the Juilliard School with Robert White (1980–81) and made his stage début as Tamino at the Opera Theatre of St Louis in 1984. He first appeared in Europe as Fenton in Amsterdam in 1986, followed by Almaviva in 1987, the year in which he made his débuts at the Vienna Staatsoper (as Lindoro in *L'italiana in Algeri*) and Glyndebourne (as Ferrando). He made his début at Chicago, as Elvino (*La sonnambula*), in 1988, his Salzburg Festival début as Don Ottavio in 1990 and his San Francisco début, in the same role, in 1991. His Metropolitan début in 1990 was as Rossini's Almaviva and he has returned for, among other roles, Ferrando, Don Ottavio, Tamino, Fenton, Rodolfo and Idreno (*Semiramide*). He made a much-admired Covent Garden début, as Lindoro, in 1989, and in 1994 appeared there as Alfredo to Angela Gheorghiu's Violetta, a performance that was recorded live. Lopardo also sings regularly in concert in a wide-ranging repertory. His dark-grained, mellifluous tenor is deployed with agility and intelligence in all his roles, most notably on disc as Ottavio, Ferrando, Lindoro, Ernesto (*Don Pasquale*) and Alfredo.

ALAN BLYTH

Lopatnikoff [Lopatnikov], **Nikolai** [Nikolay] **(Lvovich)** (*b* Reval [now Tallinn], Estonia, 16 March 1903; *d* Pittsburgh, PA, 7 Oct 1976). American composer and pianist of Russian origin. He studied piano with B. Sakharov and theory with Zhitomirsky at the St Petersburg Conservatory (until 1917), theory with Erik Furuhjelm at the Helsinki Conservatory (1918–20), civil engineering at the Technische Hochschule, Karlsruhe (1921–7), and took private composition lessons with Toch. Among his earliest works was the Piano Concerto no.1 (1921), of which the first performance was given by Hans Bruch in Cologne in 1925; the Second Concerto was given its première in 1930 and received many performances throughout Europe thereafter, including one at the 1932 ISCM Festival. Another work that received high praise was the Symphony no.1 of 1928; performed by major orchestras both in Europe and the USA, it was taken on tour by the Philadelphia Orchestra in 1932. During these years Lopatnikoff enjoyed success as a soloist and recitalist, often in performances of his own works. He lived in Berlin (1928–33) and London (1933–9) before moving to the USA, of which he became a citizen in 1944. He held appointments as head of theory and composition at Hartt College, Hartford, Connecticut, and the Westchester Conservatory, White Plains, New York (1939–45), and as professor of composition at the Carnegie Institute of Technology (later Carnegie Mellon University, 1945–69).

Lopatnikoff's move to New York resulted in part from an association with Koussevitzky. In 1927 Copland heard his Two Pieces for mechanical piano and brought them to

Koussevitzky's attention. The conductor commissioned an orchestration of one of the pieces, played the resulting Scherzo in 1928, and offered a publication contract. There began a stormy but fruitful relationship between the two men which continued to the end of Koussevitzky's life; Koussevitzky conducted the Boston SO in the premières of Lopatnikoff's Second Symphony (in 1939), Violin Concerto (1942), and Concertino for Orchestra (1945), which had been commissioned by the Koussevitzky Foundation.

Lopatnikoff's music reflects an innate Russian spontaneity tempered by a disciplined tehnique which he credited to his studies with Toch. His early experiments in rhythm and dissonance recall Stravinsky's of the same period, and the subsequent development of his compositional style reflects his admiration for Hindemith with whom he became personally acquainted while still an engineering student in the 1920s. Prominent features of his work include linearity, motivic development and a lightly held, floating tonality. His slow movements show at once his capacity for linear working and the emotional Russian quality of his work. But, above all, he had a considerable talent for structural equipoise. His honours included two Guggenheim Fellowships (1945, 1953), a grant and citation from the National Institute of Arts and Letters, of which he was elected a member in 1963, and an NEA grant (1975) for *Melting Pot*, commissioned by the Indianapolis Ballet. From 1929 to 1937 he regularly contributed articles and reviews to *Modern Music* which described and evaluated contemporary compositional trends.

Lopes Morago, Estêvão. *See* MORAGO, ESTÊVÃO LOPES.

López, Félix Máximo (*b* Madrid, 18 Nov 1742; *d* Madrid, 9 April 1821). Spanish organist and composer. He joined the Madrid royal chapel as fourth organist in 1775, advancing to first organist in 1805 on Lidón's resignation. He was twice married; two of the sons of his first marriage were prominent in court music – Ambrosio (*b* 5 Dec 1769; *d* 6 Dec 1835) as royal chapel organist, and Miguel (known also as Miguel López Remacha) (*b* 6 May 1772; *d* 14 April 1827) as first tenor of the royal chapel, composer of operatic and sacred works and author of treatises on solfège and composition.

According to Saldoni, a number of López's works – keyboard pieces, guitar pieces, chamber works and villancicos – were published during his lifetime. As with many of his contemporaries, these publications do not seem to be extant, but several of his works have survived in manuscript. His organ pieces, mainly liturgical, range from short versets and *fabordónes* to lengthy sonatas, *caprichos* and fugues intended for the Elevation or Offertory. Some use hymn chants, including the traditional Spanish *Pange lingua.* Their style is a sometimes incongruous amalgam of the pianistic Viennese Classical idiom and *stile antico* counterpoint, but they are effective when played according to the careful registration directions on an instrument such as the royal chapel organ (built in 1778 by Jorge Bosch) for which they were written. López's harpsichord works include competently written multi-movement sonatas in the Classical style (including two for four hands) and some colourful variations on Spanish melodies. His *Reglas generales, o escuela de acompañar al órgaño, o clave* (MS, *E-Mn*) demonstrates various ways to harmonize and ornament a bass line.

WORKS

extant works only; in E-Mn unless otherwise stated

Org: Escuela orgánica, supuestos los principios: contiene una collección de pensamientos cortos, para la Elevación, y otra de sonatas, para el Ofertorio, en la que se incluyen todos los hymnos de l iglesia, 1799; [44] Piezas al órgano, incl. sonatas, caprichos, fugas, Pange linguas, versos; [7] Glosas sobre el himno Sacris solemniis; [6] Juegos de versos; 4 of the above pieces ed. S. Rubio, *Organistas de la Real capilla*, i (Madrid, 1973)

Hpd: Música de clave, incl. 15 sonatas, rondo, pieza, capricho, andante, variaciones; Variaciones al minuet afandangado

Vocal: Passions and motets, in Convento de la Encarnación, Madrid

ALMONTE HOWELL

Lopez, Francis (*b* Montbéliard, 15 June 1916; *d* Paris, 5 Jan 1995). French composer. His career as a dentist helped support his first efforts as a part-time songwriter before his initial foray into writing for the theatre in 1945. His musical *La Belle de Cadix* ran for two years (about 1500 performances) and garnered both popular and critical acclaim. Lopez worked closely on this and other operettas with librettist Raymond Vincy until *Le Prince de Madrid*, the last operetta to be written before Vincy's death. The association of Lopez and Vincy was a felicitous one, not unlike that of Rodgers and Hammerstein, producing success after success and setting a standard for works in the genre, casting a large shadow over the musical theatre scene in postwar Paris. Besides the larger scale works such as *Andalousie*, *Le chanteur de Mexico* and *La toison d'or*, the pair also created chamber operettas (*Quatre jours à Paris*, *La route fleurie*), which were mounted at smaller theatres, but with success that rivalled that of the larger productions.

Films were made of several of Lopez's early operettas, and he also scored numerous films in the 1940s and 50s, and a film remake of Vincent Scotto's *Violettes impériales*. Lopez began to produce his own works in the 1980s at the Théâtre de la Renaissance, the Elysée-Montmartre and the Eldorado. His wife, Anya, and his son, Rodrigo, wrote some of the music for the operettas that were produced at this time. The score for *La perle des Antilles* (1979) is solely the work of his wife and son, and Rodrigo Lopez composed all the music for his father's production of *Aventure à Tahiti* (1988).

At his best, Lopez wrote music that is lively in its rhythmic vitality, suiting the voice well. The music for some of his operettas is inflected with a Spanish accent, as in *Andalousie* and *Méditerranée*. Lopez wrote an autobiography, *Flamenco: la gloire et les larmes* (Paris, 1987).

WORKS
(*selective list*)

Stage (in order of first performance): La Belle de Cadix, 1945, film 1953; Andalousie, 1947, film 1950; Quatre jours à Paris, 1948, film 1955; Monsieur Bourgogne, 1949; Pour Don Carlos, 1950; Le chanteur de Mexico, 1951, film; La route fleurie, 1952; Soleil de Paris, 1953; A la Jamaïque, 1954, film; La toison d'or, 1954; Méditerranée, 1955; El aguila de fuego, 1956; Tête de linotte, 1957; Maria-Flora, 1957; S E la Enbajadora, 1958; La cancion del amor mio, 1958; Le secret de Marco Polo, 1959

PAUL CHRISTIANSEN

Lopez, George [Jorge Enrique] (*b* Havana, 30 Nov 1955). American composer, active in Austria. His family emigrated to the USA from Cuba in 1960. He studied at the California Institute of the Arts (1971–5), where his composition teachers included Leonard Stein and Morton Subotnick. After holding various jobs outside music, he composed *Landscape with Martyrdom* (1981–4), a work that attracted the attention of Michael Gielen in 1984. Following its première at the Donaueschingen music festival (16 Oct 1987), Lopez moved to Germany (1990) and then to Austria (1991). His honours include grants from the Berlin Akademie der Künste, and the Ernst von Siemens, Paul Sacher and Heinrich Strobel foundations. He received the Austrian State Stipend in 1995.

Lopez' extremely differentiated compositional style is based on his study of Ives, Bruckner, Mahler and the Second Viennese School, as well as Messiaen, Xenakis, Ligeti and Stockhausen. He has also derived inspiration from walking expeditions through wilderness landscapes in North America, Iceland and Lapland, during which he observed irregular forms and structures, and came to regard nature as the source of the archetypes of human culture. These experiences are at the root of his preference for deep, diffuse and 'uncivilized' sounds, often classified as noise. In his works written in Europe, he has taken as subjects those areas that seem inaccessible to the conscious mind, but that leave traces as myth, dream and archaic ritual. After *Dome Peak* for 92 dispersed instrumentalists (1991–3), his works have increasingly undermined conventional concert paradigms. In *Schatten vergessener Ahnen* (1994–6) the apparent conductor (disguised by a martial mask covering the whole body) seems to be ritually slaughtered. *Traumzeit und Traumdeutung* (1996–7) involves instrumental groups positioned around a mountainous area.

CHRISTOPH BECHER

López (Gavilán), Guido (*b* Matanzas, 3 Jan 1944). Cuban conductor, choirmaster and composer. He studied choral direction at the Conservatorio Amadeo Roldán in Havana, graduating in 1966. He continued his studies as a conductor at the Moscow Conservatory, graduating in 1973. On returning to Cuba, he taught conducting at the

Havana Instituto Superior de Arte. He has conducted all the major Cuban orchestras and toured widely abroad, notably in Poland, Hungary, Yugoslavia, the Soviet Union, Bulgaria, Romania and Germany. He has had considerable success in Latin America, particularly in Mexico, Colombia and Ecuador.

He has written orchestral, chamber and choral works. His creative style is generally conventional though often harmonically daring. He has also written avant-garde music. His work frequently contains elements taken from diverse kinds of traditional Cuban music, such as the habanera, *contradanza*, *guaguanco* and others. Notable among his works is *Victoria de la esperanza*, written in 1985 for orchestra, choir, soloists, actors and dancers, and containing cinematic scenes.

OLAVO ALÉN RODRIGUEZ

López, Miguel [Miquel] (*b* Villarroya de la Sierra, Aragon, 1 Feb 1669; *d* Zaragoza, 7 June 1723). Spanish composer and organist. He entered the Escolanía of Montserrat as a choirboy about 1678; on 15 October 1684 he became a novice in the Benedictine order there and in 1686 a full member. While serving as organist of the monastery of S Martín, Madrid (1689–96), he studied theology at Salamanca University. He was twice choirmaster at Montserrat (1699–1705 and 1715–18) and organist of the monastery of S Benito, Valladolid (1705–15). On 25 February 1722 he was named manager of the house at Alcañiz belonging to Montserrat.

Virtually all of López's known music is contained in a 580-page folio manuscript entitled *Miscellanea musicae*, an autograph compendium of the service pieces he prepared throughout his career, many bearing dates (between 1696 and 1720) and place names (a detailed inventory is given in MEM, vi). The vocal works are accompanied by continuo and many include small orchestral ensembles. Those for the Latin liturgy are written in the polychoral style favoured in 17th-century Spanish church music, the instrumental parts acting as one choir among several. The style is austere and non-dramatic, alternating between points of imitation and antiphonal effects. The non-liturgical pieces, apart from a few secular cantatas, are devotional villancicos designated for church festivals and ranging from solos with continuo to larger combinations. The organ works consist of a few large pieces of a didactic nature and several sets of psalm or hymn versets; all are in a thickly polyphonic Baroque style.

López was also an erudite writer. An autograph Latin history of Montserrat is extant, and he has also been identified as the 'aficionado' who wrote four witty pamphlets in 1718–19 in defence of Valls in the celebrated *Missa aretina* controversy; but his two-volume work of music theory, *Exagoga ad musicem*, is lost.

WORKS

Miscellanea musicae, *E-Boc* 37, after 1720; contains 5 masses, 32 vesper and compline pss, 3 Lamentations, 19 motets, 62 villancicos and cants., other vocal works, many org pieces; 9 org solos in *Antologia de organistas clásicos españoles*, ii, ed. F. Pedrell (Madrid, 1908, 2/1968); 10 in *Música instrumental*, i, ed. D. Pujol, MEM, iv (1934, 2/1984); 1 org verset ed. in J. Muset: *Early Spanish Organ Music* (New York, 1948), 41–3; 8 org versets ed. in P. Piedelièvre, *Les anciens maîtres espagnols* (Paris, 1952), 26–9; 2 org versets in *Liber organi*, v, ed. S. dalla Libera (Vicenza, 1954); 2 masses, org versets in *M. López: Obres completes*, i, ed. I. Segarra and G. Estrada, MEM, vi (1970); 3 org versets ed. in *Organa hispanica*, iii (Heidelberg, 1972)

ALMONTE HOWELL (with ALMA ESPINOSA)

López Buchardo, Carlos (*b* Buenos Aires, 12 Oct 1881; *d* Buenos Aires, 21 April 1948). Argentine composer and teacher. He began piano and violin studies with Hector Bellucci, studied harmony with Luis Forino and Gaito, and later took piano lessons with Alfonso Thibaud. Thereafter he was a pupil of Roussel in Paris, returning to Buenos Aires to work as a composer and teacher. In 1924 he founded the National Conservatory, which he directed until his death, and which was named in his honour; he also established the fine arts school of the University of La Plata, where he served as professor of harmony. His other appointments included the presidency of the Wagnerian Association, a directorship of the Teatro Colón (twice) and the post of director of music and art for the stage for the Ministry of Justice and Public Instruction. López Buchardo was a fine melodist and a gifted writer for the voice, whether in stage works such as lyrical comedies and musicals, or in songs on themes from Argentine peasant music. The symphonic poem *Escenas argentinas* – which uses motifs from the *milonga* and the *gato*, two popular dance forms – was first performed by the Vienna PO under Weingartner on a visit to Buenos Aires in 1922, and in the following year it won the municipal music prize. López Buchardo wrote several songs for voice and piano in an intimate and refined style, using French texts at first, then, from 1924, indigenous popular sources. In 1920 he married the soprano Brígida Frías; together they initiated a musical and literary salon frequented by prominent figures in Buenos Aires and visiting artists from Europe. López Buchardo also wrote six stage works: one opera, *Il sogno di Alma*, with an Italian fairy tale libretto, first performed at the Teatro Colón in August 1914 under Tullio Serafin and sung by Lucrezia Bori, Alessandro Bonci and Giuseppe De Luca; and five musical comedies, the last two of which remained unfinished. He also composed the incidental music for *Romeo y Julieta*, first performed at the Odeón in 1934 and characterized, particularly its Nocturno, by an ethereal sonority.

WORKS
(*selective list*)

Stage: Il sogno di Alma (fantasía lírica, 3, S. Benelli, after E. Prins: *En el país violeta*), Buenos Aires, Colón, 4 Aug 1914; Madama Lynch (comedia lírica, 3, E. García Velloso and A. Remón), Buenos Aires, Odeón, 25 June 1932; La Perichona (comedia musical, 3, García Velloso and A. Remón), Buenos Aires, Ateneo, 31 May 1933; Romeo y Julieta, incid music, perf. 1934; Amalia (comedia musical, García Velloso and P.M. Obligado, after J. Marmol), Buenos Aires, Odeón, 1935; Santos Vega (leyenda lírica, 1, G. Caraballo, after R. Obligado), unfinished; La bella Otero (comedia musical, A. Berruti and Remón), collab. M. Torroba, unfinished

Orch: Escenas argentinas, sym. poem, 1920

Choral: Mass, chorus, org, 1901; other works incl. school songs

Songs for 1v, pf: 6 canciones argentinas, 1924; 5 canciones argentinas, 1935; 29 other works
Pf: Sonatina, 1944; 6 other works

SUSANA SALGADO

López-Calo, José (*b* Nebra, La Coruña, 4 Feb 1922). Spanish musicologist. After studying music with Manuel Ansola at the seminary in Santiago de Compostela, he took the diploma in philosophy at the pontifical University of Comillas (1949), continuing his music studies there with J.I. Prieto Arrizubieta; ordained a priest in 1951, he studied theology at the Granada Theological Faculty (diploma 1956). After a year in Dublin he moved to the Pontificio Istituto di Musica Sacra in Rome, where he took the master's degree in chant (1959) and the doctorate in musicology (1962); he dedicated his dissertation on music at Granada Cathedral in the 16th century to his mentor in Rome, Higini Anglès. He also studied there with Eugène Cardine, Domenico Bartolucci, Dante D'Ambrosi and Edgardo Carducci. He became Anglès's assistant (1964–5) and successor in the chair of musicology at the Pontificio Istituto (1965–70), and after Anglès's death in 1969 edited a three-volume collection of his principal articles, *Scripta musicologica* (1975–6). A Jesuit, he was general secretary of the International Sacred Music Society (1963–8).

Returning to Spain in 1970, López-Calo won a national competition sponsored by the Juan March Foundation that gave him responsibility for cataloguing and editing works in the musical and documentary collections of old Castile. In 1973 the University of Santiago de Compostela appointed him professor of music history, a post that he occupied until 1987, continuing as emeritus professor until 1997. In 1989 King Juan Carlos of Spain awarded him the National Gold Medal of the Arts; in 1990 his university published a Festschrift in his honour.

López-Calo's meticulously indexed catalogues listing over 100,000 pieces of music in Spanish cathedrals, supported by about 150,000 documents, are an invaluable resource; his copious articles, reviews and contributions to reference works make him not only one of the most extensively published but one of the most influential Spanish musicologists.

JOSÉ M. LLORENS/ROBERT STEVENSON

López Capillas [López y Capillas], **Francisco** (*b* Mexico City, *c*1605–8; *d* Mexico City, 18 Jan 1674). Mexican composer and organist. The son of Bartolomé López (who was possibly a royal notary) and María de la Trinidad, López was probably admitted to the choir of Mexico City Cathedral around 1625 (see Estrada); he would have studied with its *maestro de capilla* Antonio Rodriguez Mata. A Francisco López, who may well be the composer, graduated in theology at the University of Mexico on 20 August 1626. Stevenson has suggested that López may have studied with Juan de Riscos during a visit to Jaén, where Riscos was *maestro de capilla* until 1643 (Stevenson: 'Mexico City Cathedral Music', 1987). On 17 December 1641 López was named assistant organist and dulcian player (*bajonero*) at Puebla Cathedral under Juan Gutiérrez de Padilla, who had facilitated his appointment. His duties as a dulcian player were replaced with singing duties on 13 September 1645. He probably received the degree of *licenciado* from the University of Mexico no earlier than autumn 1646.

Between 1642 and 1647 he frequently substituted for the principal organist, Pedro Simón, and on 15 January 1647 López was promoted to the position. However, following the reappointment of Simón in January 1648 (and a subsequent lowering of his own salary), López left Puebla on 15 May 1648 in search of better opportunities. His whereabouts for the next six years are unclear. On 10 March 1654 López presented a book of his compositions to the authorities at Mexico City Cathedral. When the cathedral choirmaster Fabián Ximeno died a month later, López was appointed to the dual post of organist and *maestro de capilla* within four days of Ximeno's death, even though the chapter had announced a 40-day waiting period for the vacancy. From this time López signed himself 'López Capillas' ('López of the Chapels'). In January 1656 he was asked by the viceroy, the Duke of Alburquerque, to compose a mass for the investiture of four bishops on the feast of St James; the result may have been the four-choir mass received with amazement by Gregorio Martín de Guijo and noted in his *Diario, 1648–64* (ed. M. Romero de Terreros, Mexico, 1952).

During the following years López supervised the two brilliant dedications of the new cathedral and strengthened his reputation for outstanding ability and conscientious service, but his pleas that the posts of organist and *maestro de capilla* be separated were refused until 1668, when the cathedral engaged Joseph Ydiáquez as principal organist. A beautifully illustrated choirbook of compositions by López, which was presented to Madrid (it is now in *E-Mn* M2428), may have played a part in securing a full prebend for López which was granted by a royal decree dated 23 March 1673. At the time of his death López was earning 1000 pesos, one of the largest salaries ever received by a church musician in Mexico during the colonial period. A will made on 13 January 1674 reveals that as well as valuable silver objects and a number of paintings he owned three violones and an organ.

López was the first *maestro de capilla* of Mexico City Cathedral to be born in the city. His numerous compositions, among the finest produced in New Spain, are written exclusively according to the *prima pratica* but with notable skill and fluency. Their smooth polyphony masks a learned and greatly varied use of canon (e.g. the second Agnus Dei of the *Missa Quam pulchri*), parody techniques and complex mensural practices. In a 'Declaracíon de la Missa', a preface to his hexachord mass, he cites three chapters of Guevara's lost *Compendio de musica* to validate his mensural practice; he also cites Cerone's *El melopeo y maestro*. As influences on his musical style he mentions Hellinck, Richafort, Morales and Palestrina.

ALICE RAY CATALYNE/JOHN KOEGEL

López-Chavarri Marco, Eduardo (*b* Valencia, 29 Jan 1871; *d* Valencia, 28 Oct 1970). Spanish musicologist and composer. He obtained a law degree from the University of Valencia (1896) and a doctorate in law from the Central University in Madrid (1900); as a musician he was mainly self-taught, though he had private studies in composition with Pedrell and piano lessons in France, Italy and Germany. He studied musicology in Germany, and harmony there with Salomon Jadassohn. Following a brief career as a lawyer he became a distinguished composer and critic, choral and orchestral conductor, lecturer and teacher. From 1898 until shortly before his death he was music critic for the Valencian daily *Las provincias*. In 1903 he founded and directed the Valencian Chamber Orchestra, which enabled him to perform works

by eastern Spanish composers, including his own, thereby succeeding Salvador Giner (1832–1911) in the role of spokesman for the regional Valencian school of contemporary Spanish music. He also conducted the orchestra of the Teatro Principal (1906), and was guest conductor for the symphony orchestras of Madrid, Bilbao, Zaragoza, Oviedo and Valencia. From 1910 to 1921 he was professor of aesthetics and music history at the Valencia Conservatory, where he also directed both the orchestra and chamber orchestra. From 1943 he served as musical adviser for the Sección Femenina and wrote many works for its chorus. His compositions show a great diversity of styles and instrumental combinations, with extensive use of traditional melodies; he has collected *c*200 songs and dances from the coastal regions of Valencia and Alicante in the unpublished *Cancionera de Valencia*. Among his publications are numerous translations of studies of late 19th- and early 20th-century composers, and of some important writings by Schumann, Kufferath and Marcello; the most valuable, however, are his *Música popular española*, a fundamental study of Spanish traditional music, and *Historia de la música*. López-Chavarri Marco was an honorary member of the Faculty of Arts, London University, and a member of various academies in Spain (S Carlos, Valencia; Fernando, Madrid; Bellas Letras, Córdoba and Barcelona).

WORKS

ISRAEL J. KATZ

López-Cobos, Jesús (*b* Toro, 25 Feb 1940). Spanish conductor. He graduated in philosophy from Madrid University, then studied conducting in Italy with Franco Ferrara and in Vienna with Hans Swarowsky. His operatic début was at La Fenice, Venice, with *Die Zauberflöte* in 1969, followed in 1970 by *La bohème* at the Deutsche Oper, Berlin, where he was engaged on a five-year contract before serving as music director, 1981–90. López-Cobos was associate conductor of the Spanish National Orchestra, 1981–3, and musical director, 1984–9. In 1987 he became conductor of the Cincinnati SO and in 1990 was appointed conductor of the Lausanne Chamber Orchestra. His American début was at San Francisco (*Lucia di Lammermoor*, 1972), and was followed by débuts at the Opéra (*Il trovatore*, 1975) and Covent Garden (*Carmen*, 1975), and at the Metropolitan (*Adriana Lecouvreur*, 1978). With the Deutsche Oper he conducted the first *Ring* cycle staged in Japan (1987). His recordings include Rossini's *Otello* from the autograph score, the original version of *Lucia di Lammermoor* and Falla's *La vida breve* and *El amor brujo*. In opera his conducting reveals a Latin liveliness of spirit, a keen sense of theatre and a concern for instrumental detail and clarity of texture.

NOËL GOODWIN

López de Velasco, Sebastián (*b* Segovia, bap. 2 Feb 1584; *d* Granada, 1659). Spanish composer. Having received his earliest musical training from his father, Diego López de Arellano, he was a chorister at Segovia Cathedral between 1596 and about 1604, where the *maestro de capilla* was Pedro Serrano. From 1604 to 1607 López de Velasco served as *maestro de capilla* of S Coloma. He held the same post at Berlanga de Duero, Soria, for a few months in 1607 before obtaining his first important post at El Burgo de Osma, where he remained until 1614. Cathedral records there mention the composition of lamentations by him and his slow compilation of a parchment manuscript (thought lost but now known to be at Segovia Cathedral) with works by Morales, Guerrero and himself. He was ordained priest in 1609 and after the death of Serrano in 1614 he obtained the post of *maestro de capilla* of Segovia Cathedral. He left in 1618 and in 1619 became chaplain and *maestro de capilla* to Doña Juana at the Descalzas Reales, Madrid. He retired in 1636 because of ill health, spending the remainder of his life at Granada Cathedral as *racionero*, a royal appointment with no musical duties.

López de Velasco's most important work is the *Libro de missas, motetes, salmos, magnificats, y otras cosas tocantes al culto divino* of 1628, which comprises five eight-part masses, two settings of the *Magnificat*, one for eight voices, the other for ten, and 22 other works, mainly motets or psalms and all for eight voices except three that are for ten, 11 and 12 voices respectively. One of the eight masses included in the collection is the same work as the eight-part version of Philippe Rogier's *Missa 'Domine Dominus noster'* (it is known that Rogier's 12-part version of this mass was frequently reduced to smaller forces). Additional sacred works survive at Segovia Cathedral and while no secular works by him are extant, he himself mentioned the composition of villancicos. López de Velasco is one of the most representative polychoral composers of his generation.

WORKS

Libro de missas, motetes, salmos, magnificats, y otras cosas tocantes al culto divino (Madrid, 1628); ed. R. Mota Murillo (Madrid, 1980–83)

Other sacred works, all at Segovia, Archivio de la Catedral: 3 Mag, 4–5vv; Dixit dominus, 6vv; Benedicamus domino; 2 cum invocarem, 8, 12vv; In te domine, 8vv; Nunc dimittis, 8vv; Ecce nunc, 11vv; Salve regina, 8vv; ?3 Mag, 4vv, attrib. by López-Calo (1988–9)

EMILIO ROS-FÁBREGAS

López Jiménez, Melchor (*b* Hueva, nr Guadalajara, 19 Jan 1760; *d* Santiago de Compostela, 19 Aug 1822). Spanish composer. He studied music at the Madrid Colegio Real and on 23 March 1784 was appointed *maestro de capilla* at Santiago Cathedral, where he remained until his death. López Jiménez was a prolific composer who took great care over his compositions; of over 550 masses, motets, psalms and villancicos extant in Santiago Cathedral, most of the parts are in his hand. They are models of the Classical style in the sacred music of Spain: his melodies display a deep religious spirit, and the accompaniments, mostly for a large orchestra, are expressive and imaginative. Modern editions of his works include: *Villancicos galegos da Catedral de Santiago: Melchor López*, ed. J. Trillo and C. Villanueva (La Coruña, 1980); *Misa de Requiem*, ed. J. López-Calo and J. Trillo (Santiago de Compostela, 1987); *Oratorio al Santísimo Sacramento*, ed. J. Trillo (La Coruña, 1995); *Jubilate Deo*, ed. J. Trillo (Santiago de Compostela, 1996); *Misa solemne 'Unus Deus'*, ed. J. Trillo (Santiago de Compostela, 1997).

JOSÉ LÓPEZ-CALO

López Marín, Jorge (*b* Havana, 8 May 1949). Cuban composer and conductor. He studied music in Cuba with José Ardévol, Félix Guerrero, Carlos Fariñas and Frederico Smith, and from early on showed a talent for conducting and composition. Between 1969 and 1975 he continued his training in both fields at the Kiev Conservatory, and in 1975 he went on to the music conservatory in Moscow to study with Khachaturian (composition) and Khaikin (conducting). He stayed in Russia until 1978. In his dual capacity as composer and conductor he has given numerous concerts in Cuba and abroad.

Classical forms, in particular sonata and concerto, predominate in his output, of which his masterfully orchestrated symphonic works are the best known. He was the first Cuban composer to write concertos for orchestra (no.1, 1982; no.2, 1984) and the first also to produce a cello concerto, entitled *Concierto cubano* (1983). The development of his thematic material is, in general, characterized by dramatic conflict. This material at times alludes to, or derives from, Cuban popular melodies, with tonal references or turns of phrase from rock, samba, tango and jazz. Not excessively experimental or abstract, López Marín's work continues the nationalist tradition of Roldán and Caturla; it occasionally also displays the influence of Bartók and contemporary Russian composers.

VICTORIA ELI RODRÍGUEZ

López Mindreau, Ernesto (*b* Chiclayo, 1892; *d* Lima, 1972). Peruvian composer and pianist. Unlike the majority of Peruvian composers of the period, who were self-taught and who composed almost exclusively for the piano, López Mindreau received a thorough musical training, both in composition and in the piano. He began his studies at the age of seven at home and subsequently in Trujillo and Lima, working under Gerdes (piano) and Valle Riestra (harmony). He went on to the Paris Conservatoire and then to New York where he studied with Rachmaninoff and Stokowski. On his return to Europe, to the Hochschule für Musik in Berlin, he was a pupil of Leichtentritt (composition, orchestration) and Scharwenka (piano). At his début in Berlin in 1921, with Scharwenka conducting, he played his teacher's Piano Concerto no.6. Back in Lima in 1923, he gave a concert of his own works, including the première of his *Fantasía* for piano and orchestra. Between 1924 and 1928 he was once again in Paris, where he composed, under the generic title of *Nueva Castilla*, two operas: the three-act *Cajamarca* and the two-act *Francisco Pizarro*, to librettos by Luis Augusto Carranza. In 1928 he returned permanently to Peru.

Both the orchestration and the harmonic structure of López Mindreau's symphonic works display solid, professional workmanship, though his musical language is somewhat heterogeneous. Like the majority of Peruvian composers of his day, he alternated between a European idiom and unadulterated folkloric thematic material. Typical of the former are his *Preludio en estilo antiguo* and the *Octeto*, which employs 12-note techniques; folk-derived works include *Obertura a Choquehuanca*, the *Sinfonía peruana* and 'Marinera y tondero' from the *Album folklórico* for piano. In the opera *Cajamarca* the influence of Italian opera and Spanish zarzuela can also be detected (Pinilla). The second act is perhaps the most interesting for its inclusion of pentatonic melodies.

WORKS

Stage: Cajamarca (op, 3), *c*1924–8; Francisco Pizarro (op, 2, L. Carranza), *c*1924–8

Pf: Preludio en estilo antiguo (Brussels, n.d.); Preludio Incaico: Gavota; Evocacíon; Album folklórico; 8 canciones populares

Other inst: Fantasia, pf, orch, *c*1923; Obertura a Choquehuanca, orch; Octeto; Sinfonía Peruana, orch; Str Qt; Sym. Study, orch

Songs: 2 Yaraví, 1v, pf, after 1924 [from op Cajamarca]; El fin de un sueño, 1v, pf

ENRIQUE ITURRIAGA

Loqueville, Richard (*d* Cambrai, 1418). French composer. He played and taught the harp to the son of the Duke of Bar in 1410, as well as teaching the duke's choirboys plainsong. From 1413 to his death he taught music at Cambrai Cathedral, where he was almost certainly Du Fay's teacher (see Planchart, 357–9). His four rondeaux carry text in the highest part only. Their simple rhythms, transcribed in 6/8 with 3/4 hemiolas, are also found in the ballade, whose text laments the fact that musicians are only well fed when they have money – none too common a state when they travel abroad. The mass movements are quite varied, for the first Gloria (ed. Reaney, no.6) alternates two-part solo writing with a three-part chorus, like the works of Guillaume Legrant. The Gloria–Credo pair, transcribed in 3/4, consists of a duet for two treble voices over a supporting tenor (with a possible alternative contratenor in *I-AO* for the second treble). The Sanctus, in four parts, uses the VINEUX melody and the associated textual trope. The isorhythmic motet, in honour of the Breton saint Yvo, has a tenor employing a retrograde colour. The Marian antiphon is no doubt a contrafactum version of a lost three-voice rondeau.

WORKS

Edition: *Early Fifteenth-Century Music*, ed. G. Reaney, CMM, xi/3 (1966)

Gloria, Credo, 3vv
Gloria, 3vv
Gloria, 3vv
Sanctus, 4vv (with trope 'Qui januas mortis')
O flos in divo/Sacris pignoribus, 3vv (isorhythmic motet)
O regina clementissima, 3vv (antiphon)
Quant compaignons, 3vv (ballade)
Je vous pri, 3vv (rondeau refrain)
Pour mesdisans, 3vv (rondeau)
Puisque je suy amoureux, 3vv (rondeau)
Qui ne veroit que vos deulx yeux, 3vv (rondeau)

GILBERT REANEY

Lorano, Filippo de. *See* LURANO, FILIPPO DE.

Lorber, Johann Christoph (*b* ?Weimar, 19 April 1645; *d* Weimar, 16 April 1722). German poet and writer on music. He was royal Poet Laureate and court lawyer at Weimar and also a musical amateur, who had studied there with the Kantor Stephan Burckhard. He published a poem, *Lob der edlen Music* (Weimar, 1696), and the critical review *Vertheidigung der edlen Music, wider einen angemassten Music-Verächter aussgefertiget* (Weimar, 1697). The latter is one of three responses (including *Ursus murmurat* by Johann Beer) to a public lecture by Gottfried Vockerodt entitled *De falsa mentium intemperatarum medicina*. In it Vockerodt attributed the madness and despotism of three Roman emperors, Caligula, Claudius and Nero, to the detrimental influence of the arts of theatre, dance and music. Lorber and the other critics judged these remarks to be a general attack on music and a recommendation to ban its instruction in schools and its performance in churches. Vockerodt countered these rather exaggerated criticisms in a separate book, *Missbrauch der freyen Künste, insonderheit der Music* (1697). This includes his original lecture as well as excerpts from Lorber's and the other critical essays. These documents provide valuable evidence of, and insight into, the conflict of opinions regarding the place of music in the church between Orthodox (Lorber) and Pietist (Vockerodt) Protestants.

GEORGE J. BUELOW

Lord's Prayer. *See* PATER NOSTER.

Lorée. French firm of oboe makers. It was founded by François Lorée in 1881. Lorée (*b* La Couture 1835; *d* 1902) had worked for Triébert, first as *chef de fabrication* and from 1867 as *chef d'atelier*. By 1882, the Lorée oboe had won the approval of the eminent oboist and teacher Georges Gillet, thereafter becoming the official oboe used at the Paris Conservatoire. Lorée's instruments, including the english horn, oboe d'amore, and baritone oboe, were awarded the silver medal at the Paris Exposition of 1889. François' son, Lucien (*b* La Couture 1867; *d* Paris 1945), carried on the business after his father's death. Having developed oboes with Boehm and Barret systems, he produced the 'Conservatoire' system (no.6 *bis*) in 1906 in close collaboration with Gillet, a system which may be considered the perfected form of the Lorée oboe. In 1925, Lorée sold the company to Raymond Dubois (1887–1957) but continued to work for him until 1942. On Dubois' death the succession passed to his son-in-law Robert de Gourdon (1912–1993). The present director is his son, Alain de Gourdon (*b* 1949). The firm, now known as F. Lorée-De Gourdon, is based in Paris and continues to make F. Lorée oboes, english horns, oboes d'amore, bass oboes, piccolo oboes, and the Cabart student line.

LAILA STORCH

Lorengar, Pilar [García, Pilar Lorenza] (*b* Zaragoza, 16 Jan 1928; *d* Berlin, 2 June 1996). Spanish soprano. She studied in Madrid, making her début in zarzuelas in 1949. In 1955 she sang Cherubino at Aix-en-Provence, Rosario in a New York concert performance of *Goyescas* (her American début) and Violetta at Covent Garden, where she returned as Donna Anna, Countess Almaviva, Fiordiligi and Alice Ford. She sang Pamina at Glyndebourne (1956) and Buenos Aires (1958), and Ilia (*Idomeneo*) at Salzburg (1961). She sang at San Francisco (1964–5) as Desdemona, Liù, Mélisande and Eva. In 1966 she made her Metropolitan début as Donna Elvira, later singing Elsa, Eva, Agathe and Butterfly. She appeared in most major European opera houses, but it was at the Deutsche Oper, Berlin, where she was engaged from 1958 for over 30 years, that she chiefly made her career, broadening her repertory to include Regina (*Mathis der Maler*), Elisabeth de Valois, Mařenka, Tatyana, Jenůfa, Mimì, Tosca, Manon Lescaut, Valentine (*Les Huguenots*), Maddalena (*Andrea Chénier*) and Queen Isabella in the German première of Falla's *Atlántida* in 1961. Though not the deepest of interpreters, Lorengar achieved great success through her attractive stage presence, pearly tone and refined phrasing. Notable among her many recordings are her Fiordiligi and Violetta.

HAROLD ROSENTHAL/ALAN BLYTH

Lorente, Andrés (*b* Anchuelo, nr Toledo, bap. 15 April 1624; *d* Alcalá de Henares, nr Madrid, 22 Dec 1703). Spanish theorist and composer. He was educated in Alcalá from about the age of 12, and entered the university there in 1645, taking the BA in 1650. From 1652 until his death he taught at the same university, possibly acting as assistant in the afternoons to the doctors and graduates who had given lectures in the mornings; from 1696 to 1701 he was dean of the faculty of arts. His university duties left him time to work also as senior organist at SS Justo y Pastor, an important church linked to the university in the provision of canons and prebendaries.

Lorente was known as an expert on organs. He restored the organ of the parish church in his home town in 1664–6, returned there to make some important repairs in 1684–5, and was mentioned as a builder of the organ in the university chapel of S Ildefonso. In addition to his other activities he acted in a limited, presumably honorary capacity as Commissioner of the Holy Office in Quer, the small village near Alcalá where he lived. Probably before that, in 1660–73, he was a chaplain at the parish church in Anchuelo.

Lorente's most important contribution to music is the treatise *El porqué de la música, en que se contiene los quatro artes de ella, canto llano, canto de órgano, contrapunto, y composición* (Alcalá de Henares, 1672, 2/1699), in which the 'four arts' – plainchant (including notation, modes and repertory), 'organ chant' (mensural notation, time and proportions), counterpoint (intervals, consonance and dissonance, and rules for part-writing) and composition (harmonic formulae, polyphonic modality and compositional styles) – are closely studied in accordance with Renaissance and Baroque theory. It is an erudite book, full of citations, but it is also a practical work with numerous music examples, many of them interesting pieces by Lorente himself. Although not entirely original, it effectively bridges the gap between the late Renaissance crystallization of Cerone's *El melopeo y maestro* (1613) and late Baroque summation of Pablo Nassarre's *Escuela música* (1723–4). At 695 pages, *El porqué* is shorter and more sharply focussed than either of these, and it proved to be of exceptional value in general education and as a theoretical and practical reference book, especially in ecclesiastical circles; it served for decades as a complete manual for those competing for posts as organists or *maestros de capillas*.

Little is known of Lorente as a composer, but it seems that many anonymous works in contemporary anthologies, especially in the *Flores de música* compiled by his pupil Antonio Martín y Coll, may be his, and some pieces questionably attributed to others (for example the *Benedictus a fabordón por séptimo tono* by 'Maestro Torres' in *E-Bc*) may also be by Lorente. The manuscript M.1358 in the Biblioteca Nacional, Madrid, has been shown to be by Lorente (see Jambou, *Mélanges de la Casa de Velazquez*, 1976; transcriptions in Jambou, 1977). A volume of organ tablature, *Melodías músicas*, by Lorente, cited in Ruiz de Ribayaz's *Luz y norte musical* (Madrid, 1677), has never been found.

ÁLVARO ZALDÍVAR

Lorentz, Johann [Johan] (**i**) (*b* Grimma, Saxony, *c*1580; *d* Elsinore, bur. 18 June 1650). Danish organ builder of German origin, father of Johann Lorentz (ii). He studied organ building with NIKOLAUS MAASS in Stralsund before settling down as a master builder in Flensburg in 1609. In 1616 or 1617 he was brought to Copenhagen by Christian IV and in 1639 he received the royal privilege as builder of organs in Denmark and Norway. He built and repaired many notable organs, for example those at the Trinity Church, Kristianstad (Skåne, now part of Sweden); St Marie, Elsinore; St Nikolai and St Petri, Copenhagen; S Nikolai, Nakskov; and in Odense and Sorø. The instrument in Kristianstad is the best surviving example of his work.

JOHN BERGSAGEL

Lorentz, Johann [Johan] (**ii**) (*b* Flensburg [now in Germany], *c*1610; *d* Copenhagen, 19 April 1689). Danish organist and composer, son of Johann Lorentz (i). He became organist of Vor Frue Kirke, Copenhagen, in 1629 on the recommendation of King Christian IV. He was granted leave of absence to study in Italy and Germany from 1631 to 1633. During this period he may have studied in Hamburg with Jacob Praetorius, whose daughter he married in 1635 and to whose position of organist at St Petri, Hamburg, he was elected in 1651. He chose, however, to remain in his post as organist of St Nikolai, Copenhagen, which he had assumed in 1634 or 1635 and which he held until his death. He was also organist of Holmens Kirke. He and his family died in the fire that destroyed the opera house erected to celebrate King Christian V's birthday in 1689. Lorentz introduced weekday concerts at St Nikolai, where his playing on the fine organ built by his father earned him a reputation as 'organist second to none in Europe'. According to Pirro he taught Buxtehude, but there is no evidence for this claim. Only a few short organ pieces by him survive (at *DK-Kk* and *S-Uu*; ed. B. Lundgren, Lund, 1960); most

are dance movements, and they seem to have been intended for teaching purposes.

JOHN BERGSAGEL

Lorentzen, Bent (*b* Stenvad, 11 Feb 1935). Danish composer. He studied musicology at Århus University and then theory and music history at the Royal Danish Conservatory, from which he graduated as a music teacher in 1962. At this time he also studied composition with Jersild. In 1962 he was appointed to teach theory at the Jutland Conservatory in Århus; from 1967 to 1968 he held a scholarship to study at the EMS electronic studio in Stockholm. He settled in Copenhagen in 1971, and was attached to the Danmarks Laererhøjskole (postgraduate college) in 1972–3.

In his creative work Lorentzen quickly turned away from convention and, stimulated by what he had learnt at the Darmstadt summer courses of 1965, devoted much of his attention to electronic music, which he has also used extensively in teaching. During the period 1967–8 he composed a number of electronic works, acquiring a thorough knowledge of technique and developing a quasi-serial compositional method in which timbre is the dominant element. Experience gained in the electronic field was further exploited in the late 1960s and early 1970s in instrumental compositions, of which the organ piece *Intersection* (1970) is an important example. This graphic score includes directions for changes of stops in a sort of tablature notation. In addition to such purely musical works, Lorentzen has interested himself in a theatrical form that seeks to voice a protest against capitalist society and its sophisticated musical life, a protest unmistakably expressed in such works as *Tristan variationer*, *The End* and *Danish Wind*. These two strands in Lorentzen's work have little in common, but an attempted synthesis is perhaps to be found in the opera *Euridice*, in which the underworld is viewed through the eyes of the title character. The work won the 1970 Italia Prize.

During the 1970s the political commitment and avant-garde tendencies in Lorentzen's works were replaced by a more classical orientation combined with the development of electrophonic effects. This became the point of departure for the film opera *Tårnet* ('The Tower'), a prize-winner at Nyon in 1973, and for a series of musical dramatic works for vocal soloists with tape accompaniment, which he composed for German stages. Examples include *Die Musik kommt mir äusserst bekannt vor* (Kiel, 1974), which combines characters and quotations from Mozart's Italian operas into a witty and characteristic collage, and *Eine wundersame Liebesgeschichte* (Munich, 1979), subtitled 'Tristan variationer', which links together Wagner's drama with the 'murder' of Ludwig II of Bavaria on the Starnberger See. During the 1980s and 90s Lorentzen continued in musical theatre with a series of (often comical) works which combine electronic sound and instruments, where traditional stylistic features become more prominent to the detriment of the experimental and modernistic, and where the rhythmic element is profiled and gradually becomes just as significant as the sound element. Among the most important of these works are the psychological thriller opera *Bill og Julie* (Ebeltoft, 1991) and *Den stundesløse* ('The Fussy One'), after the play by Holberg (Copenhagen, 1995).

Lorentzen has also composed choral and instrumental music which in the 1970s showed inspiration from Polish modernism (Penderecki and in particular Lutosławski), and following a stay in Brazil in 1977 he brought in Latin American rhythms and percussion instruments. The orchestral work *Tide* (1971) is an important example; others, all prizewinners, are the ensemble work *Paradiesvogel*, the choral work *Olof Palme*, the organ work *Luna* and a piano concerto.

JENS BRINCKER

Lorenz, Alfred (Ottokar) (*b* Vienna, 11 July 1868; *d* Munich, 20 Nov 1939). German musicologist and conductor. A pupil of Spitta and Radecke in Berlin, he worked as a conductor from 1893, notably at Coburg and Gotha, and composed an opera, several orchestral works, songs and a Clarinet Quintet. In the aftermath of World War I he was forcibly retired and settled in Munich. He studied musicology under Moritz Bauer at Frankfurt, graduating in 1922 with a thesis on form in Wagner's *Ring*. The following year he was appointed lecturer, and in 1926 honorary professor, at Munich University. His four-volume *Das Geheimnis der Form bei Richard Wagner* (1924–33) laid the foundation for all subsequent Wagnerian analysis and is still unsurpassed in scope. Cognizant of Wagner's mention in *Oper und Drama* of the tonally unified 'dichterisch-musikalische Periode', Lorenz divided his post-*Lohengrin* works into such periods, each internally articulated by recurring forms such as *Bar* and *Bogen*. He was the first Wagner analyst to systematize musical procedures beyond the purely referential web of leitmotifs, endeavouring to defend the works from accusations of 'formlessness' and to prove their worth as absolute music. Although he claimed to exclude the drama from consideration, in practice it tended to be the primary determinant of the period boundaries. His preoccupation with form and structure was tempered by his adherence to Schopenhauerian-Wagnerian music aesthetics. He demonstrated the applicability of his formal analysis to other composers with studies of the early operas of Alessandro Scarlatti (1927) and Mozart's operatic finales (1926), as well as of instrumental pieces by Bach, Beethoven, Bruckner and Strauss. A number of his articles were published in the *Bayreuther Festspielführer*, 1924–39 and translated into English (*Wagner*, ii, 1981, 21–5, 40–44, 74–7; iv, 1983, 9–13).

Lorenz was a member of the Nazi party from 1931 and published articles on music and race, genealogical research, and the 'Jewish question'. Many of his articles on musical form employ National Socialist rhetoric, and many of the aesthetic and philosophical foundations of Nazism are shared by his method. In 1938 he published a collection of Wagner's letters and other writings, aiming to present him as a spiritual forefather of Nazism.

STEPHEN McCLATCHIE

Lorenz, Max (*b* Düsseldorf, 10 May 1901; *d* Vienna, 12 Jan 1975). German tenor. After studying with Grenzebach in Berlin he became a principal tenor at Dresden in 1928. From 1933 he was at the Berlin Staatsoper, appearing also at the Metropolitan (from 1931), Bayreuth (from 1933, and again in 1952), Covent Garden (1934 and 1937) and in many other houses in Europe and the USA. He became a member of the Vienna Staatsoper in 1937, appearing at many Salzburg festivals and creating roles in such new works as von Einem's *Der Prozess* (Josef K, 1953), Liebermann's *Penelope* (1954) and Wagner-Régeny's *Das Bergwerk zu Falun* (1961). Lorenz was for almost three decades a prominent Wagnerian tenor, celebrated as Tristan, Siegfried and Walther in particular; he was also a notable Othello, Bacchus and Herod. Late in his career he showed his versatility in a number of smaller and less characteristic parts, but he continued to be a striking Tristan and Florestan into his mid-50s.

PETER BRANSCOMBE

Lorenz, Ricardo (*b* Maracaibo, 24 May 1961). Venezuelan composer. He attended the Olivares and Landaeta conservatories in Caracas and studied composition with Juan Orrego-Salas and Donald Erb at Indiana University (MM, 1986). He was acting director of the university's Latin American Music Center (1987–92), where he compiled the sourcebook *Scores and Recordings at Indiana University's Latin American Music Center* (Bloomington, 1995). In 1992 he moved to the University of Chicago to study for the PhD with Eaton and Ran. He has been composer-in-residence with the Chicago SO and the Billings SO (Montana).

Lorenz has emerged as one of the most prominent Venezuelan composers of his generation. He has received many prizes and grants, and his works have been performed at festivals in the Americas and in Europe. In

works like the Concerto for Orchestra, commissioned by Dennis Russell Davies, his imaginative orchestration clothes complex tonal structures, frequently constructed round the rhythmical principle of the Cuban *clave*. The sardonic wit of his music belies a learned manipulation of elements of Latin American popular music and an ideological concern for cultural and artistic identity.

LEONARDO MANZINO, CARMEN HELENA TÉLLEZ

Lorenzani, Paolo (*b* Rome, 5 Jan 1640; *d* Rome, 28 Oct 1713). Italian composer. He was born into an artistic family – his older brother Giovanni Andrea (1637–1712) was a poet and librettist, his uncle Lazzaro Baretta a painter – and sang soprano in the choir of the Cappella Giulia from May 1651 to July 1655 under the direction of Orazio Benevoli, *maestro di cappella* from 1646 to 1672. In 1669 Lorenzani's name began to appear regularly on the registers of the Congregazione di S Cecilia when he was chosen to compose litanies, vespers and masses for various occasions in Rome, including four oratorios for the Arciconfraternita del SS Crocifisso, in S Marcello. He succeeded Vincenzo de Grandis (ii) late in 1672 as *maestro di cappella* of the Jesuit Chiesa del Gesù and the Seminario Romano. His motets, along with those of the most illustrious composers of his time, appeared in two collections published in Rome and Bologna in 1675. In autumn 1675 he left his position of prestige in Rome and became *maestro di cappella* at Messina Cathedral. The Duke of Vivonne, brother to Mme de Montespan and Mme de Thianges, was at that time Viceroy of Sicily and in charge of the French forces. Lorenzani composed not only masses, vespers and *Te Deum* settings for the cathedral, but also *intermedii*, ballets, *comédies-ballets* and an opera (*Il Coloandro*) for the duke, who often put on sumptuous festivities and displays for the Sicilian nobility. In 1678, when Louis XIV recalled Vivonne to France and sent La Feuillade in his place to withdraw the French forces from Sicily, Lorenzani boarded La Feuillade's ships for France; he arrived at Toulon on 7 April.

When Lorenzani reached Paris later that spring, Lully, whose career was at its height, was exercising absolute control over French opera. In 1666, with Colbert's help, he had persuaded the king to dismiss his Italian singers, and he had since discouraged Italian music in France. But Lorenzani soon came under the protection of his former patron Vivonne, who introduced him at court in August that year. Louis XIV heard one of Lorenzani's motets, which so pleased him that not only did he have it sung several more times, but he gave the composer a substantial sum of money, encouraged him to remain in France, and supplied him with most of the funds necessary to purchase from Jean-Baptiste de Boësset the position of *maître de musique de la reine*. Lorenzani's success and popularity grew as he continued to please the king and all his court. In June 1679 the king sent him to Italy to recruit 'the best singers he could find' (*Mercure galant*, June 1679). Lorenzani returned in December with five castratos, and on 1 January 1680 he took up his new position in the service of the queen. In August that year he was placed in charge of the music for the consecration of Colbert's son, Jacques Nicolas Colbert, as coadjutor to the Bishop of Rouen.

Lully was undoubtedly troubled by all this success. In September 1681 the Duke of Vivonne and the Duke of Nevers (Philippe-Julien Mancini), son-in-law to Mme de Thianges and a nephew of Cardinal Mazarin, organized and presented before the king at Fontainebleau an Italian pastoral-opera by Lorenzani entitled *Nicandro e Fileno*, on a text by Nevers himself. Although his privilege of 1672 gave him no power over this court performance, Lully, out of jealousy of Lorenzani, did everything possible to block its presentation. The opera, which featured Lorenzani's Italian style adapted to French taste, was an immediate success. According to the *Mercure galant* the king saw two performances, and declared he had 'never seen a more suitable and noble performance'.

Lorenzani continued to triumph at court in 1682: one of his psalms was performed at the royal chapel in April; a concert of his *airs*, requested by the king to honour the dauphine, was sung by the Italian soprano Anna Caruso in September; four new motets were given before the king in October; and in November a collaboration with Lalande in another dramatic work, a *sérénade en forme d'opéra*, was presented before Louis XIV at Fontainebleau. But the year 1683 marked the decline of Lorenzani's career at court. First he was eliminated in the famous contest (suggested to the king by Lully) held to fill the four positions of *sous-maître de musique de la chapelle*, which were to be shared by four men, each one sharing a four month term. Lorenzani and many other deserving composers, including Charpentier, Desmarets, Nivers and Danielis, were eliminated because of a procedure that favoured patronage over merit. It is quite possible that Lully wanted by this means to exclude from court all possible rivals, the popular and successful Lorenzani in particular. The announcement of the results in May caused a near scandal. Lully was accused of intrigue, and a polemic broke out in the press, led by the *Mercure galant* (June 1683), over his stranglehold on operatic music in the kingdom. Nonetheless Lorenzani continued to be well thought of, offering his faithful supporter Mme de Thianges a *sérénade* entitled *Quanto è dolce il languire* on 9 July 1683. But on 30 July the queen died after a short illness, and Lorenzani was suddenly without a position at court. However, his service to the queen was acknowledged in November when a royal declaration allowed him to keep his title and all the privileges assocated with it.

Lorenzani's activities away from court remain partly obscure. He wrote a song *Tornami in petto speranza cara*

for a play by Fatouville performed at the Théâtre Italien on 5 March 1684, and on 20 June 1685 he was appointed director of music at the Theatine convent, where his 'saluts en musique', which included several sung motets, a short sermon and a benediction, became one of the most fashionable attractions of Paris and Versailles. Performances of his masses, *Te Deum*, *Exaudiat* and motets in several Parisian churches are documented, particularly for 1686–7. On 23 August 1688 the Académie Royale de Musique presented his opera *Oronthée* at Chantilly during magnificent festivities given for the dauphin by the Prince of Condé. The score is lost (except for a fragment), as is that of a hastily prepared divertissement performed later that week which included arias from *Nicandro e Fileno*. These performances did little to enhance Lorenzani's career. In 1693 Ballard published a lavish edition of his motets. Lorenzani had these printed at his own expense and dedicated them to the king in the hope of obtaining a vacant position as *sous-maître de musique de la chapelle*. But when Lalande was given the position in September, this disappointment and the poor sale of his motets 'because there were too many circulating in manuscript' caused him to become disgusted with France, according to Sébastien de Brossard.

On 19 July 1694 the chapter of the Cappella Giulia elected him *maestro di cappella* to succeed Francesco Beretta, even though Lorenzani had not applied for the position and had been absent from Rome for nearly 20 years. He accepted the offer and left for Rome probably in spring 1695, assuming his new functions at the Vatican on 1 April that year. He must have married by then, since three daughters of his were baptized in Rome between 1695 and 1701. Meanwhile, Ballard published his *Airs italiens* in 1695 and another of his *airs* in 1696; these were followed by a solo cantata in 1706. Lorenzani remained active throughout his tenure at the Cappella Giulia, assuming many responsibilities beyond his duties at S Pietro. In 1696, 1704 and 1710 he was elected *guardiano* of the Congregazione di S Cecilia representing the *maestri di cappella*, and he was often called upon to compose music for various churches and celebrations in Rome. He died on 28 October 1713, at the age of 'about 73 years' and was buried in the parish of Santo Spirito in Sassia.

The only Italian composer apart from Lully to hold an official position at court during the reign of Louis XIV, Lorenzani was probably one of the most popular and influential Italian composers in France at that time. It was in France that he developed a distinctive voice as he adapted his writing to French taste. Before going to France he had established himself as one of the leading composers of his generation. Two motets published in 1675, the cantata *Darmi di tali tempre* and the song *Due pupille amo in un volto* are very much in the style of his contemporaries. During his 17 years in France he composed a great quantity of music, much of which has been lost. The motets published by Ballard in 1693 retain a number of Italian features, particularly in their form and instrumentation, but they incorporate French as well as Italian practices. Similarly, some arias from *Nicandro e Fileno* resemble those of Alessandro Scarlatti's early operas, but the general style of the work, though more Italian here than in the motets, shows a remarkable capacity for adaptation to French taste on the part of Lorenzani, as do most of the cantatas and arias from the Brossard collection in the Bibliothèque Nationale. *Nicandro e Fileno* remains a landmark in the history of French opera, not only because of its original style but also because it was one of the rare Italian operas performed in France during the personal reign of Louis XIV. Conversely, traces of his 'French style' are discernible in the music written in Rome during his tenure at S Pietro. Unfortunately, few of the 180 works he left at the Cappella Giulia at his death have survived. Three *Magnificat* settings, litanies for the Virgin, a set of psalms for Vespers and ten other motets illustrate his mastery of tonal counterpoint and his ability to marry the traditional Roman polychoral medium with the modern concertato style. But it was in France that Lorenzani's impact was chiefly felt. The popularity of his church compositions in particular caused a surge of interest in Italian music. His influence, along with the efforts of other 'italianizing' French composers of the time – Du Mont, Charpentier, Danielis, and later Campra and Brossard – eventually brought about the italianization of French music at the turn of the century.

WORKS

SACRED

Magnificat, 4 solo vv, 2 SATB choirs, bc, *I-Rvat*; Magnificat, 5 solo vv, SSATB, SATB, bc, *D-MÜs*, *I-Rvat*, ed. G. Catalucci (Rome, 1981); Magnificat, 6vv, bc, *Rsc*

Litanie, 4 solo vv, SATB, bc, ed. F. Vernaz (Paris, 1992)

[25] Motets à I, II, III, IV, et V parties (Paris, 1693); 6 ed. F. Vernaz (Paris 1991)

Other motets: Alma Redemptoris mater, 3vv, bc, *I-Rf*, *P-Lf*; Ave regina caelorum, 3vv, bc, *I-Rvat*; Benedictus qui venit, 2vv, bc, *Rvat*; Caeli chori festinate, 3vv, bc, 1675[3]; Cibavit eos, 2 SATB choirs *Rvat*; Custodi me Domine, SATB, *Rvat*, ed. J. Lionnet, *La Cappella Giulia*, i: *I vespri nel 18 secolo*, L'arte armonica, II/ii (Lucca, 1995); Hoc est praeceptum, 2vv, bc, *Rvat*; Nihil est sub sole, 2vv, bc, 1675[2]; Obstupecite, 3vv, 2 vn, bc, *F-Pn*; O sacrum convivium, 3vv, bc, *Rvat* (4 settings), 2 ed. Lionnet, op. cit.

[7] Psalmodia varia, 6vv, bc, *Rsc*

L'Angelo custode (orat, G. Apolloni), music lost, lib *Rvat*

Lost: orats, masses, TeD, motets, cited in *Mercure galant*; 71 pss, 16 Mag, TeD, 6 masses, 12 grads and offs, 19 motets for the elevation, 36 ants for communion, 19 hymns for communion, listed in the archives of the Cappella Giulia, Rome

STAGE

Il Coloandro (op), Messina, 1679, lost

Nicandro e Fileno (opéra-pastorale, 3, P.-J. Mancini, Duke of Nevers), Fontainebleau, Sept 1681, *F-Pn*; 1 aria in Airs italiens de M. Lorenzani (Paris, 1695), 1 in 1695[5], 1 ed. in Prunières; ed. A. La France (Versailles, 1999)

La sérénade (en forme d'opéra, C.-C. Genest), Fontainebleau, Nov 1682, lost, collab. M.R. de Lalande

Oronthée (opéra, 5, M. Leclerc), Chantilly, 23 Aug 1688, frag. *F-Pn*, lib (Paris, 1688)

Intermedio musicale (1, M. Cervoli), music lost, lib *I-Rvat*

4 intermedii, 2 comédies-ballets, Messina, 1675–9, lost

SECULAR VOCAL

Cantatas (for 1v, 2 vn, bc, unless otherwise stated): A pena dall'oriente, 1695[5]; Colpe mie venite a piangere, Mdina archives, Malta; Darmi di tali tempre, *US-Cn*; Infra l'horide balze, *F-Pn*; Mi contento cosi, *I-Rvat*; Quanto è dolce il languire (Sérénade pour Mme de Thianges), 2vv, 2 vn, bc, *F-Pn*; Quanto poco durate, *Pn*, *GB-Lbl*, Sopra l'erbose sponde, *F-Pn*

Airs italiens de M. Lorenzani (Paris, 1695) (for 1v, bc, unless otherwise stated): Amorose pupillete; E chi porti, 1v, 2 vn, bc; Mi lusingate; Tornami in petto speranza cara; Voglio amar se trovero; 1 aria from Nicandro e Fileno (see STAGE above)

Other arias (all in *F-Pn*; for 1v, bc, unless otherwise stated): Amorose pupillete; Diletto perfetto piu caro, 1v, 2 vn, bc; Due pupille amo in un volto; Ho petto che basta; Luci care, luci amate, 1v, 2 vn, bc; Occhi miei che posso farvi; O questo volta si ch'io m'innamoro, 2vv, bc; Se ne vola la speranza; T'amo Filli et t'amo tanto; Una mano candidetta; Vera fe verace ardore

Quand mon destin belle Sylvie, in *Airs sérieux et à boire* (Paris, 1696)
Menuet, lost, mentioned in *Mercure galant*, May 1679, 271–3
Air in *Mercure galant* (May 1680), doubtful attrib.

ALBERT LA FRANCE

Lorenzi, Filiberto. *See* LAURENZI, FILIBERTO.

Lorenzi, Giorgio (*b* Florence, 1846; *d* London, 1922). Italian harpist and composer. He received his education at the Istituto Musicale in Florence, studying the harp under Ferdinand Marcucci, whom he succeeded as professor. About 1910 he moved to London, where he continued to teach and to perform. His compositions, all for the harp, include a method, studies and about 12 pieces.

Lorenzi's son and pupil Mario (*b* Florence, 1894; *d* London, 1967) received his diploma from the Istituto Musicale in Florence when he was 14 years old. He played in public with his father both in Florence and in London. His technique produced a strong, rich and even tone, and as an improviser he displayed a freshness of invention. He also played the jazz harp and made some recordings. After 1952 he gave up playing because of arthritis.

ALICE LAWSON ABER-COUNT

Lorenzini, Raimondo (*b* Rome; *d* Rome, late May 1806). Italian composer. From 1751 he was organist at S Maria Maggiore in Rome, where he became *maestro di cappella* on 7 September 1786 and, according to Santini, remained until 1795. He was a distinguished composer in the Roman tradition of vocal polyphony and occasionally also composed in a straightforward *a cappella* style. His work is closest to that of Cannicciari, Casciolini and Giorgi, as his Requiem demonstrates. His Responses for Holy Week are reminiscent of compositions by Anfossi and Cordans.

WORKS

Stage: Il matrimonio discorde (farsetta, C. Goldoni), Rome, 1756
Sacred: Requiem and 4 Assolutioni, 4–8vv; Sacerdotes Domini, Laudate Dominum, O quam suavis, Sub tuum praesidium, all 4vv, bc; Miserere, 4–8vv; Responses for Holy Week, 3vv; Dixit, 8vv, insts; Veni Creator, 2vv, bc; Salve regina, S, A, chorus, insts; 2 Tantum ergo, 1v, org, 2vv, bc; Antiphons for Advent; 4 motets 'in pastorale'

SIEGFRIED GMEINWIESER

Lorenzino [Lorenzino dai Liuti, Laurenzini, Laurencinus Romanus, sometimes also identified with Cavaliere del Liuto, 'Eques Romanus', 'Eques Auratus Romanus'] (*d* ?Rome, ?23 Nov 1608). Italian lutenist and composer. While his origins and his possible identification as the 'Cavaliere del liuto' cannot be confirmed, it is likely that most of the various references to a late 16th-century and early 17th-century lutenist by the name of Lorenzino refer to the same person. The first record refers to a lutenist called Lorenzino who was in the service of Cardinal Ippolito d'Este in Ferrara and Tivoli in 1570–71. He was probably Lorenzino Trajetti (*d* Rome, 20 July 1590), the son of Franciscus 'Gallus Belgicus'; he died in Rome in his house in the via dell'Olmo (now via Vicolo del Lento), leaving to his widow, Lucrezia Paolini, 'tre liuti usati' and 'un chitarrone usato', among other possessions (Pesci, 1997).

According to Valdrighi, a 'Lorenzino Bolognese', a 'singer' in the service of the Farnese family in Parma between 1573 and 1586, studied as a page with the celebrated Neapolitan Fabrizio Dentice (who served at the Farnese court in both Rome and Parma). On 12 August 1570 a 'Lorenzino dai Liuti' was called for by the Duke of Mantua, but he had already left Rome in the retinue of the Prince of Bisignano (and was possibly involved in the theatrical celebrations organized the same year in Naples for the prince by Dentice). In 1586 (when the 'Bolognese' Lorenzino left the service of the Farnese family), a 'Cavaliere del liuto' appears for the first time in the register of house musicians of Cardinal Montalto (Alessandro Peretti) in Rome. This virtuoso is mentioned several times (as well as in Jean de Macque's letters from Naples) during his time in Montalto's service, until his death in the cardinal's palace in 1608.

The identification of 'Lorenzino dai Liuti' with the Cavaliere del Liuto, apart from their biographical coincidence, is suggested by a poem in the *Thesaurus harmonicus* of 1603 by Jean-Baptiste Besard, in which he is described as 'Laurencium civem romanum, qui propter insignem testudinis experientiam Eques Auratus [i.e. Knight of the Order of the Golden Spur] Roma fieri promeruit'. It was not unusual for Roman cardinals, particularly Montalto, to obtain titles for their most important musicians. The problem is that the styles of the pieces by Lorenzino, the so-called 'Eques Romanus' (whom Besard listed separately in his index), and the Cavaliere del Liuto are at times so far apart as to call into question this identification. But it is also true that there are cases where the same piece is attributed in different sources to different composers. It may well be that Lorenzino became a pupil of Dentice, probably in Rome, not in Parma. Nicola Tagliaferro, a singer in the Neapolitan Chapel Royal may have been referring to Lorenzino when he stated that Cavaliere Dentice, who was a 'Neapolitan knight of noble standing', had no equals, not even the 'little knight (Cavaglierino)

in the service of Cardinal Farnese in Rome'. The only surviving vocal piece attributed to 'S. Cavaliere del liuto' (*Di pianti e di sospir*, a villanella for 3 voices on a text by G. Paratico: I-Moe) is almost certainly by Fabrizio Dentice. The connection between Lorenzino and Dentice and other Neapolitan lutenists is also documented by the manuscript *PL-Kj*, formerly *D-Bsb*, Mus. 40032 (a rich source of single pieces by Lorenzino). The other lutenist in the service of the Farnese family appears in this source: Santino Garsi, to whom another manuscript attributes a capriccio (*D-DO G.I.4*), which a later Hebrew hand ascribed to a 'Kawalis Lorenzo', thus almost confirming the identity of 'Cavaliere Lorenzo'.

The situation is complicated by the fact that other 'Cavalieri del liuto' were active in Rome after 1608. Franca Camiz has discovered a reference to 'Cavaliere del liuto' in the service of the Roman Orsini family and still alive after 1608, and T. Boccalini (*Ragguagli di Parnaso*, 1612–15) refers to a Vincenzo Pinti, a Roman nobleman, as 'Cavaliere del Liuto'.

Lorenzino (to whatever extent he can be identified with the Cavaliere) was the most important lute teacher in Europe at the end of the 16th century and the beginning of the 17th. In the monumental edition 'Divo Laurencini dicata' of the *Thesaurus harmonicus* (1603), Besard stated that he was a pupil of the lutenist in Rome and that he acquired from him the valuable *Istruzioni* published in his work entitled *De modo in testudine studendi libellus*, which was shortly afterwards reprinted in English (Dowland, 1610) and by Besard himself in Latin and German (1617). A manuscript copy of a similar *Istructio* received in Rome from a 'Cavaliero maestro di Roma' (another piece of evidence to identify him with Lorenzino) was copied in Latin by a Polish student on a collection of Venetian lutebooks of the years 1546–7 (which was once held in Sorau but which disappeared after 1942).

Evidence of the fame of the Cavaliere del Liuto is provided by many contemporary references in dedications by musicians close to Cardinal Montalto, such as Raval 1590, and in later documents. Alessandro Piccinini (1623) declared that one of the 'archlutes' he had invented in 1594 was taken from Ferrara to Naples by Prince Carlo Gesualdo and then entered the possession of the Cavaliere del Liuto, returning to Piccinini on the latter's death (an important confirmation of a connection between the Cavaliere and Naples). Besides Besard, Lorenzino's works were made known in England and the German states in the publications by Dowland (1610) and Fuhrmann (1615) and throughout Europe in a vast number of manuscript versions. In 'Mary Burwell's lute book', Lorenzino is credited as the 'inventor' of modern lute music and he is also mentioned in the manuscript treatise by E.G. Baron (1727) and in the *Lexicon* by J.G. Walther (1732).

Lorenzino's compositional style is derived from that of his probable teacher, Fabrizio Dentice, particularly in his adept use of counterpoint alternating with chordal homophony and in a taste for unprepared dissonances and suspensions. His mature style (and that of the Cavaliere del Liuto) is more clearly modern, with a prevalence of short, prelude-like compositions, and characteristic formulas, in which an early use of *style brisé* starts to appear. There is an overriding impression of compositions that are not complete but are exercises of remarkable craftsmanship and artistry, intended primarily for teaching purposes.

WORKS

all for lute; some attrib. 'Eques Romanus' or 'Cavaliere del liuto'

Printed: 22 preludes (1 doubtful, 2 attrib. 'Equitis Romani'), 9 fantasias (1 doubtful, 2 attrib. 'Equitis Romani', 9 galliards (1 attrib. 'Equitis Romani'), 4 passamezzos (1 attrib. 'Equitis Romani'), 2 branles (1 arr. Besard), 5 intabulations of It. madrigals (1 anon.), 1 of Fr. chanson; 1603[15], 1610[23] (1 doubtful, 1 attrib. 'Knight of the Lute'), 1615[24] (attrib. 'Laurencini Romani', 'D. Laurencinus', 'Romanus', 'Laurentzini'), 1617[26] (attrib. 'Laurencini'); 1 passamezzo ed. O. Chilesotti, *Lautenspieler des XVI. Jahrhunderts* (Leipzig, 1891/R); 2 fantasias ed. E. Hunt, *Robert Dowland: Varietie of Lute-Lessons* (London, 1957); 1 branle ed. A. Souris and M. Rollin, *Oeuvres pour luth seul de Jean-Baptiste Besard* (Paris, 1969)

MS only: 2 passamezzos, romanesca, ricercata, 2 toccatas, 2 galliards, 'tenore', 'matachin', *PL-Kj* (olim *D-Bsb* Mus. Ms.40032); 2 passamezzos (1 ascribed 'Equitis Romani'), 6 galliards (2 ascribed 'Equitis Romani'), romanesca, *D-W* Guelf 18.7 (dated 1603); 2 galliards, *I-COc* (dated 1601; facs. in AntMI, *Monumenta lombarda* C, iii, 1980); 2 passamezzos, praeambulum (ascribed 'Equitis Romani'), *CH-Bu*; toccata, 2 fantasias (ascribed 'Cavalieri di liuto' doubtful), *GB-Cfm*; fuga ('Equitis Romani'), *PL-Kj* (olim *D-Bsb* Mus. Ms.40143); fantasia and cappriccio, *D-DO* G.1.IV (also attrib. Garsi); Gagliarda ('Cavalieri del liuto'), *I-PESo*, Rari Ms.b–10 and *F-Pn* Rés.29; It. Madrigal 'transposito Laurenzino', *D-Bsb* (MS addition to copy of 1601[18])

DINKO FABRIS

Lorenziti [Lorenzetti, Lorenzity], **Bernard** (*b* Kirchheim, Württemberg, *c*1764; *d* after 20 Oct 1815). French violinist and composer of Italian descent. His father was *maître de chapelle* to Prince Nassau de Weilburg. Bernard was taught by his brother Joseph Antoine Lorenziti (*c*1740–89), *maître de chapelle* of Nancy Cathedral. According to the *Almanach musical* (1775–83/R), which praised his 'distinguished talent for the violin', he spent about a year in Paris, where in March 1777 he published his op.1, *Six Quatuors*. In November that year he went to Nancy. He was a violinist in the orchestra of the Académie Royale de Musique in Paris from Easter 1787, and in 1802 was appointed first violin in the quartet

established to accompany rehearsals. His retirement is recorded in a decree of 19 October 1812, issued in Moscow.

According to Fétis, he wrote almost 250 works, some 40 of which were published. They are often confused with compositions by his brother. Those which have been preserved, mainly for string instruments, are concertos and chamber music. They are technically simple, and his Six Trios (1780) were considered suitable for 'an amateur who, fearing comparison with a virtuoso, wishes to shine in a concert and yet to play with him' (*Almanach musical*, 1781). In 1798 he published his *Principes, ou Nouvelle Méthode de musique pour apprendre facilement à jouer du violon*. The main interest of this work lies in the duos added to it.

WORKS
published in Paris unless otherwise stated

ORCHESTRAL

Violin Concerto (1787)
Viola Concerto (*c*1799)

CHAMBER

3 sonatas, va, acc. b, op.39 (*c*1800)
6 duos, 2 vn, op.3 (*c*1781); 6 duos, 2 vn, op.5 (*c*1781); 6 duos concertants, (fl, vn)/2 vn (*c*1794); 6 duos d'une difficulté progressive à l'usage des commençants, 2 vn (*c*1794–7), also pubd as op.38 (Bonn, 1797); 6 duos concertants, 2 vc/2 bn (*c*1807); 3 duos dialogués à l'usage des commençants (18e livre de duos), 2 vn, op.36 (*c*1812)
6 trios, 2 vn, b (1780); 3 trios concertants, 3 vn, op.38 (*c*1799)
6 qts, 2 vn, va, b, op.1 (1777); Bataille de Prague, 2 vn, va, b (*c*1794)
Variations: La gamme, et 5 petits airs, vn, acc. va/b (1777); Airs variés, vn, acc. b (1785); Marche des Marseillois, vn, vc (*c*1793–4); Airs variés (2e suite), vn, acc. b (1794); 6 airs variés, vn, acc. vn (*c*1800); Ah, vous dirai-je maman, vn (*c*1808)
Canon, ou divertissement, 2 cl, 2 bn (*c*1800)
Ouverture d'Iphigénie en Aulide (Gluck), vn (*c*1811–14)

Doubtful: Menuet avec 10 variations, vn, b (1787), mentioned in *Calendrier musical universel* (1788); 6 trios, 2 vn, b, op.4 (n.d.), mentioned by Gerber; Pots-pourris (*c*1794–7), mentioned by Pierre

MICHELLE GARNIER-BUTEL

Lorenzo da Firenze [Magister Laurentius de Florentia; Ser Lorenço da Firençe; Ser Laurentius Masii, Masini] (*d* Florence, Dec 1372 or Jan 1373). Italian composer and teacher of music. He belonged to the second generation of Trecento composers. The name 'Masini' probably refers to his being the son of 'Tomaso'. Villani named him together with Bartholus de Florentia as a composer. According to Gallo he was a *canonicus* at S Lorenzo, Florence, from 1348 until his death.

The madrigal *Ita se n'er'a star* (see illustration overleaf) was presumably composed to rival Vincenzo's setting of the same text. We may conclude from the texts of the *Antefana* and *Dolgomi a voi* that Lorenzo was active as a teacher. The partly contemporaneous activity of Lorenzo and Landini at S Lorenzo makes some kind of master–pupil relationship probable. Similarly, the texts of *Ita se n'er'a star* and *Vidi, ne l'ombra* strongly suggest that Lorenzo moved in the same circles as Landini, Andreas de Florentia and Paolo da Firenze. The fact that he died in 1372 or 1373 explains why Lorenzo, like Gherardello, composed only monophonic ballette. Apart from these, ten madrigals, one caccia, a two-voice Sanctus, the *Antefana*, and perhaps a Gloria by him have survived. The music to two ballette texts by Sacchetti has been lost. The works have come down solely in Tuscan sources, among which the Squarcialupi Codex (*I-Fl* 87) contains all the secular compositions. Apart from texts by Sacchetti, Soldanieri and Gregorio Calonista, Lorenzo also set to music two poems by Boccaccio.

Lorenzo's style is characterized by the use of melisma, often very extensive. Imitations, the offsetting of text between the parts and part-crossing occur frequently. However, alongside these there are some older stylistic features such as parallel perfect consonances. In addition, there are French elements in Lorenzo's work: the caccia with a vocal tenor in the manner of a chace and the partly isorhythmic passages in *Povero zappator*. In the notation a change from the older Italian to the more modern French style is detectable (cf the two versions of *Ita se n'er'a star*). Besides this, the use of accidentals, often in profusion and with partly chromatic effect, is striking. In the Sanctus there is singular use of heterophonic part-writing. Lorenzo's style emerges, in the light of all this, as highly complex, many-sided and vigorously experimental.

KURT VON FISCHER/GIANLUCA D'AGOSTINO

Lorenzo da Pavia [Gusnaschi, Lorenzo; Gusnasco, Lorenzo] (*d* 1517). Italian instrument maker who worked in Venice. He is known both through an organ with paper pipes of 1494 and his correspondence with Isabella d'Este, a customer and patron who commissioned a virginal (*clavicordio*) from Lorenzo in 1496. This instrument is probably the one depicted in an intarsia in Isabella's *grotta* in the Palazzo Ducale, Mantua, which shows the earliest known use of the *C/E–c'''* compass in string keyboard instruments. Although Lorenzo made several harpsichords and lutes, his organ of 1494 is the only instrument known to have survived. This is a rare example of the use of paper pipes and also testifies to the probable use of a tuning close to ⅓-comma mean-tone (see Wraight) 77 years before it was first described in print by Zarlino (*Dimostrationi harmoniche*, 1571, p.221). According to Donati it had a compass *FG–f'''* with two ranks of pipes at 6′ and 3′ pitch. It is held in the Museo Correr, Venice.

DENZIL WRAIGHT

Loret, Jean (*b* Carentan, Normandy, 1595; *d* Paris, 1665). French writer. He settled in Paris, where he published his first poems, including the *Poésies burlesques*, in 1647. Some years later he obtained the patronage of Marie d'Orléans, Princess of Longueville, who became the Duchess of Nemours when she married. She granted him a pension of 350 livres and lodgings in her residence. Loret began producing a rhyming gazette for her: a weekly letter in diary form, giving an account of the news at court and in the city in octosyllabic verse. It first appeared on 4 May 1650 and closed on 28 March 1665, on Loret's death. It came out in manuscript until 1652; a printing licence was granted in 1655, and it appeared under the title *La muze historique* from 1656 onwards. Loret's verses in themselves are mediocre, but they are of interest for the information they provide. Loret had several correspondents, and his sources are varied. There are many letters concerning music at court, with accounts of various ballets, the latest Italian spectacles, the Molière-Lully collaboration and concerts; there are letters on church music, describing many ceremonies, and accounts of music-making among both the nobility and the prosperous middle class. Many performers are mentioned and several of the letters concern the lives of musicians or concerts given in their homes, either to publicize their own or their friends' works or to display their talents as instrumentalists.

YOLANDE DE BROSSARD

Lori, Arcangelo [Arcangelo del Leuto, Arcangelo del Liuto] (bap. 2 Jan 1615; *d* Rome, 15 Jan 1679). Italian lutenist, organist and composer. He spent the whole of his known career in Rome, where he was a leading lutenist in the mid-17th century. He is first heard of, however, as an organist: it was he whom Luigi Rossi succeeded as organist of S Luigi dei Francesi on 1 April 1633. Lori maintained connections with this church, for, at least from 1649 to 1662 and again from 1665 until he was removed in 1667, he participated as a lutenist in the patronal festivals there (on 25 August). From 1655 to 1678 he was second lutenist in Lenten Oratorios performed by the Arciconfraternita del SS Crocifisso at S Marcello. From 1651, at the latest, he was a member of the Congregazione di S Cecilia; between 1653 and 1657 and in 1664 he was *guardiano* of its various sections, on 19 November 1664 he was elected one of three almoners, and on 9 July 1665 he was appointed to a commission set up to revise the congregation's statutes. A series of letters written by Lori in 1665 to the Venetian opera impresario Marco Faustini, and to Faustini's friend Giovanni Antonio Leffio, reveal that the musician was active as a voice teacher, preparing a number of students for the operatic stage. His few surviving pieces show that he was a competent composer. Most are arias and cantatas for solo voice and continuo (in *I-Rc* and the Biblioteca Pamphiliana di S Agnese in Agone, Rome); one cantata, *Dimmi, Amor* (?*c*1645), whose source is now unknown, is published (ed. F.-A. Gevaert, *Les gloires de l'Italie*, Paris, 1868, i, and, attributed to 'Giovanni Francesco del Leuto', ed. A. Parisotti, *Arie antiche*, ii, Milan, 1890/*R*). There is also a motet, *Venite, gentes*, for soprano, violin, lute and continuo (in *I-Bc*).

HELENE WESSELY

Loriod, Yvonne (*b* Houilles, Seine-et-Oise, 20 Jan 1924). French pianist. She studied at the Paris Conservatoire in the early 1940s with Lazare Lévy, Marcel Ciampi, Messiaen and Milhaud, taking seven *premiers prix*. In 1943 she joined Messiaen in the first performance of the *Visions de l'amen* for two pianos, and since then she has been heard in the premières of all his works which include a piano part; she has recorded them all. She became Messiaen's second wife and subsequently appeared with him throughout the world. Messiaen said that he felt free to allow himself 'the greatest eccentricities' in his piano writing, knowing that they would be mastered effortlessly by Loriod. Indeed, his music is particularly suited to her style, richly sonorous, rhythmically acute, slicing into the keyboard to display extraordinary cascades of colour. She has also been associated with those composers who were her Conservatoire contemporaries, notably Boulez, whose second book of *Structures* she introduced with the composer at Donaueschingen in 1961. Her pioneering recordings of Barraqué's Sonata and Boulez's Second Sonata had the status of essential documents at a time when almost no-one else was playing such works. She taught at the Paris Conservatoire and at Darmstadt, her pupils including many of the French pianists who came to prominence during the 1960s and 1970s.

Lo Roy. *See* ROY, BARTOLOMEO.

Lortat-Jacob, Bernard (*b* Paris, 1 Jan 1941). French ethnomusicologist. He studied music at the Schola Cantorum (1964–6), ethnology at the Sorbonne with A. Leroi-Gourhan (1966) and then ethnomusicology with Gilbert Rouget at the Musée de l'Homme, Paris (1969–73). In 1974 he joined the Centre National de la Recherche Scientifique, where he remained for his subsequent career as a researcher, becoming the director of research in 1993. In 1988 he was placed in charge of the ethnomusicological course for the PhD at the University of Paris X (Paris-Nanterre) and in 1991 was appointed director of the Laboratoire d'Ethnomusicologie at the Musée de l'Homme. Lortat-Jacob's research concentrates chiefly on the music of countries in the Mediterranean (particularly Morocco and Sardinia) and the Balkans (especially Romania), and is conducted from a deliberately anthropological perspective.

JEAN GRIBENSKI

Lortie, Louis (*b* Quebec, 27 April 1959). Canadian pianist. He studied in Quebec with Yvonne Hubert and made his first major public appearance at the age of 13 with the Montreal SO. By the age of 15 he had won first prize in Canada's two main competitions, the Canadian Music Competition and the CBC National Competition. He made an official début in 1978 in Toronto with the Toronto SO, which subsequently engaged him for a tour of Japan and China. In his early twenties he moved to Baltimore to study with Leon Fleisher, and in 1984 won the Busoni International Competition and was also a prizewinner at Leeds. These successes helped to launch an international career based in Canada and the USA, with frequent tours of Europe and appearances in Asia. Lortie plays with powerful projection and a straightforward and unpretentious natural musical flow. Among the best of his recordings are the Chopin Etudes, the complete piano music of Ravel and Schumann's Concerto; his repertory also extends to Gershwin. He founded the Lortie-Berick-Lysy Trio in 1995, and appears both as conductor and soloist with the Orchestra di Padova e del Veneto. In 1992 he was made an Officer of the Order of Canada.

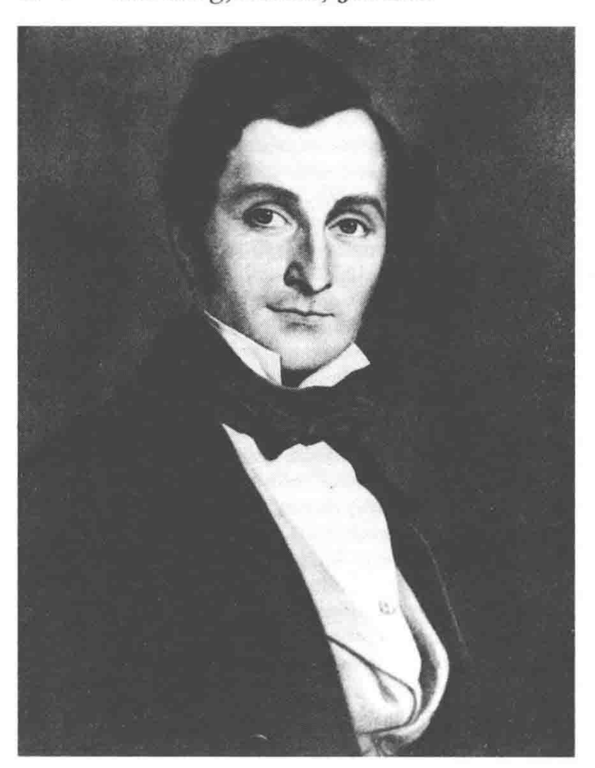
JESSICA DUCHEN

Lortzing, (Gustav) Albert (*b* Berlin, 23 Oct 1801; *d* Berlin, 21 Jan 1851). German composer, actor and singer. From

the mid-1830s he composed comic operas with spoken dialogue, adapting the *opéra comique* genre which had been very popular in Germany as well as France in the early 19th century. His operas were particularly successful in German theatres, less so in French- and English-speaking countries. While this distinction still holds good, Lortzing remains one of the most frequently performed of all operatic composers on the German stage.

1. LIFE. The composer's father, Johann Gottlieb Lortzing (*b* Berlin, 12 May 1776; *d* Leipzig, 2 Dec 1841), was a leather merchant. His mother, Charlotte Sophie, née Seidel (*b* Berlin, 6 April 1780; *d* Vienna, 8 Dec 1846), was descended from a French émigré family. Albert's parents took a great interest in the theatre and performed with the amateur dramatic company Urania, from which many professional actors had graduated. (Lortzing composed a festive piece in 1842 for the company's 50th anniversary.) The composer's uncle, Johann Friedrich Lortzing (1782–1851), had, with his wife Beate Elsermann (1787–1831) and his foster-daughter Caroline Lortzing (1809–71), been a member of the Weimar Staatstheater company under Goethe. This uncle later became a portrait painter at Weimar. At the end of 1811 Lortzing's parents found themselves in financial difficulties and decided to make a career of their hobby. Johann Gottlieb specialized in comic and sentimental fathers, while Charlotte Sophie took larger parts, including comic old women, and was a good enough singer to appear in opera.

At first the couple were engaged to appear with various touring companies in Saxony, Bavaria, Breslau and Freiburg, but in his *Autobiographische Skizze* (repr. in Capelle, ed.: *Albert Lortzing: sämtliche Briefe*, 1995, p.450) Lortzing points out that 'although they were employed only by touring theatrical ensembles, they did all they could for my musical education'. He had already taken piano lessons in Berlin from Johann Heinrich Griebel, bassoonist in the orchestra of the Königliche Schauspiele, and had studied theory with Karl Friedrich Rungenhagen, director of the Berlin Sing-Akademie. These studies constituted Lortzing's only continuous training; some harmony exercises are preserved in the Lippische Landesbibliothek, Detmold. Lortzing also learnt the violin and the cello, which he occasionally played in the theatre orchestra, and sometimes appeared on stage in children's parts with the companies employing his parents. In 1816–17, while they were in Freiburg, he composed his first publicly performed incidental music, for Kotzebue's *Der Schutzgeist* (the music is now lost). He also frequently worked as a copyist to improve the family's finances – to the benefit of his written notation, which remained very clear throughout his life.



After 1817 his parents were engaged by Joseph Derossi and Sebald Ringelhardt, whose troupe toured the Rhine area, playing in Aachen, Düsseldorf and Elberfeld; when the two theatrical directors parted company, the Lortzings stayed with Ringelhardt, performing in Aachen and Cologne. In 1820 Lortzing was engaged for the first time on his own account. According to his *Autobiographische Skizze*, he played the parts of '*bons vivants* and gentlemen, and sang second tenor and *buffo* roles'. He was generally very popular as an actor, and while he was young would take any part required of him, including such major serious roles as that of Karl Moor in Schiller's *Die Räuber*. Some of these performances earned him bad reviews, and during his years in Detmold (1826–33) he confined himself to comic roles in both plays and operas. After his move to Leipzig in 1833 he took larger parts in comedies and played operatic roles until his retirement from the stage in 1844.

In 1823–4, during his engagement with Ringelhardt's company (which lasted until 1826), Lortzing composed his first opera, *Ali, Pascha von Janina*, a one-act piece. Its successful première took place in Münster in 1828. On 30 January 1824 Lortzing married the company's leading lady, Rosina Regina Ahles (*b* Bietigheim, 10 Dec 1800; *d* Vienna, 13 June 1854). She continued to appear on stage until 1835, but took only minor roles in Leipzig. The marriage was a happy one and produced 11 children, five of whom died in infancy. The youngest son, Hans, became an actor.

According to Rosina Lortzing in the first biography of her husband, by their friend Philipp Düringer, Lortzing supplemented his musical training during his years with Ringelhardt's company through his own assiduous study, particularly of Albrechtsberger's *Gründliche Anweisung zur Composition*. His compositions up to the middle of 1826 confirm her account, although there is no obvious evidence of Albrechtsberger's influence. A noticeable advance in formal control and refinement of instrumentation appears in an aria written early in 1826 for insertion into Auber's opera *La neige*. The aria, which greatly increases the dramatic effect of a scene for the Prince of Neuburg, was performed in November 1826 in Detmold, where Lortzing had joined the Hoftheater company. This ensemble, directed by August Pichler, played in Detmold, Pyrmont, Münster and Osnabrück. The Lortzings were among its leading members, and would have been well content with their position had not the constant travelling from place to place prevented a settled domestic life.

In Detmold Lortzing composed a great deal of incidental music, notably for Scribe's *Yelva* and for Christian Dietrich Grabbe's *Don Juan und Faust*, in which he incorporated themes from Spohr's *Faust* and Mozart's *Don Giovanni*, two operas which left clear traces on the text itself. Lortzing's oratorio *Die Himmelfahrt Jesu Christi* had its première in a concert in Münster on 15 November 1828, and was performed again in Osnabrück in 1829; it is a work that stands up well against the many oratorios of the period written for music festivals, and shows that Lortzing had learnt the craft of counterpoint. He also composed a *Potpourri* for horn and orchestra for his friend August Räuber, who played the horn in the Hofkapelle. Among his stage works of this period are the arrangement of Hiller's *Die Jagd* (1830), the Liederspiel *Der Pole und sein Kind* (1832), the vaudeville *Der Weihnachtsabend* (1832) and two Singspiele: *Andreas Hofer* and *Szenen aus Mozarts Leben*. Apart from the overtures, all of these works draw largely or wholly on other music.

In November 1833 Lortzing and his family followed Ringelhardt to Leipzig, joining his parents who had come from Cologne. He quickly established himself there as an actor and singer, and immediately joined the Tunnel society, of which he became musical director in 1843 and for whom he wrote several occasional works. He later also joined the 'Minerva' freemasons' lodge and the Schiller-Verein, founded by Robert Blum in 1840. Lortzing regularly attended concerts in the Gewandhaus but in these years composed no purely orchestral works, for the Gewandhaus orchestra was unlikely to perform a

2. *Costume designs by Girolamo Franceschini for Van Bett (left) and Peter Ivanov in Lortzing's 'Zar und Zimmermann', Kärntnertortheater, Vienna, 1842 (Theatermuseum, Institut für Theaterwissenschaft, Cologne)*

composition by an actor. His monthly salary from the theatre was only just enough for the family to live on, so in 1834 he sought to supplement his income by writing works for domestic use. His piano variations on a theme from Nestroy's *Lumpazivagabundus* (now lost) failed to find a publisher, and he was soon forced to realize (see his correspondence for 1834) that this field of composition was not his strong point. He had greater success in Leipzig with songs written for insertion into other people's works, publishing these in a series entitled *Figaro*.

He began work on his first full-length comic opera, *Die beiden Schützen*, in 1835. However, it did not receive its première in Leipzig until 20 February 1837, partly because Ringelhardt was reluctant to promote Lortzing's 'second career'. (For the same reason he never offered him a post as Kapellmeister.) Lortzing sent the opera to other theatres, including Berlin, but none of them was prepared to risk a work by an unknown composer. A second opera, *Die Schatzkammer des Ynka*, followed in 1836, to a text by Robert Blum, but its music is now lost, apart from a march. According to Lortzing himself, he never ventured to publish this 'grand romantic opera' after the subsequent success of his comic operas.

Immediately after the successful première of *Die beiden Schützen*, Lortzing started work on another comic opera, *Zar and Zimmermann*. First performed in Leipzig on 22 December 1837, the opera sealed Lortzing's reputation as the foremost German composer of comic operas. It was produced in opera houses throughout the German-speaking countries (fig.2), particularly after its triumphant performance at the Berlin Hofoper on 6 January 1839. *Die beiden Schützen* was now taken into the Berlin repertory as well, and Lortzing's next 'grand comic opera', *Caramo, oder Das Fischerstechen* was composed expressly for the Berlin company. However, despite its successful première in Leipzig, with the composer conducting, the Berlin company rejected the work because its subject was similar to that of the opera *Bergamo* by the Berlin composer Karl Ludwig Blum. Other theatres also rejected it because of the demands it made on the singers, while the finale called for an expensive stage set of purely local interest to Leipzig.

Lortzing wrote his next opera, *Hans Sachs*, to a text by Philipp Reger, to celebrate the 400th anniversary of the invention of printing; he followed it immediately with another comic opera, *Casanova*, given its première on the last day of 1841. Exactly a year later, on 31 December 1842, *Der Wildschütz* had its brilliantly successful première in Leipzig. After Ringelhardt's contract at the Stadttheater in Leipzig expired in 1844 Lortzing, to his delight was offered a year's contract as Kapellmeister by the new director, Karl Christian Schmidt. Lortzing now saw the achievement of his ambitions within his grasp, while the widespread recognition he had won as a composer was further confirmed by a successful tour to Mannheim and Frankfurt in May 1844.

It is difficult to assess Lortzing's abilities as a Kapellmeister. He and Joseph Netzer succeeded F.L. Schubert as Kapellmeister of the Leipzig theatre, and on hearing of the appointments the leader of the Gewandhaus orchestra, Ferdinand David, remarked, 'God send us a correct beat!' Netzer fell out with the orchestra from the very beginning, so it quickly emerged that his contract would not be extended; but Lortzing was shocked to learn that he would fare likewise. This was the first time in his life he

had been dismissed, and he saw the reason as purely financial, although he later indirectly admitted that he had not at first entirely mastered the art of conducting. All his subsequent efforts to obtain a conducting post show that Lortzing felt himself cut out to be a Kapellmeister primarily because he was a successful operatic composer. He wanted a position that would allow him ample time for composing, at a period when the performance of new operas by composers such as Verdi, Wagner and Meyerbeer made increasing demands on a Kapellmeister's energies. Although he seems initially to have found discipline difficult, contemporary accounts confirm that Lortzing was a perfectly capable conductor. But after his engagement in Vienna in 1846 he never again succeeded in finding a suitable post.

Disappointment at his dismissal as Kapellmeister in Leipzig was mitigated by the success of his Romantic opera *Undine* both at its première in Magdeburg and in the production he himself conducted in Hamburg. Lortzing used the year 1845–6, when he had no official duties, to build up his health (he suffered from gout). He also made several appearances as a conductor, including a successful concert in Leipzig mounted at his own expense, and composed a new opera, *Der Waffenschmied*. Its première in Vienna on 30 May 1846 led to his appointment as Kapellmeister at the Theater an der Wien. Lortzing took up his Viennese post in September 1846 in a spirit of optimism. He and Franz von Suppé had been engaged together as Kapellmeister, and he hoped to find a secure niche in the wide-ranging theatrical and musical life of the city. However, he soon found himself frustrated by theatrical rivalries, by a repertory that favoured established productions starring guest singers at the expense of new operas, by the lack of singers suitable for his own works and by the musical taste of the Viennese, who far preferred Italian to German opera.

At first, however, Lortzing continued to work as usual in Vienna: he composed the comic opera *Zum Grossadmiral*, which had its première in Leipzig on 13 December 1847, and wrote a great deal of incidental music for productions at the Theater an der Wien. A decisive change came with the events of March 1848. Lortzing sympathized with the new revolutionary ideals, wrote a number of male-voice choruses and freedom songs and saw a good opportunity for the Theater an der Wien to triumph over the rival court opera at the Kärntnertor. He composed his *Regina* 'for the circumstances of the time', but the Revolution was already over by the time it was finished in October. In retrospect, the year 1848 had brought Lortzing nothing but disappointment: takings at the theatre were irregular, and consequently so was his salary, there was little demand from other theatres for his previous opera, *Zum Grossadmiral*, while *Regina*, with its 'liberal' subject, had no prospect of performance. When the opera company of the Theater an der Wien was dissolved on 1 September 1848, he was once again without a post.

Lortzing knew that only a new opera could resolve his financial difficulties and give him the credit he needed in applying for a post as Kapellmeister. He completed his last full-length opera, *Rolands Knappen*, in the spring of 1849, conducting its acclaimed première in Leipzig on 25 May. He was immediately invited by the new director at Leipzig, Rudolf Wirsing, to take up the position of Kapellmeister in the city; but at the end of October, when his whole family had moved back to Leipzig, he learnt that his predecessor Julius Rietz had been reappointed, and resigned. He was obliged to return to acting and to touring as guest conductor in the hope of finding permanent employment. At the same time he wrote many songs and male-voice choruses, which he could sell immediately to publishers, and sketched out (but did not compose) an opera, *Cagliostro*. Early in 1850 he had high hopes of a projected performance of *Zar und Zimmermann* at Her Majesty's Theatre in London, which would have given him an opportunity to promote the work in the English market and sell the Italian translation that now existed to other theatres. However, his negotiations with the manager of Her Majesty's, Benjamin Lumley, fell through.

On 1 May 1850 Lortzing took up the post of Kapellmeister at the Friedrich-Wilhelmstädtisches Theater in Berlin. Its director had assured him that he could build up a repertory of comic opera there. However, political plays and farces drew bigger audiences, and nothing came of Lortzing's plans. On 20 January 1851 his last opera, *Die vornehmen Dilettanten, oder Die Opernprobe*, had its première in Frankfurt. He died suddenly of a stroke the following morning.

Lortzing and his family lived in great poverty after his final return to Leipzig. Moving at this time cost 1000–1200 thalers, at least as much as his normal annual salary, and he had disbursed a similar sum for his daughter's dowry in 1848. Since he could hardly keep his family on his salary alone, he relied heavily on the income from the sale of his operas. His account book (copy in *D-Bsb*) shows that his earnings were good after the success of *Zar und Zimmermann*; but they depended on his writing a successful opera every year, since the theatres made a one-off payment for the score and singing parts. A royalty system, which would have eased his difficulties, was not introduced until the mid-1840s, and then only tentatively, and he benefited from it only with *Undine* in Hamburg.

2. WORKS. Lortzing was above all a man of the theatre – the theatre of the average German town in the first half of the 19th century. From his earliest years he had practical experience of acting and singing in a mixed repertory of drama (often adaptations from the French, or conventional pieces by the crude but fertile Kotzebue and his followers), of ballet, Singspiel, Liederspiel, Lustspiel, Posse and other semi-musical pieces, but all too rarely of opera as it was developing in the years after Weber and in Wagner's early career. He was originally content to write for the audience drawn to the theatre for varied and undemanding entertainment; only as his career developed from provider of music for whatever the theatrical occasion demanded into the author of operas welcomed in the theatres of Germany did he begin to raise his sights higher.

Possessing a quick and receptive mind, as well as a highly developed practical sense, Lortzing began as an imitator when he did not actually use other men's music. *Ali, Pascha von Janina* is a weak dilution of the superficial rescue-opera features of *Die Entführung aus dem Serail* (the fashionable oriental setting, here Epirus, with a Turkish march, a harem and the Belmonte-like Bernier) and *Fidelio* (Ali Pascha's vigorous vengeance aria, not only musically but verbally copying Pizarro's 'Ha! welch ein Augenblick – Die Rache werd' ich kühlen' with 'Ha schrecklich – Will ich meine Rache kühlen'). Untypically,

the action is awkward, with three settings for a one-act opera, and the dialogue stilted. The four one-act Singspiele of 1832 show a sharper ear for dialogue and greater deftness in assembling a stage piece in response to immediate stimuli. *Der Pole und sein Kind* and *Andreas Hofer* reflect the contemporary enthusiasm for the liberation struggles of Poland and the Tyrol, though the former uses only two original numbers (the overture and Janicky's first song) and the latter draws extensively on outside music, including Spohr's oratorio *Die letzten Dinge* and Weber's *Leyer und Schwert*. *Der Weihnachtsabend* also has only its overture and one number by Lortzing, and draws extensively on Mozart. *Szenen aus Mozarts Leben* (on the Mozart–Salieri rivalry, with singing parts for Constanze, Aloysia, Adamberger, Albrechtsberger and Salieri and, presumably, a speaking part for Mozart) consists entirely of Mozart's instrumental music. If it shows little real appreciation of Mozart, the piece indicates Lortzing's admiration for what he saw as an exemplary German idiom. These lessons and experiences he put to good use in *Die beiden Schützen*, in its dramatic organization a pivotal work between the youthful Singspiele and the mature operas.

With *Zar und Zimmermann*, Lortzing hit upon the formula that, with ingenious variations and developments, was to provide him with the substance of his greatest successes. He liked to take his subjects from obscure plays (often Lustspiele, or pieces translated from the French) which provided the effective roles which he demanded; and he resisted strongly the easy recourse to the classics in choosing subjects, as he told Lobe: 'About that, everyone must follow his own inclination ... I would make no other general rule, except not to grasp at easily accessible classical pieces ... Forgotten sources, like *Der Bürgermeister von Saardam*, *Der Rehbock* and so on – one can make something of them'. His distaste for the classics took satirical form in *Der Wildschütz*: the vogue for Sophocles that followed the 1842 Leipzig performance of Mendelssohn's incidental music to *Antigone* is mocked in the Countess with her Greek mania and her perpetual Sophocles quotations. Similarly, he mocked italianate recitative, which he found dull and difficult for German singers to master, in his last work, *Die vornehmen Dillettanten, oder Die Opernprobe*, in which the opera-mad Count always addresses his servants in recitative. Although he did occasionally use recitative, generally for special purposes and in an un-italianate manner, he was a firm believer in dialogue, which he even introduced effectively into musical numbers, as with Peter Ivanov's interjections into Marie's 'Die Eifersucht' in *Zar und Zimmermann*. He normally wrote his own texts, and is the most important German composer before Wagner to have done so.

The form which he evolved for his use out of Singspiel and *opéra comique* is thus number opera, with dialogue, set out in a theatrically sound pattern. Normally this would consist of an overture, an opening chorus setting the scene, then a series of short numbers, building, especially in the second act, towards a finale of some structural fluency. Though the finale would hardly approach those of his exemplar Mozart in symphonic range, it could (as in Act 1 of *Undine* and Act 2 of *Rolands Knappen*) include separate songs as well as choral sections and passages of freer composition. Within the overall structure, the separate numbers were often to a formula which Lortzing, with his melodic fluency, knew he could easily diversify to the satisfaction of audiences who would still feel themselves on comfortingly familiar ground. One regular standby was the jovial, comic or explanatory aria in a square 2/4: such are Görg's 'Ein Schuster, jung an Jahren' in *Hans Sachs*, Eduard's 'Fern von Treiben' in *Zum Grossadmiral*, and comparable arias for Andiol in *Rolands Knappen* and for Casanova. Another was the tender cavatina, often given to a girl (Kunigunde in *Hans Sachs*) but also sometimes to a man (Amarin in *Rolands Knappen*); commonly these would begin on the dominant, leading into the tonic for the entry of the voice. The polacca, a type which Lortzing would have learnt from Hiller's *Die Jagd* but which was a popular feature of German Romantic opera, provided a contrast: examples are given to the Countess in *Der Wildschütz*, to Georg in *Der Waffenschmied*, and to Casanova, where his cry for freedom, perhaps associated with Poland's sufferings, becomes a motif for the whole opera. Combined with these were duets, choruses and ensembles, all leading up to the finale.

However, Lortzing was too good a craftsman and too sensitive to influences of various kinds to allow this pattern to settle into a rigid framework. His initial impulse had come from the Singspiel and from Mozart; receptive to the impressions gained during his years in the theatre, he was also capable of absorbing the example of Weber and of French *opéra comique*, and of taking the example of 'reminiscence motif' as it was developing towards leitmotif. There are several suggestions of leitmotif in *Casanova*; these are more fully developed in *Undine*, in which there is quite a sophisticated use of the device, and in *Rolands Knappen* and *Regina*; and they return even in the more modest *Zum Grossadmiral*. Together with this naturally goes an increased harmonic range. Fundamentally an eclectic and assimilative composer, Lortzing could also reflect part of the idiom of Spohr and Weber in some advanced chromatic harmony. The increased freedom won with *Undine* was put to expressive use in his other, Marschner-like, fairy opera, *Rolands Knappen*, in which his normally even phrase lengths and plain melodic lines could be turned to a much more expressive irregularity, despite the simple couplets (ex.1). And the introduction to a tender aria, instead of comprising a plain dominant introduction to the tonic, could involve some chromatic harmony that was not overtaken until mature Wagner (ex.2).

But despite the achievements of *Undine* and *Rolands Knappen*, Lortzing was well advised to keep within the bounds of comic opera. *Regina*, his one attempt at a Revolutionary opera, was inspired more by the public mood of 1848 than by any powerful political convictions, and reduces the issues to those of a robber novel, the revolutionaries to a rebellious mob. The work is technically interesting in Lortzing's output for its attempt to tackle Romantic opera of a particular kind, and for its move away from number opera (in the first two acts the musical continuity is broken only twice by dialogue, and in the last act there is none); but it often fails to rise to the occasion, since Lortzing could not consistently summon the creative power to charge his theme and his form with musical meaning.

It was in comic opera that he remained most at home; and though his humour does not range far beyond the homely jollity of his middle-class German audiences, he

Ex.1 *Rolands Knappen*, no.9

was capable of many delightful strokes. Satire was not his strong point, though he was able to make capital out of situations he really understood. There are some lively shafts in *Die Opernprobe*, and nothing in his output is more amusingly handled than Van Bett's rehearsal scene in *Zar und Zimmermann*, when the dim-witted chorus first misunderstands its choirmaster, then repeatedly comes in wrong and falls to mutual recrimination: all this is cleverly composed into a continuous number. Van Bett is a lively *buffo* bass in fairly traditional vein, taking his colour from Rossini's Bartolo in 'O sancta justitia' (in which his failure to achieve a low F is remedied by a helpful bassoon). In this way, characterization tends to be by reference to type, with the Marquis de Châteauneuf given an elegant aria in the French manner. It was, in fact, the singer-type which guided Lortzing's ideas, rather than a feeling for character leading him to impose his demands on the singer. But he was a master at providing roles that ideally suited singers of the rather compartmentalized parts then common in the German theatre; and he had a particular touch with comic bass parts such as Baculus in *Der Wildschütz* and Van Bett. With admirable effectiveness, his old boors bumble, his maidens flirt or sigh, his ardent young men woo or make merry: each knows his place, and each expresses himself with the tunefulness that was Lortzing's second nature. He was not equipped to make much of the characters of *Hans Sachs*, though there are hints, not only attributable to the common origin in Deinhardstein's play, on which Wagner acted for *Die Meistersinger von Nürnberg*. There is, for instance, a sequence of dances (with which Lortzing had a sure touch) before the dénouement; Sachs is conceived as a dreamer; and Görg has a cadential figure to his first aria which curiously anticipates his *Meistersinger* equivalent, David.

Lortzing's choruses tend to be simply written, opening the opera with a characteristic scene-setting number, as with the apprentices in *Hans Sachs* and *Der Waffenschmied*, the peasants in *Zum Grossadmiral* and the Murano gondoliers' barcarolle in *Casanova*. However, the latter work includes, most entertainingly, what is probably the first operatic appearance of a chorus of comic policemen, singing with exaggerated caution as they pursue their prey ('Ganz behutsam, still und leise'). Only with *Der Wildschütz* was the opening chorus first abandoned: later, *Undine* begins with an aria, *Rolands Knappen*, for dramatic reasons, with a solo terzett.

As with other contemporary developments, the greatly increased range of orchestral technique left its mark on Lortzing. He liked to work with the Mozartian orchestra that he could expect to find in the average German theatre, and he normally scored for it conventionally but deftly, with the woodwind used in chorus or individually picked out for solos. He seldom attempted any of Weber's subtle combinations. However, there is a Weberian touch in the cantabile section of Van Bett's 'O sancta justitia', when the voice is accompanied by pizzicato arpeggios over cello and double bass chords on the first beat of the bar with low held viola 3rds in the middle. Also in *Zar und Zimmermann*, there is an enterprising use of violins *sul ponticello*; and in *Rolands Knappen*, a work in which, exceptionally, the orchestra includes a harp, Lortzing introduced an original effect of high tremolo violins. The use of four trumpets for Ali Pascha's vengeance aria was an experiment he did not take further, though the sound of the *Euryanthe* huntsmen's horns seems to have impressed him in *Rolands Knappen*, as it was to impress Wagner, to judge by the opening of Act 2 of *Tristan und Isolde*.

The circumstances of his life at once gave Lortzing access to a readily acceptable style of theatre composition while demanding of him a high rate of production. With this, his fluency could cope; but he was given little respite in which to develop the more ambitious manner which shows intermittently in the works of his last five years. He remained essentially outside the development of Romantic opera, despite the Romantic elements which,

Ex.2 *Rolands Knappen*, no.8, introduction to Amarin's aria

together with much else, he absorbed into his operas, especially *Undine* and *Rolands Knappen*. Dittersdorf and Hiller, Weber, Marschner and Spohr, and above all Mozart provided him with examples; he drew on *opéra comique* and French dramatic style, which he knew from his mother and from the contemporary theatre, as much as on German Singspiel; like other German composers, he did not reject the Italian influence as completely as he would have one believe.

An essential part of his success lay in his mastery of the native theatre song style, ultimately related to folk music, which so appealed to contemporary German audiences and has continued to do so to their descendants. Though he showed much ingenuity in developing whole operas on this basis, with a shrewd instinct for what could be harnessed to effective ends, he lacked the gift for more extended imaginative forays. It is as the ablest mid-19th-century German theatre composer for entertainment that he is remembered; and despite his attempts at larger enterprises, he would probably be content with his steady place in the affections of ordinary German audiences. To Lobe he once remarked, 'I would be happy for a few of my works to give a number of honest souls some agreeable hours'.

WORKS

Thematic catalogue: I Capelle, ed.: Chronologisch-thematisches Verzeichnis der Werke von Gustav Albert Lortzing (Cologne, 1994) [LoWV] principal MS collections in D-Bsb, DT; librettos by the composer unless otherwise stated

SINGSPIELE AND OPERAS

LoWV

9 Ali, Pascha von Janina (Ali Pascha von Janina, oder Die Franzosen in Albanien) (Oper, 1), 1824, Münster, 1 Feb 1828, vs ed. G.R. Kruse (Leipzig, 1904)

20 Die Jagd (komische Oper, 3, after J.A. Hiller and C.F. Weisse), 1829/30, Detmold, Hof, 19 Dec 1830, unpubd, lib ed. G.R. Kruse (Leipzig, 1904) [arr. of Hiller's Die Jagd]

25 Der Pole und sein Kind, oder Der Feldwebel vom IV. Regiment (Liederspiel, 1), Osnabrück, 11 Oct 1832, vs ed. C. Braun (Regensburg, ?1835), lib in Lortzing (1847), i

26 Der Weihnachtsabend: Launigte Szenen aus dem Familienleben (Vaudeville, 1), Münster, 21 Dec 1832, unpubd, lib ed. G.R. Kruse (Leipzig, *c*1930)

27 Andreas Hofer (Spl, 1), 1833, unpubd; arr. E.N. von Reznicek, Mainz, 14 April 1887; ov. (Leipzig, 1940)

28 Szenen aus Mozarts Leben (Spl, 1), 1833, 18 April 1834, vs arr. V. Bankwitz (Berlin, 1932)

A-11 Der Amerikaner (after W. Vogel), ?1833–4, only lib sketched

35 Die beiden Schützen (komische Oper, 3, after J. Patrat: *Les méprises par ressemblance*, trans. G. Cords), 1835, Leipzig, Stadt, 20 Feb 1837, vs (Leipzig, 1838/9), ov. ed. O. Lohse (Leipzig, 1926)

36 Die Schatzkammer des Ynka (grosse romantische Oper, 5, R. Blum, after C.A. von Waschmann), 1836, unpubd, only a Festmarsch (perf. Leipzig, Stadt, 22 Dec 1837) and lib. survives

38 Zar (Czaar) und Zimmermann, oder Die beiden Peter (komische Oper, 3, after Melesville, Merle and Boirie: *Le bourgmestre de Sardam, ou Les deux Pierres*, trans. G.C. Römer), Leipzig, 22 Dec 1837; vs (Leipzig, 1838), fs ed. G. Kogel (Leipzig, 1900)

41 Caramo, oder Das Fischerstechen (grosse komische Oper, 3, after A. Vilain de Saint-Hilaire and P. Duport: *Cosimo*), Leipzig, Stadt, 20 Sept 1839, vs arr. G.R. Kruse (Berlin, 1930), lib. in Lortzing (1847), i

43 Hans Sachs (Fest-Oper mit Tanz, 3, P. Reger, after J.L.F. Deinhardstein), 1839–40, Leipzig, Stadt, 23 June 1840, vs (Leipzig, 1841), ov. in fs (*c*1885)

50 Casanova (komische Oper, 3, after E.A. Varin and Desvergers: *Casanova au fort de St André*, trans. K.A. Lebrun), 1840–41, Leipzig, Stadt, 31 Dec 1841, vs (Leipzig, 1842)

58 Der Wildschütz, oder Die Stimme der Natur (komische Oper, 3, after A. von Kotzebue: *Die schuldlosen Schuldbewussten*), Leipzig, Stadt, 31 Dec 1842, vs (Leipzig, 1843), fs (Leipzig, 1843)

64 Undine (romantische Zauberoper, 4, after F. de la Motte-Fouqué), 1843–4, Magdeburg, Stadt, 21 April 1845, vs (Leipzig, 1845), fs ed. G. Soldan (Leipzig, 1926)

66 Der Waffenschmied (Der Waffenschmied von Worms) (komische Oper, 3), Vienna, an der Wien, 30 May 1846, vs (Leipzig, 1846), fs ed. G. Kogel (Leipzig, 1922)

74 Zum Grossadmiral (komische Oper, 3, after A. Duval: *La jeunesse de Henri V*, trans. A.W. Iffland), Leipzig, Stadt, 13 Dec 1847, vs (Leipzig, 1848)

83 Regina (Oper, 3), 1848, *Bsb*, vs ed. (Leipzig, 1954); arr. A. L'Arronge as Regina, oder Die Marodeure, Berlin, 21 March 1899, vs arr. R. Kleinmichel (Berlin, 1899), fs and vs ed. I. Capelle (Munich, 1998–9)

85 Rolands Knappen, oder Das ersehnte Glück (komische-romantische Zauberoper, 3, 'G.M.' [? G. Meisinger], Lortzing, P. Düringer, after G.A. Musäus), Leipzig, Stadt, 25 May 1849, vs ed. G.R. Kruse and P. Nodermann (Berlin, 1920)

91 Die vornehmen Dilettanten, oder Die Opernprobe (komische Oper, 1, after P. Poisson: *L'impromptus de campagne*, rev. and trans. J.F. Jünger), Frankfurt, Stadt, 20 Jan 1851, vs ed. R. Kleinmichel (Leipzig, 1893), ov. in fs (Leipzig, 1898)

109 Cagliostro (komische Oper, 3, after E. Scribe and J.-H. Vernoy de Saint-Georges), 1850, lib only, unpubd

INCIDENTAL MUSIC

3 Der Schutzgeist (A. von Kotzebue), Freiburg, 1816–17, lost

12 Die Hochfeuer, oder Die Veteranen (1 act), Münster, 24 March 1828, lost

16 Don Juan und Faust (5, C.D. Grabbe), Detmold, 29 March 1829

22 Der Löwe von Kurdistan (F. Grillparzer), 1831

24 Yelva, oder Die Stumme (2, T. Hell, after E. Scribe), Pyrmont, 30 June 1832

55 Uranias Festmorgen (Festspiel), Berlin, 1842

72 Der wilde klaus, oder Der Schwur am Dreifingerstein, 1847

76 Ein Held und seine Liebe (C. Elmar), 1847

78 Vier Wochen in Ischl, oder Der Geldausleiher in Tausend Aengsten (Posse, 3, J.K. Böhm), Vienna, 18 March 1849

86a Die Marseillaise (R. von Gottschall), 1849

88 Im Irrenhaus, 1850

93 Eine Berliner Grisette (Posse, 1, O. Stotz), Berlin, 16 June 1850

99 Der Zerissene (J. Nestroy), 1850

101 Ferdinand Schill (5, R. Gottschall), Berlin, 20 Nov 1850

102 Ein Nachmittag in Moabit (farce, 1), Berlin, 5 Dec 1850

103 Das Lied vom 9. Regiment, B solo, chorus, orch, Nov/Dec 1850, perf. 21 Jan 1851

108 Weihnachten (A.W. Hesse), 1850

A–6 Faust II (J.W. von Goethe), inc.

Other works, unperf.

OTHER WORKS

4 Andante maestoso con variazioni, hn, orch, 1820, vs ed. M. Andreae (Frankfurt, 1979)

A–7 Overtura alla turca, orch, 1821, lost

5 Hymne ('Dich preist, Allmächtiger'), solo vv, chorus, orch, 1822

15 Die Himmelfahrt Jesu Christi (orat, 2, K. Rosenthal), Münster, 15 Nov 1828

23 Potpourri (Konzertstück), hn, orch, July 1831

49 Kantate zur Säkularfeier der Loge 'Minerva zu den drei Palmen' (L. Mothes), solo vv, male chorus, orch, Leipzig, 20 March 1841

Various choral and male vocal works, theatre songs and quodlibets; numerous songs, 1v, pf; ovs. and dances, orch

IRMLIND CAPELLE (1, work-list, bibliography), JOHN WARRACK (2)

Los Angeles. City in California, USA. It was founded in 1781 by settlers who were chiefly of Spanish, African and Mexican Indian descent, and incorporated in 1850.

1. Early settlers. 2. Opera and concert life, 1850–1900. 3. Development of a local musical culture. 4. The modern era: (i) Orchestras (ii) Vocal and chamber music (iii) Concert halls (iv) Sacred music (v) Education and libraries (vi) Publishing (vii) Film music (viii) Jazz and popular music.

1. EARLY SETTLERS. The early history of religious music in Los Angeles is the history of the San Gabriel Mission, which was founded in 1771. The Beñeme and Jeniguechi Indians gathered there each day, and sang an *alabado* (praise song) at dusk and dawn and a *bendito* (grace) before each meal. In 1776 Pedro Font, a Franciscan from Mexico, visited the mission and led a mass that he accompanied on his psaltery. In 1844 Ignacio Coronel opened a school north of Arcadia Street where he was assisted by his daughter Soledad, a harpist. As late as the mid-1850s the harp remained the favourite instrument of the local aristocracy. In 1855 Blas Raho (1806–62), a Lazarite from southern Italy, arrived in Los Angeles to become parish priest of Our Lady of the Angels Church; a skilled musician, he paid for a new organ and sought to organize a choir for services. In 1856 six Sisters of Charity, including three from Spain, arrived in the city and in 1857–8 trained a choir at their girls' school.

2. OPERA AND CONCERT LIFE, 1850–1900. The California Minstrels visited Los Angeles in 1856; they returned to play for three nights at Jesús Domínguez's ranch and at the Nichols salon (1858), Stearns Hall (1859) and the Temple Theater (1865). Frank Hussey's Minstrels and the Metropolitan Minstrels played at the Temple in 1861.

In 1865 the Gerardo López del Castillo Spanish Company from Mexico City performed one act of Verdi's *Attila* at the Temple Theater between acts of *La trenza de sus cabellos* by Tomás Rodríguez Rubí.

In the 1870s a number of sizable concert halls were constructed that could accommodate larger opera and concert performances. Merced Theater (cap. 400) opened in 1870 with a 'grand vocal and instrumental concert' at which the 21st Wilmington Army Band performed. Turnverein Hall, a large hall in a two-storey building on Spring Street, opened in 1872 and was the site of theatrical performances from 1874 and concerts from the following year. In 1875 the English pianist Arabella Goddard (1836–1922) gave two concerts there.

Teresa Carreño and her husband, the violinist Emile Sauret, gave four Turnverein concerts in 1875; Sauret also played duos with the guitarist Miguel S. Arévalo (1843–1900). Arévalo had studied at Guadalajara, taught for two years in San Francisco, and moved to Los Angeles in 1871, where he became music director of the newly formed Los Angeles Musical Association. For three decades he was a leading concert performer, composer and teacher, as well as a frequent contributor to *La crónica*. He helped the area's Mexican culture withstand the pressure of German and Anglo-American musical influences that resulted from waves of immigration in the 1880s.

The completion in 1876 of the Southern Pacific railway link with San Francisco and in 1881 of a link eastward made Los Angeles virtually an obligatory stop for all concert artists touring the West. Ozro W. Childs's Grand Opera House, an elegant auditorium built in a horseshoe configuration with wide aisles, unobstructed views, and 500 seats, opened in 1884 with a house orchestra led by Peter Engels. In 1885 Emma Abbott brought her English Opera Company to the Grand Opera House.

In 1887 large crowds heard Theodore Thomas and Gustav Heinrichs conduct the National Opera Company in several works at the newly opened Hazard's Pavilion. This building, also known as the Academy of Music when first opened, seated 4000 (razed after Alfred Hertz conducted *Parsifal* there in 1905); it would not have been large enough to accommodate the crowd that heard Patti sing the role of Semiramide (Rossini) at Mott Hall in 1887, which was 'the largest audience in both numbers and money receipts' that had ever gathered in Los Angeles. In 1892 the Alessandro Salvini Co. performed Mascagni's *L'amico Fritz* (18 November) before it was heard in New York. The first American performance of Puccini's *La bohème* was given by the Del Conte Italian Opera Company on 14 October 1897 at the Los Angeles Theater.

After 1875 black Americans played an important part in the history of Los Angeles. In 1876 the Jubilee Singers from Fisk University sang spirituals at Turnverein Hall, which was filled to capacity. All-black minstrel groups that performed in the city included the Original Georgia Minstrels, the New Orleans Minstrels and Brass Band, Callender's Minstrels, Richard and Pringle's Georgia Minstrels, Lew Johnson's Refined Minstrels and Cleveland's Colored Minstrels. Such well-known performers as William Kersands and Sam Lucas toured frequently with these troupes.

3. Development of a local musical culture. In 1892 Paul Colberg, the founder of a local conservatory, sponsored a concert of his own compositions at Turner Hall; this was the first performance devoted entirely to the works of a Los Angeles resident. Colberg soon left the city, however, convinced that no national reputation could accrue to one of its inhabitants. Preston Ware Orem (1865–1938), a composer, pianist and organist who lived in the city from 1889 to 1897, left for the same reason. In 1895 Carlyle Petersilea (1844–1903), a pianist and teacher from Boston, gave a recital at the Young Men's Christian Association auditorium. The following year he played all of Beethoven's piano sonatas in a series of 11 recitals, the first time such a cycle had been given west of the Rocky Mountains.

The first amateur musical association in Los Angeles, the Ellis Club, was formed in 1888; the following year a women's club, the Treble Clef (later the Lyric Club) was organized. The number of such organizations had grown to 17 by 1922.

In 1883 Emily J. Valentine founded the Los Angeles Conservatory of Music (from 1892 the Los Angeles Conservatory of Music and Art) and with the aid of her daughter directed it until her death in 1910; she bequeathed it to Adeltha Valentine Carter and Earl B. Valentine. The conservatory moved many times during the next half-century before merging in 1961 with the Chouinard Art Institute to form the California Institute of the Arts, at Valencia, north of Los Angeles.

In the 1880s and 90s a number of institutions of higher learning offered specialized musical instruction, including St Vincent's College (later Los Angeles College) and Ellis College; both retained Emilie Lassaugue as a teacher until 1884, when she left amid some controversy to establish her own musical college in Nadeau Block. In 1888 Occidental College engaged Asbury Kent, who also taught at McPherrin Academy, as a piano and singing teacher. The teaching of music in Los Angeles public schools began in 1885. In 1910 Jennie Jones became supervisor of an elementary-school orchestra programme; by 1924 there were 122 elementary and 27 high-school ensembles with a total of 2800 players.

The first church with a vested boys' choir was St Paul's Episcopal, where Alfred J.F. McKiernan was precentor from 1886 to 1889. He was assisted at St Paul's School by M.L. Laxton, a school teacher from London. Mamie Perry (1862–1949), a native of the city who had studied opera in Milan, was particularly sought after to sing in various churches in Los Angeles after giving her début at Turnverein Hall in 1882. The most widely performed and published composer of church music was Frederick Stevenson (1845–1925); he moved to the city from Denver in 1894 to conduct at St John's Episcopal Church and Temple B'nai B'rith.

B'nai B'rith (from 1933 the Wilshire Boulevard Temple) was a centre of musical activity as early as 1869, when the temple's building fund sponsored three concerts. From 1862 to 1886 services were led by Abraham Wolf Edelman, an Orthodox rabbi from Warsaw. Later another ritual was instituted; during the tenure (1899–1919) of Rabbi Sigmund Hecht, from Hungary, the congregation not only employed a gentile mixed choir and organist but more than once welcomed 'Christian worship'. Congregation Sinai, an organization founded in B'nai B'rith hall in 1906, began with a cantor named Katz; from its inception Sinai allowed organ playing, although at first it had no choir.

4. The modern era.

(i) Orchestras. The Los Angeles Philharmonic Society was formed in 1878 and revitalized in 1888. The orchestra gave four concerts during the 1888–9 season under the direction of Adolph Willhartitz (1836–1915). Theatre musicians made up most of the 35-piece orchestra when August J. Stamm opened a four-concert season in 1893 at the Grand Opera House. In 1898 Harley Hamilton (1861–1933), the leader of Stamm's orchestra, formed the Los Angeles SO, which he conducted until 1913. He championed the works of several local composers, including Morton Freeman Mason (1859–1927), who played the bassoon in the Los Angeles SO until 1907, Charles Edward Pemberton, the orchestra's oboist in 1904–5, then a member of its violin section, Henry Schoenefeld and Stevenson. He also performed works by other Americans, including Chadwick, MacDowell, Shapleigh, Arthur Foote and Frederick Zech. In addition to leading the Los Angeles SO he conducted the Women's Orchestra of Los Angeles for 20 seasons from 1893 on.

From 1913 to 1920 the Los Angeles SO played under Adolph Tandler (1875–1953), who conducted the Los Angeles premières of 52 compositions. A graduate of the Vienna Conservatory and founder of the Tandler Quartet (brought to Los Angeles in 1909), he was the first conductor in the western USA to perform Beethoven's Ninth Symphony, and also introduced Berlioz's *Harold en Italie*, Skryabin's *Le poème de l'extase*, Sibelius's First Symphony and other works to local audiences. He also performed works by many local composers and conducted several of his own compositions.

After performing in Trinity Auditorium during the 1916–17 season the Los Angeles SO moved for its last three seasons to the Auditorium (known as Clune's between 1915 and 1919). This auditorium, seating 2600, was inaugurated in 1906 and was then the largest reinforced concrete building in California. It became known as Philharmonic Auditorium in 1920 when the Los Angeles PO began performing there and was demolished in 1975.

Founded in 1919 and financed until 1934 by William Andrews Clark, jr (1877–1934), the Los Angeles PO was intended to be 'as fine an orchestral institution as has existed in America'. Clark was unable to engage Rachmaninoff as its first conductor, and instead chose, on Alfred Hertz's recommendation, Walter Henry Rothwell (1872–1927), formerly the conductor of the St Paul SO. He was followed by Georg Schnéevoigt (1927–9), Artur Rodzinski (1929–33) and Otto Klemperer (1933–9). Clark subsidized the orchestra but left it no bequest; on his death the Southern California Symphony Association intervened and continued Klemperer's contract.

Between 1943 and 1956 the orchestra was led by Alfred Wallenstein, one of the first American-born music directors of a major orchestra. His successor, Eduard van Beinum, accepted the music directorship on condition that he be allowed to continue as director of the Amsterdam Concertgebouw. Stricken by a heart attack in 1959, he was succeeded, after Solti refused the appointment, by Zubin Mehta, who was music director and conductor from 1962 to 1978. Carlo Maria Giulini led the orchestra from 1978 to 1983, and Michael Tilson Thomas and Simon Rattle served as principal guest conductors until 1985, when André Previn's appointment as music director became effective. In 1992 Previn was succeeded by Esa-Pekka Salonen. Ernest Fleischmann, executive director from 1969 to 1997, was succeeded by Willem Wijnbergen, and in 1999 by Deborah Borda.

On 11 July 1922 members of the Los Angeles PO, conducted by Alfred Hertz, gave the opening concert in the first ten-week summer season of 'Symphonies under the Stars' at Hollywood Bowl. The Bowl – a 60-acre canyon possessing great natural acoustical advantages – had been sold to the Theater Arts Alliance in 1919, and was assigned by deed by the Community Park and Art Association to Los Angeles County in 1924. The Beatles drew huge audiences when they appeared at the Bowl in 1964 and 1965. To revive audiences for classical music, Fleischmann inaugurated spectaculars and mini-marathons; a wide range of popular artists and classical concerts have made the Bowl the Los Angeles PO's financial bastion.

Los Angeles's other orchestras include the Jewish SO, based in Brentwood, the Los Angeles Baroque and Mozart orchestras, the Japanese PO, formed in 1961, the Los Angeles Chamber Symphony, led by Neville Marriner from 1969, then by Gerard Schwarz (1978–85); and more than 20 community orchestras, including the Glendale SO (formed 1923 and led by Carmen Dragon from 1963 until his death in 1984), and well-known ensembles in Long Beach, conducted from 1989 by JoAnn Falletta, and in Pasadena, conducted from 1984 by Jorge Mester.

(ii) Vocal and chamber music. The Roger Wagner Chorale was founded by Wagner (1914–92), in 1946. Out of it grew the Los Angeles Master Chorale, founded by Wagner in 1965, which during the next two decades was the only professional resident chorus in the country giving its own series of concerts; its programmes include sacred works and operas performed in concert versions. Paul Salamunovich was appointed conductor in 1991.

Since 1997 chamber concerts have been held at Beckman Auditorium, Pasadena. Japan America Theater is the favoured venue for new music involving small ensembles. Monday evening concerts, mainly of contemporary music, are held in the Leo S. Bing Theater, Los Angeles County Museum of Art. Chamber music concerts have also been sponsored by the Music Guild and other organizations.

(iii) Concert halls. Shrine Auditorium, a massive structure built in 1927, was only partly satisfactory for opera and ballet performances. In the 1960s, however, a group of citizens led by Dorothy Buffum Chandler oversaw the financing and construction of the Music Center, a complex of three auditoriums in central Los Angeles. The Dorothy Chandler Pavilion (cap. 3200) is used chiefly for symphonic and operatic performances, the Mark Taper Forum (753) for chamber music concerts, and the Ahmanson Theater (2100) for drama, light opera and musical comedy. Auditoriums connected with academic institutions include Royce Hall (seating 1892 when built in 1939, slightly fewer after remodelling in 1984) and Schoenberg Hall (528) at UCLA; Edison Performing Arts Center, formerly Ingalls Auditorium (2000) at East Los Angeles College; Bovard Hall (1600) at the University of Southern California; and Thorne Hall (960) at Occidental College. Vying with the Pantages Theater in Hollywood, the Shubert Theater (1824) in Century City has remained the city's principal venue for musical theatre. In 1932, 1934 and each autumn from 1937 to 1965 the San

Francisco Opera gave a season of several weeks in the Shrine Auditorium (cap. 6000). Music Center Opera, the city's first fully professional opera company, launched its inaugural season in 1986 with Domingo in *Otello* at the Dorothy Chandler Pavilion.

(iv) Sacred music. Several churches and synagogues in Los Angeles have been important centres of musical activity. First Congregational's annual Bach festival was started in 1924 by John Smallman (1886–1937). Lloyd Holzgraf became the church's organist in 1959 and began an annual recital series in 1969.

In 1928 the Church of the Blessed Sacrament acquired a Casavant organ with four manuals and 58 ranks and engaged Richard Keyes Biggs (1886–1962) as its organist. Biggs played and recorded prolifically, composed many masses and presented a series of organ recitals at which local virtuosos performed. Roger Wagner began two decades as organist and choirmaster at St Joseph's in 1944. Other prominent music directors have included Jonathan Wattenbarger, followed by Frank Brownstead, at St Paul the Apostle, James Vail at St Alban's and Charles Feldman at Wilshire Boulevard Temple. The area's best-known cantors have included J.J. Frailich at the Reform University Synagogue, Jay Harwitt at the Temple Memorah and Samuel Fordis at the Conservative Adat Shalom.

(v) Education and libraries. In 1882 a branch of the San Jose Normal School was formally opened in Los Angeles; this became independent (renamed the Los Angeles Normal School) in 1887. It moved in 1914, and in 1919 it became the southern branch of the state university system, being empowered to grant its own degrees in 1924 and assuming its present name, the University of California at Los Angeles (UCLA), in 1927; it moved to its present campus in 1929. Vocal instruction was introduced at the school in 1883. In 1911 a music department was formally established, becoming a school of music with five faculty members in 1915. The school became the department of music of the new southern branch of the University of California in 1919. The MA degree was authorized in 1940, and the PhD was first conferred in 1949. Ki Mantle Hood, who began teaching at the university in 1954, founded the Institute of Ethnomusicology in 1961; this was absorbed by UCLA's music department on his retirement in 1973. The UCLA music department in the School of the Arts and Architecture offers courses for performers leading to the DMA and the MA and PhD degrees for composers. The University of Southern California (USC), a private institution, was founded in 1880 and began to offer musical instruction in 1883–4. In the mid-1990s the music faculty offered degrees in performance, music education, choral music, theory, composition, music history, conducting and musicology. In 1999 the USC's music school was renamed the Flora L. Thornton School of Music. The USC building that had previously been occupied by the Arnold Schoenberg Institute became the headquarters of the Thelonius Monk Institute of Jazz Studies. In addition to UCLA and USC there are strong composition programmes at the California Institute of the Arts (which absorbed the Los Angeles Conservatory of Music established in 1883) and at California State University, Northridge.

Libraries in the area with important local music history material include the Henry E. Huntington Library in San Marino (which holds the scrapbooks of Lynden Ellsworth Behymer, documenting the history of symphonic and operatic performances in Los Angeles from 1898 to 1947); the William A. Clark Memorial Library; the Walt Disney Archives in Burbank; the Los Angeles Music Center Archives; the Pasadena Public Library; the library of the Academy of Motion Picture Arts and Sciences in Beverly Hills; and the libraries of the California State University branches in Los Angeles, Long Beach and Northridge.

(vi) Publishing. Between 1885 and 1945 there were 29 music publishers in Los Angeles. Of these W.A. Quincke & Co. was active for the longest period; the firm was established in 1906 and was in operation until at least 1929. West Coast Publishing Co., which specialized in shape-note gospel music, was active until at least 1924. Other local music publishers and printers during this period were Southern California Music Publishing Co., Falconer & Loveland Music Printers, Frank E. Garbett, Freed & Powers, Saunders Publications, Boris Morris Music Co., Wright Music Co. and Harry G. Neville.

Musical activities in Los Angeles between 1911 and 1948 were described in the *Pacific Coast Musician*, a periodical founded and edited by Frank Colby (1867–1940), an organist, conductor and composer. *Music of the West*, a monthly issued in Pasadena from 1945 to 1969, also focussed on local musical events. The only musicological journals published in Los Angeles in more recent years are the *Journal of the Arnold Schoenberg Institute* (1976–94), edited until 1991 by Leonard Stein, and the *Inter-American Music Review* (1978–), edited by Robert Stevenson.

(vii) Film music. The southern California climate attracted the first film companies to Los Angeles in 1913. The advent of sound films in 1927 created a far greater demand for composers and performers; Malotte settled in the city that year, founded a school for theatre organists and wrote and conducted film scores for Walt Disney. Each motion-picture studio employed an orchestra of symphonic proportions, providing a vast pool of musical talent that helped make Los Angeles a centre for radio, television and the recording industry.

(viii) Jazz and popular music. Among the most influential jazz musicians in Los Angeles was Stan Kenton, who initiated several progressive-jazz ensembles that performed throughout the USA. Other jazz musicians who achieved prominence in Los Angeles include Shelly Manne, Les McCann and Shorty Rogers. Howard Rumsey's series of Concerts by the Sea made the Lighthouse in Hermosa Beach one of the most popular jazz clubs in southern California. In 1998 both UCLA and USC founded institutes of jazz studies. The following year a statue of Duke Ellington was placed in front of UCLA's Schoenberg Hall.

The leading exponent of modern black gospel music, James L. Cleveland, settled in Los Angeles in 1962 and died there in 1991. He formed the Southern California Community Choir in 1968, and in 1971 became pastor of the Cornerstone Institutional Baptist Church.

Los Angeles has long been an important centre for rock music. Two of the best-known groups of the 1960s, the Doors and Frank Zappa's Mothers of Invention, began their careers in the area. More recently, Los Angeles has been home to several best-selling rap groups, notably NWA, Above the Law and Compton's Most Wanted.

ROBERT STEVENSON

Los Angeles, Victoria de (*b* Barcelona, 1 Nov 1923). Spanish soprano. She comes from a musical family and studied the piano, the guitar and singing at home as well as at the Barcelona Conservatory. After her operatic début at Barcelona (1941, Mimì), she soon became a leading opera and concert singer, internationally as well as in Spain. Having been invited by the BBC to sing Salud in a 1948 studio broadcast of Falla's *La vida breve*, she made her début at Covent Garden in 1950, and at the Metropolitan in the following year, and sang regularly in both houses until 1961. Although she successfully tackled the lighter Wagnerian roles, such as Eva and Elsa, she excelled as the more lyrical heroines of *La bohème*, *Madama Butterfly* and *Manon* (see illustration). At the Metropolitan she was especially admired in her début role of Marguerite, and as Mélisande and Desdemona; and in two successive years (1961 and 1962) she appeared

Victoria de Los Angeles in the title role of Massenet's 'Manon', Metropolitan Opera, New York, 1951

at Bayreuth as Elisabeth. During the later 1960s she took part in several productions at the Teatro Colón, Buenos Aires, and she sang in *Otello* at Dallas in 1969. By that time, however, she had already confined her appearances mainly to the concert platform, where her personal and vocal charms made her a great and continuing favourite.

Victoria de Los Angeles possessed a warm, vibrant instrument of unusual clarity and flexibility, somewhat dark and southern in quality but capable of much tonal variety. In her best years the timbre of her voice was exceptionally sweet, and she was a most communicative artist in both song and opera. Among the best of her operatic recordings are *La bohème* and *Carmen*, conducted by Beecham, *Il barbiere di Siviglia*, two sets of *Madama Butterfly*, *Manon* (with Monteux) and *La vida breve*. From early in her career she made a speciality of recording Spanish songs, from the Middle Ages to the 20th century. Los Angeles studied lieder with Gerhardt, and was a particularly accomplished interpreter of Brahms, both in recital and on disc. She was also a delightful exponent of *mélodies*.

DESMOND SHAWE-TAYLOR

Löschenkohl, Hieronymus (*b* Elberfeld, *c*1753; *d* Vienna, 11 Jan 1807). Austrian engraver and music publisher. He opened an art shop in Vienna about 1770 and became

known for his topical cheap copperplate engravings; Gräffer aptly named him the 'iconographic journalist'. Through publishing calendars and almanacs he came into contact with literary and musical circles and acquired a modest position in the Guild of Viennese Music Publishers. In the *Wiener Zeitung* of 29 September 1787 he announced a cheap music engraving process, which he evidently also used for the musical supplements to almanacs. On 15 March 1788 he published Giuseppe Sarti's three piano sonatas op.4, but until 1799 dealt chiefly in songs and dances from Singspiele and ballets. He was unfortunate in that 12 lieder and odes by Gellert in settings supposedly by Mozart (1800 and 1801) all proved to be forgeries. However, he became Beethoven's first publisher with the edition of *Das Glück der Freundschaft* op.88, which he printed on green paper in the shape of a sunflower leaf. Thereafter until 1806, apart from some works by G.J. Vogler and J.B. Vanhal and several pieces by Anton Fischer, Löschenkohl published only Austrian, French and Russian military marches. In 1806 he issued his *Musikalisches Kartenspiel*, a beautifully engraved musical card game including compositions by Mozart. At his death his shop was taken over by the music publisher and art dealer H.F. Müller.

ALEXANDER WEINMANN/NIGEL SIMEONE

Löschhorn, Carl Albert. *See* LOESCHHORN, CARL ALBERT.

Lose. Danish firm of music publishers and dealers. It was established in Copenhagen in 1802 when the Lose family took over the firm of E.F.J. Haly (founded 1793) in the name of C.C. Lose (1787–1835). Early publications bear the imprint C. Lose & Comp., though from 1814 they are marked C.C. Lose. On Lose's death P.W. Olsen became manager, and the firm was styled C.C. Lose & Olsen until 1846, when the younger C.C. Lose (1821–92) attained majority and entered into partnership with O.H. Delbanco. The firm was then named C.C. Lose & Delbanco, but from January 1865 Lose continued alone in his own name. On 8 November 1871 he sold the firm to F. Borchorst, and until June 1879 publications bore the imprint C.C. Lose (F. Borchorst). On 25 June 1879 the firm was incorporated into the house of Wilhelm Hansen.

In 1815 the elder Lose founded the first Danish lithographic printing works; it did not meet his expectations and he sold it in 1820, subsequently establishing his own engraving and printing shop. During the first half of the 19th century Lose was the dominating music firm in Copenhagen, with about 2000 publications in its catalogue. These include works by Weyse, Kuhlau, Gade, Hartmann and Lumbye. Dramatic music is amply represented, particularly by opera, Singspiel and ballet. Important periodical publications include the *Nye Apollo* (12 vols., 1814–27; piano music and songs), continued as *Odeon* (7 vols., 1827–34; piano music), and *Musikalsk Theater-journal* (ed. Ludwig Zinck, 14 vols., 1817–41). Lose ran an extensive music hire library, and its printed catalogues (1818–66) provide important information on musical taste and activities in the Danish capital at that time. The collection is now in the State Library at Århus.

DAN FOG

Lösel, Johann Georg Ernst Cajetan (*b* Bohemia, *c*1699; *d* Miltenberg, nr Mainz, 7 Dec 1750). German composer. After working in the electoral Kapelle in Dresden, he became a court musician to Prince Dominik Marquard von Löwenstein-Wertheim in 1723 or 1724. When the musical establishment was disbanded about 1728 he moved to the Nassau-Usingen court, but before the end of 1735 returned to Wertheim as Kapellmeister to the young prince Carl Thomas von Löwenstein-Wertheim-Rosenberg. In 1740 the prince lost interest in the Kapelle and wanted to appoint Lösel manager of his Bohemian estate; Lösel resisted this until 1747, when he left with compensation. He spent the rest of his life as a man of private means in Miltenberg, where he married Maria Klara Apollonia Kittner. Three Passion oratorios by Lösel were performed on his visits to Prague: *Die obsiegende Liebe* (1724), *Das bittere Leiden Jesu* (1726) and *Das beweinte Grab des Heilands* (1745); only the printed librettos survive. Of Lösel's numerous compositions, only a concerto grosso or 'Sinfonia' has survived from his Dresden period and two concertos and a Capriccio for flute and orchestra from his Wertheim period. (E.F. Schmid: *Musik am Hofe der Fürsten von Löwenstein-Wertheim-Rosenberg (1720–1750)*, Würzburg, 1953)

JIŘÍ SEHNAL

Los Reyes (y Mapamundi), Juan Mathías de (*b c*1735; *d* Oaxaca, 17 Aug 1779). Mexican composer. Receiving his early training at Guatemala (now Antigua) Cathedral in the mid-18th century, he moved to Oaxaca Cathedral where he was employed as a harpist and singer on 27 April 1750. He was a private composition pupil of the *maestro de capilla* Manuel de Zumaya, who collaborated with him on *Bonitatem fecisti cum servo tuo Dominum*. On Zumaya's death in 1755 Los Reyes became acting *maestro de capilla* (1756); in a document of 1760 he is described as a harpist, singer and teacher of the harp and organ. He was also appointed second organist in 1763. He remained *maestro de capilla* until his death, with two interruptions: Francisco Martínez de la Costa was appointed *maestro* during the period 1765–8, and Juan Verón was appointed to (but never actually held) the post in May 1770. Los Reyes purchased a pair of horns from Puebla Cathedral in 1770 and paid for two large choirbooks in April the same year. When he died he left behind his widow, María Cabada. He is often confused with Zapotec Juan Mathías who was in Oaxaca a century earlier.

WORKS

all in Oaxaca Cathedral, Mexico

Bonitatem fecisti cum servo tuo Dominum, SATB, SATB, 2 vn, bc, collab. Zumaya (1st pt by Los Reyes)

Mag, 5vv, 2 vn, clarín, 2 bajóns, bc, ed. in Tesoro de la Música Polifónica en México, iii (Mexico City, 1983)

Motete para la procesión de la Dominica in Ramis Palmarum, 4vv, 1757

Loss, Joe [Joshua] **(Alexander)** (*b* Liverpool, 22 June 1910; *d* London, 6 June 1990). English bandleader. After studying music at Trinity College of Music and the London School of Music he led the Magnetic Dance Band (1926) and worked as a professional violinist and with dance bands in Blackpool and London. In 1930 he became the leader of a seven-piece band at the Astoria Ballroom, London, and after a short period as bandleader at the Kit-Cat Club (1931–4) he returned to the Astoria as leader of a 12-piece band, making frequent broadcasts and recordings, and annual tours. In 1940 he left the Astoria to make more extensive tours, and during the war his band, which included Chick Henderson and other notable singers, was one of the most popular in Britain. After the war his band took up a residency at the Hammersmith Palais, and he also started his own agency. He achieved chart success in the 1960s with such numbers as *Wheels Cha Cha* and *March of the Mods*, and often appeared on 'Come Dancing' for the BBC. He was made an OBE in 1978 and retired from performance in 1989.

Lossius [Lotze], **Lucas** (*b* Vacha, 18 Oct 1508; *d* Lüneburg, 8 July 1582). German music theorist. After studies at Göttingen and Lüneburg he matriculated in 1530 at the University of Wittenberg. There he met Luther and Melanchthon, who became his teacher and friend. In 1540 he was appointed co-rector in Lüneburg, a position that he held until his death. Lossius wrote *Erotemata musicae practicae* (Nuremberg, 1563/*R*), a treatise which had several editions and which was widely used in Protestant schools. His most significant work was *Psalmodia, hoc est cantica sacra veteris ecclesiae selecta* (Nuremberg, 1553, with numerous later editions). In it he applied Gregorian chant melodies and texts to the evolving Lutheran liturgy. He added troped Latin texts to melismatic chants; for some melodies, such as the *Te Deum*, he used German texts. With the support of Melanchthon's preface, the work greatly influenced Lutheran music in north Germany.

CLEMENT A. MILLER/R

Los Van Van. Cuban dance band. One of Cuba's most popular dance bands, Los Van Van was founded in 1969, in La Habana, Cuba, by bassist, composer and bandleader Juan Formell. Under percussionist José Luis Quintana ('Changuito') the band developed a rhythm known as *songo*, one of the most innovative modern dance styles to emerge in Cuba since the 1959 Revolution. Fusing elements of traditional Cuban *son*, ritual *batá* drumming and traditional rumba with North American and European rock and funk, *songo*'s dynamism is mirrored in the band's name, which loosely translates as 'The Go-Gos'.

Although based on the traditional flute-and-violin *charanga* ensemble Los Van Van utilized a drum-set instead of traditional percussion. In 1981 trombones were added to thicken the middle register, with the atypical violin-trombone combination becoming Los Van Van's trademark. Throughout the 1980s, the band experimented with synthesizers, but subsequently abandoned them in the 1990s. For over 25 years, Los Van Van has enjoyed enormous popularity arising not only from their infectious dance music but also the topical nature of Formell's songs, which closely reflect and comment on everyday Cuban experiences. Among the band's dozens of hit tunes are *El baile del buey cansado* (1982), *Sandunguera* (1983), *La Habana no aguanta más* (1984), *Se acabó el querer* (1988), *Que le den candela* (1992), and *Que sorpresa* (1994).

LISE WAXER

Losy, Jan Antonín, Count of Losinthal [Logi, Loschi, Losymthal] (*b* Štekeň Castle, near Strakonice, *c*1650; *d* Prague, 9 Aug – 2 Sept 1721). Bohemian lutenist and composer. He was born into a wealthy family of Swiss origin; his father had settled in Prague in the 1620s and was raised to the Bohemian nobility for his bravery during the defence of the city against the Swedes in 1648. Losy studied at Prague University from 1661, taking the doctorate in philosophy in 1668. After this he probably undertook the customary European tour; he is known to have visited Italy, and he probably went to France and the Low Countries as well. He had a great enthusiasm for French music, especially that of Lully, and also for the music of Fux. He played the lute and violin in concerts at his palace in Prague. At the height of his fame (1696–7) he travelled in the German lands and engaged in a friendly musical competition in Leipzig with Pantaleon Hebenstreit and the Thomaskantor Johann Kuhnau, who subsequently dedicated to Losy his *Frische Clavier Früchte* (1696). Losy's son Adam Philipp (1705–81), who lived in Vienna and became music director to the imperial court, was a competent double bass player in aristocratic orchestras.

Losy was the best-known and most respected lutenist in late 17th-century Prague, but his reputation extended

far outside his own land. He was praised by Ernst Gottlieb Baron (*Historisch-theoretische und practische Untersuchung des Instruments der Lauten*, 1727) and one of his courantes was printed in Le Sage de Richée's *Cabinet der Lauten* (1695). Silvius Leopold Weiss wrote a highly expressive *tombeau* in his honour. The real measure of his popularity is seen in the number and wide distribution of manuscripts containing his compositions, which also exist in arrangements for mandore, angélique and keyboard. Several manuscripts of compositions by him for guitar are probably also arrangements. Losy adopted the traditional French style and genres, but he somewhat moderated the characteristic *brisé* texture of Parisian lute music in favour of more distinct melody and bass lines, probably influenced by contemporary Austrian composers. Vogl identified 100 or so individual pieces, to which about 50 more may be added (see Crawford), although attributions are rarely entirely reliable. A few pieces are grouped into suites or partitas, but Losy's intentions in this regard remain unclear. About 60 pieces survive only in guitar tablature, most of which may be arrangements of lute originals.

WORKS

Courante, lute, in P.F. le Sage de Richée's Cabinet der Lauten (1695); ed. in DTÖ, l, Jg.xxv/2 (1918/*R*)

Other lute pieces, *A-ETgoëss*, *Kla*, *KN*, *KR*, *Wn*; *CZ-Bm*, *Bu*, Lobkowitz family's private collection, Prague; *D-Bsb*, *Gs*, *Ngm*, *Ru*, *SWl*; *F-B*, *Pn*; *GB-Lbl*; *PL-Kj*, *Wn*, *WRu*; *S-K*, *L*; *US-NYp*, *R*; Partie, 3 others ed. in DTÖ, l, Jg.xxv/2 (1918/*R*); 8 ed in DTÖ, lxxxiv (1966); 5 ed. in EDM, 2nd ser., *Alpen- und Donau Reichsgaue*, i (1942); Ouverture in D, Tombeau, ed in DČHP (1957)

Guitar pieces, *CZ-Pnm*, and modern gui arrs.; some ed. J. Zuth (Vienna, 1919); 9 suites, 10 other pieces ed. in MAB, xxviii (1958/*R*); Partita in a, arr. K. Scheit (Vienna, 1955)

ADRIENNE SIMPSON/TIM CRAWFORD

Lot. French family of woodwind instrument makers, active from *c*1650 to 1896. All the makers of this family trace their ancestry to Pierre Lot, whose wife Marie was related to Thomas Le Vacher, named in Mersenne's *Harmonie Universelle* (1636–7) as 'the most excellent maker of flageolets and musettes we have'. The Lots were also related to other familes of woodwind instrument makers: Hotteterre, Chédeville, Thibouville, Lessieu, Fremont, Naust, Pelletier, Cornet, Dlerablée, Noblet, Godfroy, Deschamps, Noë and Martin.

(1) **Thomas Lot (ii)** (*b* La Couture, 1676; *d* La Couture, *c*1750). He was described in the 1734 marriage contract of his son (2) Thomas (iii) as an instrument maker 58 years of age, working in La Couture. Several instruments stamped 'T*LOT' in the Musée Jacques Hotteterre, La Couture-Boussey, can be attributed to him.

(2) **Thomas Lot (iii)** (*b* La Couture, 1 May 1708; *d* Paris, 11 Feb 1787). Son of Thomas (ii). From *c*1722 he worked for Antoine Delerablée (1686–1734), master maker and successor to the Naust workshop in the rue de l'Arbre Sec, St Germain l'Auxerrois. After Delerablée's death, Thomas married his employer's widow Jeanne, a daughter of the maker Pierre Naust, and took over the workshop, serving such customers as Blavet, Philidor and Hannès Desjardins. His high standing in the Parisian musical community is evidenced by the important musicians who signed his marriage contract, among them Blavet, Boismortier and E.P. Chédeville. An inventory of the workshop in 1765 lists 323 instruments of the flute family and 78 bassoons, valued at 2739 livres.

Thomas (iii) used the mark 'T*LOT/lion rampant'. He specialized in flutes; early instruments (1734–55) are characterized by a flat cap, small round embouchure, large ferrules, square keys and a cylindrical foot joint while late instruments (after 1775) have an oval embouchure and key, and narrow ferrules integral to the body. A pair, each with five *corps de recharnge*, made *c*1760 for Louis XV are a stunning example of his elegant workmanship (Horniman Museum, London). About 55 instruments are extant, including some 32 transverse flutes, a *flute d'amour*, two alto flutes, a bass flute, piccolos, recorders, oboes and a flageolet.

(3) **Martin Lot** (*b* La Couture, 12 May 1718; *d* Paris, 25 June 1785). Brother of Thomas (iii). His career began in the Naust workshop. In 1743 he married a daughter of

Lot family tree

Delerablée and Jeanne Naust and established his own workshop, manufacturing under the mark 'M*LOT/dolphin'. Martin's work is comparable to that of his brother: its high quality is exemplified by an octave bassoon of maple with five brass keys in the Bate Collection, Oxford. About 18 of his instruments survive, including transverse flutes, oboes, tenor oboes, clarinets and bassoons.

(4) Louis (Esprit) Lot (*b* La Couture, 17 May 1807; *d* Chatou, 12 Jan 1896). Flute maker, a descendant of Pierre Lot. By 1831 he was working in Paris for Clair Godfroy *l'aîné* at his workshop at 55 rue Montmartre and in 1833 he married his master's daughter Caroline Joséphine. On 7 September of that year he formed the Société Godfroy fils et Lot with his brother-in-law V.H. Godfroy. In 1836 the Société succeeded to the mark and workshop of Godfroy *aîné* (*see* GODFROY for the manufacturing achievements of the Société). The partnership ended in 1855; in the same year Lot established his own workshop at 36 rue Montmartre and began to manufacture flutes with the mark 'L.L./LOUIS LOT/PARIS'. He collaborated with Louis Dorus in the development of the metal French model cylinder Boehm flute and became the offical supplier to the Paris Conservatoire when the instrument was adopted there in 1860. Lot retired in 1876 and the successors to his mark were H.D. Villette (1876–82), Debonneetbeau (1882–9), E. Barat (1889–1904), E. Chambille (1904–22) and G.P. Chambille (1922–51). From 1887 the firm was located at 6 rue Monder.

The exquisite workmanship and elegant design that characterized Lot's silver flutes was acknowledged early on by Theobald Boehm, who wrote in 1870 that he placed orders with 'Lot of Paris who without doubt does the best work'. Between 1855 and 1863 Boehm purchased 20 keyless flutes from Lot (Giannini, 1993, p.178). Of the 2700 or so instruments made by Lot between 1855 and 1876 about a third were metal flutes, mostly silver, and the rest were Boehm system wooden flutes and piccolos and few simple system flutes. In 1869 he manufactured the first gold cylinder flute (no.1375) for Jean Rémusat; the instrument was later owned by Jean-Pierre Rampal. The gold flute modelled after Lot's has since become the favoured instrument of soloists.

TULA GIANNINI

Lotfi, Mohammad Rezā (*b* Gorgān, north Iran, 1947). Iranian *tār* and *setār* player. He trained at the National Music Conservatory in Tehran with Ali Akbar Shahnāzi and Habibollāh Sālehi, studying Western classical music and the violin as well as the *tār* and the *setār*. From 1969 Lotfi studied with Nur Ali Borumand at the University of Tehran, and at this time he also joined the Centre for the Preservation and Propagation of Iranian Music in Tehran as a soloist and an ensemble director. From the early 1970s he performed and recorded with many prominent classical musicians, appearing regularly on radio and television. Lotfi also taught Iranian music at the University of Tehran and was closely involved with several ensembles, notably the Sheydā Ensemble which he co-founded.

He has performed and recorded with Mohammad Rezā Shajariān; both were central figures in the revival of traditional Iranian music following the 1979 Islamic Revolution. Lotfi is widely regarded as the best performer of *tār* and *setār* in the post-1979 period and is respected for his thorough command of the classical repertory, his unrivalled technique and his musical interpretation. He has carried out research into the regional musics of Iran and has introduced folk elements into his performances of classical music. He has also been active as a composer. Since 1984 Lotfi has lived outside Iran, initially spending two years performing and teaching in Italy, before moving to the United States in 1986. There he established the Anjoman-e Sheydā organization, which publishes an annual collection of essays and writings on Iranian music under Lotfi's editorship. During the 1990s he performed regularly in North America, Asia and Europe.

LAUDAN NOOSHIN

Loth, Urban (*b c*1580; *d* Passau, 29 Dec 1636). German composer and organist, probably of Bohemian birth. He spent his early years in Bohemia (where his father was a cook in royal service, probably in Prague). In 1610 he succeeded Salomon Waldhofer as organist of Passau Cathedral and remained there until his death. He was one of a group of Catholic musicians (including Aichinger, Pfendner, Rudolph Lassus and Sätzl) in south Germany and Austria who in the early 17th century took up the form of the concertato motet for few voices and developed it along German lines. Most of the 97 works in his two motet collections, written for Passau Cathedral, are of this type (only a very few motets in four or more parts are included, in the second book). Loth preferred the combination of two or three equal voices and wrote only a few pieces for a solo voice, adopting the Italian monodic style. Interest lies not so much in the melodic content as in the imitative interplay between the voices; the motifs used are often based on the notes of the triad or on scale passages, offering opportunities for close strettos at the unison which Loth exploited to the full. Syllabic treatment of the text predominates, rhythmic interest compensating for a certain lack of melodic unity: Loth adopted only rarely the rondo or refrain form popular with other composers of this type of music. The importance of these motets lies partly in the treatment of the continuo, which is often totally independent of the voice parts while preserving a rhythmic relationship with them, and partly in the growing consciousness of a key centre, including extended dominant-tonic progressions in the bass. The large number of these motets that appeared in the principal anthologies of the time bears witness both to his contemporary reputation and to the wide use to which they were put.

WORKS

Musa melica, 1–3vv, bc (Passau, 1616); 3 pieces ed. K. Ruhland in *Drei geistliche Konzerte zur Weihnachtszeit* (Altötting, 1988)

Musa melica continuata, 2–8vv, bc (Passau, 1619); 3 pieces ed. Ruhland in *Drei Hymnen für Ostern, Pfingsten, Dreifaltigkeit* (Altötting, 1988)
Many motets in collections published 1622–72, including 1622[2], 1623[2], 1624[1], 1626[2], 1627[1], 1638[5], 1672[2]

A. LINDSEY KIRWAN/STEPHAN HÖRNER

Lothar, Mark [Hundertmark, Lothar] (*b* Berlin, 23 May 1902; *d* Munich, 6 April 1985). German composer. He was a pupil of Schreker and Juon at the Berlin Hochschule für Musik and studied composition privately with Wolf-Ferrari, who exercised a considerable influence on his musical development. After the success of his operas *Tyll* (1928) and *Lord Spleen* (1930), he was engaged by Max Reinhardt to become music director at the Deutsches Theater, Berlin, in 1933 and from 1934 to 1944 worked under Gustaf Gründgens at the Preussische Staatstheater. After the war, he moved to Munich where he held a similar position at the Bayerische Staatstheater. In 1956 he retired from public life to devote himself exclusively to composition.

Although Lothar wrote music in a variety of different genres, his long association with the theatre as well as his penchant for composing lieder gave him the necessary experience to write technically fluent and dramatically convincing operas. He judiciously avoided tackling psychologically complex subjects, preferring to offer the public vivid portrayals of lovable if eccentric outsiders such as Tyll Eulenspiegel (*Tyll*), Anton Wibbel (*Schneider Wibbel*) or the Irish priest of *Der widerspenstige Heilige*. In this respect, he attempted a renewal of the traditions of German Singspiel much in the manner of Lortzing, whose *Casanova* he arranged for performance at the Berlin Staatsoper in 1944. Of Lothar's 11 operas, the most successful were *Schneider Wibbel* (1938), which enjoyed over 200 performances in German opera houses up to 1944, and *Rappelkopf* (1958). Both are notable for their swiftly moving action, skilful characterization and sense of atmosphere. In *Rappelkopf*, Lothar sought to bring Raimund's musical play up to date and free it from the conventions of Viennese popular theatre. Yet despite the music's evident charm, the score seems to lack the melodic memorability needed to ensure it a permanent place in the repertory.

WORKS
(*selective list*)

OPERAS

Tyll (3, H.F. Königsgarten), op.12; Weimar, 14 Oct 1928
Lord Spleen (2, Königsgarten, after B. Jonson), op.17; Dresden, 11 Nov 1930
Münchhausen (3, W.M. Treichlinger), op.20; Dresden, 6 June 1933
Das kalte Herz (Funkoper, 1, G. Eich), Berlin Radio, 24 March 1935
Schneider Wibbel (4, H. Müller-Schlosser), op.34; Berlin, Staatsoper, 12 May 1938
Rappelkopf (2, Treichlinger, after F. Raimund), op.56; Munich, 20 Aug 1958
Der Glücksfischer (2, W. Brandin), op.62; Nuremberg, 16 March 1962
Liebe im Eckhaus (Spl, 2, A. Cosmar), op.70
Der widerspenstige Heilige (3, Lothar, after P.V. Carrol), op.73; Munich, Gärtnerplatz, 8 Feb 1968
Momo und die Zeitdiebe (M. Ende), op.84; Coburg, Landes, 19 Nov 1978
La bocca della verità: Hommage à Baldassare Galuppi, op.93; Munich, 1982
Much incid music for stage, television, film and radio

Lotinis, Johannes de. *See* LANTINS, DE.

Lotosflöte (Ger.). *See* SWANEE WHISTLE.

Lotring, I Wayan (*b* Kuta, Bali, ?1883; *d* Kuta, 1983). Balinese composer, performer and dancer. He was a pre-eminent figure in Balinese music between the Dutch

takeover in 1906 and the onset of World War II, a crucial period during which the old court system was in decline and the performing arts were enjoying a new secular and popular role. Lotring trained as a dancer at the court of Blahbatuh. Until retreating from public life in the late 1940s he drummed, choreographed and taught music to gamelan clubs in Kuta and throughout southern Bali. As well as instrumental works mainly for gamelan ensembles of the *palegongan* type, he reworked the *legong* dance form with elements of the modern *kebyar* style. He taught his music in numerous villages, freely reworking his compositions each time, so that contrasting variants of each work exist. The instrumental pieces achieved wide success in the 1920s and 30s as preludes for dances or dramas given in recreational contexts. Their rhapsodic, distinctively modern forms, innovative textures and patterns, and assimilation of materials from older gamelan genres (such as the incorporation of the 5 + 3 rhythm of *gamelan gambang* into his piece *Gambangan*) became models for subsequent new music composition on the island. The American musicologist Colin McPhee worked closely with Lotring in the 1930s, profiling him at length in *A House in Bali* (New York, 1946/*R*) and devoting a chapter to an analysis of his music in *Music in Bali* (New Haven, CT, 1966/*R*). Consequently, in addition to its canonization by the Balinese, Lotring's music has been widely celebrated by succeeding generations of foreign admirers.

WORKS
(*selective list*)

all for Balinese gamelan and composed between 1910 and 1940

Angklungan; Gambangan (Pelugon); Gegenggongan; Jagul; Kompyang; Liar Samas Cenik; Liar Samas Gdé; Pantun Cina; Sekar Gendot; Simbar; Solo

MICHAEL TENZER

Lott. English family of violin makers. The first member of the family to make violins was John Frederick Lott (*b* London, 26 April 1776; *d* London, 13 April 1853). He is said to have worked for the Astors as a chair maker before commencing instrument making. In March 1798, through the intercession of the elder B.S. Fendt, Lott became an employee of Thomas Dodd, for whom he made many fine cellos and double basses. After leaving Dodd's employ, he worked from his own shop on King Street, Seven Dials.

Lott had two sons, the first being George Frederick Lott (*b* London, *c*1800; *d* London, 29 March 1869), who worked first for William Davis on Coventry Street; after 1847 he opened a shop at 16 Princes Street, which operated until his death. His work is not well known. The younger son, John Frederick ('Jack') Lott (*b* London, 23 May 1804; *d* London, 7 June 1870), was the finest 19th-century English maker, and as an imitator of Guarneri del Gesù and Stradivari was unequalled in his own country. According to *Jack of All Trades*, a novel by Charles Reade which was based on his life, 'Jack' Lott also began his career as an apprentice to Davis, but after four years the apprenticeship was cancelled. He then made instruments briefly for Edward Dodd. There followed a lengthy period away from violin making, during which time he was, among other things, an organizer of firework displays, an actor, a musician and an elephant handler. He also worked as a wood-grainer, treating woods to give them the appearance of other woods and the look of age and wear; this training no doubt contributed to his later skill and success in the creation of 'old' violins. He spent much of the 1830s in the USA and on the European continent. He was in Geneva in 1839, where his elephant was killed; there he married and had a family, returning to England and his original profession some time after 1843. By that time the younger B.S. Fendt had explored with considerable success the idea of making new instruments appear old and used (the most difficult aspect being the imitation of worn Italian varnish); such 'old' instruments found a ready market, and Lott began to make them also.

Whereas Vuillaume and Fendt, among others, took pains to reproduce precisely the features they saw on the early Cremonese instruments, Lott tried more to capture their mood. His aim was to generate in the beholder the excitement felt by connoisseurs when they contemplate fine old instruments. He seems to have made few exact replicas of individual instruments, perhaps seeing himself as continuing where the masters he admired, particularly Guarneri, had left off. Lott had nearly equal success tonally, the sound of his instruments sometimes being deceptively Italianate. Ida Haendel used one of his instruments early in her career, and one can regard his work with admiration, unlike the Victorian writer who said of him that 'all the talent and skill a craftsman of this sort has will not atone for a life of fraud'.

CHARLES BEARE, PHILIP J. KASS

Lott, Dame **Felicity** (*b* Cheltenham, 8 May 1947). English soprano. She studied at the RAM, and made her stage début in 1973 with Unicorn Opera, Abingdon, as Seleuce (*Tolomeo*). She first appeared at the ENO in 1975 as a touchingly artless Pamina. An impressive Fiordiligi and an impassioned Natasha in *War and Peace* followed. In

Felicity Lott in the title role of Richard Strauss's 'Arabella', Glyndebourne, 1989

1976 her Covent Garden début was in Henze's *We Come to the River*, and she later appeared there as Anne Trulove, Blanche (*Dialogues des Carmélites*), Ellen Orford, Eva and the Marschallin, all roles that exhibited her gifts for clear tone, alert musicianship and interior feeling. At Glyndebourne she has been admired as a Straussian. Her Octavian, Arabella (see illustration), Madeleine and particularly her Christine Storch (preserved on video) all brought out a touch of insouciant charm in her singing and acting. Munich, Dresden and Vienna all acknowledged her gift as a Straussian by casting her as, variously, the Marschallin, Arabella and Madeleine. The Marschallin was also the role of her Metropolitan début in 1990. Her Louise in Brussels and her Jenifer (*The Midsummer Marriage*) for WNO were notable successes in other genres. Lott has also been admired as a soloist in all the major oratorios and as a recitalist, and is a founder-member of the Songmakers' Almanac. She has gained a justified reputation in lieder and *mélodies*, her interpretations marked by the subtle nuances she brings to the text. Her gift for sensuousness is notably preserved on her recordings of Debussy and Poulenc, her sense of humour in Offenbach. Her gifts as a Mozartian are shown in her recordings of Countess Almaviva (with Haitink) as well as Fiordiligi and Donna Elvira (with Mackerras). She was made a CBE in 1990 and a DBE in 1997.

ALAN BLYTH

Lotter. German firm of music publishers and printers. Johann Jakob Lotter (*b* Augsburg, *c*1683; *d* Augsburg, 1738) founded the firm in Augsburg, and for over a century (before 1720 until after 1830) it held a leading position in south German music publishing. Although he himself was Protestant, he published primarily the works of Catholic composers, and his increasing prosperity was based in particular on church music. After his early death his son Johann Jakob Lotter (*b* Augsburg, 1726; *d* Augsburg, 1804) extended the publishing and printing business and published copious music catalogues in which south German masters predominate, although composers from central and north Germany, Italy, France and elsewhere are also represented. In its heyday the firm sold its publications beyond the south German area, evidence of which survives in Austrian and Swiss music inventories of the 18th century and early 19th.

Above all the firm of Johann Jakob Lotter & Sohn, as it subsequently became known, supplied many court orchestras, music colleges, monasteries, vicarages and schools with contemporary music literature of the most varied kind. In addition the firm offered young people in abbeys, at courts and in municipal music posts the opportunity to publish their works, thereby contributing to the extraordinary wealth of south German music during the 18th century. It has been estimated that more than 100 composers had their works published by Lotter. Leopold Mozart, a close friend of Johann Jakob Lotter the younger, had his violin tutor published by the firm, and carried out some business transactions for Lotter in Salzburg; their friendship is further confirmed by their correspondence (in *D-Asa*) and the fact that the publisher was the first to be informed of Wolfgang Amadeus's birth. In the third generation of the family firm Esaias Daniel Lotter (*b* Augsburg, 1759; *d* Augsburg, 1820) had to overcome the economic setbacks which had resulted from the Napoleonic wars and subsequent secularization. Two other Lotters contributed to the technical improvements of note-type printing. The last surviving music catalogue is dated 1829; the firm probably ceased to exist in the second quarter of the 19th century.

ADOLF LAYER

Lottermoser, Werner (*b* Dresden, 18 June 1909; *d* Bad Reichenhall, 13 June 1997). German acoustician. After attending the Technische Hochschule in Dresden (1928–9), he studied at the universities of Kiel, Tübingen and Berlin (where he was a pupil of Biehle). His work with M. Grützmacher and Gurlitt during this period stimulated his later research. In 1935 he received a doctorate in physics at the University of Berlin with a dissertation on reed pipes. From 1936 to 1945 he worked first in the State Institute of Physics and Technology in Berlin-Charlottenburg and later was independently employed in the physics department of Tübingen University. In 1952 he began work in the Federal Institute of Physics and Technology in Brunswick, becoming administrative adviser in 1953, chief adviser and head of the acoustics laboratory in 1956, and in 1968 professor and director of the institute. He retired in 1971.

Lottermoser conducted extensive research into the acoustics of instruments, especially the organ and violin, and into the physiology of hearing them. Through his articles on differing architectural styles in churches he contributed to the study and improvement of spatial acoustics.

HANS HEINRICH EGGEBRECHT

Lotti, Antonio (*b* Hanover, 1666; *d* Venice, 5 Jan 1740). Italian composer. Though identified as a Venetian in his op.1 collection (1705), Lotti was born in Hanover, where his father Matteo was Kapellmeister. By 1683 he was in Venice studying with Legrenzi; the latter's opera *Giustino* of that year was long attributed to Lotti. When the musical fraternity of S Cecilia was established at the Basilica of S Marco (act of 25 November 1687) Lotti, as an extra singer in the choir, was one of the first to sign its register. On 30 May 1689 he began receiving a regular salary for singing alto; on 6 August 1690 he became an assistant to the second organist, on 31 May 1692 second organist, and on 17 August 1704 first organist, a position he held until 1736 when he was named *primo maestro di cappella*. When the position became vacant on the death of Antonio Biffi in 1733 he failed to get a plurality of votes in competition with Antonio Pollarolo and Nicola Porpora (8 March 1733), and he had to wait three years to compete once more against Pollarolo, acting *maestro* since 1733. He now won the endorsement of nine of the 12 procurators of S Marco (2 April 1736), which qualified him for the annual salary of 400 ducats and free lodging in the piazza de' Canonici; he held the position until his death. Angelo Lotti had been appointed to assist him at the organ at his own cost on 2 March 1732. As organist he wrote much music for the choir; the procurators had awarded him 50 ducats as early as 1698 for composing a book of masses.

In addition to the sacred music for S Marco, Lotti wrote solo motets, choral works and oratorios for the singers of the Ospedale degli Incurabili. The singing style of this female choir, famous throughout the 18th century, was grounded (according to Caffi) in Lotti's teaching. The period of his office at the institution is not known: it must have been immediately before Porpora's (*c*1726–33) unless he shared duties with C.F. Pollarolo, *maestro* there from about 1696 to about 1718 or later (?1722). Lotti was also *maestro di cappella* of Spirito Santo, at least from 1697 to 1707. His membership of the Sovvegno di Santa Cecilia is documented for the years 1737 to 1739.

Lotti's career as an opera composer began in 1693, when his *Il trionfo dell'innocenza* was given in Venice. His most productive period of writing for Venetian theatres, however, was between 1706 and 1717, when at least 16 new operas (including the first setting of Zeno's *Alessandro Severo*, Carnival 1717) and three revised works by him were staged. Granted leave of absence by the procurators of S Marco (22 July 1717 and renewed for another year in 1718), he left Venice (5 September 1717) to write an opera for Dresden. He took musicians of the basilica with him as well as his wife, Santa Stella, and the librettist Antonio Maria Luchini. The first of his three operas for Dresden, *Giove in Argo*, had its first performance on 25 October 1717 in the Redoutensaal and was revived on 3 September 1719 to inaugurate the Hoftheater, Dresden's principal theatre in the 18th century. The opera *Teofane*, performed in Dresden on 13 September 1719, interested Handel to such a degree that in 1725 he included bass arias from the work in his pasticcio *Elipidia*. A *festa teatrale* by Lotti, *Li quattro elementi*, was performed on 15 September 1719 in a palace garden in celebration of the wedding of the Saxon Elector Friedrich August and Maria Gioseffa of Austria. Despite his successes in Dresden, Lotti retired from the theatre after his return to Venice. As souvenirs of his visit, he kept in Venice the carriage and horses that he had been given for his return trip from Dresden (autumn 1719). No other trips taken by Lotti outside Venice are recorded, except one to Novara to provide music for a religious festival on 14 June 1711: an orchestra of 37 musicians, mostly from Milan, played music by Lotti, Antonio Caldara, Francesco Gasparini and other north Italian composers. In February 1740 the *Pallade Veneta* reported the solemn funeral services for Lotti at S Salvatore.

Like many of his contemporaries, Lotti composed numerous cantatas for solo voice with continuo, some of them with strings; but he also wrote short pieces for two, three and more singers which make up an unusual repertory of secular music. A collection of such pieces printed in Venice in 1705 and dedicated to the Habsburg Emperor Joseph I is entitled *Duetti, terzetti e madrigali a più voci* op.1. In a work published anonymously, *Lettera famigliare d'un accademico filarmonico*, Benedetto Marcello criticized these pieces severely. Nevertheless, Padre Martini admired them and included one, *Tant'è ver che nel verno*, in his counterpoint treatise, *Esemplare ossia Saggio fondamentale* (1775). In a very different way, G.B. Bononcini used another, *In una siepe ombrosa*: he posed as its composer when Maurice Greene had it performed at London's Academy of Ancient Music in 1731. Lotti provided the Academy with requested testimony (including a letter from Pietro Pariati, who had written the poetry for Lotti), and in 1732 the Academy published a report justifying Lotti's claimed authorship.

Among Lotti's late works is a setting of the *Miserere* in D, first performed in 1733 and subsequently sung every Maundy Thursday at S Marco during the 18th century and occasionally in the early 19th. A mass with vespers designated 'nello stile a terra' was performed annually by the S Marco choir in S Geminiano (opposite the basilica in piazza S Marco until it was destroyed in 1807) in commemoration of the composer, who was buried there. Many of Lotti's other sacred works remained in the choir's active repertory until the end of the 18th century.

Among the occasional works intended for banquets of the doge is Lotti's *Il tributo degli dei*, a cantata for four voices and strings of 1736. His *Spirto di Dio ch'essendo il mondo* composed in the same year was sung by the S Marco choir when the doge sailed in the Bucintoro on Ascension Day to celebrate the symbolic marriage of Venice with the sea. The score of this madrigal was the only secular work in the S Marco library when, in the early 19th century, Caffi surveyed its holdings.

Lotti's operas use streamlined plots and long recitatives. The arias are usually in da capo form and accompanied by treble instruments and continuo. The operas for Vienna and Dresden are especially varied in instrumentation with the basic strings and continuo being enriched variously by recorders, trumpets, oboes and horns. His melodies are often built on two- to four-bar segments which are then extended by sequence or coloratura elaboration, which often has an expressive function in terms of word-painting. In *Alessandro Severo*, for example, Salustria's farewell to her father in the aria 'Padre addio' is expressed in short, sighing motives which give way to smooth coloratura lines, all accompanied by muted strings.

Lotti's oratorios are stylistically similar to those of Francesco Gasparini. Simple melodies and returning ritornellos characterize *Il vota crudele*, while *L'umiltà coronata in Esther* is more ambitious with chorus sections

integrated into the drama and an overture in concerto grosso style. His motets contrast contrapuntal and homorhythmic passages, and demonstrate careful attention to word rhythm and expression. Textural contrast is also achieved by alternating contrapuntal sections and monophonic chant phrases.

Lotti's later works display an elegance and contrapuntal craft of the highest order. He was an exponent of the robust Baroque style of the late 17th century who had no difficulty adjusting to the 18th-century neo-classical taste favouring more clearly regulated harmonies and lighter textures. Perhaps better than any other composer of his time, he bridged the late Baroque and early Classical periods. When Burney heard Lotti's music performed at S Marco in 1770 he wrote: 'it affected me even to tears. The organist here very judiciously suffered the voices to be heard in all their purity, insomuch that I frequently forgot that they were accompanied'. Most of Lotti's sacred music lacks orchestral accompaniments, as though they might obstruct the contrapuntal lines – what Burney called 'the fugues and imitations'.

Among Lotti's pupils were Domenico Alberti, Girolamo Bassani, Baldassare Galuppi, Michelangelo Gasparini, Benedetto Marcello, Giambattista Pescetti and Giuseppe Saratelli. Hasse never studied formally with Lotti, although La Borde called him a pupil. Burney merely reported that 'Hasse regarded Lotti's compositions as the most perfect of their kind'. This evaluation was echoed a century later by Fétis, who wrote: 'his style is simple and clear and no one in modern times has possessed, better than he, the art of having the voice sing in a natural manner ... in his madrigals and church music he is at least the equal of A. Scarlatti, and his superiority over all other masters of his time is incontestable'.

Lotti had no children, but his wife (named Santa Scarabelli Stella in a libretto of 1710) had a daughter (Lucrezia Maria Bassadonna) who became a nun. Librettos cite Santa and her sister Chiara as singers at the Mantuan court, and for a time they earned the handsome salary of 18,600 ducats; Santa, a native of Bologna, gained a considerable reputation as a soprano. After Lotti's death, his wife erected a monument to him in S Geminiano, where she too was later buried (she died on 18 September 1759), but their tomb was moved to an unknown location on 25 June 1807.

WORKS

OPERAS

first performed in Venice, music lost, unless otherwise stated

VC – *Venice, Teatro S Cassiano*

VGG – *Venice, Teatro S Giovanni Grisostomo*

Il trionfo dell'innocenza (R. Cialli), S Angelo, carn. 1693, arias *I-CCc*, *Rvat*

Tirsi [Act 1] (dramma pastorale, 5, A. Zeno), S Salvatore, 3 Nov 1696, arias *B-Bc* [Act 2 by A. Caldara, act 3 by A.O. Ariosti]

Sidonio (5, P. Pariati), VC, aut. 1706

Achille placato (tragedia per musica, 5, U. Rizzi), VC, 12 Feb 1707, perf. with Le rovine di Troja [Dragontata e Policrone] (int), *Bc*, *Br* (facs. in DMV, x, forthcoming)

Teuzzone (Zeno), VC, 27 Dec 1707, perf. with Catulla e Lardone (int); rev. G. Vignola, as L'inganno vinto dalla ragione, Naples, Fiorentini, 19 Nov 1708

Il vincitor generoso (F. Briani), VGG, 10 or 11 Jan 1709

Ama più chi men si crede (melodramma pastorale, 3, F. Silvani), VGG, 23 Nov 1709

Il comando non inteso et ubbidito (Silvani), VGG, 8 Feb 1710, arias *D-WD*

La ninfa Apollo (scherzo comico pastorale, 3, F. de Lemene), VC, 4 March 1710, collab. F. Gasparini

Isacio tiranno (Briani), VGG, 24 Nov 1710, arias *WD*

Il tradimento traditor di se stesso (Silvani), VGG, 17 Jan 1711; rev. F. Mancini, as Artaserse, re di Persia (with prol), Naples, Palazzo, 1 Oct 1713, arias *Bsb*, *WD*

La forza del sangue (Silvani), VGG, 14 or 15 Nov 1711; rev. Vignola, Naples, S Bartolomeo, 26 Oct 1712

L'infedeltà punita (Silvani), VGG, 15 Nov 1712, arias *Dl*; collab. C.F. Pollarolo

Porsenna (A. Piovene), VGG, 4 Feb 1713; rev. A. Scarlatti, Naples, S Bartolomeo, 19 Nov 1713

Irene augusta (Silvani), VGG, 22 Nov 1713, arias *Dl*

Polidoro (tragedia per musica, 5, Piovene), SS Giovanni e Paolo, carn. 1715, *I-Nc*

Foca superbo (A.M. Lucchini), VGG, carn. 1716, *D-Dl*, *S-St*

Ciro in Babilonia (Pariati), Reggio nell'Emilia, Pubblico, May 1716

Costantino (Pariati ?and Zeno), Vienna, Hof, 19 Nov 1716, *A-Wgm*, *Wn*; ov. by Fux, intermezzos and licenza by Caldara, arias and dances by N. Matteis

Alessandro Severo (Zeno), VGG, carn. 1717, *D-Dl* (facs. in IOB, xx, 1977)

Giove in Argo (melodramma pastorale, Lucchini), Dresden, Redoutensaal, 25 Oct 1717; rev., Dresden, Neues Opernhaus, 3 Sept 1719, *Bsb*, *Dl*, *Mbs*

Ascanio, ovvero Gli odi delusi dal sangue (Lucchini), Dresden, Redoutensaal, Feb 1718, *Bsb*, *Dl*

Teofane (S.B. Pallavicino), Dresden, 13 Sept 1719, *Bsb*, *Dl*

Li quattro elementi (carosello teatrale), Dresden, palace garden, 15 Sept 1719

ORATORIOS

music lost unless otherwise stated

La Giuditta, 1701

Gioas, re di Giuda (Z. Valaresso), Venice, Incurabili, ?1701

San Romualdo, Venice, 1702

Il voto crudele (Pariati), Vienna, court, 1712, *A-Wgm*, *Wn*

Triumphus fidei, Venice, Incurabili, 1712

L'umiltà coronata in Esther (Pariati), Vienna, *c*1714, *Wgm*, *Wn*

Il ritorno di Tobia (G. Melani), Bologna, Madonna di Galliera, 1723

Judith, Venice, Incurabili

SECULAR CANTATAS

Those marked ‡, and perhaps others, consist of a single aria only and may be arias from operas.

A Clorinda, al suo bene, S, bc, *GB-Lbl* (2 copies, 1 attrib. D'Astorga), *Lcm*, *I-Nc*; Adorato Filen prima che manchi, S, bc, *D-Bsb*; Alma te'l dissi pure, S, bc, *GB-Gu*; A l'ombra d'un alloro, A, bc, *Lam*; Al piè d'un colle ameno, S, bc, *B-Bc*; Amor perchè l'istessa fiamma, S, bc, *D-Bsb*; ‡Amor sa far le piaghe soavi, S, str, bc, *Bsb*; Ascolta Filli, S, bc, *GB-Gu*; Aure care, S, bc, A, bc, *Lcm* (2 versions); Bianca man, mano d'argento, S, bc, *F-Pn*; Cara Lidia adorata, S, bc, *I-Nc*; Cari numi, S, bc, *S-L*; Cedea Febo all'occaso, S, bc, *D-Bsb*; Chari zephyri fontes, S, 2 ob, str, bc, Berlin according to Eitner; Che v'ami il mio core, S, bc, *Bsb*; ‡Chi ben ama ha sol piacere, S, str, bc, *Bsb*; Clori, mi comandate, S, bc, *Bsb*; Clori, tu parti ed io lungi, S, bc, *Bsb*; Clori, tu parti ed io qui resto, S, bc, *Bsb*

Daliso io più non veggio, S, A, str, bc, *MÜs*; Della mia bella Clori, S, bc, *GB-Lbl*, *Ob*; Dove sei, dolce mia vita, A, str, bc, *D-ROu*; E pure un dolce dardo, S, bc, *I-Bc*; ‡E un martir che fa morir, A, str, bc, *D-Bsb*; Favella al tuo core, S, ob, str, bc, cited in Brook; Filli crudel, spietata Filli, S, bc, *GB-Lbl*, *I-Nc*; Finchè l'alba ruggiadosa, A, bc, *Nc*; Fra queste vi sono qualche, S, vn, bc, *D-Bsb** according to Eitner; Fra questi alpestri, S, bc, *Bsb*; Gelsomin che superbetto, S, bc, *Bsb*; ‡Già che dovrai penar, S, str, bc, *Bsb*; Già di giubilo, A, bc, *A-Wn*; ‡Ha colei dal cielo il viso, A, str, bc, *D-Bsb*

Idrena idolo mio, A, bc, *Bsb*; I cocenti sospiri, S, bc, *GB-Gu*; Il mio cor non ha riposo, S, bc, *D-Dl* according to Eitner; Il tributo degli dei, 4vv, str, 1736, *Mbs*; In alta rocca, S, bc, *Dl* according to Eitner; Io piango al tuo partir, S, bc, *GB-Gu*; Io sospiro se vi miro, S, bc, *D-Bsb*, *GB-Lbl*, *Ob*; Lagrime sventurate che pe' i fonti, S, bc, *D-Bsb*; Lasciatemi piangere che di versare, S, bc, *Bsb*; ‡La speranza è come stella, S, str, bc, *Bsb*; Le stelle fortunate, S, B, str, bc, *A-Wn*; Lidia, amor che si pasce, S, bc, *D-Bsb*; Lidia, t'amai nol niego, S, bc, *Bsb*; Lilla, del tuo bel foco, A, bc, *Bsb*; Lusinghiera bellezza in dolce pena, S, bc, *Bsb*; ‡Ma confuse e vergognose, S, str, bc, *Bsb*; ‡Meco vieni e sorgerai, A, str, bc, *Bsb*; ‡Mi dispiace in amor, S, vn, bc, *Bsb*; Mi forza di morir Fillide, S, bc, *Dl* according to Eitner

Mirai, e fù lo sguardo, A, bc, *GB-Lbl*; Mira sul verde, S, bc, *D-Bsb*; Occhi veri pupilli, S, bc, *Dl* according to Eitner; Oh pastorello gentile e bello, S, bc, *Bsb*; ‡Partirò ma tutti aurete, A, str, bc, *Bsb*; Pastori, se vedete all'or ch'il sole, S, bc, *Bsb*; Per far fede à chi non crede, S, vn, bc, *Bsb*; ‡Per mirar chi è la mia luce, S, str, bc, *Bsb*; Per rendersi gradito, S, bc, A, bc, *I-Nc* (2 versions); Piange il fiore, piange il prato, S, vns, bc, *Mc*; Qual'arde la Fenice, S, bc, *D-Bsb*; Quanto per te soffersi, S, bc, *Bsb*; Quanto siete fortunate, S, bc, *Bsb*; ‡Quest'alma non disprezza, S, str, bc, *Bsb*

Rendi al mio cor la pace, S, bc, *Bsb*, A, bc, *GB-Lbl* (2 versions); ‡Ritorna, Amor ritorna dopo impresa, S, str, bc, *D-Bsb*; Ruscelletto, che vai scherzando, A, bc, *I-Nc*; Se dì quel dì fatal, S, bc, *D-Bsb*; ‡Se deggio sempre amar, S, str, bc, *Bsb*; Sempre più sento, S, bc, *GB-Lcm*; Se piange l'alba, S, bc, *D-Bsb*; Si d'un volto la beltà, S, str, bc, cited in Brook; Si, si, v'intendo, S, str, bc, *MÜs*; So d'essermi d'Amor, S, str, bc, *MÜs*; Su i smeraldi ridenti, S, bc, *Dl* according to Eitner; Sulla sponda d'un rio, S, bc, *Bsb*; Supplice e lagrimante, S, str, bc, *MÜs*; Ti sento, o Dio bendato, S, ob, bc, *GB-Cfm*; Tra le selve il cor perdei, S, bc, *D-Bsb*

Tuonava il bronzo, A, bc, *A-Wn*; ‡Tutto pien di chiara luce, S, va, bc, *D-Bsb*; Usignuolo, che nel duolo, S, ob, str, bn, bc, *Bsb*; Usignuolo tu ci, S, bc, *Dl* according to Eitner; Va, mio core, al bel che adoro, A, bc, *Bsb*; Va mormorando quel ruscelletto, S, bc, *Bsb*, 1st aria *S-L, Uu*; Vedrò versar quel sangue, S, str, *GB-Lbl*

OTHER SECULAR VOCAL

[12] Duetti, [4] terzetti e [2] madrigali a più voci, vv, bc, op.1 (Venice, 1705), incl. In una siepe ombrosa (La vita caduca), *D-HVs, I-Vlevi, US-Bc*

Spirto di Dio ch'essendo il mondo [Madrigale del Bucintoro] (Z. Valaresso), 4vv, bc, Ascension Day 1736, *I-Vnm**, copies *A-Wgm*; *B-Br*; *D-Dl, HVs, MÜs, WRgs*; *I-BGc, Vc, Vlevi, Vs*; *US-Wc*

Sommo duce in trono assiso, pastorale, 4vv, *B-Br, D-MÜs*

Lamento di tre amanti, madrigal, 3vv, *B-Br*

Cants.: Corda fidelis, S, str, *D-DO*; Desiderata spes, S, str, *H-P*

7 Duetti, *D-MÜs*; 3 Duetti, *MÜs*; 4 Duetti, *I-BGc, S-S*; 8 Duetti, *I-BGc*; 4 Terzetti, *BGc*; 9 Terzetti, *D-MÜs*, single arias, *D-Hs*

Other madrigals, 2–5vv, survive in MSS, but no accurate survey has been made.

SVEN HANSELL/OLGA TERMINI

Lottini, Antonio (*b* Pistoia; *fl* 1717–65). Italian bass. He was a pupil of A.F. Carli and later of the composer Francesco Gasparini, in whose *Intermezzi in derisione della setta maomettana* he made his first appearance (1717, Rome). Until Carnival 1729 he performed serious as well as comic roles in both southern and northern Italy. After 1729 he sang almost exclusively in Tuscany (perhaps because he had entered the service of the Grand Duchess of Tuscany), confining himself to the comic repertory. His partner in intermezzos between 1730 and 1739 was Anna Maria Faini, with whom he visited London in 1737–8 and introduced a number of comic intermezzos, which were not well received. While in London he also sang minor roles in works by Handel (Teobaldo in *Faramondo*, Elviro in *Xerxes*) and others before returning to Tuscany and resuming his career there. He was still active, in comic roles, in 1765. He was a singer of solid technique with perhaps greater agility than power.

FRANCO PIPERNO

Lotto, Izydor (*b* Warsaw, 22 Dec 1840; *d* Warsaw, 13 July 1927). Polish violinist and composer. Son of a Jewish street musician, he played the violin in Warsaw taverns. He studied at the Paris Conservatoire (1852–5) with J.L. Massart (violin) and Ambroise Thomas (composition), and won a *premier prix* in 1855. His career as a soloist began in 1852 when he performed in the Salle Herz in Paris. In 1857 he gave three concerts in Warsaw (15, 18 and 19 February), in 1860 in Warsaw, Lublin and in 1861 played in Kraków; he also appeared in many European cities, including Paris (1860, 1865), Berlin, Weimar and Leipzig. He was professor of violin at the Strasbourg Conservatory (1873–80) and the Music Institute in Warsaw (from 1880); he was also leader of the Warsaw opera orchestra. His compositions are exclusively for the violin.

WORKS

5 vn concertos, 1865; Fantasia on the Russian national anthem, vn, orch or pf, op.1 (Leipzig, 1861); Morceau de concert, vn, orch or pf, op.2 (Leipzig, 1861); Fileuse, vn, pf, op.8 (Leipzig, 1861); Barcarolle; Danse slave; 12 études, op.9 (MS in Präger and Meyer's private collection, Bremen); Fantasia on a theme from Moniuszko's Halka; Le papillon; Valse de concert; Rondino, cadences to concs. by Mendelssohn, Paganini, Viotti

Loud. Anglo-American family of piano makers. Thomas Loud (i) (*b c*1762; *d* New York, 2 Jan 1833) was active in London at the turn of the century; the signature 'Loud 1796' appears on a Longman and Broderip square piano and in 1809 the Post Office Annual Directory listed him as a piano maker living at 22 Devonshire Street, Queen Square, London.

In 1802 he was granted a British patent for an upright piano just under two metres high. He stated that, by using diagonal stringing, 'an instrument standing only five feet high and four feet wide in front will admit of the bass strings their full length which is five feet two inches'. This was not the first time that oblique stringing had been used, as Friderici had strung his pyramid piano of 1745 obliquely, in order to accommodate the exceptionally long bass strings. Loud emigrated to America before 1816, and was building overstrung 'piccolo' upright pianos by 1830. Records show that Thomas and John Loud arrived in Philadelphia in 1817, followed by Joseph Loud in 1828. The will (1832) of Thomas Loud (i) refers to his sons Thomas, John, Philologus and Joseph Edward as trading in Philadelphia as Loud & Brothers. In 1835 they became Loud & Co.

In 1812 the Philadelphia *Aurora* announced the dissolution of a partnership between Thomas Loud Evenden sr (Thomas Loud (ii)) and the cabinet maker Joshua Baker. A square piano of about 1810 (now owned by Jörg Demus), marked 'New Patent. Thomas Loud from Clementi & Compy', may be the work of Thomas Loud (i) or (ii), if indeed they are distinct. Thomas Loud (i) was survived by a widow, Harriet (née Evenden); from 1814 a Harriet Evenden is listed in Philadelphia directories with a Thomas Loud Evenden jr. A piano of about 1815 marked 'Tho. L. Evenden & Son, from London' (in the Metropolitan Museum of Art, New York) is the only known instrument bearing the Evenden name, which was dropped in 1817 when John Loud joined Thomas in the business. Their piano of about 1818–22 marked 'Thomas & John Loud' is in the Smithsonian Institution, Washington, DC. Around 1825 Philologus Loud joined the partnership, now known as Loud & Brothers; Joseph Edward Loud entered in 1828, when the firm expanded to new quarters on Chesnut Street.

By this time the family firm was among the most prolific in the USA, producing about 600 pianos annually at retail prices of \$180 to \$1200 and exporting instruments to the West Indies and South America. In 1832 the firm exhibited two distinctive square pianos at the Franklin Institute, Philadelphia, one of them triple strung for greater brilliance, the other better suited to vocal accompaniment. In 1830 the Louds advertised a metal frame, which they patented in 1835. Their other six patents between 1827 and 1865 include a transposing action (1842) and swell device (1865); their upright piano dated as early as 1831 (in the Metropolitan Museum) is equipped with pedal-operated swell shutters and a curiously shifted action. Other family members in the piano business included Thomas C., William H. and Joseph R. Loud. Joseph R.'s career paralleled the firm's decline: in 1855 he was listed as a piano maker, in 1860 as a tuner, and in 1862 as a plumber.

MARGARET CRANMER/LAURENCE LIBIN

Loud & Brothers. *See* LOUD.

Loudness. The subjectively perceived strength of a sound. There is a complex relationship between this psychophysical quantity and objectively measured attributes of the sound wave. The loudness of a sound is most directly related to the intensity, which is the energy transmitted by the sound wave across unit area per second; it is also influenced by the duration and the frequency spectrum of the sound, and by the context in which the sound is heard.

It has often been suggested that subjective loudness is proportional to the logarithm of the sound intensity (an example of the Weber-Fechner psychophysical law, which states that sensation is proportional to the logarithm of stimulus). The intensity level is a logarithmic intensity measure: if the intensity is multiplied by *n* powers of ten, then the intensity level increases by *n* bels or 10*n* decibels (dB). For example, if one sound has twice the intensity of another, the difference in intensity is 3 dB, if the first sound is ten times more intense the difference is 10 dB, and if the first sound is a million times more intense the difference is 60 dB. The reference intensity corresponding to 0 dB is chosen to be one picowatt per square metre, which is below the threshold of audibility for almost all human listeners. The loudness level, whose unit is the phon, also takes account of the fact that the ear's response varies with frequency; the phon rating of a sound is numerically equal to the intensity level (in dB) of an equally loud sinusoidal tone at the standard frequency of 1000 Hz.

A rough correspondence can be established between loudness level and the musical dynamic scale, with a change of 10 phons being approximately equivalent to one dynamic step (for example, from *mezzo-forte* to *forte*). Loudness level is not, however, directly proportional to loudness. A *fortissimo* sound might be rated at 90 phons, and a *pianissimo* sound at 45 phons: most listeners would judge the loudness ratio of these sounds to be much greater than two. Psychoacoustic studies of loudness ratio estimation have established that a doubling of loudness corresponds roughly to an increase of 10 phons. This is the basis of the sone loudness scale: 1 sone is equivalent to 40 phons, 2 sones to 50 phons, 4 sones to 60 phons and so on. The empirically verified sone scale implies that subjective loudness is not proportional to the logarithm of the sound intensity, but rather to the cube root of the intensity.

See also SOUND.

MURRAY CAMPBELL, CLIVE GREATED

Loudová, Ivana (*b* Chlumec nad Cidlinou, 8 March 1941). Czech composer. She studied composition at the Prague Conservatory with Miloslav Kabeláč (1958–61) and with Emil Hlobil (1961–6) at the Prague Academy of Musical Arts, where she also undertook graduate studies between 1968 and 1972. She continued at the Paris Conservatoire, where she studied with Messiaen and Jolivet, and worked at the Centre Bourdon with the Groupe de Recherches Musicales. A jury member at many competitions, in 1992 she became a professor of composition and music theory at the Prague Academy, where she has founded the Studio N for new music.

Loudová has an extensive command of contemporary compositional and instrumental techniques (especially in creating new sounds for wind and percussion) and writes in a wide variety of genres; her music demonstrates a deep sense of form and combines timbre and rhythm to good effect. Many of her large-scale vocal works employ either Italian Renaissance or modern Czech poetry. Loudová has won many awards, including a prize for *Rhapsody in Black* at the GEDOK competition in Mannheim (1967), three prizes in the Guido d'Arezzo competition for *Sonetto per voci bianche* (1978), *Italian Triptych* (1980) and *Occhi lucenti e belli* (1984), and the Heidelberg Artistic Prize in 1993. Her choral compositions have been awarded in the Jihlava and Jirkov competition and in radio competitions in Moscow and Olomouc.

ANNA ŠERÝCH

Loud pedal. *See* SUSTAINING PEDAL.

Loudspeaker (Fr. *hautparleur*; Ger. *Lautsprecher*; It. *altoparlante*). A transducer which converts variations of electrical current into sound vibrations. The principle of the loudspeaker is the exact reverse of that of the microphone. It is driven by an amplifier (which may be housed in a separate cabinet or combined with the

loudspeaker in a single 'combination unit'), and is the exact reverse of the microphone. The loudspeaker is an essential component of every electro-musical system. A loudspeaker cabinet for professional or domestic use normally contains at least a substantial mid-range unit and a 'tweeter' for higher frequencies; a larger cabinet or a separate bass loudspeaker will also incorporate a low-frequency 'woofer'. A loudspeaker installation for a large space, temporary or permanent, is normally known as a PA ('public address') system.

See also ELECTRIC GUITAR and ELECTRONIC INSTRUMENTS, §I, 5(ii).

HUGH DAVIES

Louël, Jean (Hippolyte Oscar) (*b* Ostend, 3 Jan 1914). Belgian composer, conductor and pianist. He studied at the conservatories of Ghent and Brussels, and then at the Paris Conservatoire where, in 1946, he obtained a conducting diploma. In 1943 he won the Belgian Prix de Rome for his cantata *La navigation d'Ulysse*. In the same year he was appointed to teach harmony at the Brussels Conservatory, changing to counterpoint in 1955 and fugue (1967–74). In 1956 he was made inspector of music education for Flemish Belgium, and three years later he took charge of the counterpoint courses at the Chapelle Musicale Reine Elisabeth. He was artistic director of the Brussels Concerts de Midi (1949–70) and founded its chamber orchestra; he was also active as a chamber music player, notably in an ensemble he founded with two violinists. In 1968 he was elected a member of the Flemish Royal Academy of Belgium. His works, most of them instrumental, are few. Freeing himself from the influences of Ravel and Bartók, he developed a polytonal style of great complexity and rhythmic variety, giving an impression of ceaseless movement. Louël's music exploits a wide range of performing techniques particularly in the Second Violin Concerto. In 1958 he began to use 12-note procedures, but his writing has not been strictly serial.

HENRI VANHULST

Loufenburg, Heinrich. *See* LAUFENBERG, HEINRICH.

Loughran, James (*b* Glasgow, 30 June 1931). Scottish conductor. He organized and conducted music at school, and then locally while studying law and economics. Seeking a musical career he went to Germany in 1958 on the advice of Karl Rankl and acquired experience as a répétiteur at the Bonn Opera, with the Netherlands Opera and in various Italian centres. Back in Britain he found little opportunity for work until he won a competition for conductors organized by the Philharmonia Orchestra in 1961. He was with the Bournemouth SO (1962–5), then went to Glasgow as principal conductor of the BBC Scottish SO (1965–70), and to Manchester to the Hallé Orchestra in succession to Barbirolli in 1971. From 1979 to 1983 he was chief conductor of the Bamberg SO (the first British conductor to hold a major German orchestral post), and in 1983 he ws appointed conductor laureate of the Hallé Orchestra.

Loughran conducted the première of Malcolm Williamson's *Our Man in Havana* at Sadler's Wells Theatre in 1963, and the next year made his débuts with the Sadler's Wells company (*La traviata*) and at Covent Garden (*Aida*). He also worked with the English Opera Group (1966) and Scottish Opera (first in *The Gondoliers*, 1968). During his Scottish appointment he conducted as a regular policy a number of new works by British composers. In 1969, at the invitation of the European Broadcasting Union, he recorded for radio all the Beethoven symphonies with the LSO; the cycle was broadcast by member countries of the EBU during the Beethoven bicentenary year. He made his American début in New York with the New York PO in 1972 and has since worked regularly with other major orchestras in Europe, Japan and the USA. Loughran's fruitful association with the Hallé Orchestra is commemorated in direct, satisfying recordings of Brahms's symphonies and orchestral works, Elgar's symphonies and Holst's *The Planets*.

NOËL GOODWIN

Louie, Alexina (Diane) (*b* Vancouver, 30 July 1949). Canadian composer of Chinese descent. As a piano student of Jean Lyons, Louie took the AA degree at the Royal Conservatory of Music in 1967. She went on to study composition with Cortland Hultberg at the University of British Columbia (BMus 1970). Further study with Robert Erickson and Pauline Oliveros at the University of California, San Diego followed (MA 1974). Erickson encouraged Louie to explore qualities of sounds by experimenting with polytimbral synthesizers and computer-based sequencers, and by composing music for performance by fellow students. As a member of Oliveros's Women's Ensemble from 1971 to 1974, she performed meditations in sound and movement, some of which were based in Tibetan Buddhism. She expanded her knowledge of Asian music through Chinese zither (qin) lessons with Tsun-Yuen Lui at UCLA. In 1975 her four-track tape piece, *Molly* (1972), a work based on the last segment of Joyce's *Ulysses* which aims to make electronic composition sound 'human', was chosen for the Ripert International Festival of Electronic Music. Further recognition came with performances of *Lotus I* (1977) (chosen for the 1979 National Conference of the American Society of University Composers), *Lotus II* (1978) (which received a Composers, Authors, and Publishers Association of Canada [CAPAC] award) and *Pearls* (1980). These compositions combine sounds common to Asian music with avant-garde techniques.

Based in Toronto from 1980, Louie has taught at the Royal Conservatory of Music, York University (1982–4) and the University of Western Ontario (1990). The widely performed *O Magnum Mysterium: In Memoriam Glenn Gould* (1982) for 44 divisi strings incorporates quotations from J.S. Bach and Mahler's 'Der Abschied' in a texture of eastern-influenced sounds. Her concerns over the environment are expressed in works such as *The Eternal Earth* (1986), *Music for Heaven and Earth* (1990), both commissioned by the Toronto SO, and *Love Songs for a Small Planet* (1989). In *The Night is Shattered and the Blue Stars Shiver in the Distance* (1997), based on a line from a Neruda poem, she explores orchestral colour and texture.

Louie's numerous honours and achievements include a 1988 Juno Award for Best Classical Composition (*Songs of Paradise*, 1983), the distinction of 'Composer of the Year' from the Canadian Music Council during the 'International Year of Canadian Music' (1986), the CAPAC Micheline Coulombe-St Marcoux Award (*From the Eastern Gate*, 1987), a 1991 Society of Composers, Authors and Music Publishers of Canada award (*Thunder Gate*, 1991), two awards (1990, 1992) for being the most performed Canadian composer, and a 1994 Chalmers award (*Their Own Words (Obsessions*). Louie has served as composer-in-residence for the Canadian Opera Company and is the co-founder of the Esprit Orchestra. She is the subject of the documentary *Eternal Earth* (1987).

ELAINE KEILLOR

Louis XIII, King of France (*b* Paris, 27 Sept 1601; *d* Paris, 14 May 1643). French ruler, patron of music and composer. He was the son of Henri IV, whom he succeeded in 1610. His doctor recorded that from an early age he took a lively interest in music and dancing; he continually invented new steps and songs and had musicians sing and play for him. This passionate interest, however, did nothing to change radically the nature of music at his court. He maintained the same musical establishment as his father (30 musicians in the royal chapel and the '24 violons du roi') and enjoyed the same kind of *airs de cour* sung in his bedchamber or in public by leading singers of the day; he wrote one or two himself.

Occasionally more ambitious compositions were attempted: to mark Louis's triumphant return from Brittany in 1614 Jacques Mauduit organized concerts for massed choirs and instruments; and to enhance the melodramatic effects of the ballet *La délivrance de Renaud* (1617) he composed for and directed an ensemble of 64 voices, 28 viols and 14 recorders. Yet state occasions that called for music of these dimensions were fairly rare during Louis's reign. Even his first minister, Richelieu, sensible of the political advantages of the arts, found spectacle more eloquent than music.

For Louis XIII personal indulgence was dominant. Wherever he travelled, at royal entries or municipal banquets it was the musical aspects of the entertainment that attracted him: examples include the sound of 100 trumpets at the carousel in Paris in 1612 and the music of Sauveur Intermet performed at Avignon in 1622, when he was so moved that he had the parts torn from the players' hands and caused the music to be repeated the following day. During the siege of La Rochelle in 1628 'he kept up his spirits by composing some motets'. He showed priests how to set psalms to music, and in its director's absence he conducted the royal choir himself. He wrote the words and music and devised the choreography for *Le ballet de la Merlaison*, performed at Chantilly on 15 March 1635; the music (in *F-Pn*) in this lively *ballet à entrées* cleverly follows the characters of the dancers. Mersenne (*Harmonie universelle*, 1636–7) published an *air* by Louis, *Tu crois, o beau soleil*, arranged for keyboard by Pierre de La Barre, and Antoine Godeau claimed that four pieces in his *Paraphrase des pseaumes de David* (1648) were set to music by Louis, although only one, *Seigneur à qui seul je veux plaire*, can definitely be attributed to him. Other music that the king is said to have written is lost.

MARGARET M. MCGOWAN

Louis XIV, King of France (*b* Saint-Germain-en-Laye, 5 Sept 1638; *d* Versailles, 1 Sept 1715). French ruler and patron of music. He was the elder son of Louis XIII, who died when he was four, and Anne of Austria, who served

Louis XIV, aged 34, surrounded by some of the instruments of his time (two viols, violin, guitar, musette): portrait by Jean Garnier, 1672 (Château de Versailles)

as his regent, aided by her first minister, Mazarin, 1643–61. From an early age, he was encouraged by Mazarin to take an interest in Italian music and French dance, which, with the help of his closest minister, Colbert, he learnt to employ to great effect in the interests of state. He inherited a musical establishment from his father that included the 24 Violons du Roi and, as king, expanded and bureaucratized it to unprecedented levels.

Louis XIV learnt dancing from Prévost, Jean Regnault and Beauchamp, and took principal roles in *ballets de cour*. His association with the image of the Roi Soleil (or 'Sun King') was established by Benserade's 1651 *Ballet du roy des festes de Bacchus*, in which he danced the role of Apollo, god of the sun and of music. Although he could not read music, he had an excellent ear; he learnt to play the lute from Pinel, the guitar from Bernard Jourdan de La Salle and Visée and the keyboard from Etienne Richard. His own children were later taught music by Lalande and François Couperin, establishing a fashion at court that was copied by courtiers and the bourgeoisie (and which in turn stimulated the production of music for amateurs and further employment for professional musicians). His early patronage of the Italian-born dancing-master and composer Lully yielded ever more elaborate *ballets de cour* (they first danced together in the 1653 *Ballet royal de la nuit*), followed by a series of highly successful *comédie-ballets* (devised in collaboration with Molière and performed in Paris throughout the 1660s) and celebrated court spectacles in the grounds of his royal hunting retreat at Versailles (1664, 1668). Louis XIV made his last public appearance as a dancer in *Les amants magnifiques* (1670). Foreign royalty and diplomats who attended these performances took back glowing reports of French culture and the state of the monarchy.

Louis XIV ascended the throne in 1661, having already wed the Spanish infanta, Maria Teresa, in 1660; their marriage was belatedly marked by the performance in 1662 of a specially commissioned opera, *Ercole amante*, by Cavalli, with ballets by Lully. One of his early acts was to make Lully *surintendant de la musique du roi* and *maître de la musique de la famille royale*. In 1669 he created the Académie Royale de Musique and three years later placed it under Lully's independent management; based in Paris, at the theatre of the Palais Royal, between 1673 and 1687, the Académie – a company of singers, dancers, instrumentalists and scenic artisans and technicians – existed exclusively to perform Lully's *tragédies*, on which he successfully collaborated with Quinault, who took every opportunity to associate the official successes of the reign with the plots and the king with the heroes. In the 18th century, the Académie became known as the Opéra.

The court remained in residence at the Louvre in Paris until 1672, when a permanent base was abandoned in favour of travelling between several of the royal châteaux, Fontainebleau, Versailles and Saint-Germain-en-Laye in particular, where music formed an accompaniment to both formal ceremonies and informal occasions: the daily *lever*, Mass (one panegyric *grand motet* and two *petit motets* were performed), meals (the *dîner* and the *souper*) and the *coucher*. Musical theatre pieces (divertissements and *fêtes*) were composed exclusively for the entertainment of the court (Lully's 1674 *Divertissements de Versailles* lasted six days) and most of Lully's *tragédies* were given their first performances before opening in Paris. In addition, music heralded the arrival of distinguished visitors and the return of the army or the hunt and serenaded royal promenades and boating on the canal. Concerts took place as part of the thrice-weekly *jours d'appartement* and, towards the end of his reign, in the private rooms of Mme de Maintenon (Louis XIV's morganatic second wife).

In 1682 the court took up official residence at the greatly enlarged château at Versailles, although the king continued to travel to his other royal residences, which also included Marly and Meudon (the residence of the dauphin). The royal musicians held quarterly appointments as officers and *ordinaires* of the *chapelle*, *chambre* and *écurie;* when on duty they lived in the town of Versailles and travelled with the royal entourage. When off duty the royal musicians returned to Paris, where they held additional posts with churches and private patrons. Only a few women (usually members of the music dynasties in royal service) held appointments as singers in the *chambre*, although not in the *chapelle*; as a young prodigy, Elisabeth Jacquet (later de La Guerre) was taken under the personal protection of the king and his mistress, Mme de Montespan.

At Versailles, music was performed in both public and private rooms, in the gardens and in the nearby pavilions at the Maison des Italiens (the residence of the castratos who sang in the *chapelle*) and the Trianon; the present chapel was not completed until 1710 and the opera house was not built until 1748. From 1704, the king ceased to attend public performances. When he died in 1715, his nephew, the musical and italophile Duke of Orléans (1674–1723), succeeded as regent for the young Louis XV (1710–74) and returned the court to Paris, installing the government at the Palais Royal.

Through Louis XIV's patronage a uniquely French musical style developed during the 17th century, based on dance and the *air de cour*. Lully, Charpentier and Lalande orchestrated them in three and five-part textures, framed them with *ouvertures*, chaconnes and *passacailles*, and combined them into larger forms, both secular (the suite, *divertissement* and *tragédie*) and sacred (the *grand* and *petit motet*). With the interest and support of the king, instrumental virtuosos on the bass viol and the keyboard, typified by Marin Marais and Couperin, emerged and, because of the nature of their court appointments, became equally renowned as teachers. Under the influence of the great dramatists and actors of the era, singers developed a highly rhetorical style of delivery, which they developed a stage further with the application of ornamentation learnt from the great French theorbo and keyboard players of their day. From the late 1680s an unprecedented flowering of treatises and *avertissements* attached to collections, addressing matters of interpretation and performing practice, often in contrast with the prevailing Italian style, resulted in the codification of a French style associated with the court of Louis XIV.

The musical life of Louis XIV's reign is recorded in letters, memoirs and court diaries, published journals and annuals as well as a rich array of iconography. Many composers dedicated works to the king and based works on royal subjects (for which they had to apply for royal privileges to publish); even in instrumental music the titles assigned to movements often made allusion to the monarch. The attempts of Titon du Tillet to commemorate the achievements of musicians and writers of the *louis-quatorzien* era, chronicled in *Le Parnasse françois* (1732) and its supplements, highlight the importance of the patronage of Louis XIV, which inspired other royal patrons of music, notably Charles II, Leopold I and Frederick the Great.

JULIE ANNE SADIE

Louis, Rudolf (*b* Schwetzingen, 30 Jan 1870; *d* Munich, 15 Nov 1914). German writer on music. He studied philosophy in Geneva and Vienna where he received a doctorate in 1893 with a dissertation on conflict in music; he then

studied composition with Klose and conducting with Mottl in Karlsruhe. He was appointed conductor in Lübeck and Landshut and before moving to Munich in 1897. In 1900 he succeeded Porges as chief music critic for the important Bavarian newspaper the *Münchner neuesten Nachrichten*. Louis's reviews for that paper, as well as his writings on individual composers reveal his bias towards the Wagnerian school, and his nationalistic and anti-Semitic book, *Die deutsche Musik der Gegenwart* (1909), inspired the work of both Storck and Moser. His *Harmonielehre*, written in collaboration with Thuille, is a practical textbook of harmonic structure and analyses up to Richard Strauss. His symphonic poem *Proteus*, was performed at the 1903 festival of the Allgemeiner Deutscher Musikverein in Basel.

ALFRED GRANT GOODMAN/K.M. KNITTEL

Louis Ferdinand [Friedrich Christian Ludwig], Prince of Prussia (*b* Friedrichsfelde, nr Berlin, 18 Nov 1772; *d* Saalfeld, 13 Oct 1806). German composer and pianist. He was the son of Prince Ferdinand of Prussia, youngest brother of Frederick the Great. The most musically talented of all the Hohenzollerns, he displayed remarkable keyboard proficiency in his childhood. Frederick the Great, along with his sister and brother, Princess Amalie and Prince Heinrich, encouraged the boy to develop his musical interests. Prince Heinrich's orchestra served as a training ground for his early compositions, and his home, a gathering place for French émigrés, provided a stimulating and cosmopolitan intellectual atmosphere. Louis Ferdinand was educated by tutors with a view to a military career; he joined the army in 1789 and in the Silesian campaign (1790) and the Franco-Prussian War (1792–5) he gained a reputation for heroism which lasted beyond his lifetime. In one incident he risked his life to rescue an Austrian soldier from gunfire, for which he was decorated by the Austrian government; he narrowly escaped death on two other occasions.

Louis Ferdinand's creative life coincided with the development of early German Romanticism. Through his active participation in the salon life of Berlin he came into contact with the Schlegel brothers, Schleiermacher, Wackenroder, Dorothea Veit, Fichte, Tieck and other philosophers and artists who sought to rejuvenate German intellectual life. Louis Ferdinand benefited from, as well as contributed to, their discussions. He often played the piano in the salons, and was particularly noted for his improvisations. The salons also provided an outlet for his advanced political views; he chafed at Prussia's refusal to take Napoleon seriously and predicted that all Germany would fall to Napoleon if Prussia and Austria did not settle their differences.

With his almost extravagant individuality, Louis Ferdinand was a child of the early Romantic era. His surviving letters reveal his frustration at his military inactivity during Prussia's neutrality from 1795 to 1805, and his resentment at the restrictions under which his royal birth placed him. For some time he was unsuccessful in finding a suitable composition teacher; Jan Ladislav Dussek, with whom he had first studied in Hamburg, joined his entourage in 1804 and remained in his patronage until the prince's death. The relationship was fruitful for both composers, but Louis Ferdinand had little time to develop his compositional bent. On the Napoleonic invasion of 1806 the prince commanded the Prussian advance guard, and was fatally wounded at the battle of Saalfeld. His death was seen as an evil omen by the Prussian people, to whom he had become a symbol of German nationalism. A folk lament based on his exploits and heroic sacrifice was sung for several decades after his death. His life was also the basis for a popular historical novel, *Prinz Louis Ferdinand*, written in 1848 by Fanny Lewald, the eminent and prolific German writer often compared to George Eliot and George Sand.

Louis Ferdinand had a reputation as an outstanding pianist long before he became known as a composer; Reichardt ranked him among the first and greatest of virtuosos. Beethoven, visiting Berlin in 1796, remarked that his playing was neither royal nor princely, but that of a true musician, and later demonstrated his regard by dedicating his Third Piano Concerto to him. (Some sources also state that Beethoven's Third Symphony, the 'Eroica' was rededicated to his memory.) Apart from a few songs, Louis Ferdinand's music was written entirely for the piano, most often with various chamber combinations. The early works reflect the waning concept of the accompanied sonata; the later ones make considerable technical demands on the players. Contemporary reviews are uniformly enthusiastic, with theme and variation movements often singled out as being particularly successful. The music was performed from Paris to St Petersburg; its popularity is evident in the frequent new editions as well as duet and two-piano arrangements. In 1825 A.B. Marx listed the composer among 'genuine artists' such as Beethoven, Mozart, Weber, Dussek and Hummel, and public performances of his music occurred as late as the mid-century. His pianistic idiom, along with Dussek's, placed him among the early Romantic colourists whose innovations were to culminate in Chopin's mature style.

BARBARA H. McMURTRY

Louis of Toulouse. *See* LUDOVICUS SANCTUS.

Louisville. City in Kentucky, USA. At the time of its settlement on Corn Island (1778) settlers danced to fiddle tunes played by Cato Watts (a slave on George Rogers Clark's founding expedition). The earliest musical organization was possibly the St Cecilia Society, an orchestra whose repertory, dated 1820, is preserved in the Anderson Music Library of the University of Louisville. Singing societies established by German immigrants in the 1840s, including the Liederkranz society (1848–77) and the Louisville Sozialer Maennerchor (renamed the Social Male Chorus), built such venues as the Weisiger Hall and the Mozart Hall (1851–66), where, among distinguished visiting performers, the Mozart Musical Society's orchestra and chorus performed large choral works. In this hall the Germania Musical Society, an orchestra of 25 members, performed in 1854 just before it disbanded. The Liederkranz gave two seasons of German opera in 1873–4.

The Louisville Philharmonic Society was founded in 1866 by Louis Hast (1823–90); the Louisville Civic SO organized 50 years later by Morris Simon evolved into the Young Men's Hebrew Association orchestra. The Louisville Orchestra (known as the Louisville Philharmonic Society, 1942–77) was founded in 1937 by the Louisville Civic Arts Association. Robert Whitney, its first conductor, encouraged the mayor, Charles P. Farnsley, to initiate the Louisville Orchestra Commissioning project in 1948 to fund new works. Whitney was succeeded by Jorge Mester (1967), Akira Endo (1980), Lawrence Leighton Smith (1983), Max Bragado-Darman (1995) and Uriel Segal as guest conductor in 1995 and conductor in 1999. Together with the University of Louisville School of Music, the orchestra organized Sound Celebration, an international contemporary music festival, in 1987 and 1992. The Greater Louisville Fund for the Arts (established 1949) supports the orchestra and 12 other organizations, including the Louisville Bach Society (founded in 1964).

The Kentucky Opera Association had its origins in an amateur group linked in the 1940s with the University of Louisville School of Music. The company became professional in 1952, with Moritz von Bomhard as artistic director, and commissioned works including Peggy Glanville-Hicks's *The Transposed Heads* (1954), Richard Mohaupt's *Double Trouble* (1954) and Rolf Liebermann's *The School for Wives* (1955). In 1981 Thomas Smillie succeeded Bomhard, and Deborah S. Sandler assumed the position of general director in 1998. Kentucky Opera, like the Louisville Orchestra and the Louisville Ballet, perform in the Kentucky Center for the Arts (opened in 1983), which has two halls, the Robert S. Whitney Hall (cap. 2400) and the Moritz von Bomhard Theater (cap. 620).

Since 1939, after the founding by Dwight Anderson and Gerhard Herz of the Louisville Chamber Music Society, which regularly brought the Budapest and later the Juillard Quartet to the city, chamber music has flourished. Ensembles include the Kentucky Center Chamber Players (founded in 1983), which also has premièred and/or commissioned new works, Ceruti Players (founded in 1986), and Ars Femina (1987), which has uncovered over 1400 works by 300 women composers. The Speed Art Museum, University of Louisville, Indiana University Southeast and Southern Baptist Seminary also maintain chamber series.

Choral music has been prominent in the musical life of the city. In 1939, Father Joseph Emrich founded the Louisville Chorus. The Louisville Bach Society Chorus and Orchestra, founded in 1964 by Melvin and Margaret Dickinson has been responsible for the local premières of many choral masterworks including several by Bach, Beethoven's *Missa solemnis*, and masses by Mozart and Bruckner, as well as national premières of works by lesser known composers; it has also commissioned new works. A third choral organization presenting a regular concert season is the Choral Arts Society, founded in 1987.

Music publishing firms and music stores flourished from the 1840s, among them William C. Peters, Henry J. Peters, David P. Faulds, Tripp & Cragg and G.W. Brainard. Macauley's Theatre, which opened in 1873, was used for performances by visiting opera troupes; it was demolished in 1925. The Speed Music Room served from 1914 to 1952 as a studio and concert hall and a concert series at the J.B. Speed Art Museum continues this tradition.

The University of Louisville School of Music was established in 1932 after the demise of the Louisville Conservatory of Music (founded in 1915). The first dean, Jacques Jolas, was succeeded in 1935 by Dwight Anderson, who helped found the Chamber Music Society (1938) and the Kentucky Opera Association. The school offers the BM and BME degrees, an MA in historical musicology and an MM in history and literature, music education, performance, and theory and composition. The University of Kentucky grants a PhD in musicology with residence at the University of Louisville. In 1977 the Isidore Philipp Archive and Memorial Library was established at the university under the aegis of the American Liszt Society. The Ricasoli Collection comprises 400 manuscripts and editions from the 18th century and the early 19th.

Music degrees are also offered by the School of Church Music at the Southern Baptist Theological Seminary (founded in 1944). The Louisville Academy of Music (1954) is a preparatory music school. Louisville was one of the first cities in the USA to include music as part of its public school curriculum (1853). A Youth Performing Arts School was completed in 1979. Witold Lutosławski was the first winner of the annual University of Louisville

Grawemeyer Award for Music Composition, established in 1984 by the philanthropist H. Charles Grawemeyer.

The Henry Pilcher & Sons organ company was based in Louisville from 1872 until the 1940s. Steiner-Reck, founded in Louisville as the Steiner Organ Company, built the tracker organ in the recital hall at the School of Music, which is among the largest with mechanical action in the USA.

An annual bluegrass music festival initiated by the city in 1977 is the largest event of its kind in the USA.

MARION KORDA

Loulié, Etienne (*b* Paris, 1654; *d* Paris, 1702). French musician and theorist. He was a chorister at the Ste Chapelle, Paris, from about 1663 to 1673. He is known later to have served the house of Mlle de Guise as flautist, viol player and organist, but appears to have held no important position either at court or in the church: instead he earned his living mainly as a *maître de musique* in Paris. He published three theoretical works and also left unpublished studies, which he willed to his close friend Sébastien de Brossard. His writings contain practical, systematic and enlightened contributions to the prevalent musical ideas of the time. His discussions of tempo, metre, transposition, ornamentation, key and temperament are particularly important for the development of French theory. He is also notable for his interest in pedagogy and for his musical inventions, which include the *chronomètre* (a metronomic pendulum device used to fix tempo) and the *sonomètre* (an instrument intended to facilitate the tuning of keyboards). Both instruments were approved by the Académie des Sciences (in 1701 and 1699 respectively).

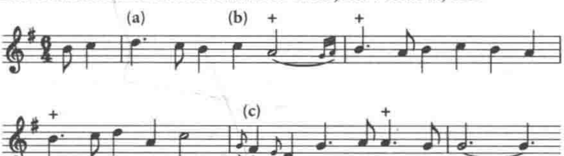
ALBERT COHEN/CATHERINE CESSAC



Lourdault. *See* BRACONNIER, JEAN.

Lourdoys. Ascription in Petrucci's *Canti B* (RISM 1502²) of a piece commonly attributed to JEAN BRACONNIER.

Loure [lur] (Fr.). A French dance and instrumental *air* popular in the late 17th and early 18th centuries.

The origins of the loure are obscure. The term referred to a kind of bagpipe known in Normandy during the 16th and 17th centuries, but it is not known if this use of the word has any bearing on the origin of the dance. The 18th-century loure was a slow, virtuoso French theatre dance of a noble, majestic but languid character, often associated with the pastoral tradition. The ten extant theatrical choreographies are difficult to perform even by modern standards, using complex movements such as the *entrechât*, *battements*, elegant turns of as much as one and a half times, and as many as six steps set to a 6/4 bar of music (see Little and Marsh). The loure was often described as a slow gigue or 'Spanish gigue', but it was also associated with the ENTRÉE in its complex, soloistic choreography and majestic affect. The music is indeed similar to that of a slow gigue (*see* GIGUE (i), §3), set in slow 3/4 or 6/4 time with an upbeat, using phrases of irregular length in a contrapuntal texture, and characteristic rhythmic motifs such as the typical dotted figure of the gigue (ex.1*a*), syncopation (ex.1*b*), hemiola (ex.1*c*)

Ex.1 Destouches: Loure from *Amadis de Grèce*, Act 4 scene iii, 1699

and a crotchet–minim or quaver–crotchet pattern as the upbeat. Examples of the theatrical loure may be found in such works as Lully's *Les fêtes de l'Amour* (1672), *Alceste* (1677) and his ballet *Le temple de la paix* (1685), Charpentier's *Médée* (1693), Campra's *L'Europe galante* (1697), Destouches' *Amadis de Grèce* (1699) and *Sémiramis* (1718), and Rameau's *Les Indes galantes* (1735), *Les fêtes d'Hébé* (1739) and *Platée* (1745).

Stylized loures apparently not intended to accompany dancing were composed frequently in the first half of the 18th century, although the instrumental loure never acquired the popularity of such dances as the bourrée and gavotte. François Couperin included a loure in the eighth *concert* of *Les goûts-réunis* (1724), which bears the heading 'dans le goût théatral' and includes useful performance indications. In addition to ornamentation and phrasing symbols, the word 'pesamment' at the beginning implies that the beats were to be heavily accented.

J.S. Bach is the composer of two of the most famous loures, that in the fifth French suite for keyboard (erroneously entitled 'Bourrée II' in some modern editions) and the second movement of the Partita in E major for solo violin, also arranged for lute an octave higher and

with different ornamentation. These loures are heavily embellished, but succeed well if performed at the slow tempo proper to the dance. In addition, the C♯ minor prelude in the first book of *Das wohltemperirte Clavier* and the C minor fantasy for organ both have loure characteristics, although the dance title is absent. Telemann wrote loures in both 3/4 (in the orchestral *Ouvertures*, see *Musicalische Werke*, x) and 6/4 (*Musique de table*, i, 1733). Other composers of stylized loures include M.-R. de Lalande (*Sinfonies pour les soupers du Roi*, iii), J.-J. Mouret (*Nouveau recueil de chansons choisies*, i, 1723) and Louis de Caix d'Hervelois (*Sixième livre de pièces pour un par-dessus de viole*, 1750).

In fact, the most famous loure of the 18th century was neither a theatrical nor an instrumental dance, but a social dance choreographed by Louis Pécour to the introduction of the air 'Aimable vanqueur' in Campra's opera *Hésione* (1700; Little and Marsh, no.1180). This new dance was first performed at a court ball before Louis XIV during the 1701 carnival season at Marly. The king was extremely pleased, and Pécour's dance soon became a favourite at balls throughout Europe. It was first published in dance notation in Paris in 1701 (*F-Po* Rés.841/3), and was subsequently reprinted widely both in France and elsewhere (as in Pablo Minguet's *Arte de danzar a la francesa*, Madrid, 1758).

MEREDITH ELLIS LITTLE

Louré (Fr.). *See* PORTATO. *See also* BOW, §II, 3(iii).

Lourer (Fr.). A term for a species of NOTES INÉGALES defined by Etienne Loulié in *Eléments ... de musique* (Paris, 1696): 'In any time signature, but especially in triple metre, the quavers are performed in two different ways although they are written the same ... sometimes they are performed equally' – called 'detaching' (*détacher*), for foreign music and music containing leaps – and 'sometimes one makes the first quavers a little longer; this is called "lourer", and is used in melodies of conjunct motion'.

DAVID D. BOYDEN

Lourié, Arthur Vincent [Lur'ye, Artur Sergeyevich] (*b* Propoisk, Mogilev Province [now Slavgorod, Belarus], 2/14 May 1891; *d* Princeton, NJ, 12 Oct 1966). Russian composer. He studied at the St Petersburg Conservatory, but soon abandoned his formal studies to experiment with Impressionist and proto-serialist atonal techniques. Early ventures in these fields produced the five *Préludes fragiles* (1908–10), the two *Poèmes* (1912) and the *Synthèses* (1914). He came under the spell of Debussy and Busoni, and was also influenced by the ideas of St Petersburg futurists, with whom he became closely associated. In 1914 he participated with Benedikt Livshits and Georgy Yakulov in the publication *Mï i zapad* [We and the West], the St Petersburg futurists' 'answer to Marinetti'. His next work – *Formes en l'air* (1915) – is sub-titled 'sound script' and dedicated to Picasso; the score approaches cubism in its design with staves omitted in the place of rests. The *Corona carminorum sacrorum* of the same year comprises settings of the *Ave Maria* and *Salve Regina* and is the first of Lourié's religious works. In 1918 he was appointed, in effect, music commissar as head of the music section of Narkompros, the state cultural and educational department, but resigned his post under mysterious circumstances in 1921 when he moved to Berlin. It was there he met Varèse and also Busoni, whose acquaintance he had made in St Petersburg in 1912; he found himself in sympathy with the Italian's broad cultural interests and philosophical ideas. He finally moved to Paris in 1924 where he encountered Stravinsky, an acquaintance that initially developed into friendship but which later turned into enmity. Lourié left for the USA in 1941 and became a citizen six years later.

Although in some works written between 1917 and 1928 – such as the Toccata of 1924 – Lourié adopted a neo-classical style, he later eschewed this. More innovative are the *Sonata liturgica* (1928) and the *Concerto spirituale* (1930); after his early experiments with atonality and quarter-tones, Lourié had come to prefer modal harmonies. The former, scored for alto voices and chamber orchestra, uses melodic ideas akin to plainsong and has a suite-like form of four chorales; the whole is suggestive of Byzantine chant. Lourié's predilection for low registers (a reflection of his Slavonic origins and his self-admitted roots in the music of Glinka and Musorgsky) is exemplified in the *Concerto spirituale*, for piano solo, voices and an orchestra lacking woodwinds and upper strings. The two symphonies are of greater interest. The first, the *Sinfonia dialectica* (1930), is a one-movement piece of great metric plasticity, closing in an extended diminuendo; the second is in ten closely connected sections forming a set of variations on the intervals of the 2nd, minor 3rd and 4th unified by rhythmic repetition. Pandiatonic harmonies of superimposed 3rds are contrasted with more melodic passages. Subtitled 'Kormtchaia', this second symphony bears the epigraph 'Ricordati che vivi, e cammina!' ('Remember that you live, hence go!'), reputedly written by Michelangelo for his *Moses*; the subtitle derives from Greek and refers to Mary as guiding mother and, figuratively, to Mother Russia. Lourié considered his two stage pieces, *The Feast during the Plague* (1935) and *The Blackamoor of Peter the Great* (1961), his most important works. The action of *The Feast* takes place in England and is founded on John Wilson's dramatic poem *The City of the Plague* (1816). The later opera concerns an episode in the life of Ibrahim Hannibal, an African who was a grandfather of Pushkin.

WORKS
(*selective list*)

GIOVANNI CAMAJANI/DETLEF GOJOWY

Louska [Lousca], František Ignác. *See* LAUSKA, FRANZ.

Louvain (Fr.). *See* LEUVEN.

Louvier, Alain (*b* Paris, 13 Sept 1945). French composer and conductor. Following a baccalauréat in mathematics, he entered the Paris Conservatoire in 1961, where he studied with, among others, Messiaen (analysis), Aubin (composition), Rosenthal (conducting), Veyron-Lacroix (harpsichord) and Dufourcq (history), received nine *premiers prix*, and became the last recipient of the Prix de Rome (1968). He was appointed director of the Ecole Nationale de Musique at Boulogne-Billancourt in 1972, and in 1975 was awarded the Prix Honegger. Since the 1970s he has established his reputation as a conductor of new music, appearing with the Radio France, Concerts Colonne and Lamoureux orchestras, and the ensemble Ars Nova. Appointed director of the Paris Conservatoire in 1986, he held this position until 1991, when he became professor of musical analysis. He received the Paul Gilson Prize in 1981 and the Enesco Prize of the SACEM in 1986.

A leading figure in the French music education reforms of the 1980s and 90s, he has composed and commissioned much pedagogical music. Some of Louvier's early works show the influence of Messiaen, notably *Çandrakâla* which incorporates Hindu rhythms. Much of his music is inspired by mathematical formulae, number sequences, algebraic curves and geometrical shapes, including *Hommage à Gauss*, *Canto di Natale*, *Neuf carrés*, $\Sigma(NP^2\text{-}1)$ and the fourth book of *Etudes pour agresseurs* designed as a meditation upon Pascal's triangle. Composed over a period of nearly 20 years (1964–83), the cycle of six books comprising *Etudes pour agresseurs* explores new timbral effects and keyboard techniques. Often incorporating micro-intervals and unusual scordatura he has also made use of electro-acoustic technology, the Concerto for Orchestra using computer-generated sounds realized at IRCAM.

WORKS
(*selective list*)

Orch: Hommage à Gauss, vn, orch, 1968, arr. solo vn; Trois atmosphères, cl, orch (incl. 2 pf tuned 1/4 tone apart), 5 perc, 1974; Conc. for Orch, 7 perc, pf, cel, 2 hp, elec tape, orch, 1982; Conc., va, orch, 1997; Météores, 2 pf, orch, 1998

CAROLINE RAE

Louys, Jean [Louuys (Louwys), Joannes; Loys, Jan (Jhan de)] (*b c*1530; *d* Vienna, 15 Oct 1563). Flemish composer. The frequent occurrence of this name or its Flemish counterpart, Jan Loys, makes the composer difficult to identify. He cannot be identical with the singer Jan Loys who was active in the chapels of Philip the Fair and Charles V between 1506 and 1517, since in the dedications in his three volumes of *Pseaulmes cinquante de David* (Antwerp, 1555) he called himself a youth. These dedications are all addressed to Antwerp citizens. From 1 Feb 1558 until his death on 15 October 1563 a certain Jhan de Loys was a singer in the chapel of the Emperor Ferdinand I. Although the commonness of the name must again give pause, an indication that Louys may have moved from the Low Countries to the Habsburg court in about 1558 is provided by the anthologies in which his motets and psalms appeared. Between 1552 and 1556 they are found in volumes published at Leuven or Antwerp, but between 1556 and 1564 they appear in volumes published at Nuremberg; in 1568, moreover, four of his motets were included in the series *Novi atque catholici thesauri musici*, which was dedicated to the Emperor Maximilian II and consists of five books of motets by composers active in Habsburg chapels in Germany and Austria. If, then, as is likely, Jean Louys is to be identified with Jhan de Loys, he spent the last few years of his life in Vienna.

Louys' compositions are squarely in the mid-century Dutch tradition of Crecquillon, Clemens non Papa and Gombert. Most of his motets and chansons, like all of the psalm settings, are for five voices. Motifs are often extended to form long, melismatic phrases, rather than being brief and declamatory as in the French style cultivated by Sermisy and Certon. They are overwhelmingly imitative, with thick textures. In his *Pseaulmes cinquante de David* he created successive points of imitation from each phrase of the Genevan melody. The psalms usually begin with longer points, which may use two phrases of the original melody simultaneously; subsequent points are generally shorter but often merge because of the absence of strong cadences between them. Psalm-derived material is all-pervasive. Although some settings open with clearly discernible counter-motifs, these are rare after the first point of imitation. As the psalm progressed, Louys tended to shape all voices after the tune. Some voices state the complete phrase, while others use only a few notes of the given melody before continuing in free counterpoint. Occasionally one voice may present the melody in breves, but this cantus-firmus style never lasts for more than a phrase. There is no pairing of voices and no expressive use of chordal writing, dissonance or chromaticism. This relentless polyphonic style reminiscent of Gombert permeates his motets and affects even his chansons, which were published in anthologies in Leuven and Antwerp.

WORKS

Pseaulmes cinquante de David composeez musicalement ensuyvant le chant vulgaire, 5vv (Antwerp, 1555)

23 motets, mostly 5, 6vv, 1552^{29}, 1553^{12}, 1553^{15}, 1553^{16}, 1554^{9}, 1555^{9}, 1564^{3}, 1564^{4}, 1568^{2}, 1568^{4}; 12 ed. in SCMot, xv–xviii (1995–7)

8 chansons, 3–6vv, 1552^{14}, 1553^{24}, 1553^{25}, 1554^{22}, 1555^{22}; 4 (3vv), ed. in SCC, ii (1992)

HOWARD SLENK

Lovanio (*fl c*1420). Composer. He was presumably from Leuven, although no further identification is possible; Eitner's suggestion that he might be identifiable with Thomas Fabri, who was a cleric and singer at St Donatian, Bruges, in 1412 and a composition pupil of Tapissier, is unfounded. His one ascribed work, a four-voice Credo in the early layer of *I-Bc* Q15 (copied 1420–25) is scribally paired with a three-part Gloria by Loqueville. The alternation of full sections and upper-voice duos, in alternating minor and major prolation (imperfect tempus throughout), are marked ‘chorus’ and ‘unus’, a characteristic of this scribe's work.

MARGARET BENT

Love. American rock group. Formed in Los Angeles in 1965 by Arthur Lee (Arthur Porter Taylor; *b* Memphis, 7 March 1945; vocals and guitar), the group played an important role in the Los Angeles psychedelic scene, though it never achieved the level of US success of others such as the Byrds and the Doors. Their first single, ‘My

Little Red Book' (1966), was a rock cover version of a Bachrach-David song and a moderate hit. Much of their early music evinces strong influences from the Byrds and the Rolling Stones, for example 'Can't Explain' from their first album, *Love* (Elek., 1966). In the wake of the Beatles' *Sgt. Pepper's Lonely Hearts Club Band*, Love released their third and most celebrated album, *Forever Changes* (Elek., 1968), which featured ambitious tracks at times employing orchestral accompaniment and psychedelic recording-studio effects. It was more of a musical and critical success than a financial one, partly due to Lee's reluctance to tour outside southern California. The album earned the respect of many other rock musicians (including Led Zeppelin), and was also a favourite of many mid-1980s British neo-psychedelic bands such as Echo and the Bunnymen, and Siouxsie and the Banshees. In 1969 Lee and a new line-up released *Four Sail* (Elek.), but neither this nor subsequent releases enjoyed the influence or acclaim of *Forever Changes*. In the 1970s Lee released albums as a solo artist, as well as with versions of Love.

JOHN COVACH

Loveday, Alan (Raymond) (*b* Palmerston North, New Zealand, 29 Feb 1928). English violinist. He was taught by his father from the age of two, and first performed in public when he was four. From 1939 he studied with Albert Sammons, at first privately and later at the RCM (1944–8). He made his London début in 1947, and soon established himself as a soloist in the concerto repertory, being particularly successful in the works of Paganini and Tchaikovsky. He spent a year as leader of the RPO, but left in 1968, and from then became leader or co-leader of various chamber orchestras – the Academy of St Martin-in-the-Fields, Steinitz Bach Orchestra, London Bach Orchestra and Philomusica of London. He taught at the RCM from 1955 to 1972. Loveday has not only natural musicianship and an excellent technique but also a well-developed sense of style. He has taken a special interest in performing 18th-century works (particularly unaccompanied Bach) on an instrument without modern adaptations and with a bow in the style of the period. He has made a large number of recordings, many of which are with the Academy of St Martin-in-the-Fields or with the pianist Leonard Cassini. His recordings of Vivaldi's *Four Seasons* and Mozart's G major Concerto have been particularly admired.

WATSON FORBES

Loveless, Wendell Phillips (*b* Wheaton, IL, 2 Feb 1892; *d* Honolulu, 3 Oct 1987). American radio evangelist and composer of gospel choruses. See GOSPEL MUSIC, §I, 1(v).

Lovelock, William (*b* London, 13 March 1899; *d* London, 26 June 1986). English composer and writer on music. After studies with C.W. Pearce and Henry Geehl at Trinity College of Music, London, and service in World War I, he taught at Trinity College from 1919, was private organist to Viscountess Cowdray (1923–6), organist at St Clement, Eastcheap, and took a doctorate in composition at the University of London (1932). He served in India in World War II and was an established teacher, author of music theory textbooks, and music examiner in London when he was appointed Dean of the Faculty of Music at the University of London in 1954. He went to Australia in 1957 as founding director of the Queensland Conservatorium. His traditional approach to the new school brought difficulties, and he resigned in 1959, after which he was for 20 years music critic for the Brisbane *Courier Mail* as well as being a popular adjudicator and examiner for the Australian Music Examinations Board and Trinity College. He returned to London in 1981.

Lovelock's compositions, all peerlessly written in frankly Romantic idioms, range from teaching pieces for children to full-scale orchestral, choral, brass and military band works, including 14 concertos. He produced more than 20 books, including *A Concise History of Music* (London, 1953; London, 2/1966), *Rudiments of Music* (London, 1957) and others, which remain widely used in Australia as well as in many other countries.

WARREN BEBBINGTON

Lover, Samuel (*b* Dublin, 24 Feb 1797; *d* St Helier, Jersey, 6 July 1868). Irish writer, painter and composer. He showed precocious talent from an early age. After unsuccessfully attempting to follow in his father's business as a stockbroker, he devoted himself to painting and was elected a member of the Royal Hibernian Academy in 1828, becoming its secretary two years later. He also achieved success as a writer of prose and verse, and published *Legends and Stories of Ireland* in 1831. On 9 February 1832 an opera to his libretto, *Grana Uile, or The Island Queen*, was performed in Dublin, the music selected from Irish airs and arranged by William Penson. In the same year, Lover gained fame by the exhibition of a miniature he had painted of Paganini.

In 1835 Lover settled in London, where he attained a good deal of social and artistic success as a miniature painter. His first novel, *Rory O'More* (the title taken from his own song arrangement of the same name, dated 1826),

was published in 1837, and in the same year he dramatized it for the Adelphi Theatre, where it ran for more than 100 nights. He continued to produce musical pieces regularly for the next five years, and plays until 1861. His other successful novel, *Handy Andy*, appeared in 1842. He contributed to the *Dublin Literary Gazette*, was a founder of *Dublin University Magazine* and was associated with Dickens in the founding of *Bentley's Miscellany*.

By 1844 Lover could no longer paint because of failing eyesight, and on 13 March 1844 he started a musical entertainment, called *Irish Evenings*, in the Princess Concert Rooms. The experiment was so successful that he toured with it all over England, Scotland and Ireland, going to the USA (followed by Canada) in 1846. In 1848 he returned to London and appeared in a new entertainment called *Paddy's Portfolio*, based on his experiences abroad. Later he wrote two librettos for Balfe, which were never set. Lover's creative output ceased in 1864, and he later retired to Dublin. Among his most popular songs were *Molly Bawn* (from the burlesque opera *Il Paddy Whack in Italia*), *The Low-Backed Car*, *The Angel's Whisper* and *The Girl I Left Behind Me*. Some were adapted to traditional Irish melodies. He published a collection entitled *Songs and Ballads* in 1839.

Lover's songs were enormously popular in their day. Best among them are the Irish comic songs, which possess an engaging knockabout humour, though this cannot disguise the poverty of their harmonic vocabulary. His remaining songs merely explore a shallow vein of outdated, mild sentimentality.

Lovin' Spoonful. American folk-rock group. Formed in New York in 1965, its members were John Sebastian (*b* New York, 17 March 1944; vocals, guitar autoharp and harmonica), Zal Yanovsky (*b* Toronto, 19 Dec 1944; vocals and lead guitar), Steve Boone (*b* Camp Lejeune, nr Jacksonville, NC, 23 Sept 1943; bass guitar) and Joe Butler (*b* New York, 19 Jan 1943; drums. Their first single, *Do you believe in magic?* (Kama Sutra, 1965), reached number 9 in the US pop chart, and their later successes included three top ten hits in 1966 (*Daydream*, *Did you ever have to make up your mind?* and *Summer in the City*) along with the soundtracks to Woody Allen's *What's Up, Tiger Lily?* (Kama Sutra, 1966) and Coppola's *You're a Big Boy Now* (Kama Sutra, 1967). The Lovin' Spoonful's style blended the noisy passion of rock with the affable sincerity of urban folk music, a contrast exemplified by Sebastian's soft voice and the raucous guitar playing of Yanovsky. Most of their work is gentle and good-humoured, at times evoking the sound of a jug band. After the group disbanded in 1968, Sebastian pursued a successful solo career.

KEN TUCKER

Low Countries. An area that includes the present-day Kingdom of the Netherlands (familiarly but imprecisely known as 'Holland'), Belgium and Luxembourg. These countries have a long history of changing boundaries and political organization. The term 'Netherlands' itself has also changed meaning several times. Initially it was a general geographical name covering the Netherlands, Belgium, Luxembourg and some northern parts of France; after about the mid-15th century it became increasingly a politico-dynastic designation which referred to the northern domains of the Duke of Burgundy.

Only after the mid-16th century did the word 'Netherlands' appear in official documents. Stronger links were forged and there was a greater unity between the various provinces under the rule of the dukes of Burgundy. During the reign of Emperor Charles V this tendency towards centralization was continued and, except for the prince-bishopric of Liège, which maintained its independence until 1794, all parts of the present Kingdom of the Netherlands, Belgium, Luxembourg and even areas of northern France (French Flanders with Arras, Hesdin, Douai and Lille and parts of southern Hainaut with the cities of Cambrai and Avesnes), the sizes of which varied according to the prevailing political climate, were united under the jurisdiction of a single prince in 1543. This political unity was disrupted during the religious upheavals and their aftermath towards the end of the 16th century and culminated in the Union of Utrecht (1579); the northern provinces united in 1588 to form the 'Republic of the Seven United Provinces' and for a long time they were governed by a Stadtholder or hereditary Stadtholder from the House of Orange-Nassau. Meanwhile the southern provinces, the so-called 'Spanish' and

from 1714 the 'Austrian' Netherlands remained under Habsburg rule. After the French Revolution and the ensuing occupation of both the Republic of the Seven United Provinces and the Austrian Netherlands (1794–1813), the 'United Kingdom of the Netherlands', was created in 1815: under that arrangement the Netherlands, with the exception of a few parts of northern France, comprised the old politico-geographical unit established

1. Map of the Low Countries, c1648

by Charles V. This political union was also dissolved in 1830 and it was divided into the two present states: the kingdoms of Belgium and the Netherlands.

Because of their cultural and, in part, political unity, it is proper to combine in one article the history of the musical developments until 1600 which occurred in the territories of these two states. During the era of the United Kingdom of the Netherlands (1815–30), which regarded itself in a Romantic nationalist sense as the heir to a general cultural legacy of the late Middle Ages and the Renaissance, the musical golden age of the area from about 1430 to the close of the 16th century was felt to be typically 'Netherlandish'. A scholarly basis for that view was argued in the essays by Kiesewetter and Fétis which were submitted as entries in the open competition of the Koninklijk Nederlandsch Instituut van Wetenschappen, Letterkunde en Schoone Kunsten. Even after the collapse of the United Kingdom of the Netherlands the period continued to be called (by Ambros, among others) the 'Age of the Netherlanders'. Attempts made by modern research to label parts of the period or the period as a whole 'Burgundian', 'Flemish' or 'Franco-Flemish' emphasize too often only a partial aspect or fail to recognize the cultural unity and independence which was centred at that time in the Netherlands as a whole. Moreover, such attempts show the embarrassment of scholarship when faced with the conceptual interpretation of a variable national-geographical name.

It should be added that the name 'Holland' is misleading because it strictly applies to only one province of the Netherlands of that time (still in the Kingdom of the Netherlands). The English word 'Dutch' should be used only with reference to aspects of the present-day Kingdom of the Netherlands. The confusion is increased when it is realized that 15th- and 16th-century documents use 'Fiammingo', 'Belga' or 'Batavus' and similar terms as *pars pro toto* for 'Netherlander'.

I. Art music

1. NETHERLANDS TO 1600. The earliest evidence of the widespread cultivation of music in the Netherlands dates from the end of the Carolingian era. A planctus mourning the death of Charlemagne (*d* 814), supposedly by Colomban, abbot of St Truiden, has been regarded by older schools of research as the earliest evidence. The indigenous tradition of Gregorian chant is more fruitful; as in music theory, musicians from Liège led the way. Important composers of Office melodies include Bishop Stephen of Liège (*c*850–920), educated in the important music centres of Metz and Aachen, who composed three Offices. The antiphon *Magna vox laude sonora* from the Office of St Lambert remained in use as the 'hymn' of the prince-bishopric of Liège until the French Revolution. Office settings by composers at the abbey of St Laurent in Liège and at neighbouring St Truiden are also extant: an Office for St Maria Egyptiaca by Brother Joannes (a composer at St Laurent in Liège) and a night Office by Abbot Rodolfus of St Truiden (*d* 1138) survive. The sequences of the Office for the Festival of the Holy Sacrament (which had been celebrated since 1246 in Liège even before it had been generally recognized by the papacy) composed by Brother Joannes (not the above-mentioned) show a melodic inventiveness indebted to the corpus of sequence melodies currently in vogue.

The Netherlands was extremely important in the early development of liturgical drama. An Easter play originated under north-east French influences in the 12th century or the early 13th in Maastricht: the earliest surviving manuscript (*NL-DHk* 76.F.3) calls it the Dutch Easter Play of Maastricht. A 15th-century manuscript, a hymnary from Egmond (*DHk*), contains the text and music of this same drama originally performed by the monks at Egmond on Easter morning. The play, in seven scenes using 11 soloists, is among the most comprehensive of all Latin Easter plays; in addition it is the only one which incorporates the journey of the apostles to Emmaus (scene vi), which was normally an independent play. In Delft this particular drama, with many ornamentations and some secular additions, outlived the tradition of the Easter play, which died out at the end of the 15th century.

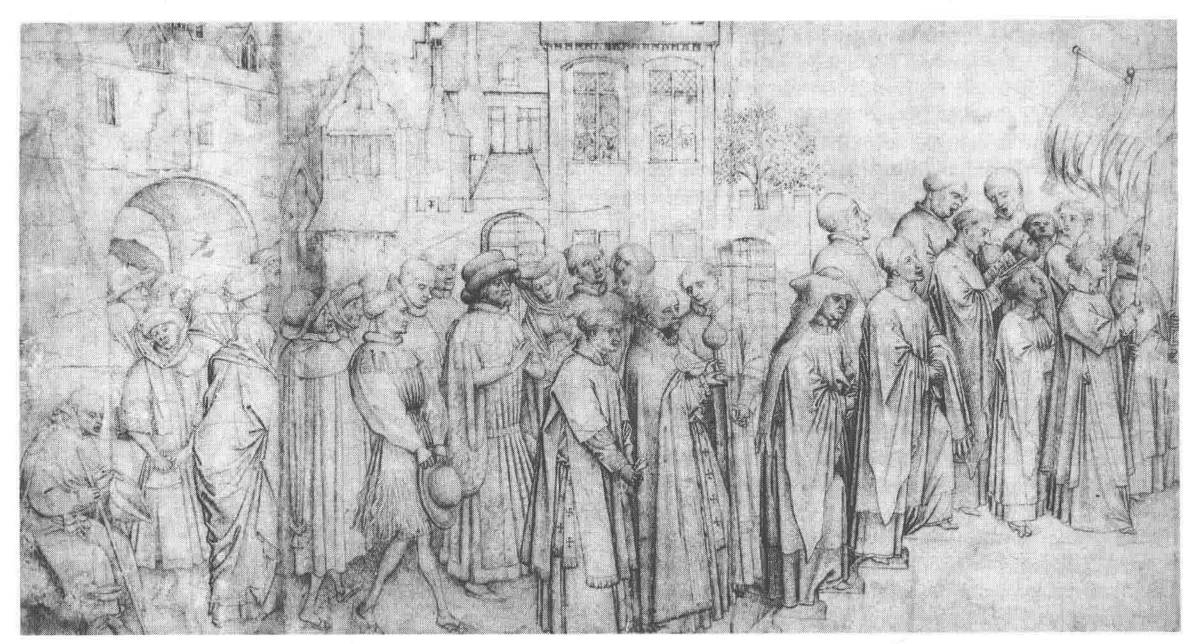
From the 12th century and especially from the 13th, a neumatic notation developed in the area around Maastricht between the Rhine, Maas and Moselle rivers, which was influenced by developments at Aachen, Liège and Cologne. Although it owed much to Germanic and Messine notations, its distinctive character was maintained and through the travels of ecclesiastics it became very widespread and is found even in Finland.

The obvious middle position of the Netherlands between French and Germanic influences can be seen in the secular monophony of the Limburg epic poet Hendrik van Veldeke, who was closely associated with the group of trouvères at the court of Marie, Countess of Champagne. His creative writing comprises the legends of Aeneas and St Servatius and many poems. From a literary point of view he seems to have stood at the beginning of the romance phase of German Minnesang: both the form and melody of his songs show strong French influence. The art of the trouvères in the 13th and 14th centuries spread chiefly through the southern Netherlands, and in this process the neighbouring area of Artois, which was extremely important for the courtly lyric, played a significant role. Jeux-partis, pastourelles and courtly songs, which became popular at the larger and smaller courts in Hainaut, Flanders, Brabant and Cambrésis, reflect this southern influence both in their literary and musical components. The most important representatives of this courtly art-form (though not all of Netherlandish origin) include Conon de Béthune, Gillebert de Berneville, Jacques de Cysoing, Jocelin de Bruges, Mahieu de Gant, Pierre le Borgne, Henri III (Duc de Brabant), Adenez, Erart and Gontier de Soignies.

The Liedgesang, which used Netherlandish texts, is frequently documented both in the northern and southern Netherlands. The corpus of songs surviving from this period can in no way correspond to the original number. The earliest source is the famous and comprehensive Gruuthuse Manuscript from the second half of the 14th century, in which a melody is appended to 147 Middle Netherlandic poems, and eight melodies are given for the allegorical poem at the end of the manuscript; the five-line notation, which is also found in several other contemporary manuscripts, represents an indigenous notation of Flanders.

The leading position of Liège and its surrounding area in music theory is undisputed; the various abbeys of the

bishopric were involved from the 10th century and produced important works from the 11th century until the early 14th (e.g. the progressive treatises of Aribo, of Bavarian extraction, and of Johannes Cotto, Coussemaker's Anonymus 9, Rodolfus of St Truiden, the putative anonymous compiler of the *Quaestiones in musica* and Magister Lambertus). This activity in music theory reached a climax with the writings of Jacobus of Liège (*c*1260–*c*1330), whose massive, encyclopedic *Speculum musice* (which had incorrectly been attributed to Johannes de Muris) summarizes the polarity of speculative and empirical musical thought dominant at that time. Franco de Colonia, an important Netherlandish medieval theorist whose name appears between 1215 and 1224 in the records of St Servatius, Maastricht, is probably the same person as Franco of Cologne, the mensural theorist who taught in Paris.



The small amount of polyphony surviving from the Ars Nova period which can be shown to be of Netherlandish origin does not correspond with the extensive cultivation of sacred and secular polyphony of which there is evidence. The number of works by local composers in a manuscript from the end of the Ars Antiqua (now in *I-Tr* vari 42, but possibly originating in the abbey of St Jacques in Liège) is uncertain. It is more certain, however, that an early 14th-century polyphonic setting of the Ordinary, the so-called TOURNAI MASS, is of Netherlandish origin despite the existence of concordances in Spanish, southern French and Italian sources.

The polyphonic works with Netherlandish texts in several manuscripts of Prague University Library (*CZ-Pu* XI.E.9) and in the Strasbourg manuscript *F-Sm* 222.C.22 (now lost) have been proved to be Netherlandish reshapings of originally French works. A three-part ballade in Netherlandish in the Reina Manuscript (*F-Pn* n.a.fr.6771) is found between Italian and French works: written in motet style, it gives a vivid picture of a Netherlandish fish market. It presumably dates from the 14th century and may have originated on the coast of northern Flanders or Zeeland. Another manuscript, in Leiden (*NL-Lu* BPL 2720), is probably from the first decades of the 15th century but may contain works dating from the end of the 14th century from the area of the province of Zeeland and perhaps even from Dordrecht; two composers, Martinus Fabri and Hugo Boy Monachus, are named. Its small repertory includes Latin, French and Netherlandish songs in ballade, rondeau and motet form. These short works, rooted in popular culture, do not seem to be on a par with those of international stature, yet they provide a more complete picture of the everyday cultivation of music in the Netherlands. Two manuscripts from Leiden (*Lu* BPL 2512, LTK 342A) and one detailed manuscript from Utrecht (*Uu* 6 E 37) have become the objects of scholarly attention; the existence of polyphonic Netherlandish songs alongside similar ones in French and Italian leaves no doubt that the Utrecht manuscript is of Netherlandish origin. The extensive repertory of Netherlandish manuscripts has only been described; the music itself awaits evaluation.

The picture of musical life in the Netherlands during the Middle Ages is extensively described in numerous literary documents which reveal an intense preoccupation with the various forms of music-making. The organization of music chapels in churches, cathedrals, monasteries, abbeys and fraternities (e.g. the Marian Brotherhood at 's-Hertogenbosch, which played a decisive part in the history of Netherlandish music from the early 14th century), the recruitment of choirboys (Maastricht and Liège) at a comparatively early date, information about music instruction, the role of processional music, the employment of town musicians, the purchase of instruments and music books, the appearances of jongleurs and other itinerant musicians, all attest the inherent part which music played in daily court, religious and urban social life.

The dissemination throughout Europe of Netherlandish musicians as early as the 14th century is a remarkable phenomenon awaiting systematic study. The great emigration of Netherlandish musicians in the 15th and 16th centuries seems to have had its origins, or perhaps its counterpart, in the 14th century. Thus during the Ars Nova the court of Aragon had already attracted several singers from the Netherlands, and minstrels were sent from Spain to Flanders for their musical education; even the popes, both during their exile in Avignon and after they had returned to Rome, had Netherlandish musicians in their services, as did the dukes of Burgundy in the 14th century. By the end of the 14th century this propagation had become so advanced (the most remarkable axis was Liège to Italy, especially Rome) that it can be identified as a significant phenomenon of cultural history which later became even more intensive. Even if no satisfactory explanation can be found for the golden age of Netherlandish music (which had begun in the 14th century) its prime cause may certainly have been the emphasis and value placed on instruction in music theory.

Johannes Ciconia is by far the most important representative of Netherlandish composers of polyphonic music in the late 14th and early 15th centuries. He was born in Liège and had moved to Italy by 1393, the date of his lament on the death of Francesco de Carrara. He was employed from 1400 in Padua, and in numerous works for state occasions praised the city and its rulers; he exerted a decisive influence on his musical contemporaries both in the Netherlands and in Italy. His works show elements of the French Ars Nova combined with those of the waning Italian trecento; he revived the fading interest in the madrigal, but above all devoted himself to the popular form of the ballata, in which two upper voices tend towards a concept of harmonic sonority despite the vocal intensity of the other parts. Ciconia wrote almost equally often for three and four voices in his polytextual motets. In some of his motets he imitated the caccia type, but this canonic rigidity soon relaxed into free imitation, which set the pattern for the motet form of the ensuing period. The varied character and polytextuality of the upper voices occasionally make way for the new ideal of assimilation; the tenor, divested of its cantus firmus character and transformed into a free contrapuntally and artistically developed harmony line, became especially prominent in his later motets. He occasionally retained isorhythmic technique as a remnant of the French tradition. His settings of parts of the Ordinary are somewhat less important than his motets and are all settings of the Gloria and the Credo, which sometimes appear to be linked by isorhythmic technique, head-motifs or a common tenor; in some sections the motifs of the three melodically equal voices are linked. Thus Ciconia anticipated to some extent the development of the 15th-century Netherlandish cyclic mass and the momentous

2. Religious procession in Flanders: drawing by a follower of Rogier van der Weyden, c1460 (British Museum, London)

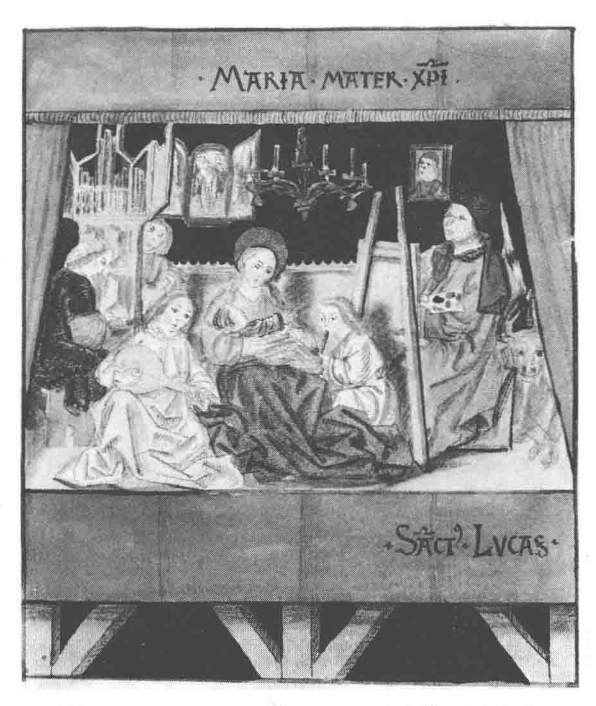
and fundamental change to homogeneous choral polyphony. The tradition of his works, in which the synthesis of French Ars Nova with the trecento is realized, shows him as the central composer of the late 14th and early 15th centuries; the term 'Epoch Ciconia' thus honours him as the chief exponent of this new development.

A new and radical development occurred about 1430; it was recognized as such by contemporaries (e.g. Martin le Franc in his poem *Le champion des dames*) as early as 1440. Tinctoris remarked on this fundamental change in the introduction to his *Ars contrapuncti* (1477), calling it the beginning of an 'Ars Nova'. He wrote that, according to connoisseurs, the only music worth listening to was that of the last 40 years. Du Fay stands at the centre of these musical innovations and at the beginning of the period which has become known as the 'Age of the Netherlanders'. He took as his starting-point the legacy of the 14th-century French Ars Nova, of his teacher Richard Loqueville and of his friend Nicolas Grenon; during his creative period, which spanned almost half a century, he synthesized the achievements of the Ciconian epoch and the English composers active on the Continent (especially Dunstaple), developing them further and interpreting them anew. The musical style developed by Du Fay and continued, transformed and expanded by his compatriots became part of a generally accepted musical language, and the steady emigration of musicians from the north ensured its rapid and broad diffusion throughout Europe. While in the service both of popes and of Italian princes Du Fay had the opportunity to come to terms with the distinctive Italian musical idioms. Throughout the period of migration of Netherlandish musicians up to the time of Lassus and Monte this confrontation with the south continually provided stimulus. The result of his versatility in serving both sacred and secular institutions was a correspondingly varied oeuvre ranging from simple sacred songs to tenor masses on a grand scale, from tasteful courtly chansons to splendid state motets.

Du Fay's most important innovation was the reformulation of the legacy of the isorhythmic motet from the Ciconian epoch. The mathematical rigidity of the tenor line of the isorhythmic motet is gradually relaxed in Du Fay's motets and the contratenor sinks once and for all below the tenor which simultaneously assumes the function of an axis. The new sense of harmony, which had come about as an adaptation of FAUXBOURDON that involved a transformation of an English polyphonic style, now permitted this 'contratenor bassus' to become a harmonic supporting voice. The character of the contratenor thus became more like that of the upper pair of voices, which moved as soprano and alto separated by the interval of a 5th. In Du Fay's later work the vocal nature of the tenor, which was formerly in long note values, became much more like that of the other parts, although polytextuality was retained as a traditional feature.

In liturgical music such as the hymn and *Magnificat* the ornamented cantus firmus is doubled in the discant at the interval of a 4th and a free tenor is added which transforms the parallel 4ths into 6-3 chords. To this new full sound were added the forms and flourishes of the type of melody which was fashioned principally by Du Fay, with the animated 3/4 rhythm that pervades all branches of his work. The genre of the song motet, used in private devotions, belongs in a special tradition which continued long after Du Fay's death.

The characteristic features of Du Fay's tenor motets set the pattern for the 15th-century motet and influenced polyphonic settings of the Ordinary, which can be considered the central form of 15th-century Netherlandish music. The striving towards musical unity in individual Ordinary sections, already noticeable in the Ciconian epoch, was largely realized in Du Fay's contribution to the mass. A borrowed tenor, either sacred or secular, was used as a link between the individual sections; in addition, the same introductory motif could be used as a kind of motto. The relative modernity of the tenor mass can be



seen in the great variety in construction of the tenor: this includes the adoption of melodies from plainchant, folksong or chanson; treatment of the melody as an ostinato in long note values; and the melodic influence of the tenor on the voices that accompany it.

Apart from the innovations made in the motet (and, related to this, in the mass), the chanson as a form retained a certain independence in Du Fay's work. A three-part texture was still the norm, in accordance with the generally more conservative approach to the chanson; the discantus was the most prominent part, and all Du Fay's earliest chansons were written in perfect time (though later examples in imperfect time also appeared). Serving both for special occasions and for more informal music-making, Du Fay's chansons show in their polyphonic organization an increased interest in imitation and a songlike character. The chansons of Binchois, who was mainly active at the Burgundian court and chiefly concerned with this genre, were of decisive importance for the next generation; they are characterized by broadly flowing melodies, clear and energetic rhythms, a cantabile songlike arrangement of the superius with the contratenor functioning as a harmonizing part, and a predominance of imitation with an unmistakable tendency towards blending individual sections: these all became characteristic features of the chanson in the following period.

Although Du Fay and Binchois were the chief exponents of the musical golden age in the Netherlands, lesser masters such as Johannes de Lymburgia, Johannes Brassart and Hugo and Arnold de Lantins added depth to the pattern of stylistic developments in many individual ways. In addition their careers elucidate in detail the international validity of the early Netherlandish style.

The main achievement of the generation of Netherlandish musicians from about 1460 to 1490 did not lie as much in the creation of a fundamentally different style nor in the development of new forms as in the extension and consolidation of the achievements of the Du Fay era in the three main genres, mass, motet and chanson. This is most impressively exemplified in the work of the chief representative of that generation, the Franco-Flemish composer Jean de Ockeghem, who probably came to maturity under the influence of Binchois. Settings of the Ordinary were his main interest; the chanson and especially the motet were subsidiary genres. He was considered unequalled in France during his lifetime, overshadowing his contemporaries, Johannes Regis, Antoine Busnoys, Hayne van Ghizeghem, Robert Morton, Firminus Caron and Jacobus Barbireau. Just as the achievements of Josquin and Willaert were later codified by Glarean and Zarlino respectively as classical, so too were those of Ockeghem in the work of Tinctoris.

Ockeghem stands in a strange half-light in the musical histories of the 19th and early 20th centuries, where his contrapuntal artifices are considered the most characteristic feature of his art. Modern scholarship has concluded that such intentional complications are of only peripheral importance, yet earlier opinions persist even in recent musicological textbooks. This disproportionate emphasis on his contrapuntal skill may be the result of the difficulty in describing the essential characteristics of his style. In any case, the artifices of this epoch (enigmatic notation for all kinds of canonic forms and the refinement of mensural theory) offer impressive proof of the astonishing

3. Tableau vivant representing the Virgin and Child with St Luke, with musicians playing organ, pipe and lute: miniature from a Flemish manuscript describing the wedding ceremonies of Philip the Fair and Junna of Castile, 1496 (D-Bkk 78.D.5, f.59r)

technical skill in counterpoint of which composers were capable.

The tendency already prefigured in the previous generation towards through-vocalization ('Dutch imitation') of the whole texture was developed further: in the four-part compositional structure of one of Ockeghem's masses, for example, each individual part has been conceived with equal contrapuntal attention; the borrowed tenor frequently loses its rhythmic individuality and is assimilated into the vocal texture of the accompanying parts; and the active implementation of refined mensural theory contributes to the highly differentiated rhythm of each individual part. Long melismatic phrases abound, avoiding all metrical breaks or other stopping-points, and, in the words of Tinctoris, the codifier of Ockeghem's art, 'varietas' is of the utmost importance; symmetry in phrase or sub-section seems therefore to have been avoided, and a sense of continuous movement is achieved.

Alongside Ockeghem's ten masses, his surviving motets, at least as far as numbers are concerned, are quite modest, a phenomenon which, moreover, is symptomatic for the period as a whole; the motet was of considerable importance only in the work of Regis. As a rule the tenor motet was in five parts, and because it belonged within the tradition of the early isorhythmic motet, it became the festival music *par excellence* for high church and state occasions.

In the period from about 1480 to 1520, the musical influence of the Netherlands spread throughout Europe in a most impressive way; the highly talented groups of musicians in churches, at courts and above all in cathedrals caused the reputation of the Netherlands as the 'Conservatory of Europe' to spread to even the most distant courts and cathedrals of the Continent. The recruitment

instructions contained in court and church documents in Spain, England, France, the whole Empire and above all in Italy confirm that the authorities wanted Netherlandish singers, composers and musical directors. Josquin, Obrecht, Isaac, Pierre de La Rue, Alexander Agricola, Weerbeke, Brumel, Compère and Antoine de Févin represent a body of musicians almost unparalleled in the history of music when one considers the greatness of their legacy together with the uniformity of their background.

The migration of Netherlandish musicians to Italy seems to have reached a climax during this period; the greatness of Netherlandish music would have been inconceivable without the stimulus of the southern European music and intellect. This is demonstrated most effectively in the work of Josquin, the leading composer of this generation. Probably brought up on the waning contrapuntal technique of Ockeghem, he was associated with the Milanese court from the early 1480s. It was there that his meteoric career in the service of the Sforza family, the popes and the Este family brought him into contact with the ideals of the Italian high Renaissance and with the indigenous musical forms of that country. His reputation for both wit and moodiness allowed him to take great liberties with his employers, and in his later years, when richly endowed with benefices, he could be certain of the princes' solicitous concern for his welfare. No other Renaissance composer made such a deep impression on the theoretical writings and music of the ensuing period. Modern scholarship, fully aware of his importance, has not only named the period after him, but sometimes even refers to the following years as the 'post-Josquin' period. His reputation, which had already attained legendary proportions before his death, must have brought him a vast number of pupils, but this remains an unsubstantiated theory.

In the same way that Josquin's career and reputation were international, his work, too, may be divided into distinct styles and genres of composition. Alongside the traditional species of Netherlandish music, such as the mass, motet and chanson, he also used indigenous Italian forms such as the frottola. It was probably his masses (about 20) that established his reputation with his contemporaries and with posterity; they demonstrate the whole stylistic diversity of this genre. Besides a fairly large number of cantus firmus masses, whose basic melody is taken from plainchant, folksong, chanson or solmization themes and whose melodic material sometimes permeates the texture of the accompanying parts, he wrote masses in which canonic or proportional part-writing is prescribed for parts or for the whole. The systematic imitation of the parts seems to reach its climax in his late works (e.g. the tenor *Missa 'Pange lingua'*); this was an important development, for pervading imitation became the characteristic formal element in the compositions of the following generation.

The motet returned impressively to the fore in Josquin's work. The motets (about 120, some 30 of which are of doubtful authenticity) exhibit a versatility of technique similar to that of the masses: alongside purely chordal motets, which may have been influenced by Italian musical ideals, there are tenor motets with pervading imitation in the accompanying parts and psalm settings not based on a cantus firmus. Perhaps the most important characteristic feature of Josquin's motet style, however, is that the cantus firmus is no longer a *fundamentum relationis*; instead the text and its syntactic coherence became fundamental. He attempted to elucidate the meaning of the text by varying the style of the setting, using homophonic-declamatory blocks or longer sections interwoven with imitative or canonic techniques, contrasting voice pairs, and varying the number of voices. The ideals of Italian humanism undoubtedly influenced the new relationship between the composer and the text, which in turn led to the application of new stylistic methods to reflect both the content and emotion of the text (e.g. word-painting and chromaticism). From a historical point of view this new concern with the text may have been the most important innovation in the Netherlandish music of the 15th and 16th centuries, for its most extreme result was the Baroque recitative, and thus the development of opera. In Josquin's secular works there is a similar gradual loosening of traditional forms and constructivism in favour of a musical style centring on the text and the emotions it conveys.

Josquin's contemporaries, Pierre de La Rue and Jacob Obrecht, clearly directed their main creative efforts to settings of the Ordinary. In some 30 masses, which became quite widely known, La Rue developed an impressive technique in varying individual motifs strongly reminiscent of Ockeghem's rhythmically varied repetition technique. On the whole the spirit of the Ockeghem era with its contrapuntal virtuosity seems to reappear in La Rue's works, which abound in canons and other devices. Even if the existence of humanistic tendencies, as emphasized above in Josquin's work, cannot be completely denied in that of La Rue, it must nevertheless be said that La Rue did not achieve the same results in adopting this approach.

If considered from the point of view of progress, Obrecht's works would seem to be less fruitful. His work is best regarded as the climax and, simultaneously, as the end of a line of development, where earlier trends are finally exhausted. Like Ockeghem's, Obrecht's masses are the most impressive part of his output; the grand scale of his tenor masses is evidence of his superior ability. But it is significant that with Obrecht the polyphonic song in Netherlandish reappears; that genre became much more popular in the next generation.

The international career of the Flemish composer Isaac is reflected in his extensive corpus of compositions. Emphasis is always justifiably placed on his ability to familiarize himself with the indigenous musical forms of the places in which he lived (e.g. the frottolas he may have composed during his long sojourn at the Florentine court of Lorenzo il Magnifico). Isaac, with his tenor songs on German texts, was the first great Netherlandish composer of the group who made the German polyphonic song almost level with other types of vernacular composition like the chanson, the madrigal and their predecessors. His universally familiar tenor song *Innsbruck, ich muss dich lassen* contributed vastly to his posthumous fame (not least because of the popularity of its Protestant contrafactum); and yet, there is no thorough and comprehensive evaluation of his work. The so-called *Choralis constantinus*, Isaac's work of massive proportions setting the most important melodies of the Mass Proper and completed by his pupil Senfl, is a work of uniform cyclic design and of comparable size to the *Magnus liber* of Leoninus and Perotinus.

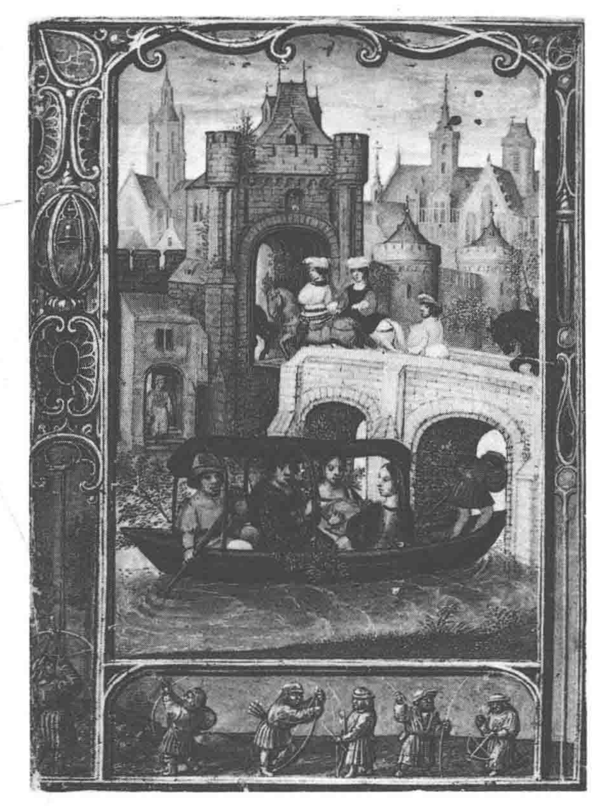
The next generation of musicians, among whom the leading figures were Gombert, Clemens non Papa and Thomas Crecquillon, were primarily active in the Netherlands either at the Habsburg courts or in cathedrals and churches. A second group, distinctive in their musical style, were the travellers to Italy headed by Willaert and somewhat later by Cipriano de Rore. The large number of greater and lesser masters belonging to the first 'northern' group include Pierre de Manchicourt, Nicolas Payen, Cornelius Canis, Benedictus Appenzeller, Josquin Baston, Eustachius Barbion, Jean Courtois, Johannes Lupi, Lupus Hellinck and the somewhat older Jean Richafort.

This 'northern' group seems to have adopted one aspect in particular of Josquin's work – imitation. This can be seen most clearly in the work of Gombert, music director at the court of Charles V and possibly a pupil of Josquin. The characteristic features of Josquin's style were abandoned, and pervading imitation, formerly only one of many stylistic features and a development which Riemann attributed to Ockeghem, became the chief principle of construction instead; the melodic lines suggest a purely linear conception. This style permeates to almost the same extent all the main genres of this generation's vocal music (the mass, motet, chanson and polyphonic song in the vernacular), if incidental connections with such styles as the Parisian chanson are not sought. Gombert's output, with approximately 160 motets, testifies to the increased interest after Josquin's generation in the motet, which is certainly the highpoint of Gombert's work and of that of his contemporaries. Polyphonic settings of the Ordinary were almost all composed using the parody technique, which later extended to other forms such as the *Magnificat*. In spite of many individual features there is a fundamental style common to the work of the other members of the northern group. The strict adherence to the principle of pervading imitation in all forms did much to bring about their stylistic uniformity, which makes it difficult to identify confidently the form of a given work.

More than anyone else at that time, Clemens non Papa was able to retain a certain degree of independence in his highly striking and personal style. When compared with the broadly flowing melodic technique of his motets with a slightly emphasized superius, the often witty, folksong-like and even cunning melodies of his chansons and polyphonic Netherlandish songs present a richly shaded picture of domestic and religious musical life. His polyphonic settings of the SOUTERLIEDEKENS which are rhymed psalms with associated melodies, are particularly important.

In the 1540s new patterns appeared in these composers' later works; broad phrases rich in melismas formerly in vogue gradually disappeared and compositions began to be dominated by a type of motif characterized by the

4. Margaret of Austria (Regent of the Netherlands 1507–15 and 1518–30) with Emperor Maximilian I (centre), her nephew Archduke Charles (later Charles V) and his sisters, members of the clergy and nobility and commoners: miniature from the 'Manuscripts of Margaret of Austria', before 1519 (B-MEa HH Mélanges 1, f.1v)



repetition of notes and by a declamation style reflecting the accent of the words. The formerly linear bass became a harmonic foundation to the five-voice texture, whose sound was characterized by a warmth absent in the works composed at the peak of Gombert's classical pervasive imitative style. This re-orientation may be traced back largely to Italian influences, particularly those which were furthered by a lively cultural exchange and the prolific activity of music printers in Italy and the Netherlands.

Willaert and many other Netherlanders had settled in Italy by the 1520s; in 1527, after serving the Este court, he was appointed *maestro di cappella* at S Marco, Venice. Through his works and personality, which attracted a great number of influential pupils, primarily Italians, he exerted a decisive influence on the cross-fertilization of Netherlandish and Italian music unlike almost any other composer before him. With other Netherlanders he contributed to the birth of the madrigal, which was rooted in typically Italian social culture. In place of the indigenous frottola, the Netherlandish contrapuntal style of composition probably set the pattern for the early phase of the madrigal, which was used as a collective heading for the sonnet, canzona and *strambotto*. Enriched by such Netherlandish composers as Arcadelt, Berchem, Jan Nasco and Jhan Gero as well as by Willaert and Rore, the madrigal attained greater importance because it served as an experimental genre for chromatic style and textual interpretation, whose results in turn extended to other genres.

In addition Willaert merits special attention because of his contribution to the development of the polychoral style. Probably based on the tendency towards the richness of sound rooted in Italian music, Willaert's *salmi spezzati* appeared in 1550; instead of the eight-part composition being divided into upper and lower chorus, as was sometimes the case in Josquin's era, the two four-part choruses are contrasted with each other in dialogue. The architectonic conditions in S Marco made this division practical. The principle progressed from bi-choral to polychoral compositions with the addition of instrumental choruses and foreshadowed the typical Baroque concerto form in the compositions of Willaert's Italian pupils and successors, including Andrea Gabrieli. Even if Willaert may not be regarded as the inventor of *cori spezzati*, his contribution to its development and revival was decisive.

The high quality of music and language permeating Willaert's compositions is also evident in those of his pupil Cipriano de Rore, who expressed his aesthetic convictions in a most remarkable way in the emotional musical idiom of his madrigals. Interpretation of text and expression of emotion are here essential characteristics, and were adopted by the next and last great generation of Netherlandish composers.

The hegemony of the Netherlands was shaken soon after the mid-16th century. A steady stream of Netherlanders was still pouring abroad; the chapels of the Austrian and Spanish Habsburgs were led by Netherlanders well into the 17th century, and in the more remote parts of the German Empire court institutions still showed a preference for these well-trained men. Netherlandish music became internationally known through the Netherlandish printing houses of Susato, Waelrant and Phalèse; similarly Italian, French and especially German publishers contributed to the general dissemination of works by Netherlandish composers by publishing those that had been written abroad. The efforts of the Netherlandish composers began to be rivalled by Italian, Spanish, French, English and German composers. Various reasons have been given for the gradual waning of the golden age of Netherlandish music: the religious wars with their political consequences which increasingly affected the Netherlands after the mid-16th century; the resulting decline of economic affluence; and the lowering of standards in musical training in the home country. These may all contribute to an understanding of the phenomenon, but do not provide a conclusive explanation.

5. Singer with musicians playing the lute and recorder, possibly performing a chanson: miniature attributed to Simon Bening from a Flemish Book of Hours (the Golf Book), c1540 (GB-Lbl Add. 24098, f.22v)

The last Netherlandish composers historically recognized as being of truly European stature are Lassus and Monte. Along with Isaac, Lassus was probably the most versatile Netherlandish composer of the 16th century. He composed in virtually every form of every country and in every musical dialect, whether *villanesche*, chromatic madrigals, French chansons, state motets, parody masses or German polyphonic songs. After a period of travel in Italy he returned to the Netherlands in the mid-1550s. His first collection of motets (1556) comprehensively reveals the impression that Italian idioms made on him. The tendencies initiated in the later works of the northern composers of the previous generation are simultaneously crowned and surpassed. During Lassus's time in the Netherlands the term 'musica reservata' was in use (*see* MUSICA RESERVATA (i)). This term has been linked with various aspects of music of the period on the basis of different, partly contradictory, contemporary definitions. Through one such definition *musica reservata* was long

6. Wedding feast of the painter Joris Hoefnagel: painting by Frans Pourbus (i), 1571 (Musées Royaux des Beaux-Arts, Brussels); the wedding couple are shown dancing to the accompaniment of two lutes (one played by the artist) and a spinet

associated with the frequent musical interpretation of individual words and of the text as a whole which occurs in Lassus's works. In fact, this is a chief stylistic feature of the works of the late Netherlanders, particularly Giaches de Wert. In the works of Lassus and of the prolific madrigal composer Monte, the emotional content of the text becomes the *primum mobile* and the emotionalism or symbolism of individual words is frequently interpreted in the music. Lassus's style seems to create a new psychological relationship between the composer and the listener, which is quite new and independent in comparison with Gombert's esoteric principle of pervading imitation. While a standard, uniform sacred style was being codified among Palestrina's circle in Rome under the influence of the Council of Trent, there is in Lassus's work a blending of motet-like contrapuntal elements with the pictorialism and emotionalism of the madrigal. Admittedly this does not exclude the occasional implementation of traditional techniques, such as the use of cantus firmus, ostinato and similar devices; rather, these are united with polychoral and chromatic techniques and with a chordal foundation which became an impressive synthesis of all available stylistic means.

The Netherlandish style of the mid-16th century was long retained at the Catholic Habsburg courts in Austria, and until Monte appeared there along with such composers as Jean Guyot, Christian Hollander, Jacobus Vaet, Johannes de Cleve, Jacob Regnart and Alexander Utendal, the 'northern' tradition had continued to develop with relative independence. Carl Luython and Lambert de Sayve were the last representatives of this late stage of Netherlandish polyphony. The court chapel of Charles V was dissolved on his abdication in 1556–7 and his successor Philip II resided in Spain; thus the most important concentration of musicians up to that time left the Netherlands. The cultivation of music at the courts of the Habsburg Stadtholders in the Netherlands was no longer as important as it had been before 1550. Composers active in the Netherlands, all of minor importance, included Geert van Turnhout, Andreas Pevernage, Séverin Cornet and Cornelis Verdonck. After a short period of activity in the Netherlands, Joannes Tollius emigrated to Italy, where he distinguished himself as a progressive and individualistic although minor composer of madrigals which had some influence on Monteverdi.

After 1550 the Netherlanders were not the only creators of an internationally valid musical style as they had been in the eras of Ockeghem and Josquin. Only one more Netherlandish musician made a significant contribution to the history of music.

2. NORTHERN NETHERLANDS, 1600–1830. The beginning of this period is dominated by Sweelinck. Even his contemporaries knew of his superior ability as a composer and a teacher. He was born into a family of musicians and by the time he was 12 he was appointed organist in the Oude Kerk in Amsterdam; he remained there until his death in 1621. His output is largely the result of his obligations to the church and the city, as well as to the bourgeois collegium musicum. At the centre of his vocal works is the polyphonic setting of the Genevan Psalter, which is strongly orientated towards the achievements of the late Netherlandish contrapuntal style. The *Cantiones sacrae* of 1619 are stylistically more advanced, using extensive chromaticism and keyboard accompaniment. Above all Sweelinck gained an international reputation with his keyboard compositions which had considerable influence outside the northern Netherlands, particularly among north German organists. The fantasias and toccatas, which were connected with developments

abroad (Venice, Spain and England), are particularly important. His skill in variation and improvisation was attested by contemporary audiences and recorded by his pupils, including the Netherlanders Anthoni and Sybrandus van Noordt, Henderick Speuy and Dirck Scholl.

Sweelinck's career demonstrates the basic elements of musical life in the Netherlands from the 17th century until the rise of public concerts in the late 18th century; music was cultivated chiefly under the auspices of the Calvinist church, the city authorities or in the numerous collegia musica. These existed in Amsterdam, Arnhem (1591), Deventer (1623), Utrecht (1631), Nijmegen (1632), Leiden, Leeuwarden, Groningen (1638), Rotterdam, The Hague, Middelburg, Zierikzee and Alkmaar; surviving documents provide insights into both social and specifically musical attitudes. Their importance extends far beyond the dilettantism usually associated with such groups, and they included musicians from the town churches who had been placed at their disposal by the city authorities. As early as the 17th century and increasingly in the 18th, these music institutions, supported by a wealthy bourgeoisie, enabled travelling foreign musicians to make public appearances, thus anticipating organized public concerts, which developed in the late 18th and early 19th centuries. As there was no productive cultivation of church music (for a while even the playing of the organ during divine services was forbidden) and no strong interest in music emanating from the courts, the work of the collegia musica was of great significance. In the 17th century their repertory consisted largely of polyphonic songs and madrigals and simple instrumental music, some of which was of local origin. The lutebook of the Leiden nobleman Thysius (*NL-Lu*) shows the high esteem for lute playing in bourgeois circles. Composers of the 17th century and early 18th, both native and foreign, included Matthias Mercker, Nicolas Vallet, Lotharius Zumbach von Koesveld, Hendrik Anders, Cornelis Padbrué, Marcus Teller, Benedictus a Sancto Josepho, Quirinus van Blankenburg, Servaas de Konink, Dirck Scholl, Carolus Hacquart, Elias Bronnemüller and Joan Albert Ban (this last particularly known for his capricious doctrine of composition). The *Pathodia sacra* of the statesman, author and musician Constantijn Huygens is an important example of Netherlandish monody. An official document provides special insight into the musical views held by the Leiden authorities: it states that organ recitals should be given before and after Sunday services and on weekdays to keep the people away from inns and taverns. The value that the authorities placed on public organ recitals in their town churches resulted in the construction of an almost incalculable number of organs, both in the Netherlands and abroad; these are among the finest of their time.

A form of musical culture peculiar to the Netherlands was the CARILLON, which still attracts the attention of foreign visitors. The immigrant brothers François and Pieter Hemony, by their accurate tuning of bells, brought the indigenous art of bellfounding to an unsurpassed peak. When the ill-humoured Charles Burney visited the country in 1772 outside the concert season, he stated that the only music to be heard was 'the jingling of bells and ducats'.

The musical theatre came into being relatively late, when the first opera house was founded in Amsterdam in 1680. Along with works from the international operatic repertory, local works in the vernacular by Hacquart, Schenk, Konink and Anders were performed during the last decades of the 17th century.

During the 18th century, even more than in the 17th, there was extensive immigration to the Netherlands of foreign musicians. Attracted by the unparalleled wealth which made the republic one of the leading European

nations in the 17th century and to a certain extent in the 18th, they either settled there or included it on their concert tours. From then on, in accordance with the Netherlandish taste of 'bourgeois satisfait', foreign musical productions in the French or Italian vein became standard occurrences. Indigenous music, which had until then been widely cultivated, and the further development of the Netherlandish opera were abandoned. French, Italian and German opera troupes with an international repertory appeared with varying degrees of success in the large towns. Indigenous music yielded to a taste for virtuosity which was catered for in great abundance by the numerous travelling musicians. The collegia musica gradually became chiefly concert organizers.

A special branch of musical life, music publishing, developed with unprecedented vigour in the large western towns. Profiting from the commercial and technical experience of printing in general in the 17th century, music printing and publishing houses came to the fore, particularly during the last decade of the century. The list of Amsterdam music publishers who made the city a principal centre of music publishing up to the second half of the 18th century begins with the immigrant Huguenots Pierre Mortier and Estienne Roger. Any musician with a European or especially an Italian reputation had his compositions published in Amsterdam; if the composers themselves did not send their works to the press, in some very extreme cases the publishers went so far as to commission sailors to appropriate newly composed works in Italy (if necessary, illegally) and these then appeared in print as 'pirated' editions without the composers' permission. Foreigners especially seem to have found favourable conditions here for their business interests. In addition to Roger's successors, Le Cène, La Coste and Chareau, important publishers included G.F. Witvogel, the Hummel family, Joseph Schmitt, Arnoldus Olofsen, Covens and Markordt.

The organ yielded its important position in instrumental music. The country still had accomplished organists such as the Havinghas and Radekers, and J.W. Lustig and Jacob Potholt, yet during the first half of the 18th century the public had a taste for concertos and sonatas, especially of Italian origin. Of the Netherlandish composers of violin sonatas the most important are Albertus and J.F. Groneman, J. Nozeman and J.H. Klein. Moreover, Willem de Fesch achieved fame during his lifetime beyond the boundaries of his country and especially in England, his second homeland, as an excellent composer of both violin and flute sonatas, trios, a number of concerti grossi and ambitious violin concertos. The famous *Concerti armonici*, long misattributed to Pergolesi, were composed by the Dutch nobleman and diplomat Count Unico Wilhelm van Wassenaer. Most of his other works are lost, although three sonatas for treble recorder and thorough bass have come to light. The work of Pieter Hellendaal was more conservative and his concerti grossi still occupy a modest place in concert programmes. In the first half of the century the Netherlands produced many talented musicians such as Ernest Heinsius, the municipal organist of Arnhem, who also worked in the collegium musicum

there and composed several violin concertos. All these musicians are overshadowed as international figures by Pietro Locatelli. In his 24 caprices and 12 violin concertos op.3, which appeared in Amsterdam in 1733 under the title *L'arte del violino*, he revealed the latest method of violin playing, as he also probably did through his personal activity. The works of Locatelli, who remained in Amsterdam from 1729 until his death, set the pattern for the development of violin technique. His contemporary Conrad Hurlebusch, from Brunswick, also spent a large part of his life in Amsterdam, where he was most active as an organist and composer. Foreign musicians who lived for a time in the Netherlands until about the mid-18th century include Carlo Tessarini and Egidio Duni. A corollary to the predilection for violin virtuosity was the rising interest in the construction of string instruments, which had its origins in the 17th century.

The second half of the 18th century and the first decades of the 19th were characterized above all by the further development of public concerts. After various early attempts to expand Amsterdam musical life, a climax was reached with the opening by the Felix Meritis Society of a small concert hall (capacity 600) in their new building in Amsterdam in 1788. Because of its excellent acoustics this concert hall remained one of the finest in Europe for many decades. The music director was Joseph Schmitt (1734–91), formerly a German Cistercian monk, who brought great fame to the Felix Meritis concerts during the three years before his death. These concerts were the most important aspect of musical life in the Netherlands until they were replaced a century later by the Concertgebouw. Schmitt, known as the composer of a number of symphonies and chamber works (some of which were also attributed to Haydn), was the first of a line of conductors that included Ruloffs, Fodor, Bree, Verhulst and Kes and culminated in the golden age of music-making in Amsterdam with Willem Mengelberg.

A basic orchestra of 30 professional musicians was at Schmitt's disposal, occasionally supplemented by other musicians, even amateurs. Apart from the Felix Meritis Society, other concert organizations appeared such as the Eruditio Musica in 1796 under Karl Joseph Schmidt; its chief merit lay in the swift dissemination of Viennese Classical works, particularly those of Haydn and Mozart. Schmitt's successor in the Felix Meritis concerts was Bartholomeus Ruloffs, who, apart from composing a large number of instrumental works, attained fame through his operas in the vernacular. After his death in

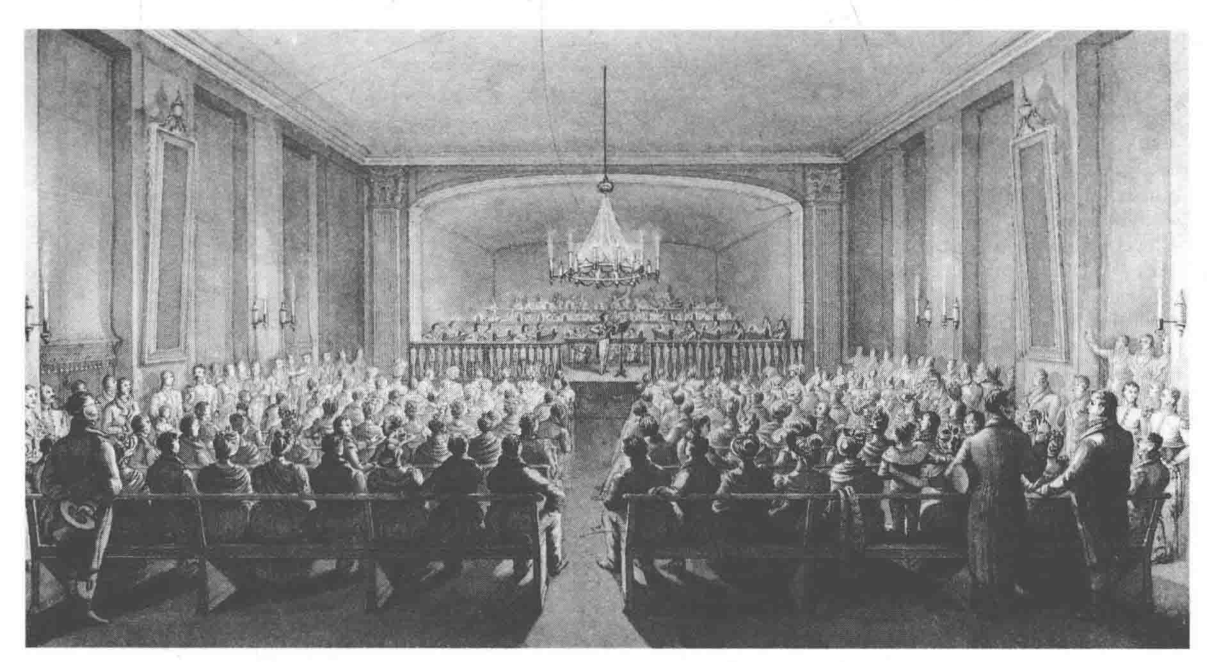
1801 the directorship was taken over by Carolus Antonius Fodor until 1830.



The reputation of the music at the Stadtholder's court was somewhat restored after the marriage of the Stadtholder Willem IV of Orange-Nassau to the English Princess Anne, a pupil of Handel. The German musician Christian Graf had been in the service of the court as early as the 1750s and was specially noted as a composer of symphonic and chamber music and as a music theorist. In 1765–6 Mozart and his sister performed at the Stadtholder's court in The Hague and, after a stay prolonged by illness, they continued their concert tour via Haarlem, Amsterdam and Utrecht. The court orchestra varied in size but never exceeded ten professional musicians. The most important among them were the composer Colizzi and the violinist Malherbe. As was the case with the orchestra of the Felix Meritis Society, the proportion of foreign musicians in the Stadtholder's court orchestra was initially very large. Musicians who travelled extensively also appeared at the court (e.g. Carl Stamitz and the young Beethoven). After 1820 under King Willem I the court orchestra became an official court institution and did much to promote musical life in the Netherlands during the 20 years of its existence. In 1829 under the leadership of J.H. Lübeck the orchestra numbered 45 professional musicians.

3. SOUTHERN NETHERLANDS, 1600–1830. The 17th century, when the southern Netherlands were under Spanish rule, was an epoch disrupted by continuous threat of war, with economic stagnation (the river Scheldt was closed to trade), and the cultural dominance of nobility and clergy. Musical life was centred on the court and the church, although civic musical societies came into being at this time. The earliest collegium musicum was established in 1585 in Hasselt; and later collegia were established at Ghent (1649), Tournai (1652) and Leuven (1670). Their members, singers and instrumentalists, were dilettantes and included members of the aristocracy and the bourgeoisie as well as magistrates and church dignitaries.

The greatest period of Netherlandish music had passed and composers were curbed by both traditionalism and foreign influence, especially from Italy and France. Nevertheless there were certain compensations; for example the exceptional prosperity of the instrument building trade, especially harpsichord manufacturing.

The Brussels court chapel was reorganized in 1647 during the reign of Lodewijk-Willem. Until 1695 it was divided into 'musique de la chapelle' and 'musique de la chambre', each with its own *maître*, singers and instrumentalists. Up to 1660 foreign musicians, especially Spaniards and Italians, were predominant in the latter, but later there was a growing number of Netherlandish musicians. Composition was still based on the Netherlandish polyphonic tradition, but slowly it came under foreign (especially Italian) influence with the introduction of the basso continuo, concertato techniques and the *sonata da chiesa*. Only a small number of sources of sacred music have survived, as in the 18th century the church repertory was comprehensively revised. The choirbook of the Terry Collection (*B-Lc* no.1325) reflects the repertory used in the Liège diocese, with traditional compositions in *a cappella* style by Remouchamps, Hodemont, Hayne and others. In the second half of the century the work of Henry Du Mont, born in Looz but working mostly in Paris, shows a notable change: he mixed polyphonic techniques with basso continuo (*Cantica sacra*, 1652), narrative motets with dialogues in recitative style after the model of Carissimi, and double-choir motets in concertato style. Collections of sacred songs were published in different areas of the southern Netherlands (e.g. *La Philomèle séraphique*, Tournai, 1640, and *Libellus cantionum catholicarum*, Leuven, *c*1690).

As both the nobility and middle classes cultivated music for recreation, there is a great deal of instrumental but little secular vocal music. An evolution from traditional

10. Orchestral concert, perhaps at a Sunday concert series: wash drawing by an unknown artist, 1820 (Gemeentemuseum, The Hague)

polythematic ricercares to motivic concentration in monothematic fugues is particularly evident in the organ works of Abraham van den Kerckhoven, a member of the royal chapel and later at the church of Ste Catherine in Brussels. Towards the end of the century a lighter, more graceful style appeared, with dance movements like allemandes or gigues, as for instance in the *Livre d'orgue* (1695) by Lambert Chaumont, who worked in Liège. Lute music shows obvious French influence, with dances and genre pieces after the style of the Gaultiers, for instance in the work of Jacques de Saint-Luc, born in Hainaut and active at the Brussels court. Chamber music consists mainly of *sonate da chiesa* for strings and continuo, for example the four sets of *Symphoniae unius, duorum et trium violinorum* by Nicolaes a Kempis, published by Phalèse in Antwerp (1644, 1647 and 1649). Even the melodic structure is sometimes conceived in a typically Italian way, for instance in the *Fasciculus dulcedinis* by Philippe van Wichel (Antwerp, 1678). In the *Harmonia parnassia* of Carolus Hacquart there is great variety of sequence of movements, and of melody and rhythm.

Theatre music was not extensively cultivated in the early 17th century; a notable occasion, however, was the wedding of Philip IV in Brussels in 1650, for which Giuseppe Zamponi composed *Ulisse all'isola di Circe*, an allegory on royal power, with ornate vocal writing and elaborate orchestration. In 1694 the Opéra du Quai du Foin was opened in Brussels under the management of P.A. Fiocco; it survived for four years, with Lully's operas as the mainstay of the repertory. Fiocco himself wrote a pastoral *Le retour du printemps* in the French style.

Instrument building in the southern Netherlands took a leading position in the 17th century. Three families of violin makers, the Borbons, Snoecks and Rottenburghs, were active in Brussels, and Tilman and Hofmans, both of Antwerp, were famous for their fine Cremona imitations. Moreover, Antwerp was known for the bell-foundry of Melchur De Haze (1632–97), who supplied a carillon of 31 bells for the Escorial and another of 38 bells for The Hague. The organ builder Hans Goltfuss, whose organ for Rotterdam had three manuals and 44 stops, also worked in Antwerp. That city was, above all, a centre of harpsichord building, where the Ruckers family were established from 1575 to about 1679 (their instruments were sold all over Europe), and where the Couchet family were active from about 1642 to 1681.

The region was under Austrian domination from 1713 to 1794, a comparatively tranquil period (at least until 1789), characterized by material progress and greater middle-class participation in cultural life. Thus an intensive musical life arose outside the court and the church which stimulated the work of Netherlandish composers as did the still strong foreign influence.

Sacred music, especially in the early part of the 18th century, was dominated by the French style; later, Italian influence became more apparent and the dominant style changed from the monumental Baroque to a lighter, more florid style. The archives of Ste Gudule in Brussels contain some important examples of 18th-century sacred music. At the beginning of the century, as in the masses and motets of P.H. Brehy (1673–1737), sacred music is characterized by a powerful Baroque style using concertato technique with fanciful melodies and solid harmonization. A more expressive style characterizes the church music of the second quarter of the century, as seen in the work of J.H. Fiocco. After 1750 Rococo and pre-Classical styles predominate, especially in the works of C.J. van Helmont and in the motets and arias of H.-J. de Croes. J.-N. Hamal adopted a style near to that of Pergolesi. Gossec's Requiem of 1760, with its vivid polyphony and colourful orchestration suitable for the concert hall, marks a culminating point in the secularization of church music, which was accelerated by a resolution made by Joseph II in 1787; this stated that hymns were to be replaced by recitation. In 1797 it was decreed that the *maîtrises* be closed and church organs be sold.

Secular music flourished at many social levels. Under Charles of Lorraine, the court musicians followed their sovereign to his hunting-lodges at Tervuren and Mariemont, where open-air music was often performed. In Brussels official festivities included performances of comedies and *opéras comiques*. In Liège opera was usually given by visiting French and Italian companies. Walloon composers copied French *opéra-ballet* (e.g. *Les plaisirs de la paix*, 1715, by T.-L. Bourgeois, in the style of Campra) and French *opéra comique*. J.-N. Hamal wrote in the Liège dialect, and the genre was most splendidly represented by Grétry. The more serious kind of opera eventually responded to the influence of Gluck's reform, evident in Gossec's *Nitocris* (1782). Opera was primarily a business enterprise, however, run by and for the bourgeoisie. In 1700 Maximilian-Emmanuel of Bavaria founded La Monnaie in Brussels, an institution based on the patent system. During the revolution it was abolished, and later the theatre became a centre of patriotic and republican ferment.

Among the musical academies active in the 18th century, the most prominent was the Académie Ste Cécile at Mechelen. It existed from 1704 to 1773, and counted noblemen, magistrates, lawyers and clergymen among its members; sonatas and symphonies were the principal fare. Chamber music was still based on the Baroque sonata, in a transitional style from Corelli to Vivaldi and Handel. Willem de Fesch, a native of the northern Netherlands, was *kapelmeester* of Antwerp Cathedral from 1725 to 1731. Sonatas are found for various combinations; for example, sonatas for flute and continuo by J.B. Loeillet, trio sonatas by Delange and de Croes, and sonatas for four or five players by Brehy.

In orchestral music there is a clear evolution from Baroque to Classical style, from concerto to symphony, and from the Italian to the German style. To the Italian type belong divertimentos, concertos and a symphony by de Croes, the *overture a due cori* in concertato style by Van Helmont and the six overtures by Hamal. The symphonies of Pierre van Maldere (1729–68), who was employed at the court of Charles of Lorraine and travelled to Dublin, Paris and Vienna, are in the German Classical style. As well as displaying elements of the Mannheim style, these symphonies are in Classical ternary form with thematic contrast, modulating development, binary liedform in the second movement and sometimes a rondo finale. A similar development from *symphonies concertantes* to the Classical symphony can be observed in the works of Gossec, who was in Paris after 1751.

Associated with the flowering of harpsichord building, there was in the first half of the 18th century a golden age of harpsichord music in the southern Netherlands. This kind of music was generally cultivated in families and

dynasties of composers, like the Loeillets, the Fioccos and the Boutmys. J.H. Fiocco's suites contain both French multipartite and Italian quadripartite compositions side by side. Ornamentation and orchestration show the influence of Rameau, especially in the music of Josse Boutmy. Nevertheless, the end of the century saw a turn to the fanciful *empfindsamer Stil* of C.P.E. Bach, as in the divertimentos of François Krafft.

A special curiosity of the southern Netherlands is carillon music, best represented by the remarkable preludes and fugues of Matthias Vanden Gheyn. The turn of the century was a period of transition and revolution, social disorder and political instability. Musical life was even more influenced by the French, and although during the period 1815 to 1830, when north and south were united, there was the beginning of an economic and cultural revival, it was too short to have any lasting musical effect.

Secularization continued; the churches gave up their educational role, which was taken over by the official schools of music in Brussels and Liège. Civil concert-promoting bodies flourished especially in Brussels (the Société des Grands Concerts, 1799–1829; the Société des Amateurs de Musique, 1793–1830; the Société Philharmonique, 1794–1833). Opera was a focus of civic musical life, not only in Brussels at La Monnaie, but also in Liège and in Antwerp, whose Théâtre Royal dates from 1802.

Composition was orientated towards the theatre and was strongly influenced by early Romantic French opera, especially in the works of M.-J. Mengal and the Antwerp-born Albert Grisar. Both sacred and orchestral music developed in the Romantic style (e.g. in the works of C.-L.-J. Hanssens and his son, Charles-Louis). The musicologist, teacher and composer F.-J. Fétis was one of the most influential musical figures of the 19th century.

In the southern Netherlands it was only after 1830 that a new musical prosperity grew up, as a Flemish and Walloon Romantic style took shape.

4. Kingdom of the Netherlands. During most of the 19th century Dutch music came strongly under German influence; certainly the Dutch music composed during the first half of the century, as in the 18th century, owed much to music brought in from the outside. In spite of this, there were isolated attempts at developing a more independent character in Dutch music, although composers of great original ability to some extent comparable with the most important contemporary composers in countries such as Germany and France are rare. During the first half of the 19th century Johannes van Bree occupied an important place in the musical life of the country both as a composer and a conductor; his output comprises numerous works which show originality (for example the Allegro for four string quartets). After van Bree's death, Johannes Verhulst occupied a dominant position in Dutch musical life for over three decades. He was a pupil of Mendelssohn and a friend of Schumann, who in his *Neue Zeitschrift für Musik* often wrote favourably about his compositions. As a conductor in the most influential posts in the Netherlands, Verhulst promoted his German contemporaries and almost as fervently opposed the new German style of Wagner and Liszt. Many of his compositions (mainly those of his younger years) are not only among the best Dutch works of the mid-19th century but are also important by international standards (e.g. the Symphony in E minor op.46, Mass op.20, String Quartet op.21 and many beautiful songs). Other important composers from this period include Richard Hol, Willem Nicolai, L.F. Brandts Buys, Daniël de Lange and J.C. Coenen.

Radical changes in musical life are apparent around 1880 when, as elsewhere in Europe, a general cultural revival began to exert its influence. A national movement arose, stimulating the cultivation of a specifically Dutch art and wider public interest. This movement began in literature, and was soon followed by the visual arts and finally by music. The Amsterdam Concertgebouw, a large concert hall fulfilling all the requirements of the time, was built between 1886 and 1888, and the Concertgebouw Orchestra founded in 1888. It is principally through this orchestra that the Netherlands began to develop a particularly fruitful orchestral tradition. When Willem Mengelberg, then aged 23, succeeded Willem Kes as conductor in 1895, the orchestra soon acquired international fame, and Amsterdam became in turn an important European musical centre. Not only did many important conductors, soloists and composers go to the Netherlands to appear with the Concertgebouw Orchestra or to hear it perform their works, but the orchestra's great success and fame also gave Dutch musicians a certain self-confidence, and thereby stimulated native composers. The first composer to react with enthusiasm and success to that stimulus was Bernard Zweers. He was a pupil of Jadassohn in Leipzig, and his Third Symphony (1890) placed him in the forefront of Dutch composers of his time. It is significant that he gave this work, which differed both through its thematic character and structure and its instrumentation from any symphony previously written in the Netherlands, the title 'Aan mijn Vaderland'. Like Verhulst, Zweers primarily used Dutch texts for his vocal works. As a teacher at the Amsterdam Conservatory (founded in 1884) he trained a large number of outstanding musicians and imbued them with his ideals.

Around the turn of the century Alphons Diepenbrock pointed the way to a new musical development in the Netherlands through his strong personality and great gifts as a composer. As a Roman Catholic he was much influenced by the newly rediscovered Renaissance polyphony and by Gregorian chant; he also had a weak spot for Wagner's sensual chromaticism. Diepenbrock's musical works were essentially based on literary sources (including Sophocles, Aristophanes, Vondel, Goethe, Novalis and Nietzsche) and consist, with a single exception, of vocal works and incidental music; the vocal works are characterized by a freely flowing rhythm which, combined with undulating melodic lines, gives an individual expression to the words, while a rich orchestral sound predominates in his instrumental incidental music and, in particular, in his symphonic songs, contemporary with those of his friend Mahler.

The music of Johan Wagenaar is completely different in character; his most important works are orchestral, especially the symphonic poems and concert overtures, in which a certain relationship with the aims of Berlioz and Richard Strauss is evident. Musical humour and a subtle love of mockery characterize many of his works, in which a very personal fantasy is coupled with a sound compositional technique. His most significant contemporaries include Julius Röntgen (i), Emile and Gerard von Brucken Fock, Carl Smulders and Leander Schlegel. After Wagenaar's generation there is a clearly perceptible duality of

Germanic and French influence, a factor that has in many cases continued to characterize Dutch music, partly because of the strong cosmopolitan state of Dutch cultural life, which is much affected by the country's geographical position.

Typically German late Romantic influences are evident in the work of such composers as Jan van Gilse, Cornelis Dopper, Jan Brandts Buys and Jan Ingenhoven, while French influences are evident in the work of Willem Landré, Bernard van den Sigtenhorst Meyer and Alexander Voormolen. A strong personal stamp characterizes the work of Matthijs Vermeulen, one of the most original Dutch composers of the 20th century. The experiments with new possibilities in sound and structural organization that started about 1920 found representatives in the Netherlands in Daniel Ruyneman, Sem Dresden, Willem Pijper, Jacob van Domselaer and Bernard van Dieren. Technically the most advanced of the group were van Dieren (whose *Zes Schetsen* for piano have affinities with Schoenberg's Three Piano Pieces op.11), Voormolen (mainly influenced by Ravel), Ruyneman and Vermeulen, whose Second Symphony can be compared with Ives in its bold polyphonic textures. Each of these composers sought a renewal of compositional structure and instrumental possibilities. Willem Pijper, who made a strong impression on Dutch music as a composer, teacher and essayist, was exceptionally important in the years 1920 to 1940, and was one of the first 20th-century Dutch composers to become internationally known. Henrik Andriessen also contributed to the reputation of Dutch music through his vocal music, largely associated with the Catholic liturgy, and through his symphonic works.

During World War II, when the Germans occupied the Netherlands, funding for the orchestras and for commissions was restructured, the results of which lasted for several decades after the war. During the war most orchestral musicians remained at their posts, as did celebrated public figures such as Willem Mengelberg at the Concertgebouw Orchestra. The composer Henk Badings even took over the direction of the conservatory in The Hague during the German occupation. The creation of Dutch music was even increased with the help of the occupying government. Still, many musicians tried to survive without any official ties by giving concerts in private homes.

After 1945 it was mainly the pupils of Willem Pijper who came to the fore; many of the composers born in the first decades of the 20th century were taught by him, including Guillaume Landré, Badings (briefly), Kees van Baaren, Rudolf Escher, Bertus van Lier and Hans Henkemans. Their very different methods of writing point to an increasing diversity in Dutch music in the mid-20th century. Besides Badings, who was internationally perhaps the best-known composer of his generation, van Baaren was of major importance, both as a composer and as a teacher. Under his guidance Schoenberg's and Webern's 12-note technique and the new serialism inspired a generation of young composers, for example Peter Schat, Jan van Vlijmen, Misha Mengelberg, Otto Ketting, Reinbert de Leeuw and Louis Andriessen. At the same time Ton de Leeuw, a pupil of Badings, Messiaen and the ethnomusicologist Jaap Kunst, developed new techniques based on serialism, but soon experimented with aleatory techniques before evolving an idiom based on modalism. Among his pupils were Jan Vriend, Jos Kunst, Joep Svaesser, Daniël Manneke, Tristan Keuris, Alex Manassen, Guus Janssen, Paul Termos and Chiel Meyering.

The most important feature of the generation of van Baaren's pupils has been the search for a politically and socially engaged music, as exemplified by the opera *Reconstructie* (1969) described as a 'morality' and written collectively by Schat, Andriessen, de Leeuw, Mengelberg and van Vlijmen. The opera concerns the destructive powers of American imperialism in Latin America as personified by Don Giovanni, and uses a mixture of serial and post-serial styles, pop songs, Mozartian pastiche, electronic music and improvisation. Its success resulted in the foundation of several specialist ensembles for avant-garde music. Many of them still play an important role in Dutch musical life, notably De Volharding, the ASKO Ensemble and the Schönberg Ensemble.

In the 1960s and 70s Dutch musical life became more international and more self-confident. With some 17 symphony orchestras, many specialist ensembles for both contemporary and early music (directed by audiences with such internationally renowned artists as Gustav Leonhardt, Frans Brüggen and Ton Koopman), and a keen taste for adventurous programmes, the Netherlands was in many respects a model of state-funded liberal culture. The versatility of Dutch musical life also resulted in the need to diversify official funding which was now given not only to established symphony orchestras, opera companies and composers but also to specialist ensembles, jazz and other forms of improvised music, experimental music and music theatre. The number of permanent symphony orchestras was correspondingly reduced in the 1980s to 14, including three radio orchestras.

Improvised music and jazz have become important features of Dutch musical life, with musicians such as Theo Loevendie, Misha Mengelberg, Han Bennink, Willem Breuker, Guus Janssen, Ernst Reijseger and Paul Termos. In the field of electronic music de Leeuw, Jan Boerman, Dick Raaymakers and Ton Bruynèl have been important pioneers.

As in other European countries and in the USA, the 1970s and 80s saw a further diversification in the language and techniques of Dutch composers. The post-serial musical climate embraced collage (Louis Andriessen), minimalism (Simeon ten Holt, Andriessen, Diderik Wagenaar, Joep Franssens), neo-romanticism and neo-tonality (Schat, van Vlijmen, Ketting, Keuris, Peter-Jan Wagemans), neo-modality (Ton de Leeuw), and finally an eclectic array of styles and genres. Among the most imporant composers of the youngest generation are Cornelius de Bondt, Theo Verbey, Willem Jeths, Rob Zuidam, Martijn Padding, Robin de Raaff and Peter van Onna.

5. Belgium. Belgium became independent in 1830 and immediately set about establishing its own national musical institutions with the conservatories of Liège and Brussels. Before that year musical instruction in Belgium came principally from the French and the Austrians, but following the French Revolution, the Napoleonic wars and years of political instability before independence, Belgium was left with broken traditions and none of the foreign teachers on whom it had depended. In 1831 the former Ecole Royale de Musique in Liège became the Conservatoire Royal; it was first directed by Daussoigne-Méhul and became famous for its violin instruction. An

école de chant founded in 1813 in Brussels by Jean-Baptiste Roucourt (1780–1849) became the Conservatoire Royal de Musique in 1832 and was directed by François-Joseph Fétis (1833–71) and F. Gevaert (1871–1908). Both these men made pioneering contributions to musicology and music teaching, and they established the Brussels Conservatory as one of the leading institutions of its day, training composers, performers, teachers and scholars to carry on the distinct national traditions they had begun. The Koninklijk Conservatorium Gent (founded 1812) was first directed by Joseph Mengal (1784–1851).

During the 19th century a number of additional music conservatories were founded, the most important of which was a small one founded in 1842 in Antwerp, which became the Flemish Music School in 1867 under the direction of Peter Benoit (1834–1901) and the Royal Flemish Conservatory in 1898. Also as part of the mid-19th-century nationalistic fervour, many small music schools were founded to train choirboys, to rebuild cathedral choral traditions and to channel the more gifted students into the state conservatories. Benoit was an important figure in the development of a Flemish culture and, in addition to his efforts in music education, he was responsible for the founding of the Vlaamsche Opera (1893, founded as Nederlandscg Lyrisch Tooneel in 1890) and encouraging a Flemish style of composition exhibited in his own works.

The first national school of composition developed in the genres of opera and choral music and, like all Belgian music of the early 19th century, it was predominantly influenced by the French. As early as 1820 Fétis had produced *opéras comiques* in the style of Boieldieu and Hérold; these were frequently staged in Paris. Albert Grisar (1808–69) was one of the first important Belgian composers known for *opéras comiques* influenced by Italian *opera buffa* and the French *opéra comique*. Auber, Adam and Meyerbeer overshadowed most opera composition in Belgium during the middle of the century.

About 1870 Belgian opera began to grow away from French models and came under the influence of Wagner (*Lohengrin* was performed in Brussels in 1870). Many composers chose to write their own librettos after Wagner's example, which largely proved detrimental. By World War I Belgian composers had achieved a style of their own by assimilating aspects of French, Italian and German music into their operas.

Belgian composers have been particularly successful in choral music. Fétis was one of the earliest proponents of choral music; his important works include the Requiem (1850), composed for the funeral of Queen Louise-Marie, and *Domine salvum fac regem nostrum* (1865) for four-voice choir, organ and orchestra. César Franck, Peter Benoit, Edgar Tinel and Joseph Ryelandt were among the most important composers of oratorios, cantatas and larger choral works.

The Lemmens Institute opened at Mechelen on 2 January 1879 and played an important role in the revival and dissemination of the refined liturgical church music and the training of future clergy, organists and choirmasters in Belgium. In 1968 the institute was moved to Leuven. The founder was the organist J.-N. Lemmens who directed it until his death in 1881; he was succeeded by Edgar Tinel, a prominent composer of religious music and religious oratorios. The Benedictine monks of the Abbey of Maredsous did much to promote the singing of Gregorian chant.

A notable lieder school developed in Belgium in the late 19th century, drawing on both the French and the German traditions of songwriting. Franck, Huberti and Waelput were among the most important in this idiom.

Symphonic music developed more slowly than had opera and vocal genres. Before the 1860s very little notable orchestral music was composed in Belgium. Fétis, Hanssens and Vieuxtemps had all dabbled in orchestral writing, but without success. Peter Benoit's symphonic poems for piano and orchestra and flute and orchestra, Adolphe Samuel's Sixth Symphony, Theodore Radoux's *Godefroid de Bouillon* and Louis Kéfer's D major Symphony (1889) are some of the earliest significant orchestral works, largely in a style drawing heavily on contemporary French and German models.

During the late 19th and early 20th centuries an important school of violinists was based in Liège. It was founded on the virtuoso repertory of the 19th century and reached its peak with César Thomson (1857–1931), Ovide Musin (1854–1929) and Eugène Ysaÿe. By and large, Belgian music in the early years of the 20th century was dominated by Wagnerism, though Désiré Pâque (1867–1939) has claims as an early exponent of atonality. The principal composers of the time included Paul Gilson (1865–1942), Joseph Jongen (1873–1953) and Flor Alpaerts (1876–1954), all of whom were influenced by Wagner and Strauss, though Jongen inclined more towards Franck. Gilson composed little of importance after 1905, giving his attention instead to teaching and writing on music; he was almost untouched by the influence of Debussy. Jongen and Alpaerts, however, did compose impressionist scores (although not until the early 1920s) and each took something from later developments in an individual manner.

The considerable delay before pre-World War I innovations made their mark in Belgium may be attributed to the lack of performances of contemporary music. Flor Alpaerts included contemporary works of both Belgian and non-Belgian composers in the Antwerpse Dierentuinconcerten (1894) and Lodewijk de Vocht gave primarily contemporary choral programmes with the Chorale Caecilia at the Nieuwe Concerten (1903–34) in Antwerp. Paul Collaer (1891–1989) gave his first concert, with works by Bartók, Satie, Stravinsky, Roussel, Ravel and Skryabin, in Brussels in 1911, but it was not until after the war that he was able to establish a regular concert series; his Pro Arte concerts, lasting from 1921 to 1934, introduced music by Schoenberg, Berg, Webern, Stravinsky, Milhaud and others. One of the first to be influenced by the Pro Arte concerts was André Souris (1899–1970), a pupil of Gilson. He had begun as a composer of Debussian songs but in the early 1920s, following some traits in Satie and Stravinsky, he engaged in a dadaist cultivation of parody and banality. His example was taken up briefly by Willem Pelemans (1901–91), though for the most part Souris was an independent; later he created works based on earlier music and folksong, adopted 12-note serialism for a short while and then, from the late 1940s, devoted himself to film music.

Other pupils of Gilson took a more moderate attitude to modern techniques. In 1925, the same year that saw Gilson's foundation of the *Revue musicale belge*, seven of his students grouped themselves together under the name

of the 'Synthétistes'. Their aim was a synthesis of the achievements of contemporary music, and they drew principally on Ravel, Stravinsky, Hindemith and Honegger in their broadly neo-classical art. The group, which included Marcel Poot (1901–88) and Gaston Brenta (1902–69), dispersed after only a few years, but a tradition of midstream, neo-romantic modernism had been established. Yet another Gilson pupil, Jean Absil (1893–1974), learnt from the music heard at the Pro Arte concerts in developing his polytonal style. In 1934 he founded the review *Syrinx* and the concert series La Sirène, in which Souris and Poot were also active; both ventures were short-lived, but they did help to promote knowledge of contemporary music in Belgium.

Three of Absil's pupils, Pierre Froidebise (1914–62), Marcel Quinet (1915–86) and Vic Legley (1915–94), came to the fore in the 1940s. Quinet's style developed directly from Absil's, as did that of Legley, who, like Poot, Raymond Chevreuille (1901–76) and other Belgian composers, did important work for radio in the years after World War II. Froidebise was a more independent musician: as an organist he was concerned in the revival of early music, and as a composer and teacher he took a lively interest in new trends, including Webernian serialism (from the late 1940s) and aleatory writing. One of his pupils was Henri Pousseur (*b* 1929), who quickly established himself as an international figure in the company of Stockhausen, Boulez and Nono. Karel Goeyvaerts (1923–93) was also an early pioneer of 'total serialism' and synthesized electronic music, but he soon abandoned his avant-garde position.

It was Pousseur who founded the first Belgian electronic music studio, APELAC, in Brussels in 1958. The studio was absorbed into the Centre de Recherches Musicales de Wallonie, established in Liège under Pousseur's direction in 1970. A parallel institution in the Flemish region is the Instituut voor Psychoacoustica en Electronische Muziek in Ghent, which was founded by Louis de Meester (1904–87) in 1962 with the cooperation of Belgian radio and television and Ghent University; others who have worked there include Goeyvaerts and Lucien Goethals (*b* 1931). All three of these Ghent composers are leading members of the 'Spectra' group. Among composers closely associated with Pousseur are Philippe Boesmans (*b* 1936) and Pierre Bartholomée (*b* 1937), a founder member of the Brussels ensemble Musique Nouvelle. Other composers, such as André Laporte (*b* 1931) and Frederik van Rossum (*b* 1939) cultivate a style that synthesizes traditional and avant-garde techniques.

The Théâtre Royal de la Monnaie (Koninklijke Muntschouwburg) is the centre of opera in Brussels, as is the Vlaamse Operastichting (formerly Opera voor Vlaanderen) in Antwerp and Ghent and the Opéra Royal de Wallonie in Liège. The Société Philharmonique (Filharmonische Verening), based in Brussels, is the most important concert society in the country. In Liège the Orchestre Royal de Liège et de la Communauté Française de Belgique (Liège PO) gives frequent concerts, as does the Koninklijk Filharmonisch Orkest van Vlaanderen (Royal Flanders PO) in Antwerp, where the De Singel concert society also makes a significant contribution to musical life. The Festival van Vlaanderen and the Festival de Wallonie organize concerts in provincial towns as well as the large centres, while the Ars Musica festival has promoted contemporary music since 1988.

In Belgium, as elsewhere, radio has played an important part in musical life. However, its role has been reduced by the separation of Belgian radio into two entities (Vlaamse Radio en Televisie and Radio-Télévision Belge de la Communauté Française de Vlaamse), by the priority given to television transmissions and by financial problems. Of all the ensembles that were available to the two companies during the 1960s, only the symphony orchestra of Belgische Radio en Televisie is still in existence. Nevertheless, both broadcasting companies still have programmes exclusively devoted to music.

A protective rights society, the SABAM (Société des Auteurs Belges, or Belgische Auteurs Maatschappij), was founded in 1945. Since the reform of the Belgian state in 1970 the two linguistic communities, French-speaking and Flemish-speaking, have been separately responsible for their cultural and educational institutions. The federal government takes responsibility only for the activities of national organizations such as the Orchestre National de Belgique (Nationaal Orkest van België), founded in 1936 as successor to the Brussels SO of 1931, and since 1963 the Monnaie. The CeBeDeM (Centre Belge de Documentation Musicale) was set up in 1951 to encourage contemporary composers by publishing their music, paying recording costs and subsidizing concerts.

In 1960 the leading Belgian composers formed the Union des Compositeurs Belges to 'promote and defend Belgian music in both national and international cultural life'; from 1968 it awarded the 'Fuga' medal to outstanding performers.

6. LUXEMBOURG. The earliest references to musical life in the area which is now Luxembourg are Ausonius's poem *Mosella* (*c*371 CE) and, two centuries later, Venantius Fortunatus's *De navigio suo*, both describing popular singing and folklore. The foundation of the abbey of Echternach by St Willibrord in 698 marked the beginning of sacred music in the region. The area became a duchy in 1354 and was under Burgundian, Spanish, French and Habsburg rule at various times from 1443 until 1815, when it became a grand duchy under Willem I of the Netherlands; until 1839 it included the Luxembourg province of Belgium. It became an independent state in 1839 by the Treaty of London. On the death of Willem III in 1890, the crown passed to Adolphe I, duke of Nassau-Weilburg who became Grand Duke of Luxembourg, thus founding the present dynasty. Echternach flourished during the Carolingian period and during the 10th and 11th centuries after Berengaudus had created the abbey's *schola*, which became famous through the works of Marquardus and Heribert. Several manuscripts (e.g. a sacramentary and antiphoner, *D-DS* 1946, a troper-gradual, *F-Pn* lat.10510, and a sacramentary, *F-Pn* lat.9433) attest to a remarkable musical culture.

In 963 Count Siegfried built a castle on the banks of the Alzette and called it Lucillin Burhuc ('little borough'); this was, in effect, the founding of Luxembourg. Echternach remained a centre of cultural life until 1794, when French Revolutionary troops attacked the town: the library was destroyed, books and manuscripts were burnt, stolen and dispersed over the neighbouring countries, and only 1500 of nearly 9000 volumes were recovered. Of these, 74 precious manuscripts were confiscated by J.B. Maugérard, Commissaire du Gouvernement pour la Recherche des Objets de Sciences et d'Art, and sent to the

Bibliothèque Nationale in Paris. In 1797 the abbey was sold and converted into a china factory.

There was little musical activity outside Echternach during the Middle Ages; some 13th-century minstrels, such as Jacques Bretex, appeared in the castles and many nobles played the lute. In 1446 a guild of cooks, lute players and pipers of the town was established (none of the groups being numerous enough to form a corporation by itself). In 1603 the Jesuits opened a college by giving a *drama festivum mixtum musica*, a kind of pastoral with an orchestra and a choir; such plays with music were regularly presented at the beginning and end of the academic year, and on special festive occasions. However, few documents survive from the 17th century except the basso continuo part of a cantata, discovered in 1935.

In 1737 a certain François Ferré, either of French or Walloon origin, was authorized to establish himself in Luxembourg as 'maître de musique pour le chant et la Basse de Violle'. The first philharmonic society was established in Wiltz in 1794 by Adam Kiseloppsky, followed by that founded in Esch/Sûre by Peter Krein in 1815. From 1818 Henri-Joseph Cornély was the first professor of music at the Ecole Modèle (later the Ecole Pédagogique) in Luxembourg; he conducted concerts for the Société Littéraire (1818) and was appointed conductor of operas and ballets for the Société d'Art Dramatique (1821). In 1822 he founded the first Ecole de Musique; this became the Ecole de Musique de la Ville de Luxembourg in 1844 and a conservatory in 1849, but later became an Ecole de Musique again. It was dissolved in 1882. Thanks to a generous foundation by Eugénie Dutreux, the new Conservatoire de Musique de la Ville de Luxembourg was opened in 1906; it has since expanded continuously and in 1984 moved to a larger building accommodating over 2000 students.

Cornély was not only an outstanding teacher but also conducted the orchestra of the Société Philharmonique (1824) which was formed from the defunct orchestra of the Société d'Art Dramatique. He was responsible for revitalizing the society in 1829 with J.B. Zinnen as director, and such conductors as Laurent Menager and Edmond Patzké; it organized the first concert given by Liszt in Luxembourg in November 1845. Zinnen opened a second Société Philharmonique together with a music school in Larochette which has produced some of the country's best composers, including Philippe Decker, his cousin Théodore Decker, who composed the famous Palm Sunday hymn *Lauda Jerusalem*, Philippe Manternach and Jean-Antoine Zinnen (J.B. Zinnen's son and composer of the national anthem *Ons Hémecht*, 1864). The Caecilien Verein, the choir of the future Notre Dame Cathedral of Luxembourg, was founded in 1844 by Cornély, who in 1823 had created a choir and orchestra known as the Société d'Amateurs to perform sacred music in the church of St Pierre (which became the Cathedral in 1870). Later conductors of the Caecilien Verein included Henri Oberhoffer, Jean-Pierre Barthel, Pierre Aloyse Barthel, Dominique Heckmes, Jean-Pierre Schmit, René Ponchelet and Jean-Paul Majerus. Organists included André Oberhoffer, Jean-Pierre Beicht, Albert Leblanc and Carlo Hommel.

The Ecole Pédagogique became an Ecole Normale in 1845 and offered musical instruction (Father Jean Majerus was director). A new cultural society, Gym, was established in 1849 and gave such popular composers as Michel Lentz and Dicks (Edmond de la Fontaine) the opportunity to conduct; as a result the first Singspiel in the Luxembourg language, *De Scholtschein* by Dicks, was performed in 1855. The two military bands of Diekirch and Echternach were merged in 1868 to form what eventually became the Musique Militaire Grand-Ducale; a symphony orchestra was formed from this band. Under the auspices of the prince Henry and princess Amalia of the Netherlands, the Théâtre Municipal de Luxembourg opened in 1869 with a comic opera by J.A. Zinnen, *Le chef de bande, ou Le capitaine des voleurs*. On 19 July 1886 Liszt gave his second and last concert at the Casino of Luxembourg.

A federation of Luxembourg's bands and choirs, founded in 1863 by Auguste Fischer and directed by J.A. Zinnen, was disbanded in 1882. But since Grand Duke Adolphe sponsored most of the bands and choirs, a new federation was formed in 1891; called Union Grand-Duc Adolphe, it has retained this name. In Esch-sur-l'Alzette an Ecole de Musique was created in 1917 and through private initiative was very active by 1923. In 1926 the school came under municipal control and in 1969 became a conservatory.

Despite these institutions musical life continued to decline during the first half of the 20th century. The Société Philharmonique was disbanded in 1926 and replaced by Les Amis de la Musique under Fritz Fischer in 1928, which organized concerts with international artists and orchestras. Similarly, the Luxembourg Jeunesses Musicales (founded in 1946 by Norbert Stelmes, Mathias Thinnes and Henri Pensis) and the concert series Soirées de Luxembourg (founded in 1964 by Norbert Weber and Stelmes under the Minister of Culture, Pierre Grégoire) exist primarily to bring international artists to Luxembourg. Radio Luxembourg transmitted its first programme in 1931; its own symphony orchestra, founded in 1933, became famous under its founder Henri Pensis. Most of its musicians, however, were imported from outside Luxembourg; conductors after Pensis included Carl Melles, Louis de Froment, Pierre Cao and Leopold Hager. In 1996 the orchestra was reformed as the Luxembourg PO under chief-conductor, David Shallon.

The Ecole Normale was promoted to a university institute in 1960, now the Institut Supérieur d'Etudes et de Recherches Pédagogiques; Luxembourg's most prominent composer at the time, Edmond Cigrang, a pupil of Müller-Zürich, Philipp Jarnach and André Jolivet, developed the institute's syllabus, providing practical music education on a high level for the country's musicians.

In the second half of the 20th century, musical activity in Luxembourg developed vigorously. Many new orchestras and choirs were formed, among them, Les Musiciens founded (1974) by professor Josy Groben and conducted by Pierre Cao, and a new generation of composers emerged who rejected the neo-romantic and folk-influenced styles of their predecessors in favour of a modernist idiom. In addition to Cigrang, prominent composers in the latter part of the century included Victor Fenigstein, Jeannot Heinen, Alexander Müllenbach, Johny Fritz, Walter Civitareale, Camille Kerger, Georges Lentz, Marcel Wengler, Marco Kraus, Claude Lenners and Alain Nitschké.

Several important festivals were established in Luxembourg in the second half of the 20th century: the Wiltz Festival (1953), initially an open-air drama festival and

later expanded to include operas, orchestral concerts and chamber music; the Echternach Festival (1975); and the annual young composers' festival organized by the Lëtzeburger Gesellschaft fir nei Musék (1983); and the Printemps Musical de Luxembourg (1983).

II. Traditional music

The area considered in this article mainly comprises the Dutch language area, which consists of the Netherlands and Flanders (i.e. northern Belgium and the extreme north-west of France); it also includes the Frisian language area in the Dutch province of Friesland, and French-speaking Wallonia (i.e. southern Belgium). Because of their geographical situation and political history the Low Countries have always been open to foreign cultural influences. Consequently they share most of their musical traditions with neighbouring areas in Germany and France. Since the Middle Ages the Low Countries have also been among the most urbanized areas of Europe, which has meant a continuous cultural interaction between social classes.

1. Vocal music. 2. Musical instruments. 3. Instrumental music. 4. Research and revival.

1. VOCAL MUSIC. Among the most archaic vocal forms are the calls of herdsmen, of which only some Walloon examples have been studied. Their nucleus is a 3rd (usually major), which can be divided into two tones, and extended with an additional whole (or, more recently, a semi-) tone below and/or above. Also archaic are the bi- or tritonic chains of short motifs sung by children. A study by Lucy Gelber (A1972) of the Flemish children's repertory reveals that the most representative tritonic structure is A–C–D, with C as the focal degree. Children also make great use of scales of four, five or six notes, the most frequently-heard scales being G–A–B–C–D(–E–G) and (G–) C–D–E(–G), with G or, more often, C as tonic and final note. Such scales may have been transmitted since pre-medieval times.

Until the 16th century song collections contain mainly hexatonic and modal tunes. More than half the tunes are in the D or A mode, followed in popularity by the C and G modes. Many tunes testify to the strong link between popular and church singing. The 17th-century songbooks show a transition from modal to tonal music and the appearance of accidentals. Modal tunes only disappeared from common usage in the 20th century, however, and the use of accidentals seems to have been uncommon before the end of the 19th century.

To date only folksongs in Dutch have been the subject of musical analysis. Paul Collaer studied songs collected in Flanders between about 1850 and 1910, whereas Hermine Sterringa analysed ballads collected in the Netherlands from the 1950s onwards (in Doornbosch, A1987–91).

Melodies often consist of only two phrases, and tunes of more than four phrases are exceptional. Most melodies range between an octave and an octave and a 4th, and use a major heptatonic scale. The Flemish repertory analysed so far uses the following scales: heptatonic major (35·5%), hexatonic (34%), pentatonic (14%), A mode (5%), chromatic (3·5%), D mode (3%), heptatonic minor (2%), C mode (1·5%), G mode (1%), E and F mode (together 0·5%).

Very few melodies modulate. Two-thirds of the Dutch ballads use a plagal scale and half the major plagal tunes start with the dominant followed by the tonic. They generally end on the tonic, sometimes on the third degree. The melodic outline is undulating and fluent, with a marked preference for small intervals up to a 4th. Song-tunes are essentially syllabic. Melisma occurs only exceptionally and it hardly ever exceeds two notes to the syllable.

The singing style is generally sober and has little dynamic variety. Ornamental notes are hardly ever used, except in the town of Volendam (Noord-Holland province). The use of glissando is more common.

Folksinging is essentially monodic. Spontaneous two-part singing has been recorded sporadically, but this seems to be originally a 19th-century phenomenon. There is a marked preference for binary metre and most songs are entirely isometric. When heterometre occurs, however, it is mostly as a result of the singer adapting the metre to the text or to his or her pausing at the end of a phrase. Most melodies start with an upbeat. Syncopation is extremely rare.

The traditional song repertory can basically be divided into two parts. The first group consists of songs which were mainly transmitted orally. Generally they are of a cheerful nature and meant to be sung by a group, for instance, game- and dance-songs. As a rule they are in binary metre and sung in *tempo giusto*. Each verse contains only one or two elements or lines; the rest of the verse consists of repetitions of those lines and of fixed refrain lines, including series of meaningless syllables, like *van falderadiere*, *van falderada* or *tradérira*, *luron*, *lurette*.

The second category consists of songs whose lyrics were originally written down. They may tell a merry or a sad story, and are usually sung solo. They can also be in ternary metre, and the serious songs in particular are often performed *parlando rubato*. The verses contain four to eight, sometimes more, lines, of which the last one or two are often repeated. The lyrics generally tended to suffer when transmitted orally.

Part of the repertory is linked to important events in the course of life such as conscription, marriage or moving house. There are, however, hardly any songs connected with birth or death rites. Another important group consists of seasonal songs, for instance, the luck-visit songs (sung to bring good luck to the households visited at these times) during Carnival and Holy Week, on May Day, midsummer and Martinmas, and in the period from Christmas to Epiphany. These luck-visit singers are now children and teenagers, but until the beginning of the 20th century many were handicapped or jobless adults.

From the 16th century until the beginning of the 20th, and in Flanders even until about 1950, broadside singers were a familiar sight at markets and outside churches after Mass. Their repertory dealt mainly with sensational news and love stories.

Examples of once popular dance-songs are *'t patertje* (a kissing dance from the Dutch language area), the seven steps/jumps dance, and dances round the maypole and autumn, Lent, midsummer and Easter bonfires. A rich variety of songs also accompanied the *crâmignon*, the open-air *farandole* which was danced until about 1960 in the town of Liège and which still survives in a few villages between Liège and Maastricht (Limburg province), though now mostly accompanied only by a brass band. A related chain-dance is the *vlöggelen* of Ootmarsum (Overijssel province), which is performed on Easter Sunday and Monday.

Already in the 19th century collectors were worried about the marked decline of traditional singing, which was accelerated in the 20th century by a combination of factors, the most important being the gradual loss of its function within the agricultural work-cycle and the human life-cycle. According to Doornbosch, this was caused mainly by the mechanization of agriculture, industrialization, the radio and the introduction of commercial entertainment, improvement in the means of transport, and the advent of electricity, by which twilight – the best time for singing in the family circle – was lost.

2. MUSICAL INSTRUMENTS. Some noise-makers and rhythm instruments are essentially linked with luck-visit singing. They include cog rattles (for Holy Week), the *hanske knap* (a clapper made from a clog and played on Plough Monday in some villages north of Antwerp) and the *rommelpot* (a friction drum played during Shrovetide and the Christmas and Epiphany period in some Dutch-speaking areas). A typical Carnival instrument is the

musical bow (Dutch: *goebe* or *brombas*; Fr.: *ramoncelle* or *basse de Flandres*), which has one or two strings running over a bladder as resonator. The *midwinterhoorn* is a horn about 100–120 cm long made of wood. It is played in the Twente area (the eastern part of the province of Overijssel) during Advent.

Since at least the 12th century, a rich variety of duct flutes has been known in the Low Countries. Archaeological research has yielded dozens of bone duct flutes, most of which were excavated in the *terpengebied* (area of mounds) along the coast of the provinces of Friesland and Groningen. In Belgium a few traces of a pastoral cow-horn flute tradition have been found. The duct could be formed by a wooden block or the lower lip.

Six-hole duct flutes were among the most popular traditional instruments until the first decades of the 20th century. From the middle of the 19th century these were mainly factory-made metal or synthetic instruments, imported from France, Gemany or England. The last traditional players – recorded in Belgium in the 1970s – favoured a *non legato* style, with brisk tonguing and an economy of ornamentation. Though mostly played as a pastime, the tin whistle was also often part of informal dance bands in Belgium about 1900.

The pipe and tabor were first depicted at the end of the 13th century and were a popular accompaniment for dance until about 1650.

The fife and side drum were introduced at the end of the 15th century and, until the advent of brass bands in the 19th century, provided most open-air music. The fife and drum tradition is still very much alive in the area between the rivers Sambre and Meuse (Hainaut and Namur provinces), where the players – in post-Napoleonic uniforms – accompany the military escorts of religious processions. The fifes made in this area are in C or D♭, lathe-turned from a single piece of ebony, boxwood or aluminium, keyless and with a cylindrical bore. The style of playing is characterized by sparse use of slurring and ornamentation. The tradition also survives in a few towns in the province of East Flanders. There the traditional fife has been ousted by the orchestral piccolo, and the playing style is more slurred and ornamented.

Since its introduction at the end of the 15th century, the side drum has been one of the most important open-air instruments. The carnival drummers of Binche and the surrounding villages (Hainaut province) achieve an amazingly high standard of drumming, with characteristic asymmetrical rhythms.

The earliest references to the bagpipe (Dutch: *moezelzak*, *doedelzak*, *pijpzak*; Fr.: *cornemuse*, *pip'sac*, *muchosa*) can be dated from the last quarter of the 13th century. The bagpipes of the Low Countries had a sewn bag, a conical chanter with a double reed and one (until about 1500) or two cylindrical drones with a single reed. Both drones could be mounted in a common stock, and rested against the left shoulder. In the 18th and 19th centuries shepherds in the province of Hainaut favoured a type with a parallel arrangement of chanter and small drone in the same stock, while the bass drone rested against the shoulder. In the provinces of Hainaut and Antwerp the bagpipe tradition lingered until the beginning of the 20th century.

The industrialization of wind instrument making in the first half of the 19th century brought about the formation of village wind bands. Dance bands often consisted of a clarinet, a cornet, a trombone and a tuba. There could also be a second clarinet, a flute, one or two flugelhorns and a bombardon. Until the interwar years this was the most common type of band for large village dance halls.

The accordion became a truly popular instrument about 1880, with the import of cheap German instruments and the start of mass-production in Belgium. It quickly dethroned the fiddle as the main folk instrument for small dance parties. Until the interwar years the Belgian workshops produced an amazing variety of single-action, double-action and hybrid models. Most popular among Flemish country musicians was the double-action model with two melody rows and ten bass keys, of which five keys sound bass notes and the other five their chords. Some accordion players, mainly in the province of Namur, accompanied themselves on the 'foot-bass' invented in 1894 by Joseph Alexandry. It consists of a large bellows on top of which is a soundbox with one row of nine to twelve buttons, depressed with both feet.

In the Ardennes (Liège and Luxembourg provinces) an archaic style of fiddle playing survived until the 1970s. It was characterized by *non legato* playing (with detached strokes), the use of drone strings, absence of vibrato and economy of ornamentation. In bands the fiddle could be used to play a second part or a rhythmic, generally off-beat accompaniment consisting of two notes, usually a 3rd or a 6th, sometimes a 4th apart. The fiddle was by far the most popular instrument for dancing from the 17th to the 19th centuries. Quite often it was accompanied by a bass (cello). In the provinces of Brabant and Antwerp this duo survived until about 1920. Until the beginning of the 20th century dance bands in the West-Friesland area (Noord-Holland province) generally consisted of two fiddles and a bass.

The hurdy-gurdy (Dutch: *(draai)lier*; Fr.: *vielle à roue*, *vièrlète*, *tiesse di tch'vå*) is first mentioned in the 13th century. Both diatonic instruments with a single row of keys, and fully chromatic models with a double row were used. The instrument was usually played by wandering minstrels of humble condition, many of them blind beggars. In Belgium the last players were seen about 1920.

The hammered dulcimer is first depicted between 1420 and 1435. Extant dulcimers from the 17th and 18th centuries were probably made by harpsichord makers, which points to their use as drawing-room instruments. There are, however, a few indications that the hammered dulcimer was also played by wandering street musicians until the middle of the 19th century.

The fretted zither (Dutch: *hommel*; Fr.: *épinette*) was probably introduced before 1600, as a Dutch example is dated 1608. The instrument was made in a variety of forms, ranging from crudely hollowed-out logs to fine pieces of craftsmanship. Some 20th-century Belgian zithers have an additional soundbox. There are usually from two to five melody strings and two to four drones. In the Hageland area (Brabant province) a zither tuned to two or three different major chords was popular in the 1920s. The scales produced from the frets are mostly diatonic but since about 1900, 90% of the Flemish instruments have been tuned to the following scale: C–D–E–F–G–A–B♭–B–C etc. Some instruments are, however, fully chromatic.

In Belgium in the 20th century, the zither has been played exclusively with a piece of cane or hardwood run along the frets and a plectrum for plucking. The zither

has always been an instrument for family music-making. It was the only folk instrument generally played by women. Until the 19th century the zither was mainly found in the provinces of Noord-Holland and Friesland, but about 1900 it was virtually extinct in the Netherlands. In Belgium, on the contrary, it reached the peak of its popularity in the interwar years.

3. INSTRUMENTAL MUSIC. Before the middle of the 18th century folk musicians left no written music. Many traditional tunes, however, found their way into printed collections for middle-class amateurs. For instance, the branles published by Tylman Susato in Antwerp (1551) and Pierre Phalèse in Leuven (1571) and Antwerp (1583) are unmistakably rooted in the Western European popular tradition. A wealth of traditional music is also to be found in the *Oude en nieuwe hollantse boerenlieties en contredansen* ('Old and new Dutch peasant songs and country dances'), published in Amsterdam from 1700 to 1716. This is the largest collection of tunes ever published in the Low Countries, and contains more than 1000 melodies, many of French and English origin.

From these written sources and the instruments used it would appear that until about 1700 there was no noteworthy difference between instrumental and vocal music. Tunes were often both sung and played. The scarcity of bands points to the fact that – in contrast to middle-class music – folk music was essentially monodic, drones being the only common form of accompaniment.

A wealth of 18th-century traditional music is to be found in manuscripts and printed collections by fiddlers, dancing-masters and carillon players.

About the middle of the 18th century popular music had apparently become predominantly tonal. It was still largely diatonic, but gradually it moved away from vocal models. The use of drone accompaniment gave way to harmony, which may explain the decline of the bagpipe. Some sources give an idea of the ensemble playing that was undoubtedly also adopted by country bands. The second part is mostly isorhythmic and a 3rd or a 6th below the first part. The bass is often limited to the fundamental note of the chords, sometimes with passing notes in between. The mid-18th-century tune books contain mainly minuets and marches. The dance-tunes usually consist of an *AABB* structure, both units with an even number of bars, generally eight to 16, eight bars being the usual length. The marches are in 2/2 time, and generally they consist of two units with an odd number of bars as a result of the typical tonic–dominant–tonic final cadence.

In the second half of the 18th century the minuet gave way to the country dance. Both the 'English' longways and the 'French' square dances became immensely popular. The tunes were often extended to three or four units, each consisting of usually eight and sometimes 16 bars. Modulation was no longer exceptional, but was restricted to the dominant or subdominant major keys, or to the minor on the same tonic. During the 18th century the compass of dance music was apparently extended, though seldom beyond the range of an octave and a 6th. Even at the end of the century tunes with a compass of an octave or a 9th were not at all uncommon.

The traditional music of the first half of the 19th century is mainly documented by the tune books of fiddlers from the provinces of Luxembourg and Friesland. These manuscripts contain many tunes of French, German and British origin. Most popular were all kinds of country dances, like the *anglois* in Friesland and the *passe-pied*, *allemande* and *amoureuse* in the province of Luxembourg. The Frisian *madlot* and the Luxembourgian *maclotte* were local adaptations of the *matelotte* ('sailor's dance'), introduced in the second half of the 18th century.

The Frisian manuscripts contain a number of *schotz* or *schots* ('Scottish') tunes, which are only rhythmically related to Scots dance music. In the second half of the 19th century the *skotse trije* ('Scottish three') became the 'national' dance of Friesland. Although originally danced by three dancers, by the end of the century it had become a square dance.

Shortly after 1815 the first waltzes appeared. Until the middle of the 19th century waltzes were mostly written in 3/8 time, and were more akin to the Alpine ländler than to the Viennese waltz. The polka was introduced in 1844, and it conquered the remotest villages in no time. Other pair-dances imported around this time include the mazurka, the *redowa*, the galop and the schottische.

Most pair-dance tunes from the first half of the 19th century consisted of two units of eight bars. Some tunes introduced a new element – modulation to the relative minor. In the middle of the century the quadrille was introduced. This descendant of the country dances usually consisted of four or five figures with different tunes in 2/4 or 6/8 time.

The instrumental tradition reached its greatest complexity in the second half of the 19th century. The handwritten scores of Belgian wind and mixed bands give a first and second part, off-beat chords and a bass. The use of accidentals was generalized. The literate bands mostly played pair-dances with the structure *AABBACCAABBA*, each unit consisting of eight or 16 bars. *B* and *C* (called *trio*) modulated to different related major keys, usually to the dominant and subdominant respectively, though the *B* unit sometimes also modulated to the relative minor. The units were performed with contrasting dynamics. The first part (usually on clarinet, cornet or flugelhorn) was sometimes a true bravura piece with strings of quick triplets.

Country musicians continued, however, to play older and simpler forms of instrumental music until well into the 20th century. As far as one can tell, the local people have always been eager to adopt new, fashionable dances and tunes. Some became traditional and thus survived the international dance fashion a long time. Old rounds, country dances, quadrilles and pair-dances survived best in the Twente area (Overijssel province), the Achterhoek area (Gelderland), on the island of Terschelling, in the West-Friesland area (Noord-Holland), in the province of Antwerp, the central part of Brabant province and in the Ardennes area (Liège and Luxembourg). Some communities have maintained their local traditions to this day.

Since World War I the dance repertory has been extended with dances of North or South American origin, but their diffusion by radio, TV and records has limited further evolution within an oral tradition.

4. RESEARCH AND REVIVAL. Folksong research in Flanders began in the middle of the 19th century. Among the pioneers, the French musicologist C.-E.-H. de Coussemaker was the first to collect songs from the oral tradition. The results of 19th-century research into folksongs in Dutch were compiled by Flor van Duyse in his standard work *Het oude nederlandse lied* (A1903–

08). In the first decade of the 20th century Theophiel Peeters was the first Flemish fieldworker to collect dance-tunes.

In the Netherlands and Wallonia the collection and study of traditional music made headway only at the beginning of the 20th century. The first Dutch fieldworker was Jaap Kunst, who collected songs and dances on the island of Terschelling. In the 1930s Pol Heyns of Flemish radio was the first to make field recordings of songs and dance music.

The most prolific fieldworker is Ate Doornbosch, until 1986 head of the Nederlands Volksliedarchief (Amsterdam), who managed to record some 10,000 epic songs from 1957 onwards. The most important all-embracing study of Flemish and Walloon traditional songs to date is Paul Collaer's *La musique populaire traditionelle en Belgique* (E1974).

Musical instruments were the worst documented aspect of traditional music until Hubert Boone of the Brussels Museum of Musical Instruments began his pioneering research in the late 1960s.

Since about 1900 many traditional songs from the above-mentioned collections have been promoted in a 'cultivated' form through schools, youth movements and choral societies. In the mid-1960s the Antwerp singer Wannes van de Velde was the first of his generation to resume a traditional style of singing.

Folkdancing was revived after World War I by youth movements of all tendencies, mainly with educative intentions, as a means to counter the growing popularity of the 'degenerate' newly imported pair-dances of American origin. Since the early 20th century folkdances have also been cultivated and demonstrated by folklore groups, including the guilds of archers in the provinces of Brabant and Antwerp, some of which draw their repertory from local tradition. Since the late 1970s folkdance parties have stimulated spontaneous folkdancing, mainly in Belgium.

The revival of native traditional instruments was started in 1968 by Boone's band De Vlier. In Walloon and the Netherlands the revival began in 1973, largely under the influence of Flemish bands. At first the revival caught on mainly among university students and visual artists, as a reaction against the international commercial music business.

The folk revival has often had strong links with the regionalist and ecological movements. In contrast with the older folklore groups the revival ensembles have not limited themselves to the most recent traditional forms, as collected from the surviving, mostly aged, musicians. They also go back in time by drawing from older, written sources and by reconstructing and playing (virtually) extinct folk instruments. An important tendency within the revival aims at revitalizing traditional music by performing it using non-traditional arrangements, techniques, instruments and line-ups. Many of the new bands are heavily influences by foreign, particularly Irish, British and central French, revival music. Traditional music now seems to have carved out a lasting, though still marginal, place in the contemporary music scene of the Low Countries.

Lowe, Edward (*b* Salisbury, *c*1610; *d* Oxford, 11 July 1682). English composer, music copyist, organist and writer on music. He was a chorister at Salisbury Cathedral, where he was a pupil of John Holmes. Some time between Michaelmas 1631 and 1641 he became organist of Christ Church Cathedral, Oxford. During the Commonwealth he remained in Oxford, where he gave private lessons and took part in weekly music meetings at William Ellis's house. He was paid as university organist in 1657–8 and by the end of 1658 had resumed his place at Christ Church. Soon after the Restoration he became one of the three organists of the Chapel Royal (with William Child and Christopher Gibbons) and in 1661 he succeeded John

Wilson as professor of music at Oxford. He retained all of his court and Oxford appointments until his death.

Lowe's music copying, often annotated with informative historical or practical details, was extensive and varied. Most of the manuscripts are in the Bodleian Library, Oxford, and others are at Christ Church, Edinburgh University and the British Library, London. At Christ Church he added 27 anthems to the cathedral partbooks *GB-Och* Mus 1220–4; organ parts in his hand are in *Och* 438 and 1002 and voluntaries in *Och* 1176. Lowe's principal responsibility as professor was to organize weekly meetings for performance at the Music School, and under his direction the school's collection of vocal and instrumental performing material was greatly expanded to contain music in a variety of earlier and contemporary styles. He copied performing parts for several act songs (mostly at *Ob*), among them two works of his own, and compiled substantial collections of vocal music by his contemporaries in *Eu* Dc.I.69 (with its companion *Ob* Mus.d.38) and *Lbl* Add.29396 (facsimiles in Bickford Jorgens, v, viii). Most of Lowe's verse anthems, essentially traditional in style, could well have been written for the newly reconstituted choir of the Chapel Royal in the early 1660s; his *A Short Direction for the Performance of Cathedrall Service* (Oxford, 1661, 2/1664) contains straightforward settings of the liturgy based on pre-Civil War practice. Lowe remained active in old age, copying out the parts of Aldrich's act song *Conveniunt doctae sorores* (performed 7 July 1682; *Och* 1127) in his usual firm and legible hand. His will reveals much about his character and circumstances.

WORKS

VERSE ANTHEMS

† – *text printed in J. Clifford: The Divine Services and Anthems (London, 2/1664)*

†If the Lord himself, *GB-Och*, *WB* (inc.)

ROBERT THOMPSON

Löwe, Ferdinand (*b* Vienna, 19 Feb 1865; *d* Vienna, 6 Jan 1925). Austrian conductor. A pupil of Josef Hellmesberger (i), he was active chiefly in Vienna and Munich, later also appearing regularly in Budapest and Berlin. He was a staff conductor at the Vienna Hofoper when the newly appointed Mahler chose him to succeed Johann Nepomuk Fuchs, who died in October 1899. Löwe did not, however, live up to promise. He is chiefly remembered in connection with Bruckner, whose pupil he was at the Vienna Conservatory, and whose symphonies he championed together with Franz Schalk and Hugo Wolf. He collaborated with Schalk in a spurious score of the Fourth, with cuts and with orchestral textures recast in Wagnerian style, and this appeared as the first edition in 1890. Although Bruckner sanctioned it, he refused to sign the printer's copy, instead making a fair copy that very year of his own definitive version of 1880. Löwe, on his own initiative, also concocted an even more doubtful version of the Ninth in 1903, seven years after the composer's death. His (and Schalk's) motives in presenting such editions on Bruckner's behalf to a sceptical public and hostile music critics may have been well intentioned, but they were also misguided.

DERYCK COOKE/CHRISTOPHER FIFIELD

Lowe, Joseph (*b* 1796; *d* 1866). Scottish dancing-master. He was the most prominent member of a family of dance teachers in Scotland in the early 19th century, whose descendants numbered more than 20 teachers over five generations and who were active in Scotland, Canada, Australia and New Zealand for some 200 years. With his brothers John, Robert and James, Lowe was influential in establishing Scottish dance in a modern ballroom form. The brothers taught in different parts of Scotland and together wrote *Lowes' Ball-Conductor and Assembly Guide* (Edinburgh, *c*1830), one of the most extensive 19th-century dance manuals. Joseph Lowe also published many arrangements of Scottish dance-tunes for the piano. From 1851 to 1860 he was dance tutor to the family of Queen Victoria, and his journal of these years gives an

insight into his teaching at Windsor and Balmoral. His workbook, which contains step descriptions of dances and some entries by his son Joseph Eager Lowe, who taught in New Zealand and Australia, is in the National Library of New Zealand.

ALLAN THOMAS

Lowe, Nick (*b* Woodbridge, Suffolk, 25 March 1949). English songwriter, singer and record producer. During the 1970s he was a key figure in the development of English pub rock and punk rock. His early career was spent as a member of Brinsley Schwarz, a guitar- and organ-based group which set out to translate the American pop of the Band and the Byrds into an English urban context. Lowe sang, played bass guitar, and composed such songs as *Nervous on the Road*, *Don't lose your grip on love* and *What's so funny ('bout peace, love and understanding)*, recorded by the group between 1970 and 1975. Next he collaborated with the club-owner and producer Dave Robinson in setting up Stiff Records (1976), which recorded such figures as Elvis Costello and Ian Dury. Lowe produced the first British punk rock album, by the Damned, before resuming his own musical career. In the late 1970s he had hit records with *I love the sound of breaking glass* and *Cruel to Be Kind*. Although he continued to compose and record as a solo artist, in the 1980s and 90s Lowe collaborated with such figures as Dave Edmunds, John Hiatt and Johnny Cash while producing albums by Costello, Carlene Carter and others.

DAVE LAING

Lowe, Thomas (*d* London, 1 March 1783). English tenor. He joined the Drury Lane company in 1740 as a singing actor, and for many years appeared in ballad operas and other light theatre pieces. He enjoyed most success, however, as a singer between acts and in pleasure gardens; he was very popular at Vauxhall and sang at Ruckholt House, Essex, in 1743 and 1744. He played minor parts in Shakespeare and Restoration comedy, generally as a mouthpiece for songs; most of Arne's Shakespeare settings were composed for him. Lowe moved from Drury Lane to Covent Garden in 1748, and back to Drury Lane in 1760, on each occasion succeeding Beard, with whom he alternated as Macheath in *The Beggar's Opera*. He visited Dublin with the Arnes in summer 1742 and winter 1743–4, when he sang in the first performance of Arne's oratorio *The Death of Abel*. He appeared in many of Arne's more serious pieces in London, including *Comus*, *Rosamond*, *The Judgment of Paris* and *Alfred*, in De Fesch's *Love and Friendship* (1746), and for some years was prominently associated with Handel's oratorios. He was a member of Handel's company at Covent Garden in 1743 and 1748–51. The parts of the Philistine and Israelite Man in *Samson* (1743), the title role in *Joshua* (1748), Jonathan in *Alexander Balus* (1748), the First Elder in *Susanna* (1749), Zadok in *Solomon* (1749), Septimius in *Theodora* (1750) and Apollo in *Alceste* (1750, not performed) were composed for him, as were two patriotic songs during the Jacobite rising (1745–6). He sang in the first performance of the Peace and Foundling Hospital Anthems in 1749. In the parts he composed for Lowe, Handel was careful not to tax either end of his compass (*c* to *a*′), but he must have commanded at least an adequate technique in florid music. More naturally gifted than Beard, he fell far below him in intelligence and application. According to Burney, 'with the finest tenor voice I ever heard in my life, for want of diligence and cultivation, he could never be safely trusted with any thing better than a ballad, which he constantly learned by his ear'.

In 1763, Lowe bought the lease of Marylebone Gardens from John Trusler and gave concerts there with his pupil Ann Catley, but after initial success his voice and fortune declined and he was forced to sell to Samuel Arnold in 1769. After casual engagements at Southwark, Watford and elsewhere he was invited to Sadler's Wells by Thomas King in 1772 and sang there on and off until his death, chiefly in dialogues by Dibdin, Hook and others. He died destitute despite having enjoyed over many years an annual income estimated at nearly £1000. His son, Halifax Lowe, a tenor of similar type, made his début at Sadler's Wells on 15 April 1784 but died in his 29th year in October 1790.

WINTON DEAN

Löwenbach, Jan (*b* Rychnov nad Kněžnou, Bohemia, 29 April 1880; *d* Glen Falls, NY, 13 Aug 1972). Czech musical administrator and writer. An amateur musician, he joined Hudební Matice as an expert on copyright law in 1908. He soon became an enthusiastic contributor to the Umělecká Beseda's periodical *Hudební revue* and later was one of its editors. After the formation of the Czechoslovak Republic in 1918 he helped found the Klub Československých Skladatelů (Czechoslovak composers' guild) and the Ochranné Sdružení Autorské (authors' copyright association). He was also responsible for organizing the 1924 and 1925 ISCM festivals in Prague. Löwenbach negotiated Max Brod's first dealings with Universal Edition as a translator and may have brought Janáček to Brod's attention. He often gave Janáček personal legal advice, for instance over his dealings with foreign publishers, or in his dispute with the National Theatre over its use of Kovařovic's version of *Jenůfa*. He also appears to have introduced Janáček to Bartók, who was his house guest during the 1924 ISCM festival.

Löwenbach spent most of the war years in New York, where he acted as cultural attaché to the Czechoslovak consulate, and where, with his articles and lectures and the organization of many concerts, he did much to promote the cause of Czechoslovak music. In November 1946 he was recalled to Prague as adviser to the Ministry of Education but was dismissed after the change of regime in February 1948 and returned to New York a few months later. His writings include two opera librettos, for Martinů's *Voják a tanečnice* ('The Soldier and the Dancer') and Křička's *Bílý pán* ('The Gentleman in White'), and translations from Czech into German and vice versa.

JOHN TYRRELL

Löwengebrull (Ger.). *See* STRING DRUM.

Lowens, Irving (*b* New York, 19 Aug 1916; *d* Baltimore, 14 Nov 1983). American musicologist, critic and librarian. He attended Columbia University (BS 1939) and the University of Maryland (MA 1957). He contributed music criticism to the *Washington Star* from 1953, and was its chief music critic from 1960 to 1978. He was assistant head of the reference section of the music division of the Library of Congress (1962–6). He was president of the Music Library Association (1965–6), executive board member of the AMS (1964–5), and was founder-member of the Music Critics Association, of which he was also president (1971–5). In 1975 he founded the American Sonneck Society, serving as its first president (until 1981) and initiating its official journal *American Music* (in 1983). After working as visiting professor at Brooklyn College, CUNY (1975–6), he taught at the Peabody Conservatory, Baltimore, from 1977 until his retirement as dean emeritus in 1981.

As a critic, Lowens sought to improve both the standards of criticism and the working conditions of critics in the USA; he was also instrumental in establishing the Kennedy Center Friedheim awards for compositions. His main interest was the compilation of American tunebooks, which he began collecting early in his career. His bibliography of these works, on which he worked together with Allen P. Britton and Richard Crawford, represents 30 years of scholarship in this area. Lowen's personal collection of over 2000 American hymnals and tunebooks forms the Irving Lowens Collection at the Moravian Music Foundation in Winston-Salem, North Carolina. The Irving Lowens Awards for the best book and the best article on American music are issued by the Society for American Music in honour of Lowen's contributions to the field.

PATRICK J. SMITH/R

Lower Rhine Festival (Ger. Niederrheinisches Musikfest). Festival held in turn in Düsseldorf, Aachen, Wuppertal and Cologne, originating in 1817.

Löwe [Löw] **von Eisenach, Johann Jakob** (*b* Vienna, bap. 31 July 1629; *d* Lüneburg, early Sept 1703). German composer. He came from an old Thuringian family whose members called themselves variously Lebe, Lew, Lewe, Löw, Löwe and Leo. He always signed himself 'Löw von Eysenach', but 'Löwe' is the form that has generally been used in writings since Gerber. The 'von Eisenach' is not a title of nobility but derives from his father, Johann Lewe, the Saxon electoral court's Resident in Vienna, who was a native of Eisenach. According to Walther, Löwe was taught by 'distinguished virtuosos at the imperial court in Vienna and at other princes' courts', as well as in Italy. A dedicatory verse names Bertali, Piscator, Giovanni Valentini and Verdina as his models or teachers; there is no more precise information. In January 1652 he was taken on by Schütz at the Saxon court at Dresden 'for further improvement', but in the following month he was engaged at the court at Altenburg for a six-month period. Schütz was almost a second father to him, and it was on his recommendation that in the summer of 1655 he became Kapellmeister of the court of Duke August the younger at Wolfenbüttel. His engagement as Kapellmeister of the court of Duke Moritz of Saxony at Zeitz (1663–5) was also on Schütz's recommendation. His years at these two courts were his most fruitful period as a composer. He had to resign from the post at Zeitz in May 1665 as a result of disagreements with the Konzertmeister, Clemens Thieme. He probably went to Jena, but he seems to have been without regular employment for several years; he applied unsuccessfully for posts at the Brandenburg court and at Frankfurt. His name appears in the register of the Johanniskirche, Hanau, in 1678, and three children were born to him at Hanau between 1678 and 1681, but it is not known what post, if any, he held there. The Hanau Kantor, J.G. Braun, commissioned from him the music examples for a textbook he published in 1681 and wrote the texts of the songs in his *Einstimmige neue Arien* (1682). In April 1683 Löwe took the badly paid post of organist at the church of St Nicolai und St Marien at Lüneburg, but he made no mark on the musical life of the town. He died in poverty, as letters from the last years of his life clearly show.

Löwe's suites for instrumental ensemble (1658) comprise varying series of dance movements. His addition of an introductory first movement in free form, which he called 'Synfonia', was innovatory. Such pieces, like the contents of his *Sonaten, Canzonen und Capriccen* (1664),

are in a canzona-like style, made up of small units and imitating Italian models, which he knew from Vienna. (A letter to Schütz in 1660 shows that he still sent, at his own expense, for copies of 'the best musical things composed in Vienna by masters famed for their art'). His secular song collections show the influence of Italian arias and canzonettas. He remained aloof from the aspirations of the Hamburg school of songwriters to a popular folklike style, and wrote instrumentally conceived melodies in an imitative style, as he also did in his *Neue geistliche Concerten*. Printz's description of him as 'a famous musician in the canonic style' was probably prompted by a collection of canons (1665) that was praised by Schütz but is now lost. He probably wrote the music for several Singspiele and ballets with texts by Duke Anton Ulrich, given on festive occasions at Wolfenbüttel; this music too is lost, and the only time he is expressly named as the composer is in the libretto of the Singspiel *Orpheus aus Thracien*.

HORST WALTER

Lowinsky, Edward E(lias) (*b* Stuttgart, 12 Jan 1908; *d* Chicago, 10 Oct 1985). American musicologist of German birth. He studied the piano, composition and conducting at the Hochschule für Musik in Stuttgart from 1923 to 1928. He received the PhD from the University of Heidelberg in 1933 after working with August Grisebach in art history, Karl Jaspers in philosophy and Heinrich Besseler in musicology. From 1933 to 1939 he lived in the Netherlands and from 1940 in the USA. He became an American citizen in 1947. Lowinsky taught at Black Mountain College, North Carolina, as an assistant professor (1942–7); at Queens College, New York, as an associate professor (1947–56); and at the University of California, Berkeley, as professor (1956–1961). In 1961 he was appointed Ferdinand Schevill Distinguished Service Professor at the University of Chicago. As a Guggenheim Fellow he studied the 16th-century motet in Italy (1947–8) and he was a member of the Institute for Advanced Study in Princeton, New Jersey (1952–5). From 1964 to 1977 he was general editor of the series Monuments of Renaissance Music, published by the University of Chicago Press. In 1971 he organized and presided over the highly successful international festival-conference held in New York to commemorate the 450th anniversary of the death of Josquin des Prez, and in 1974 became an honorary member of the Committee for the Preparation of the New Josquin Edition.

One of the major figures of postwar musicology, Lowinsky had already made a distinguished contribution to scholarship in 1937 with his PhD dissertation on Lassus's Antwerp motet book. His next major work, on a secret chromatic art in the Netherlands motet, caused a controversy that has stimulated continued debate about problems of *musica ficta* in the music of the Renaissance. His work as an editor and his studies of theoretical sources and individual musical manuscripts, especially those from the time of Josquin and his immediate successors, Willaert, Clemens non Papa, Gombert and so on, led him to investigate the nature of Renaissance sources and to formulate demanding criteria for modern editions, especially with regard to *musica ficta* and text underlay. He produced numerous provocative and challenging articles on the relationship between music and the history of ideas. Many of his most important articles were collected into a single volume, *Music in the Culture of the Renaissance* (1989).

HOWARD MAYER BROWN/R

Low Mass. A form of the Latin Mass which grew out of a medieval custom of saying daily private masses with few or no people in attendance. Today, the Low Mass is characterized by the complete absence of singing. *See also* MASS.

□

Lownes, Humfrey (*fl* 1587–1629). English music printer. He married the widow of Peter Short in 1604, and most of his few musical works were reprintings of Short's copyrights (e.g. Thomas Morley's *A Plaine and Easie Introduction to Practicall Musicke*) published between 1604 and 1613. It is not known if he was related to Matthew Lownes, but he seems to have ceased printing music when the latter acquired the privilege of Barley in 1614. He was succeeded by Robert Young, who printed the treatise of Elway Bevin of 1631, *A Briefe and Short Instruction in the Art of Musicke*. (*Humphries-SmithMP*; *KrummelEMP*)

MIRIAM MILLER

Lownes, Matthew (*fl* 1591–1625). English bookseller and printer. Between 1612 and 1624 he collaborated with John Browne and Thomas Snodham in the production of several music volumes, acquiring the rights to titles previously owned by William Barley and Thomas East. There is no evidence that he was himself a music printer. (*Humphries-SmithMP*)

MIRIAM MILLER

Lowrey organ. An electronic organ, many models of which have been manufactured by the Lowrey Organ Co. in Lincolnwood, near Chicago (later in nearby Deerfield, and recently in nearby LaGrange Park), from about 1949. In 1918 the F.C. Lowrey Co. (founded by Frederick C. Lowrey) purchased the designs for the Choralcelo (an electrically-powered SOSTENENTE PIANO) and from the 1920s experimented with many types of sound-generating systems in pursuit of a fully electronic organ. The first electronic instrument marketed by Lowrey was the Organo (1949), a small electronic organ controlled from the keyboard of a piano. Since the early 1950s a wide range of organs has been produced, including church, theatre and home organs, as well as electronic pianos, from the mid-1980s based on sampled timbres. In 1977 Lowrey became a division of Norlin Industries; it was acquired by KAWAI in 1988.

From 1956 Lowrey organs featured a downward semitone 'glide', superseded in the 1980s by portamento and transposition. Many earlier models included a Leslie tremulant loudspeaker; in the 1970s Lowrey replaced this with an electronic equivalent. Advances in electronic technology around 1970 made possible several new devices that are now widespread: rhythm and 'walking bass' units, arpeggiators, a choice of chord systems, memories for pre-set registrations, and (since 1980) a selection of different accompaniments, for which microprocessors are used.

Loyola (Fernández), José (*b* Cienfuegos, 12 Feb 1941). Cuban composer. He began studying music under his father, the flautist Efraín Loyola. He joined various bands and played the flute in his father's popular music group as well as composing dance pieces for it. In 1962 he enrolled at the Escuela Nacional de Arte, where he continued his flute studies and took lessons in composition with Federico Smith. Between 1967 and 1973 he studied at the State Higher School of Music in Warsaw under Bacewicz and Witold Rudzinski. He was awarded the doctorate in theory of music from the Chopin Academy in Warsaw in 1985, also under the tutorship of Rudzinski. In 1973 he began working as a teacher in Havana, giving classes in composition and related disciplines, and after teaching music in various capacities in Cuba he was appointed vice-rector of the Instituto Superior de Arte (1976–8). He undertook a variety of roles within the Unión de Escritores y Artistas de Cuba, in 1988 becoming vice-president and in 1997, president.

Loyola's composition training equipped him with the most advanced methods of the avant garde, and his first works place him firmly among the members of that movement in Cuba working in the 1960s and 70s; characteristically he used aspects of Cuban folk and popular music in combination with avant-garde elements. Among his most notable works is the series *Música viva*, begun in 1979. These pieces are rhythmic in essence, and display the use of original blends of timbre combined with unconventional instrumental techniques aiming to suggest the rhythms and sounds of Cuban folk percussion. In 1992 he was awarded the Premio Anual de Reconocimiento, the highest honour for composition in Cuba.

VICTORIA ELI RODRÍGUEZ

Loyola Guevara, Pedro de. *See* GUEVARA, PEDRO DE LOYOLA.

Loys (*fl* 14th century). French composer. He is known only from a three-voice Gloria in the Avignon repertory (ed. in CMM, xxix, 1962, and PMFC, xxiii, 1989). He could be identifiable with Louis Sanctus de Beeringen, a friend of Petrarch who was called 'magister in musica' in a letter of Pope John XXII dated 1330, and who died in 1361. Another man of this name is Loyset, a favoured musician in 1389–90 of Philip the Bold, Duke of Burgundy. The Gloria, which survives in *F-APT 16bis* and *I-IV*, is in motet style. Since it has the same isorhythmic tenor as the anonymous *Flos ortus inter lilia/Celsa cedrus ysopus/Quam magnus pontifex*, which also survives in *I-IV* as well as in two other sources, Leech-Wilkinson (11–12, n.21) has suggested that the name 'Loys' may refer to the tenor's dedicatee, St Louis of Toulouse.

Loyset (ii). *See* PIÉTON, LOYSET.

Lozhky (Russ.: 'spoons'). A Russian instrument of the janissary-music class which produced an effect similar to the Turkish crescent. According to Mahillon, it was adopted by the Russians from the Turks when janissary music became the rage in the early 18th century. The Turks called it *kaşıklar* ('spoons'), and when the Russians borrowed the device they merely translated its name. It consisted of a round hollow case of brass to which were fixed, at an angle of 60°, two brass tubes adorned with jingles (see illustration). These tubes were joined at the extremity of the angle by a solid brass arm, by which the instrument was held. The overall shape was that of a lyre. It was used in pairs and played by clashing the two round hollow cases together. The lozhky were much favoured by the Russian cavalry and often used to accompany the soldiers' songs. They became a special feature particularly in the bands of the Uhlans, which usually comprised a clarinet, oboe, tambourine, Turkish crescent, a pair of

One of a pair of lozhky (Musée des Instruments de Musique, Brussels Conservatory)

cymbals and the lozhky. Specimens are in the Musée des Instruments de Musique of the Brussels Conservatory (nos.883–4).

H.G. FARMER/R

LP [long-player; long playing record]. A 12-inch vinyl phonographic disc with a playing speed of 33⅓ r.p.m. The rise of the LP resulted from a long-running dispute inside the music industry during the 1930s and 40s between two major American phonograph companies, RCA Victor and Columbia. The ten-inch shellac 78 r.p.m. was the standard format in the 1930s, but in 1948 Columbia introduced the LP, which provided superior sound quality, was more durable and could hold more musical information. RCA responded with the seven-inch 45 r.p.m. disc, but in 1952 the rival companies ensured that the LP became the format predominantly for classical music, while the single was used for popular music. From its outset the LP was thus associated with what were considered more serious listening habits, and a burgeoning market developed around its superior sound reproduction. This market was overwhelmingly male, and for some included an appreciation of faithful sound reproduction *per se*.

By the late 1960s and early 70s stereo sound and multi-tracking were becoming the norm, and progressive rock artists such as Pink Floyd, Led Zeppelin and Mike Oldfield used the LP to encode increasingly more intricate sounds. In the early 1990s sales of LPs had decreased dramatically as the format was usurped by the CD (compact disc): in 1992 world sales figures for LPs were 126·1 million and 1152·9 million for CDs. By the late 1990s a small but committed market existed for vinyl among collectors, traders and a minority who believed in the vinyl LP's aesthetic superiority over the CD.

Lu'ah zarqa. Lists of signs in Hebrew EKPHONETIC NOTATION. *See also* JEWISH MUSIC, §III, 2(ii).

Lualdi, Adriano (*b* Larino, Campobasso, 22 March 1885; *d* Milan, 8 Jan 1971). Italian composer, conductor and writer on music. He studied music in Rome and then in Venice with Wolf-Ferrari. After gaining his diploma in 1907, he began a career as a conductor. In the 1920s he also became active as a music critic: among his numerous writings, *Viaggio musicale in Italia* is particularly valuable for the light it throws on the Italian musical world of the time. An ardent fascist, Lualdi was 'elected' to parliament in 1929 as representative of the Sindacato Nazionale dei Musicisti. He was an organizer of the first few Venice Festivals (1930–34) and director of the conservatories of Naples (1936–44) and Florence (1947–56).

Lualdi's association with fascism, which conditioned his teaching and organizing activities as well as his polemics, led to his being overrated in the 1930s, but in due course aroused such antagonism that his reputation may have suffered unfairly. Undoubtedly he was an imperfect composer, who rarely achieved stylistic unity and could sink to the abysmal level of *Lumawig e la saetta*. Yet the best pages of *Le nozze di Haura* and *La figlia del re* (e.g. Damara's invocation to the night and the whole of Act 3, scene i in the latter work) show that his evocative powers and sense of colour were considerable. Comparable qualities still appear in some later operas, like *La luna dei Caraibi*, with its recurrent use of an offstage negro spiritual, or the very eclectic *Il testamento di Euridice*, where the search for appropriate picturesque detail led him to use the ancient Greek *Epitaph of Seikilos* as a leitmotif. In comic and satirical works, too, Lualdi was resourceful: the small-scale and unpretentious *Le furie di Arlecchino* remained close enough to Wolf-Ferrari to win easy and widespread success; but the freakish libretto of *Il diavolo nel campanile* (freely based on Poe) is matched by a bizarre score, whose multiple musical parodies create reckless stylistic non-sequiturs, ending in

a deliberate musical chaos (with several superimposed tonalities) to underline the grotesque turmoil on the stage. In the revised version, first staged in 1954, this finale was replaced by an ingenious parody of 12-note technique.

WORKS
(selective list)

Op. Le nozze di Haura (1, L. Orsini), 1908, rev. version, 1913, Italian Radio, 19 Oct 1939, stage, Rome, Opera, 18 April 1943; La figlia del re (3, Lualdi), 1914–17, Regio, 19 March 1922; Le furie di Arlecchino (1, Orsini), Milan, Carcano, 7 May 1915, rev. version, Buenos Aires, Colón, 19 June 1925 (or ?1924); Il diavolo nel campanile (grottesco, 1, Lualdi, after E.A. Poe), 1919–23, Milan, Scala, 12 April 1925, rev. version, Florence, Comunale, 21 May 1954; La grançeola (1, A. Lualdi, after A. Bacchelli), Venice, Goloni, 10 Sept 1932; Eurydikes diatheke (Il testamento di Euridice) (4, Lualdi, after Gk. and Lat. poems), ?c1940–62, RAI, 22 Nov 1962; La luna dei Caraibi (1, Lualdi, after E. O'Neill), 1944, Rome, Opera, 1953

JOHN C.G. WATERHOUSE

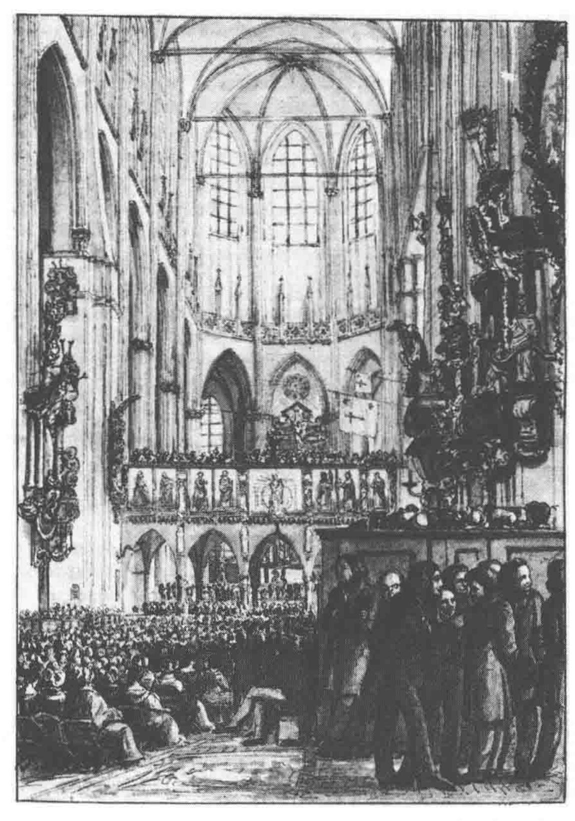
Luard-Selby, Bertram (*b* Ightham, Kent, 12 Feb 1853; *d* Brigg, Lincs., 26 Dec 1918). English organist and composer. After studying in Leipzig with Jadassohn and Reinecke, he became organist of St Barnabas, Marylebone, and Highgate School (1876), Salisbury Cathedral (1881–3), St John's, Torquay (1884), St Barnabas, Pimlico (1886), and Rochester Cathedral (1900). He also gave chamber music concerts in London in 1880. His works include two unpublished operas (*The Ring*, 1886; *Adela*, 1888, Nottingham), cantatas, orchestral music (including *Idyll*, 1897), chamber music, piano and organ pieces, 16 anthems and ten services. However, he was best known for his incidental music to *Helena in Troas*, a drama by John Todhunter and E.W. Godwin (London, Hengler's Circus, 17 May 1886), and a musical duologue, *Weather or No* (London, Savoy, 10 August 1896). The latter was also popular in Germany and Austria as *Das Wetterhäuschen*.

J.A. FULLER MAITLAND/ JOHN WARRACK

Luart [Lawaert], **Emma** (*b* Brussels, 14 Aug 1892; *d* Brussels, 26 Aug 1968). Belgian soprano. She trained at the Brussels Conservatory and after singing in the summer season at Ostend in 1913 made her official début at The Hague the following year. From 1918 to 1922 she sang at the Monnaie in Brussels, appearing mostly in lyric roles such as Louise, Mélisande and Manon which became her most famous part. She then transferred to the Opéra-Comique in Paris where she remained till World War II. Her début role there was Lakmé, and premières in which she took a leading part included Samuel-Rousseau's *Le bon roi Dagobert* and Gabriel Pierné's one-act *Sophie Arnould*. At Monte Carlo in 1923 she sang in the first performances outside Russia of Musorgsky's *The Fair at Sorochintsï* with John McCormack. On her retirement she taught singing in Brussels. A characteristically bright 'French' voice is heard in her recordings along with a touching expressiveness, especially in the excerpts from *Manon*.

J.B. STEANE

Lübeck. Port and city in Germany. The earliest surviving music in Lübeck is a neumatic manuscript (*c*1200) presented to the cathedral by Bishop Dietrich. In 1248 a Kantor was appointed at the cathedral choir school, where the pupils were divided into *pueri chorales* and *clerici chorales*. A choir consisting of six boys and two 'sankmeistere' was formed at the municipal Marienkirche in 1462; its duties included the performance of polyphony (1468). Between 1366 and 1399 an organ was installed there. Records of 33 vellum manuscripts, of which 13 survive, indicate that public worship flourished at all the churches. Evidence of an early secular musical life is provided by an association of minstrels, which had a *comes joculatorum* in its service in 1334, and a *magister fistulorum* in 1416. The position of *Spielgreve* (chief player) appeared for the first time in 1457 and was not abolished until 1811. Another guild, the Marienbrüderschaft der Musicanten und Spielleute zu St Catherinen, is believed to date from the 13th century and was active in both sacred and secular music. After the Reformation it was renamed and became a Chor- und Köstenbrüderschaft ('fellowship for singing and dining').



As a free imperial city Lübeck employed two trumpeters; the best-known was Gabriel Voigtländer (1626–33). The title *Ratsmusikant* first occurs in 1474; there were originally 12 of these municipal musicians, but by the 17th century there were only seven. Chief among them were the violinist-composers Thomas Baltzar, Nicolaus Bleyer and Nathanael Schnittelbach. The Reformation resulted in a revival of liturgical music through the foundation of the Katherineum Lateinschule; its pupils made up the Chorus Symphoniacus which sang at the Marienkirche under the direction of the Kantor. Numerous collections in the libraries of the Marienkirche and the Petrikirche testify to the predominance of polyphony. Distinctive features of Lübeck's musical life were the precocious occurrence of Passion music (early 16th century) and the custom of playing individual sections of the Mass and Vespers on the organ.

The new genres of sacred concerto and cantata became established in Lübeck in the early 17th century, particularly after the appointment of Tunder as organist in 1641. His preludes and chorale fantasias for organ, solo motets and sacred concertos show the influence of recent Italian music; they were performed at his 'Abendspielen' and at organ recitals given before audiences of city merchants. Buxtehude, succeeding Tunder in 1668, developed these concerts into the renowned ABENDMUSIK series, which continued until 1810. Lübeck's oratorio tradition was developed by Buxtehude's successors J.C. Schieferdecker (1707–32), J.P. and C.A. Kuntzen (1732–57 and 1757–81) and J.W.C. von Königslöw (1781–1833); five performances of oratorios with a common biblical theme were given annually during Advent. However, compared with the number of public concerts, with their performances of Passion music by C.H. Graun, Telemann, Pergolesi and Haydn, liturgical music continued only on a limited scale in the late 18th century. At Michaelmas 1801 the post of Kantor ceased to exist, and the school choir was no longer called upon for church services. Königslöw did much to promote concerts in the city; in addition to oratorios his programmes included evenings of symphonies and arias.

The appointment in 1832 of Spohr's pupil Gottfried Herrmann as organist of the Marienkirche, director of municipal music and singing teacher at the Katherineum further stimulated the musical life of the city. Under his leadership the Gesangverein was founded in 1833, subscription concerts were given regularly, and the first Norddeutsche Musikfest was held in Lübeck in 1839, with 410 participants. In 1845 the organization of concerts was taken over by the newly founded Musikverein. The Gesangverein became the Singakademie in 1874, and mounted a series of oratorio performances.

An opera house was built in 1753 and, after staging numerous productions by visiting companies, eventually built up a permanent company with a repertory of its own. It was demolished in 1857, and in the following year the Theater der Casino-Gesellschaft was inaugurated with *Der Freischütz*. In the second half of the century the theatre's repertory was dominated by the works of Wagner. In 1905 the theatre was closed to be replaced by a larger one in 1908; this was restored in 1996. The Verein der Musikfreunde was founded in 1896 and assumed responsibility for the concert and theatre orchestra, which subsequently passed to the civic authorities in 1908. The orchestra remains active, giving 12 symphony concerts annually, in addition to participating in numerous productions of operas, operettas and musicals; it forms the backbone of musical activity in the city. Its principal conductors have included Furtwängler, Abendroth, Gerd Albrecht and Bernhard Klee. In 1994 it moved into a new hall, the Musik- und Kongresshalle, which has also attracted touring ensembles to the city. An oratorio chorus was formed in 1923 by the amalgamation of a female-voice choir with the Lübecker Lehrergesangverein; since 1933 it has been known as the Lübeck Singakademie. It gives an oratorio concert every winter with the town orchestra.

Walter Kraft, who became Marienkirche organist in 1929, resumed the Abendmusik tradition, with cantata and oratorio performances and organ recitals. A church orchestra was founded in 1938, performing on old instruments; it continued as a chamber ensemble for church assemblies. A boys' choir was formed in 1936 from the best singers from the schools of Lübeck, and it has developed an international reputation. Distler was organist at the Jakobikirche (1931–7) and Bruno Grusnick Kantor (1930–72). Grusnick led the Sing-und Spielkreis, with whom he gave the first performances of most of Distler's vocal works as well as annual performances of the St Matthew Passion from 1949. Manfred Kluge was organist at the Ägidienkirche and later the Jakobikirche during the period 1928–71, and introduced the works of Messiaen and Stravinsky.

Interior of the Marienkirche during a concert: drawing by Carl Julius Milde, pen and ink, 1839 (St Annen-Museum, Lübeck)

The Musikhochschule in Lübeck was founded in 1946, becoming the Schleswig-Holstein Musikakademie und Norddeutsche Orgelschule in 1950; in 1973 it achieved the status of a Hochschule für Musik and in 1991 became a branch of the Brahms Institute. It holds important sources for Brahms and his circle. A music school for children of pre-school age serves to develop musical gifts at an early stage. The Stadtbibliothek dates from 1622 and has an extensive collection of early music; it also houses the archive of Distler, Grusnick, Kluge and other Lübeck musicians. Since 1996 the Schleswig-Holstein Festival has opened with a concert in Lübeck.

GEORG KARSTÄDT/ARNDT SCHNOOR

Lübeck, Vincent (i) (*b* Paddingbüttel, Dorum, Land Wursten, *c*Sept 1654; *d* Hamburg, 9 Feb 1740). German composer, organist and teacher. He was the son of another Vincent Lübeck (*b* ?Glückstadt; *d* Flensburg, 1654), who had worked as an organist in Glückstadt and, from 1647, at the Marienkirche, Flensburg, where he was succeeded in 1654 by Caspar Förckelrath. Förckelrath married the widow and was the younger Vincent's first teacher; according to Syré (1999), Vincent may also have studied with Andreas Kneller, with whose keyboard music his own shows parallels. Towards the end of 1674 Lübeck became organist of St Cosmae et Damiani, Stade, near Hamburg, marrying, as was a custom, his predecessor's daughter, Susanne Becker. The fine organ that Arp Schnitger completed there in 1679 was no doubt a factor that persuaded him to remain until 1702. His brilliant reputation then won him the appointment of organist of the Nikolaikirche, Hamburg, which he held until his death. It too had a Schnitger organ, a four-manual instrument of 67 stops, one of the largest in the world, that was considered the best in a prosperous musical city. In his postscript to F.E. Niedt's *Musicalische Handleitung* (Hamburg, 2/1721), Mattheson summed up as follows: 'This extraordinary organ ... also has an extraordinary organist. But how to extol someone who is already greatly renowned? I need only give his name, Vincent Lübeck, to complete the whole panegyric'. Numerous contemporary documents attest to his wide reputation as an organ consultant throughout north Germany. He attached particular importance to reed choruses, even in smaller organs. On several occasions he passed judgment on Schnitger's work, not only in the churches of large cities such as Hamburg (Nikolaikirche, Georgenkirche, Jacobikirche) and Bremen (St Stephani Cathedral), but also in those of Oberndorf (Georgenkirche), Hollern (St Mauritius), Sittensen (St Dionys) and other smaller places. As a teacher he was much sought after and commanded as much as 20 thaler a month from articled pupils, more than he received in salary as organist. His most important pupils included C.H. Postel and M.J.F. Wiedeburg; he also taught two of his sons, Peter Paul (*b* Stade, 24 April 1680; *d* Hamburg, 16 Aug 1732), who followed him at Stade, and VINCENT LÜBECK (ii).

Despite Lübeck's frequent opportunities to display his gifts as a composer and performer, especially in the Saturday Vesper service, only nine organ works by him are known. Yet even these few abundantly demonstrate the commanding position he occupied, together with Buxtehude and Bruhns, in north German organ music about 1700. His praeludia have been described as virtually the last link between the north German organ toccata and those of Bach (see Syré, 1999), though Lübeck attached less importance to the concept of *stylus fantasticus*. In general his style, like that of Bruhns, derives from Buxtehude, particularly in its polyphonic writing, the character of the fugue subjects and a fondness for double fugue. On the other hand Buxtehude rarely approached either of them in virtuosity. Of the seven praeludia and fugues in Beckmann's edition, two (in F and G) are now thought to be by Vincent Lübeck (ii). All fall into clearly defined sections. The structure of the Praeludium in E is similar to the five-section form that Buxtehude codified: brilliant toccata-like prelude, 4/4 fugue, middle section (free or fugal), 3/4 (4/4) fugue, and concluding toccata. The Praeludia in D minor (toccata, fugue and toccata) and C minor (toccata and fugue) are perhaps later works; the latter's short length and final cadence on the dominant suggest that it is incomplete. Like Buxtehude and Bruhns, Lübeck often unified those loose structures with subtle thematic relationships, including transformation of the fugue subject as in the Praeludium in G minor. Brilliant scales, trills in 3rds and 6ths, long pedal solos and, in the G minor work, occasional two-part writing for the pedals attest to his virtuosity and the inspiration he derived from the full choruses of the Stade and Hamburg organs. Of his two chorale settings, the extended fantasia on *Ich ruf zu dir* may have been composed for liturgical use during the Communion. In its exploitation of many techniques it invites comparison with Buxtehude's great chorale fantasia on *Nun freut euch*. The melody appears not only in contrapuntal settings and with several coloratura-like passages but in echo and toccata-like passages as well. The incomplete partite on *Nun lasst uns Gott, dem Herren* also use the echo device but adhere too strictly to the basic harmony of the chorale.

Many of the brilliant qualities of the organ works are present in Lübeck's published suite – even the Allemande is scarcely restrained. Repeated notes also characterize the fugue subject, but in a much more vigorous context than in the organ pieces. The curious chaconne *Lobt Gott ihr Christen allzugleich*, printed as an extra movement, does nothing to enhance Lübeck's reputation. Five sacred cantatas are extant and 14 others are known from titles or partial texts. All date from Lübeck's time in Stade, and the librettos he set include some supplied by the Kantor Eobaldus Laurentii between 1693 and 1702. They give the impression of being intended for a choir and instrumental ensemble of very modest attainments. The Stader Ratsmusikanten (two violins, two bass viols and a violone) provided a string consort; wind and brass players came from the local Swedish military or from musicians. The dullness of the cantata *Gott wie dein Nahme* is due in part to the restrictive writing for the three high obbligato instruments, presumably trumpets in the clarino register, as well as to the stereotyped rhythms. *Willkommen süsser Bräutigam* is a simple, lyrical work, popular in Germany at the Christmas season. *Hilff deinem Volck* is formally a stronger work; it also displays greater sensitivity to word-setting and incorporates a bravura recitative for bass. The other two cantatas, with separate instrumental movements, choruses and ritornello arias, are probably the best. *Es ist ein grosser Gewinn, wer gottselig ist* and *Ich hab hier wenig guter Tag* were commissioned by the Swedish administration in Stade in memory of the Swedish Queen Ulrica Eleanor. Lübeck wrote them on 10–14 November 1693 and they were performed on November 28.

HUGH J. McLEAN

Lübeck, Vincent (ii) (*b* Stade, 2 Sept 1684; *d* Hamburg, bur. 17 Jan 1755). German organist and composer, son of VINCENT LÜBECK (i). He studied the organ with his father and became organist of Job's Hospital, Hamburg, in 1706. With J.S. Bach and six others he was a candidate for the post of organist at the Jakobikirche, Hamburg; like Bach, he withdrew when it appeared that money, rather than merit, would decide the outcome. In 1724 he went to the Georgenkirche, Hamburg, and from 1735 he assisted his elderly father at the Nikolaikirche, where he succeeded him. His works have been confused with those of his father, and scholars have tried to define his output using stylistic criteria. According to Beckmann, the short Praeludium in F and the longer Praeludium in G, which share similar figuration, are both by the younger Lübeck. Keller identified him as the composer of some organ pieces signed 'V.L.' that came to light in Hamburg in 1928, one of which, *In dulci jubilo*, he included in an appendix to his edition of the older composer's organ works (Leipzig, 1941). All these works are simple in conception and reveal nothing of the craft and virtuosity shown in his father's organ compositions.

HUGH J. McLEAN

Lyubimov, Aleksey (*b* Moscow, 16 Sept 1944). Russian pianist. He began his studies at the age of eight with Anna Artobolevskaya at Moscow's Central Music School, and between 1963 and 1968 studied with Heinrich Neuhaus and Lev Naumov at the Tchaikovsky Conservatory. He took the first prizes in the All-Russian piano competition (1960) and the Rio de Janeiro international competition (1965). European tours with the Moscow PO and Leningrad PO (1975–7) introduced him to audiences outside Russia. Lyubimov has mastered a repertory that spans the entire range of keyboard music from the early Baroque period to the latest works of the contemporary avant garde. Between 1968 and 1975 he gave the USSR premières of works by Cage, Schoenberg and Webern as well as of new works by Gubaidulina, Schnittke and Valentin Sil′vestrov. He has also performed concert cycles in Russia on period instruments of keyboard music composed between 1600 and 1900. Lyubimov has toured in the USA frequently since his New York début in 1991. Among his many recordings, on both early and modern pianos, is an admired cycle of Mozart's piano sonatas. He has assembled a collection of historical keyboard instruments and edited an anthology of Russian keyboard music of the 18th and 19th centuries.

HOWARD SCHOTT

Lubin, Germaine (Léontine Angélique) (*b* Paris, 1 Feb 1890; *d* Paris, 20–27 Oct 1979). French soprano. She studied at the Paris Conservatoire (1909–12) and with Litvinne and Lilli Lehmann. She made her début as Antonia in *Les contes d'Hoffmann* at the Opéra-Comique, where she also sang Strauss's Ariadne, Fauré's Penelope, Charlotte, Louise and Camille (*Zampa*). At the Opéra (1916–44) she sang a very varied repertory, at first lyric roles such as Marguerite (Gounod and Boito), Juliet, Thaïs, Aida and Reyer's Salammbô; later, heavier roles including Agathe, Fidelio, Cassandra, Elsa, Eva, Elisabeth, Sieglinde, Electra, Octavian and the Marschallin. She created Nicéa in d'Indy's *La légende de Saint Christophe* (1920), Empress Charlotte in Milhaud's *Maximilien* (1932) and Gina, Duchess Sanseverina in Sauguet's *La chartreuse de Parme* (1939). She was admired for her classical dignity and repose in Gluck's *Alceste* and *Iphigénie en Aulide*, as Telaira in Rameau's *Castor et Pollux* (Maggio Musicale, 1935). She was also acclaimed for her singing of Dukas' Ariane in the London première at Covent Garden in 1937.

Lubin's friendship with the Wagners and her sympathy with Germany (though she described herself as 'a quarter Polish, a quarter Arab and half Alsatian') brought her career to an abrupt close in 1944 after the German occupation of Paris. She was imprisoned for three years and thereafter sang only in recitals (1952 and 1954). Her rounded, expressive voice can be heard on a number of

Germaine Lubin as Wagner's Isolde

recordings, of which several Wagner extracts are especially noteworthy.

MARTIN COOPER/ELIZABETH FORBES/R

Lubin, Steven (*b* Brooklyn, NY, 22 Feb 1942). American pianist and musicologist. He studied philosophy at Harvard, piano at the Juilliard School of Music and took the doctorate in musicology at New York University (1974), with a dissertation entitled *Beethoven's Development Sections in Middle-Period Beethoven.* His piano teachers included Nadia Reisenberg, Seymour Lipkin, Rosina Lhévinne and Beveridge Webster. When builders in the 1960s began to make accurate replicas of Viennese Classical fortepianos, Lubin became an early exponent, constructing an instrument of his own and cultivating an appropriate performance style. As a groundbreaker in the American early music movement, he introduced the fortepiano to New York audiences at his Carnegie Hall début in 1977. He studied the problems of retrieving the sound and manner of the original performances of Mozart piano concertos, and founded a Classical period orchestra, the Mozartean Players, that performed throughout the 1980s at the Lincoln Center and the Metropolitan Museum in New York, with Lubin as soloist and conductor. In these roles he issued a series of recordings of Mozart piano concertos. Meanwhile, he began to tour as a recital and concerto soloist in Europe and North America, playing both the modern piano and the fortepiano.

In 1987 Lubin undertook, with Christopher Hogwood and the *Academy of Ancient Music*, the first recorded cycle of Beethoven's concertos on period instruments. This cycle, which strove to reproduce the instrumental sound of the premières of each of the five works, won widespread praise. Lubin's other recordings include Schubert's piano trios and 'Trout' Quintet.

EDWARD MURRAY

Lubotsky, Mark Davidovich (*b* Leningrad [now St Petersburg], 18 May 1931). Russian violinist. He studied at the Central Music School in Moscow and at the Moscow Conservatory with Abram Yampol'sky and David Oistrakh, and won prizes at international competitions in Salzburg (1956) and Moscow (1958). He gave solo recitals and concerts in Europe, Scandinavia, the USA, and Australia, Japan and Israel, and made his British début with Britten's Violin Concerto, which he played at the 1970 Promenade Concerts and which he recorded with the composer conducting; he gave the Russian première under Kirill Kondrashin. He taught at the Gnesin Institute, Moscow (1967–76), the Sweelinck Conservatorium, Amsterdam (1976–1986), and in 1986 was appointed to the Hochschule für Musik, Hamburg. He is a notable exponent of the works of contemporary composers, and gave the first performance of Schnittke's First Violin Concerto; he also recorded Schnittke's Piano Trio (with Irene Schnittke and Rostropovich). His playing is distinguished by deep emotional feeling as well as elegant technique.

MARGARET CAMPBELL

Luca, D. (*fl* Padua, ? 1401–24). Italian composer. He is named as the composer of a Gloria in the manuscript *I-Bc* Q15 (no.41 ff.44v–5). The 'D' may stand for 'Dominus', indicating priestly status. He may possibly be identified with one or more musicians active in Padua at this time: Luca, singer at the abbey of S Giustina, was a witness when Ciconia took possession of his first Paduan benefice in 1401; the name 'Dominus presbiter Luca' follows Ciconia's on a Padua Cathedral salary list in 1411; 'Luca da Lendinara' succeeded Ciconia as *custos* following the latter's death, a post for which his musical competence was tested.

A further reference is found in Prosdocimus de Beldemandis's *Tractatus musice speculative*, which is dedicated to Luca 'de castro lendenarie policinii rudigiensis oriundus sacerdos' (Luca da Lendinara, priest, from the Polesine di Rovigo), calling him his brother and intimate friend, with whom from their youth he had read through many volumes of music theory and together found errors in the *Lucidarium* of Marchetto da Padova. Clercx stated that Luca died by 1424; more than one man could be involved, though there is musical support for all candidates.

The three-part Gloria is composed sectionally, with changes of time signature, in the Italian style of Ciconia and his successors.

MARGARET BENT

Luca, Giuseppe de. *See* DE LUCA, GIUSEPPE.

Luca, Sergiu (*b* Bucharest, 4 April 1943). American violinist of Romanian birth. He began his musical studies at the

age of four, and the following year entered the Bucharest Conservatory. In 1950 he moved with his parents to Israel, and two years later made his solo début with the Haifa SO. After a brief period of study in London with Max Rostal, he studied at the Berne Conservatory (1958–61), then emigrated to the USA and enrolled in the Curtis Institute of Music, Philadelphia, where his mentor was Galamian. He was a finalist in the 1965 Leventritt Competition, and the same year he won the Philadelphia Orchestra Youth Auditions and the Sibelius Competition, which led to his American début that year with the Philadelphia Orchestra, playing Sibelius's Concerto. In 1966 he became an American citizen. He was founder and director of the Chamber Music Northwest festival in Portland, Oregon (1971–80) and professor of music at the University of Illinois (1980–83); in 1983 he was appointed professor of violin and violinist-in-residence at Rice University in Houston. From 1983 to 1988 Luca was music director of the Texas Chamber Orchestra, and in 1988 he became director of the newly founded Houston arts organization Da Camera. He plays a wide repertory, ranging from Baroque music (with which he has a special affinity) to contemporary works. His violin is the 1733 'Earl of Falmouth' made by Carlo Bergonzi in Cremona, and his bows are of a similar vintage.

GEORGE GELLES/R

Lucacich [Lucacih], **Ivan.** *See* LUKAČIĆ, IVAN.

Lucario, Giovanni Giacomo (*fl c*1547). Italian composer. He lived in Naples, where he was acquainted with Giovanthomaso Cimello, who was probably his teacher. 15 of Lucario's motets and one piece by Cimello are included in Lucario's four-voice *Concentuum qui vulgo motetta nuncupantur liber primus* (Venice, 1547[7]; ed. in SCMot, xxii, 1987) dedicated to Bernardino Giovanni Carboni, a Neapolitan aristocrat; it is clear from an epigram by Cimello following the dedication that the two composers were closely associated. Another four-voice motet, *Omnia quae fecisti*, is in a Nuremberg collection (*RISM* 1556[9]). Although Fétis maintained that Lucario was a priest and *maestro di cappella* at S Croce, Venice, his statement cannot be supported by known documentary sources.

PIER PAOLO SCATTOLIN

Lucas, Charles (*b* Salisbury, 28 July 1808; *d* Battersea, London, 23 March 1869). English cellist and composer. He was a chorister at Salisbury Cathedral, 1815–23, then entered the RAM, where he studied the cello with Robert Lindley and composition with William Crotch. In 1830 he left the RAM and joined Queen Adelaide's private band. He performed in several London orchestras, eventually taking Lindley's place as principal cellist. A keen chamber musician, he played in the Quartett Concerts (later Dando's Quartett Concerts) from 1836 to 1859 and participated in the English premières of many works, among them Beethoven's 'late' string quartets. He also ran subscription chamber music concerts at his home from 1845 until about 1854.

In 1832 Lucas succeeded Cipriani Potter as conductor at the RAM, directing two performances of Beethoven's Symphony no.9 in 1835–6, and later conducted at the Philharmonic Society, the Concerts of Ancient Music and the Choral Harmonists' Society. In 1839 he became organist at the Hanover Chapel, Regent Street. He was vice-president of the Musical Institute, 1851–3, and a director of the Philharmonic Society, 1856–69. From 1856 to 1865 he was a partner in the publishing firm of Addison, Hollier & Lucas (from 1863 Addison & Lucas). He was appointed principal of the RAM in 1859, but poor health forced him to resign in 1866.

Lucas's published compositions include anthems, a canonic setting for four voices of the Magnificat which won the Gresham Prize in 1836, and an opera *The Regicide* (vocal score, 1840). He also wrote string quartets, overtures and three symphonies, and edited *Esther* for the Handel Society (1845). His son Stanley Lucas (*b* London, 1834; *d* London, 24 July 1903) served as secretary of the Royal Society of Musicians (1862–1903) and the Philharmonic Society (1866–80), and was a partner in the publishing firm of Stanley Lucas, Weber & Co. from 1873 to 1899.

CHRISTINA BASHFORD

Lucas, Clarence (*b* Grand River Reservation, ON, 19 Oct 1866; *d* Sèvres, 1 July 1947). Canadian composer and conductor. He began serious study of the piano, the trombone and harmony in Montreal in about 1878. In 1885 he went to Paris where he studied with G.-E. Marty and, at the Conservatoire, with Theodore Dubois. In 1889 he returned to Canada, where he taught at the Toronto College of Music and the Hamilton Wesleyan Ladies' College. He also appeared as conductor of the Hamilton Philharmonic Society. He left Canada again in the next year to teach theory and composition at the Utica Conservatory. In 1893 he went back to Europe, working in London as a freelance journalist and, for nine years, as an editor for Chappell. He directed the Westminster Orchestral Society for one season and was a conductor for Edwardes's touring musical comedies, giving the first performance of his own *The Money Spider* in London in 1897. Over the next few years he conducted *c*500 performances of musical shows in England and America, including a 1906 Richard Mansfield production of *Peer Gynt* using Grieg's score. Lucas's opera *Peggy Machree* toured the USA in 1908. In the same year he joined the editorial staff of the New York *Musical Courier*. He moved once more to London in 1919 and worked at a variety of musical jobs in Paris and London until his death. A prolific and sometimes imaginative exponent of an uncomplicated, conservative style, Lucas worked best in small formal units. His larger orchestral overtures tend to be episodic. Highly successful in its day, his music was performed by Wood, Mann, Hambourg and other leading musicians. He contributed regularly to journals in England and the USA and published *The Story of Musical Form* (London, 1908; repr. Boston, 1977).

WORKS
(*selective list*)

Stage: The Money Spider (comic op), London, 1897; additional numbers for P. Bidwell: Peggy Machree (op), Grimsby, 1904; *c*5 other works

Choral: The Birth of Christ, op.41, T, chorus, orch (1901); Requiem Mass, chorus, org, 1936, rev. chorus, orch, 1942; many partsongs
Orch: Othello, ov. (1898); As you like it, op.35, ov. (1899); Macbeth, op.39, ov. (1901); Ballade, op.40, vn, orch (1901)
Pf: Prelude and Fugue, f, op.38 (1900); *c*40 short genre pieces
*c*90 songs, 20 org pieces; many transcr. and arrs.

CARL MOREY

Lucas, Leighton (*b* London, 5 Jan 1903; *d* London, 1 Nov 1982). English composer and conductor. He came to music through dance and drama, as a member of Diaghilev's Ballets Russes (1918–21) and the Birmingham Repertory Theatre (1921–3). Conducting became his principal occupation after he directed a performance of Boughton's *The Immortal Hour* (1923). He was musical director to the Markova-Dolin Ballet (1935–7) and conductor for the Arts Theatre Ballet (1940–41). He joined the Royal Air Force in 1941 and on demobilization in 1946 formed his own orchestra, giving concerts of unfamiliar modern music including much by French composers. He gave educational concerts for Middlesex County Council, broadcast concerts for the BBC, and lectured on ballet, music and theatre. His pre-war compositions include a *Missa pro defunctis* (1934, in memory of Elgar, Delius and Holst) and various theatre works, notably the ballet *Death in Adagio*, after Domenico Scarlatti (1936). He wrote much music for films, including a score for *Ice Cold in Alex* (1958), and his theatre orchestration included that of Vivian Ellis's show *Follow a Star* (1930) and, in collaboration with Phil Cardew, A.P. Herbert's musical *Tough at the Top* (1949). He also wrote for radio (e.g. for Richmal Crompton's 'Just William' series, from 1946, and for Patric Dickinson's *Theseus and the Minotaur*, 1948). From 1956 he concentrated on orchestral and concerted music.

WORKS
(*selective list*)

Ballets: Death in Adagio [after D. Scarlatti], 1936; The Horses, 1945–6; Tam O'Shanter (2 scenes), 1972–3, unperf.
Other stage works: The Wolf's Bride (masque for singing, speech and dancing), 1934; The Ghost of Abel (drama, after Blake), 1934; Kanawa (Japanese masque), 1935
Choral: Every Wind that Blows, vv, 1932; Masque of the Sea, vv, orch, 1932; Missa pro defunctis, solo vv, vv, orch, 1934
Orch: La Goya, 2 dance impressions, 1932; Sinfonia brevis, hn, 11 insts, 1935; 5 Sonnets, pf, orch, 1937; L'Europe galante [after Campra], 1939; Quetzalcoatl Dances, 1939; Sonatina conertante, sax, orch, 1939; Suite française, 1940; A Litany, 1942; Vc Concertino, 1956; Prelude, Aria and Finale, va d'amore, orch, 1956; Cl Conc., 1957; Concert champêtre, vn, orch, 1959; Ballet de la reine, suite, 1960; Birthday Variations, 1970
Chbr: Str Qt, 1935; Disquisition, 2 vc, pf 4 hands, 1966
Film scores, incl. Target for Tonight (1941); The Dam Busters (1945) [collab. Coates]; Yangtse Incident (1957); Ice Cold in Alex (1958)

Principal publishers: Chester, Eulenburg

RONALD CRICHTON/R

Lucatello [Lucatelli], **Giovanni Battista.** *See* LOCATELLO, GIOVANNI BATTISTA.

Lucca. City in Italy, capital of the province of Lucca in Tuscany. There was a school in the cathedral of S Martino by the middle of the 8th century, and music undoubtedly formed part of the curriculum. Subsequent documents preserve the names of teachers at a singing school, Tempertus in 809 and Gausperto in 823. After that date any liturgical musical manuscripts were compiled in Lucca in a type of central Italian notation. One (*I-Lc* 603), from the 12th century, also preserves two interesting examples of two-part polyphony; evidence of an interest in polyphony, as well as the importance assigned to musical education, is provided by the treatise *Summa artis musicae* (*I-Lc* 614), attributed to Guglielmo Roffredi, Bishop of Lucca from 1174 to 1190. By the 13th century there were three schools: at the cathedral, at S Alessandro Maggiore and at S Maria Forisportam.

From the 14th century, when the city became an independent duchy and then a republic, the cathedral and the city government were the principal promoters of musical life. In 1306 two organs were acquired, and in 1357 an organist, Matteo da Siena, was employed. By 1308 the Comune had instrumentalists in its service and in 1372 the newly established republic founded the small Cappela della Signoria, which survived until 1517. Music played in the 14th century survives in *laude* and motet fragments held in the Archivio di Stato, which also houses the Lucca Codex, or Mancini Codex (*I-LA* 29), an important source of Ars Nova music compiled at the beginning of the 15th century.

In 1467 the English Carmelite John Hothby, a theoretican, teacher and composer, settled in Lucca; he had been summoned by the chapter of S Martino and was kept on by the republic. His 20 years in Lucca created the basis for the subsequent flourishing of polyphony. New organs were built in the 15th century in S Maria dei Servi, S Maria Forisportam and S Piercigoli. Those making the purchase objected to a first organ constructed for the cathedral, and in 1480 a second was commissioned from Domenico di Lorenzo. The instrument, built between 1481 and 1484 and one of the most important Renaissance organs, was enlarged by Luigi and Benedetto Tronci in 1792. Together with an organ built in 1615 by Andrea and Cosimo Ravani, it was replaced in 1962 by an electric organ. Among the organists at S Martino was Gioseffo Guami, the most famous member of a Lucca family of musicians. The organ tradition established an important school of organ building.

In 1543 the republican government established the Cappella di Palazzo, made up of five instrumentalists who were required to sing as necessary. Between 1557 and 1593 they were directed by Nicolao Dorati, the first Lucca composer whose name is known and founder of the city's oldest musical family. The *cappella* must quickly have achieved renown as in 1585 it was engaged for the wedding of Carlo Emanuele I of Savoy and Maria Caterina of Spain at Zaragoza. Giacomo Puccini, great-great-grandfather of his more famous namesake and founder of the family that dominated musical life in Lucca during the 18th and 19th centuries, directed the *cappella* from 1739 to 1781 (the family house holds a museum and a research institute dedicated to the better-known Giacomo, born there in 1858). Among other eminent Lucca composers who played in the *cappella* was Luigi Boccherini (1764–7). Expanded and reorganized according to the requirements of the day, it flourished until 1805 when it was suppressed by the Baciocchi princes.

At the end of the 16th century three seminaries (S Martino, S Michele and S Giovanni) were founded, and they became centres of musical culture. 1584 saw the establishment of the Accademia degli Oscuri, which often involved musicians from the *cappella* in its activities. In 1805 it took the name of the Accademia Napoleone and

it is now called the Accademia Lucchese di Scienze, Lettere ed Arti.

The Congregazione degli Angeli Custodi organized sacred vigils from 1627. The first oratorios for the Congregazione di S Maria Corteorlandini date from 1636; at particular times of the liturgical year they organized cycles of oratorios. The elections (known as *tasche*) of the republican governors took place over three days and involved musical compositions from 1633. Certain rules were followed: librettist and composer were from Lucca, and there was generally a single subject divided into three parts or days, with one composer for each day. The compositions were cantatas or *serenate politiche* for soloists, chorus and orchestra, on subjects from the classical republican tradition, extolling civic virtues and the 'libertas' which the Lucchesi prized so highly. The practice continued until the fall of the republic in 1799.

From early times up to the 20th century the feast of the Exaltation of the Cross has been the most important civic and religious celebration, with music at First Vespers on 13 September and Mass and Second Vespers on 14 September. Added to this is a *mottettone*, a grand composition for two choirs, accompanied by two orchestras or an orchestra and a brass band (Michele Puccini wrote a famous example in 1845). 1711 saw a return to the ancient practice of including in the celebrations distinguished musicians from outside Lucca; outstanding soloists, particularly singers and violinists, among them Farinelli and Paganini, appeared.

From the 16th century onwards there is documentation of theatrical presentations in the Palazzo dei Borghi and the Palazzo del Podestà, and of *intermedi* inserted in the productions organized by the Accademia degli Oscuri. Notable performances were *Esione*, a 'favola per musica intermidii' of 1628, and *Psiche* (1645) by Tomaso Breni. The librettist Francesco Sbarra produced a huge output. The Febiarmonici company visited the city in 1645 and 1650. In 1672 the republic decided to build a Teatro Pubblico, which was inaugurated in 1675; it was destroyed by fire in 1688 and reopened in 1693. It remained active until the beginning of the 19th century (from 1799 as the Teatro Nazionale), when restoration became necessary. Newly inaugurated in 1819, it has since then been known as the Teatro del Giglio, from the lily on the Bourbon coat of arms. Since 1978 the summer Festival Internationale di Marlia has included opera performances.

The increasingly active musical life of the 18th century required the involvement of musicians on an almost daily basis, particularly for opera seasons and the feast of the Exaltation of the Cross. As well as the Teatro Pubblico, two other theatres were active. The Teatro Castiglioncelli, built in 1752 by the Accademia 'Magis Vigent' and completely remodelled in 1772, remained in use until the end of the 19th century under the names Teatro Nota and, later, Teatro Goldoni. The Teatro Pantera, built by the Accademia dei Collegati in 1770, was the city's second theatre for most of the 19th century; in the 20th it was used as a cinema.

In the 19th century, following the Baciocchi princes' suppression of many institutions, musical life again flourished under the Bourbon dukes. The Teatro del Giglio saw a particularly brilliant period, thanks to their patronage and the far-sighted policies of the impresario Alessandro Lanari. On the initiative of the opera composer Giovanni Pacini an Istituto Musicale was established (the constitution dates from 1842); in 1867 it took the name of its founder; in 1924 it was recognized as a conservatory, and it was renamed after Boccherini in 1943. The 19th century also saw the formation of a larger *cappella*, used particularly for major liturgical services and closely linked to the Istituto Musicale. The city is active in the commemoration of its native composers, who include – as well as the Puccinis, Geminiani and Boccherini – Cristofano Malvezzi, Francesco Barsanti and Alfredo Catalani.

Important music archives in Lucca are at the Biblioteca Capitolare, the Seminario Vescovile, the Istituto Musicale, the Biblioteca Governativa and the Oratorio di SS Crocefisso.

GABRIELLA BIAGI RAVENNI

Lucca, Francesco (*b* Cremona, 21 Dec 1802; *d* Milan, 20 Feb 1872). Italian music publisher. He worked as an apprentice music engraver with Giovanni Ricordi (1816–

22) and was concurrently second clarinettist in the La Scala orchestra. Having learnt the trade he travelled abroad (1822–5) to perfect his craftsmanship. In 1825 he opened an engraving workshop with copying facilities in Contrada S Margherita, Milan, and the first samples were immediately admired for their clear printing and accurate copying. He later published, with Reycend of Turin, one of these, the *Metodo per violino* (*c*1835) by Baillot, Rode and Kreutzer. In Turin, where he stayed in August and December 1835, he also had an arrangement with the publisher Magrini. The firm's first catalogue, which appeared in 1838, listed 1250 pieces: operas, and instrumental chamber works with a prevalence of piano and flute music.

Lucca announced in the press that from January 1841 he had acquired the rights of reproduction and transfer for Donizetti's *Adelia* (1839) and *La favorite* (1841) and was preparing vocal scores and arrangements of them; he subsequently took over a share with Ricordi of the agency for *Nabucco*. Lucca's relations with Verdi became closer when, through the friendship of his wife Giovannina Strazza (1814–94) with Giuseppina Strepponi, later Verdi's wife, he persuaded the composer to give him an album of vocal music. He brought out Verdi's *Attila* in 1846, *Il corsaro* in 1849 and *I masnadieri* in 1847, but Verdi severed the connection when Lucca, having refused to give him extra time to deliver the manuscript of *Il corsaro*, deprived him of the possibility of a lucrative contract with the London impresario Lumley, and Verdi moved to Ricordi. Rivalry and competition increased between the two firms. Lucca published a music journal, *L'Italia musicale*, from 1847 to 1859; in 1848 it was renamed *L'Italia libera*.

During this period the Lucca home was a meeting-place for Italian patriots. Lucca had major successes with operas by Mercadante, Pacini, Federico Ricci, Petrella (*Jone*), Gomes (*Il Guarany*), Marchetti (*Ruy Blas*) and Catalani (*Edmea*) and also works by Coronaro. These operas and a large amount of chamber music, including numerous arrangements for various instruments of opera excerpts, were printed using only treble and bass clefs, for the first time.

Towards the middle of the century Lucca's wife joined the business and made an extremely valuable contribution. She bought rights for Italy of Gounod's *Faust* (La Scala, 1862), Halévy's *La Juive*, Flotow's *Martha* and Meyerbeer's *L'Africaine*; her greatest achievement was the acquisition (1868) of exclusive rights in Italy of all Wagner's works, for which she paid 10,000 Swiss francs. She was the sole owner of the firm after her husband's death and added to it through contracts with Berletti of Florence and Udine (1871), Canti of Milan (1878) and Vismara of Milan (1886). This expansion threatened Ricordi, and from 1886 Verdi advised Tito Ricordi to acquire Lucca; the negotiations (partly conducted by Depanis, a Turin lawyer and fervent supporter of Wagner) were protracted by Signora Lucca's determination to keep the exclusive Wagner rights. By a contract of 30 May 1888 Ricordi finally absorbed the Lucca concern at the price of a million lire plus compensation to Lucca employees, who with a few exceptions were made redundant. Ricordi acquired about 40,000 titles.

STEFANO AJANI

Lucca, Pauline (*b* Vienna, 25 April 1841; *d* Vienna, 28 Feb 1908). Austrian soprano. She studied with Uffmann and Richard Levy, becoming a chorus member at the Vienna Hofoper, where she sang the Second Boy in *Die Zauberflöte*. Engaged at Olomouc she made her début there on 4 September 1859 as Elvira in *Ernani*, and the following year sang in Prague, as Valentine in *Les Huguenots* and as Norma. On the recommendation of Meyerbeer she was engaged at the Königliches Opernhaus, Berlin, from 1861. She made her London début at Covent Garden as Valentine in 1863 and returned in 1864 to sing Marguerite in Gounod's *Faust*. She took the part of Selika at the first London and Berlin performances of Meyerbeer's *L'africaine* in 1865, and during the 1866 Covent Garden season sang Léonor in Donizetti's *La favorite*, Zerlina in Auber's *Fra Diavolo* and Cherubino in *Le nozze di Figaro*. She sang Elisabeth de Valois in the first London performance of *Don Carlos* at Covent Garden in June 1867. In 1868 and 1869 she went to Russia, but returned to London in 1870; her roles in the early 1870s included Zerlina in *Don Giovanni* and Pamina in *Die Zauberflöte*. In 1872 she broke her contract in Berlin and went to sing at the Academy of Music in New York. On her return to Europe in 1874 she was engaged at the Vienna Hofoper, where she remained until her retirement in 1889. In 1882 she returned to Covent Garden, where she sang Carmen and Leonora in *Il trovatore*. Her voice ranged two and a half octaves from *g* to *c'''* and she was especially admired in such dramatic roles as Selika, Marguerite and Carmen.

ELIZABETH FORBES

Luccacich, Ivan. *See* LUKAČIĆ, IVAN.

Lucchesi [Luchesi], **Andrea** (*b* Motta di Livenza, nr Treviso, 23 May 1741; *d* Bonn, 21 March 1801). Italian composer. By 1757 he was in Venice where, according to Neefe, he was trained 'in the theatrical style' by Gioacchino Cocchi, and 'in the church style' by Padre Giuseppe Paolucci and Giuseppe Saratelli, the *maestro di cappella* of S Marco. From 1765, with the support of his patron, the music theorist Count Giordano Riccati, Lucchesi made a name for himself in Venice as an opera composer and wrote sacred and secular occasional works on commission. He also travelled to neighbouring cities as a virtuoso performer on the harpsichord and particularly organ. In 1768, for instance, he played for the dedication of the organ in Padua Cathedral.

In 1771, like many of his colleagues, he went to Germany as the director of a travelling opera company. A decree of 26 May 1774 from the Elector Archbishop of Cologne appointed him court Kapellmeister in Bonn, succeeding Beethoven's grandfather. In 1775 he married into the distinguished d'Anthoin family. As the opera company had dispersed and the court theatre had been closed, Lucchesi was now principally active as a composer of church music. Nonetheless, he still wrote a few small-scale stage works, and in 1785 composed a serenata for the elector on the occasion of his consecration as bishop. However, the musical direction of the Nationaltheater in Bonn, built in 1778, was in the hands of the court organist C.G. Neefe, while instrumental music at the court was the responsibility first of the violinist Gaetano Mattioli and later Josef Reicha.

Apart from a visit in 1783–4 to Venice, where Lucchesi produced his *opera seria Ademira*, and where he probably received the title of director of the Accademia Musical de' Tedeschi, Lucchesi remained in Bonn until the court was dissolved after the French occupation of the Rhineland in 1794. In 1787 he was appointed *Titularrat*. From 1782 to 1792 the young Beethoven was a member of the court Kapelle, first as assistant organist, then as harpsichordist and viola player. In addition to Neefe's teaching and his experience in Reicha's orchestra, Beethoven's musical development must have been considerably influenced by Lucchesi, who, as Kapellmeister, determined the repertory of sacred music performed at the court. After the elector's flight in 1794 and in the event of the court returning, plans for church music on a smaller scale were entrusted to Lucchesi. However, they came to nothing, and his final years were spent in poverty and obscurity.

In line with his career, Lucchesi's works can be divided into the operas and instrumental works of his time in Venice and early years in Bonn, and his sacred music for the electoral Kapelle. His secular works were performed in many different European cities, ranging from Lisbon, where one of his operas was performed, to Stockholm and Prague, where several of his symphonies found their way into the archives. While he had been most famous for his organ works in Italy, according to La Borde his symphonies were held in particularly high esteem in Germany, a notable achievement for an Italian at this time. Leopold Mozart, writing in his 1771 diary of his Venetian travels, described Lucchesi as a *maestro di cemballo* and liked to use one of his harpsichord concertos when teaching. Although only a few of Lucchesi's works appeared in print, his *Sei sonate* op.1 for harpsichord and violin (1772), was the first music to be printed in Bonn. Lucchesi's sacred music, apart from the early works (mostly lost), is now at the Biblioteca Estense in Modena, together with a large part of the manuscript and printed music from the elector's collection. Apart from many compositions for liturgical use, his sacred works include a Passion to a Metastasio libretto for concertante performance during Holy Week.

Various contemporary assessments of Lucchesi's style have come down to us. Burney called him 'a very pleasing composer', while La Borde speaks of 'a particularly graceful style, concise and energetic arrangement of the parts, and new ideas'. Neefe described him as 'a light, agreeable and lively composer, whose counterpoint is cleaner than that of many of his countrymen', adding, however, that in his sacred works he 'does not always confine himself to the strict style'. Lucchesi's approach to sacred music reconciled the *stile antico* and the *stile moderno*, combining an early form of the imitation of Palestrina with the secularized, fashionable operatic style of the 18th century. It was entirely in the spirit of the contemporary theory of church music that he had learnt from his teacher Paolucci (a pupil of Padre Martini) and from Vallotti in Padua.

Lucchi, Francesca. *See* SALVINI-DONATELLI, FANNY.

Luccio, Francesco. *See* LUCIO, FRANCESCO.

Luccioni, José (*b* Bastia, 14 Oct 1903; *d* Marseilles, 5 Oct 1978). Corsican tenor. He abandoned his formal education to work for Citroën motors, but while doing his military service he was encouraged to seek proper voice teachers. He studied in Paris with Léon David and Léon Escalaïs, and won second prize in a singing competition, whereupon he was engaged to sing at the Paris Opéra, making his début in 1931 in Bruneau's *Virginie*. Success came to him the following year in Rouen, as Cavaradossi. He was re-engaged at the Opéra, where for the next 15 years he became the leading heroic tenor. His international career began in Monte Carlo, where he sang Dmitry opposite Chaliapin as Boris. He also appeared in Chicago, Barcelona, Rome (where he created Alfano's *Cyrano de Bergerac*) and at Covent Garden, where he sang Don José to Supervia's Carmen and Calaf opposite Turner as Turandot. Among his other roles were Matho in Reyer's *Salammbô*, Otello, which he sang 120 times at the Opéra, and Samson, which he recorded complete in 1947. Luccioni's true tenor voice was matched by a compelling dramatic skill. He also made two films, *Colomba* (1933) and *Le bout de la route*.

PATRICK O'CONNOR

Lucernarium (Lat., from *lucerna*: 'lamp'). A chant song at the beginning of 'cathedral' VESPERS in the early Church; also the opening chant of Vespers in the Ambrosian rite, and resembling in function the Mozarabic *vespertinus*. *See* AMBROSIAN CHANT, §6(v), and MOZARABIC CHANT, §3(ix).

Lucerne (Ger. Luzern). City in Switzerland. The Schweizerische Musikgesellschaft was founded there in 1808, and Wagner lived at nearby Tribschen from 1866 to 1872, in the villa that now houses the Richard Wagner Museum. The city's musical importance dates from 1938, when the Lucerne International Music Festival was founded. Lucerne had grown as a fashionable resort in the late 19th century and the early 20th, when concerts were given at the Casino-Kursaal by an orchestra composed of musicians from La Scala, Milan. The suggestion for a festival came from Ernest Ansermet, who wanted summer employment for the Orchestre de la Suisse Romande. Concerts in the opening season were conducted by Ansermet, Busch, Walter, Mengelberg and Toscanini (who directed a performance of Wagner's *Siegfried Idyll* at Tribschen, where it had been composed in 1870). Toscanini returned in 1939, but there was no festival in 1940. The Scala orchestra, conducted by Victor de Sabata, was engaged for the following two years. The Swiss Festival Orchestra was formed for the 1943 festival and played every year (except 1954) until 1993. In 1957 the Vienna PO made its first appearance, followed in 1958 by the Berlin PO, which has continued to play every year except 1960 and 1984. Furtwängler conducted at the festival from 1944 until his death in 1954. Karajan conducted every year from 1948 to 1988, apart from 1960. Others closely associated with the festival were Rafael Kubelík, who first conducted there in 1948; Paul Sacher, who conducted Serenade concerts at the Lion Monument every year from 1944 to 1992; and Rudolf Baumgartner, who played in the orchestra in the late 1940s, founded the Lucerne Festival Strings in 1956 and served as artistic director of the festival from 1969 to 1980. Ulrich Meyer-Schoellkopf was director from 1981 to 1991, and Matthias Bamert from 1992 to 1998. He was succeeded by Michael Haefliger.

In 1970 the festival (previously a branch of the Lucerne tourist board) became legally and financially independent. It promotes around 50 concerts and recitals between mid-August and early September and is regarded as one of the premier European festivals. It first made a feature of contemporary music in 1958 and since 1970 there has been an annual focus on the work of a living composer, including Kagel (1970), Lutosławski (1975), Peter Maxwell Davies (1982) and Schnittke (1992). Since 1992 there has also been an annual Easter festival, and since 1998 a piano festival held in November. Most festival events took place in the Kunsthaus until a new concert and congress hall, designed by Jean Nouvel and Russell Johnson, opened for the festival's 60th anniversary in 1998 (see illustration overleaf).

The festival prompted the foundation of the Lucerne Conservatory in 1942. Since 1943 it has hosted annual masterclasses featuring festival participants. During the winter season, the orchestra of the Allgemeine Musikgesellschaft Luzern gives concerts in the Kunsthaus, and accompanies opera and ballet performances in the Stadttheater, which was built in 1839 and has been several times modernized. In 1982 Othmar Schoeck's comic opera *Don Ranudo de Colibrados* was revived there, using a score reconstructed from war-damaged fragments.

KURT VON FISCHER/ANDREW CLARK

Luchanok, Ihar Mikhaylavich (*b* Mar′ina gorka, Minsk province, 6 Aug 1938). Belarusian composer. After a period of evacuation (1941–6) he returned with his parents to Belarus and studied music with his father (who had been a member of a touring theatrical troupe), learning to play popular songs and dances on the cimbalom, bayan or accordion. In 1950 he entered a special music school where he started studying the piano (with G.I. Shershevsky) and composition (with Tsikotsky and Viktor Bely). He graduated from the composition class of Bahatïrow at the Belarus Conservatory in 1961 and then took various teaching posts in addition to continuing his studies in Belarus with Khrennikov and in

Concert Hall of the Lucerne Culture and Congress Centre, designed by Jean Nouvel and Russell Johnson, opened 1998

Leningrad with Salmanov. He was later appointed senior lecturer (1968) and rector (1982–5) of the conservatory; he was board chairman of the Belarusian Composers' Union from 1979. His chief creative activity is the writing of songs whose stylistic roots lie in urban folklore and the Belarusian romance (he has done more than most other composers to develop the Belarusian tradition established by V. Olovnikov and Yu. Semenyako). They are characterized by natural rhythmic movement combined with melodic grace; predominantly dreamily elegiac in mood, their narrative is often courageous and filled with pathos. Although monologues and ballads are closest to his heart, he has also written several marches and anthemic mass songs in the Soviet style.

WORKS

Choral-orch: Kurgan [The Burial Mound] (cant., Ya. Kupala), 1962; Neizvestnïy soldat [The Unknown Soldier] (cant., P. Khor'kov), 1970; Zori nad sosnami [Dawn above the Pines] (cant., Ye. Ognetsvet), 1981

Chorus, pf: Belarus' (M. Tretyakov); Kurgan slavï [The Burial Mound of Glory] (S. Petrenko); Nash Gaydar [Our Gaydar] (S. Marshak); On rodilsya vesnoy [He was Born in Spring] (A. Chepurov); Radzima Belarus' [Native Belarus] (L. Dran'ko-Maysyuk)

Ballads (1v, pf), incl: Geroyam Stalingrada [To the Heroes of Stalingrad] (V. Gusev); Kreml' [The Kremlin] (Yu. Pankratov); Pesnya o Minske [A Song about Minsk] (P. Panchenko); Pis'mo iz 45-ogo [A Letter from '45] (M. Yasen'); Rodnamu krayu [To Our Native Land] (Ya. Kolos); Starïy Sozh [Old Sozh] (Yu. Yudin); Zorka kakhannya [Star of Love] (V. Neklyayev)

Romances (1v, pf), incl: Cheloveku nuzhna tishina [Silence is needed by People] (M. Traat), triptych; Dva orla [Two Eagles] (M. Tank); Gde tï, zvezda moya [Where are You, My Star] (A. Rusak); Ryabinovïy les [Rowan Tree Wood] (Panchenko); Siniy tsvet [The Colour of Blue] (N. Baratashvili, G. Emin, S. Kaputikian, S. Rabadanov), song cycle; Veranika (M. Bogdanovich); Vospominaniye [Recollection] (B. Oleynik); Zvuchaniye angel'skogo golosa [The Sound of an Angel's Voice] (Z. Poznyak)

Over 300 songs (1v, pf), incl.: Alesya (A. Kuleshov); Moy rodnïy krut [My Native Farmstead] (Kolos); Pamyat' serdtsa [Memory of the Heart] (Yasen'); Spadchïna [Heritage] (Ya. Kupala); Tï adna [You Alone] (N. Altukhov); Zhuravli na Poles'ye letyat [The Cranes are Flying to the Poles'ye] (A. Staver)

Chbr and solo inst: Fantaziya na belorusskiye temï [Fantasia on Belarusian Themes], pf, 1960, 1963; 8 preludiy, pf, 1963; Sonata, ob, pf, 1964; 5 preludiy, pf, 1965; Str Qt, 1965; Pf Sonata, 1968; 2 preludii, pf, 1970; Scherzo, cimb, pf, 1970

Works for jazz band, incid music, film scores, music for radio

TAISIYA SHCHERBAKOVA

Luchesi, Andrea. *See* LUCCHESI, ANDREA.

Luchini, Paolo (*b* Pesaro, *c*1535; *d* ?Pesaro, 1598). Italian theorist and singer. He was an Augustinian friar, at one time secretary of the order and provincial of the March of Ancona; he spent three years as court preacher in the service of Duke Francesco Maria II della Rovere at Urbino. At some time between 1568 and 1592 he was tutor to Lodovico Zacconi, probably at the monastery of Valmanente, where Zacconi spent the first years of his monastic life. The three books of *Della musica theorica e pratica* were compiled about 1591–2. Shortly before his death he retired to Valmanente, where he wrote the *Eptamerone* (published 1599).

The first book of the *Della musica* deals with general questions including proportions, mutations and consonances, the second principally with notation, and the third with the rules of composition and counterpoint. The work is essentially a compendium, and draws heavily upon other theorists of the 15th and 16th centuries. Nevertheless, it shows several new insights into traditional problems. Luchini's main purpose was to simplify the complex musical theory of his time. His exposition is always orderly, concise and rich in musical examples which reveal him as a skilled contrapuntist. Although the treatise is not concerned with speculative questions, such as the controversial debate about ancient and modern music, it nevertheless shows, particularly in the discussion of the relationship between words and music, that Luchini was sensitive to new ideas.

Lu Chunling (*b* Shanghai, 14 Sept 1921). Chinese *dizi* player. Lu Chunling worked initially as a trishaw driver in pre-liberation Shanghai. However, he was a keen amateur musician, becoming familiar with the Jiangnan *sizhu* folk ensemble repertory as a young man. In 1952, as part of the wave of nationalization following the establishment of the People's Republic of China (1949), Lu accepted a post as *dizi* soloist with the Shanghai National Instruments Orchestra (Shanghai minzu yuetuan).

From 1971 to 1976, Lu held a similar post at the Shanghai Opera Company (Shanghai gejuyuan). He joined the staff of the Shanghai Conservatory of Music in 1957, receiving promotion to Associate Professor in 1978. Lu has made numerous recordings (he is recipient of Communist China's first gold disc) and has taken part in many governmental cultural missions, performing in countries worldwide as well as throughout China. His personal performance style, disseminated through recordings, broadcasts and recitals and by his numerous pupils, has become representative of the Jiangnan *dizi* tradition in general.

Although he actively encouraged the study of traditional repertory, such as Jiangnan *sizhu* and folk pieces like *Zhegu fei* ('Partridges Flying') Lu Chunling has also contributed to the creation of a new repertory for his instrument. From 1957, Lu composed a succession of works celebrating the new social order and experimenting with new performance techniques. The first of the compositions, *Jinxi* ('Today and Yesterday'), is a typical example: a ternary structure with bright outer sections containing a tragic central segment characterized by slides and acciaccaturas.

Lucia, Fernando de. *See* DE LUCIA, FERNANDO.

Lucía, Paco de [Sánchez Gómez, Francisco] (*b* Algeciras, 21 Dec 1947). Spanish guitarist. His precocious gifts on the guitar enabled him to augment his family's meagre income. The dancer José Greco contracted him at the age of 13 to tour with his company from 1960 to 1961. In 1962 he won a prize at a Jerez competition; then, in 1964, he was financed by a German firm to tour with a band throughout Europe. By 1970 he had made three records and become Paco 'de Lucía'. In the same year he appeared

at a Beethoven bicentenary festival in Barcelona, where his virtuosity, of a kind previously unknown in flamenco, astonished audiences. During the 1970s he toured throughout the world and made many important recordings, including 'Almoraima' and a collection of flamenco reworkings of Manuel de Falla. He was also instrumental in launching the career of the great flamenco singer, El Camarón de la Isla (1950–92), with whom he made many recordings.

In the 1980s de Lucía collaborated with jazz and other non-flamenco musicians, both in the studio and on stage. His concerts in the second half of the decade (few of them in Spain) were invariably divided into two sections: one solo, one featuring his sextet, including brothers Pepe (voice) and Ramón (guitar) and other musicians de Lucía was keen to promote. Two solo recordings from the late 1980s, 'Siroco' and 'Zyryab', are among his finest. In 1991 he recorded a version of Rodrigo's *Concierto de Aranjuez* – the first time a flamenco musician had committed a major classical work to disk. Although de Lucía owes much to the examples of Niño Ricardo and Sabicas, the sheer brilliance of his technique and the originality of his rhythms and melodies are unequalled in the history of the flamenco guitar.

JAMES WOODALL

Lucier, Alvin (Augustus) (*b* Nashua, NH, 14 May 1931). American composer. He was educated at Yale (BA 1954) and Brandeis (MFA 1960) universities, where his teachers included Boatwright, Arthur Berger, Irving Fine, and Shapero; he also studied under Copland and Foss at the Berkshire Music Center (1958, 1959). After two years in Rome on a Fulbright fellowship, Lucier joined the Brandeis faculty in 1963 as director of the choral union; later he was head of the electronic music studio. In 1970 he moved to Wesleyan University, where he was later appointed John Spencer Camp Professor of Music. He was a co-founder of the Sonic Arts Union, music director of the Viola Farber Dance Company (1972–7) and a fellow of the DAAD Kunstlerprogramm in Berlin (1990). He has received grants from the Rockefeller Foundation, the New York State Council on the Arts, the Connecticut Commission on the Arts and the NEA. Many of his works were commissioned by American and European leading organizations.

In the mid-1960s Lucier began to explore sonic environments, particularly sounds that 'would never – in ordinary circumstances – reach our ears'. Using performers, electronics, instruments, architecture and found objects, he devises open-ended processes specifically adapted to the phenomena he chooses to investigate or reveal. Some works exploit unusual sound sources such as brain waves (*Music for Solo Performer*) or radio frequency emissions in the ionosphere (*Sferics*), while others focus on the physical characteristics of sound waves. In *Vespers* (1968), performers take the acoustical measure of a room by means of echo-location devices, thus simulating bats and dolphins, while *I am Sitting in a Room* uses a tape loop (successively recording its own playback) to transform spoken text in accordance with the room's resonant frequencies. In *Chambers* (1968), the timbres of self-sounding objects are altered after being placed in boxes or pots and are in turn influenced by the rooms and hallways through which they are carried during performance. Lucier has also explored diffraction of sound waves around moving or stationary objects (*Outlines of Persons and Things*); the visualization of sound disseminating from a stringed instrument with the aid of lights and a sweep oscillator (*Directions of Sounds from the Bridge*); freely vibrating surfaces and solids as visual equivalents of sound (*The Queen of the South*); the processing of wave forms – seen and heard – using common surfaces (*Music for Pure Waves*, *Acoustic Pendulums* and *Sound on Paper*); and the employment of solar power to integrate flows of light and sound (*Solar Sound*, *Spira Mirabilis*). In *Music on a Long Thin Wire* (1977), temperature, air current, footsteps and other factors influence a wire's vibration to produce subtle changes of pitch, timbre and rhythm. In 1982 Lucier began composing for traditional instruments (some with oscillators and resonating objects) focussing on the audible beating between closely tuned pitches.

LINDA SANDERS/KEITH MOORE

Lucino, Francesco (*b* Caravaggio, nr Milan, second half of the 16th century; *d* ?Milan, shortly before 11 Dec 1617). Italian composer and singer. He was a priest. He was engaged as a bass in Milan Cathedral choir about 1580 and remained there until his death, which is reported in a document in the cathedral archives dated 11 December 1617. He was an assistant to the *maestro di cappella*, G.C. Gabussi, and in 1610 became vice-*maestro*. When Gabussi died in September 1611 Lucino acted as *maestro* until Vincenzo Pellegrini was appointed on 26 February 1612. He then reverted to the position of vice-*maestro*, which he held until his death. He was highly regarded as a singer. Magistri acclaimed him as 'a very deep bass', and Guarini celebrated him in a madrigal verse. It is also known from two letters that he wrote in 1598 to Cardinal Federico Borromeo (in *I-Ma*) that he had received offers of other appointments but did not wish to leave Milan Cathedral because of his admiration for the cardinal. He is named, together with all the other cathedral musicians, in the dedication to the *Liber primus motectorum* (1592) by his colleague Damiano Scarabelli.

It may have been Gabussi who persuaded Lucino to publish *Le gemme*, a collection of madrigals by composers active in Bologna. Subsequent collections contained works by composers working in Milan and Lombardy. The 1608 collection includes concertos by 11 Milanese composers and was the first in a series of anthologies to present sacred works in the new concertante style. The success of this print was such that the printer Filippo Lomazzo was encouraged to publish a new edition, with additoinal solo motets, in 1612; he brought out a second expanded edition in 1617 which included further motets, a Mass, two Magnificats, a litany and 12 *Canzoni per sonare*. Lucino's importance as a composer is overshadowed by his contribution as a collector and editor of the music of Bolognese madrigalists and of composers working in Milan and other parts of Lombardy who cultivated a modern concertante style based on the alternation of solos and chorus.

MARIANGELA DONÀ

Lucio [Luccio, Luzzo], **Francesco** (*b* ?Conegliano, *c*1628; *d* Venice, 1 Sept 1658). Italian composer and organist. He spent his life in Venice; his earliest known musical activities there date from March 1645, when he became an organist at the church of S Martino. He served there intermittently until 1652, after which records do not survive. In 1645 he also began work as a freelance organist, performing for special festivities at the Venetian convents. In his second book of motets (1650) he is described as a pupil of G.A. Rigatti and singing master at the Ospedale degli Incurabili; he was probably appointed to replace his teacher, who died on 25 October 1649. In March 1658 he headed a group of musicians performing at the convent of S Martino, Burano. His death later that year came as a result of a sword wound; he was buried at S Martino in Venice. Apparently he had also been employed at the Ospedale della Pietà, to which he left all his music. He was notable primarily as a composer of opera. The attribution to Lucio of *L'Orontea* (traditionally acknowledged as the work of Cesti, whose later version survives) is found in a letter by P.A. Ziani dated

30 January 1666. The widest survey of Lucio's operatic work is contained in the *Arie* of 1655; the arias are close to Cavalli in form and in style of vocal writing, but they are perhaps more striking in their sometimes angular melodic style and more inclined to chromatic harmony. Some of the arias of *Il Medoro* are notable for their unusual formal design.

WORKS

OPERAS

all performed in Venice; exact dates are of dedication

L'Orontea (drama musicale, prol., 3, G.A. Cicognini), SS Apostoli, 20 Jan 1649 [music traditionally attrib. Cesti, but see Bianconi and Walker; music lost, unless the score of the 1654 Naples performance (*I-Nc*, at least partly by Cirillo) contains some of the orig. music]

Gl'amori di Alessandro Magno e di Rossane (dramma musicale, prol., 3, Cicognini, completed by an unknown librettist), SS Apostoli, 24 Jan 1651, arias in Arie (1655/*R*1984 in DMV, iv)

Pericle effeminato (drama per musica, 3, G. Castoreo), S Apollinare, 7 Jan 1653, arias in Arie (1655/*R*1984 in DMV, iv), 1 in *GB-Lbl*

L'Euridamante (drama regio, prol., 3, G. dall'Angelo), S Moisè, 20 Jan 1654, arias in Arie (1655/*R*1984 in DMV, iv)

Il Medoro (drama per musica, prol., 3, A. Aureli, after L. Ariosto), SS Giovanni e Paolo, 11 Jan 1658, *I-Vnm* (facs. in DMV, iv, 1984); 1 aria ed. in Worsthorne, 3 ed. in Rosand

OTHER WORKS

Ecce nunc, 1v, vn, in G.A. Rigatti: Salmi diversi di compieta in diversi generi di canto (Venice, 1646); ed. in SCISM, xi (New York, 1995)

Motetti concertati, 2, 3vv, bc, op.1 (Venice, 1649)

Motetti concertati, 2, 3vv, bc, op.2 (Venice, 1650)

Arie, 1v, bc (Venice, 1655)

4 arias, 1656[4]

4 motets, *S-Uu* (tablature), according to Eitner

THOMAS WALKER, BETH L. GLIXON

Łuciuk, Juliusz (*b* Brzeźnica, nr Radomsko, 1 Jan 1927). Polish composer. After graduating in musicology at the university in Kraków he transferred to the State Higher School (later Academy) of Music, where his teachers included Wiechowicz. He continued his training in Paris with Max Deutsch and Boulanger, and in 1959 attended the Darmstadt summer course. He has received several awards including the second prize in the 1960 Vercelli Competition for *Sen kwietny* ('Floral Dream') and first prize in the 1974 Prince Rainier Competition for *Portraits lyriques*. Łuciuk began to break with his neo-classical training in 1957, adopting serial procedures, though these are personalized by his music's innate lyricism. Thenceforth he explored a sonoristic style of writing, producing a number of delicately impressionistic works (some for the stage) where the piano strings are played with percussion brushes or sticks (*Maraton* and *Lirica di timbri* are characteristic examples). After a series of poetic song cycles (1966–74), of which the opera *Demiurgos* is an extension, Łuciuk concentrated almost exclusively on setting liturgical texts and writing large-scale oratorios. His musical idiom features triadic harmony and modal clusters, ancient chants and popular hymnody, and uses dissonance as a means of effecting colour.

ADRIAN THOMAS

Lucký, Štěpán (*b* Žilina, Slovakia, 20 Jan 1919). Czech composer and writer. From 1936 to 1939 he studied composition at the Prague Conservatory with Hába, Šín and Řídký. He took an active part in the struggle against the German invaders, and was imprisoned in the Auschwitz and Buchenwald concentration camps. After his

release in 1945 he continued his composition studies with Řídký until 1947, concurrently studying musicology at Prague University (1945–8). Between 1946 and 1948 he was a committee member of the Přítomnost association for contemporary music. Then he worked as a music critic for Prague daily newspapers, and also published articles in *Rytmus* and *Hudební rozhledy*. He was appointed head of music at the inception of Czech television in 1954, staying there for four years. He taught television opera production at the Prague Academy of Musical Arts from 1956 to 1961.

Until the end of the 1940s, Lucký was an inventive composer, using a lively sense of colour. He wrote Three Etudes (1946) for quarter-tone piano and experimented in other directions in his Cello Concerto (1946), Piano Concerto (1947) and Divertimento (1946) for three trombones and strings. During the 1950s and 1960s he devoted all of his energies to composing film music. With Václav Trojan and Jiří Srnka he established himself as one of the leading Czech composers of film scores. He wrote music for more than 40 feature films and over 100 short films, as well as much theatre music. He employed a Romantic style which brought Czech folksong into contact with South American folk music or with jazz and dance music. Only in the late 1960s did he return to composing concert music. His writings include *Filmová hudba Václava Trojana* ('The film music of Václav Trojan') (Prague, 1958; with V. Bor).

OLDŘICH PUKL/R

Ludecus [Lüdtke, Lüdeke], **Matthäus** (*b* Wilsnack [Bad Wilsnack], Prignitz, 21 Sept ?1527; *d* Havelberg, Prignitz, 12 Nov 1606). German civic official, ecclesiastic and composer. Fornaçon said he was born in 1517, but this date does not accord with those of his schooling. Owing to the early death of his impecunious parents he grew up in the Wendenhof at Wilsnack, at that time the seat of the Bishop of Havelberg, Busso II von Alvensleben. In 1539 he attended the school at Perleberg, and from 1540 to 1542 that at Pritzwalk, after which, owing to ill-health, he at intervals lived again at Wilsnack. Later Busso II appointed him tutor to two of his nephews at Wittstock and subsequently clerk in his own chancellory. When, after the bishop's death in 1548, the diocese of Havelberg adopted the reformed faith, Ludecus went to Frankfurt an der Oder for a short period of study. At Easter 1550 he was summoned by Konrad von Rohr, chief administrator of the district of Prignitz, to work as clerk in his service; he carried out his laborious duties for four years. He then successfully applied for the post of town clerk of Lüneburg, making it a condition that he first be allowed to complete his studies at Frankfurt an der Oder. In 1556 he became town clerk of Prenzlau, Uckermark, and in 1560 collector of land taxes for Prignitz, a position that he held until 1597. In 1562 he also became a canon of Havelberg Cathedral. The cathedral chapter elected him dean in 1573. In this office, which he retained until his death, he devoted himself assiduously to the internal and external business of the chapter. His special interest in liturgical matters is reflected in four liturgical publications, all of which appeared in 1589. Together with similar works by Lucas Lossius (1553), Johannes Keuchenthal (1573) and Franz Eler (1588), they form a very important part of the Lutheran liturgical repertory of the 16th century. They are at once the last and most conservative of their kind, with Latin hymns forming a large part of their contents. The *Missale* includes four Latin Passions (one according to each of the four gospels), all based on traditional Passion tones and all monophonic. The performance of them, as readings during a service, would have been divided between the vicar, deacon and subdeacon; they must therefore have been designed for cathedral use, since such a practice was not allowed in other churches at that time.

WALTER BLANKENBURG

Luders, Gustav (Carl) (*b* Bremen, Germany, 13 Dec 1865; *d* New York, 24 Jan 1913). American composer of German birth. He studied in Germany and in 1888 went to Milwaukee, where he conducted popular orchestras and led a light opera company. From 1889 he was an

arranger for a branch of Witmark and directed theatre orchestras in Chicago. He wrote at least 13 operettas, musical comedies and musical plays, many of which were performed in Chicago before they appeared on Broadway. His chief lyricist was Frank Pixley. Their most successful work was *The Prince of Pilsen* (1903), which was performed in Boston, New York, St Louis and London and revived until at least 1957; it includes the songs 'The Tale of the Seashell', 'The Message of the Violet' and 'The Heidelberg Stein Song', which retains prominence in the college glee-club repertory. Other successful works by Luders include *The Burgomaster* (1900), *Woodland* (1904) and *The Sho-Gun* (1904).

Luders's style reveals a familiarity with both Viennese operetta and the music of Arthur Sullivan. His works have an abundance of graceful waltzes and humorous or sentimental love songs, with sophisticated melodies, simple but varied rhythms and phrases, and a wider harmonic vocabulary than most stage musicals of the time. After 1904 he continued writing shows for the New York stage but did not achieve his previous popularity. He has been ignored by most writers on 20th-century musical theatre or popular song.

WORKS

all are operettas or musical plays, and unless otherwise stated dates are those of first New York performance

Little Robinson Crusoe (H.B. Smith), Chicago, 1899; The Burgomaster (F. Pixley), 31 Dec 1900 [incl. The Tale of the Kangaroo]; King Dodo (Pixley), 12 May 1902 [incl. The Tale of the Bumble Bee]; The Prince of Pilsen (Pixley), 17 March 1903 [incl. The Heidelberg Stein Song, The Message of the Violet, The Tale of the Seashell]; Mam'selle Napoleon (J.W. Herbert), 8 Dec 1903; The Sho-Gun (G. Ade), 10 Oct 1904; Woodland (Pixley), 21 Nov 1904 [incl. The Tale of the Turtle Dove, The Message of Spring]; The Grand Mogul (Pixley), 25 March 1907; Marcelle (Pixley), 1 Oct 1908; The Fair Co-Ed (Ade), 1 Feb 1909; The Old Town (Ade), 10 Jan 1910; The Gypsy (Pixley), 14 Nov 1912; Somewhere Else (A. Hopwood), 20 Jan 1913

DEANE L. ROOT

Ludewig, Wolfgang (*b* Marburg am Lahn, 7 Dec 1926). German composer. He studied the piano and theory at the Mannheim Musikhochschule (1939–43), composition with Fortner (1946–52) and musicology at Heidelberg University with Thrasybulos Georgiades and Walter Gerstenberg (1953–8). In addition, he was deeply influenced by his contact with Leibowitz, Krenek and Varèse at Darmstadt summer courses. After early activity as a music critic he was made manager of the press department for Schott of Mainz, and from 1968 to 1992 he was editor in the music department of South German Radio. He became President of the Freie Akademie der Künste at Mannheim in 1994. At first he used serial techniques to give form to an expressionist statement, but after 1960 he developed beyond the influence of the Second Viennese School to combine new sound materials with conventional formal elements.

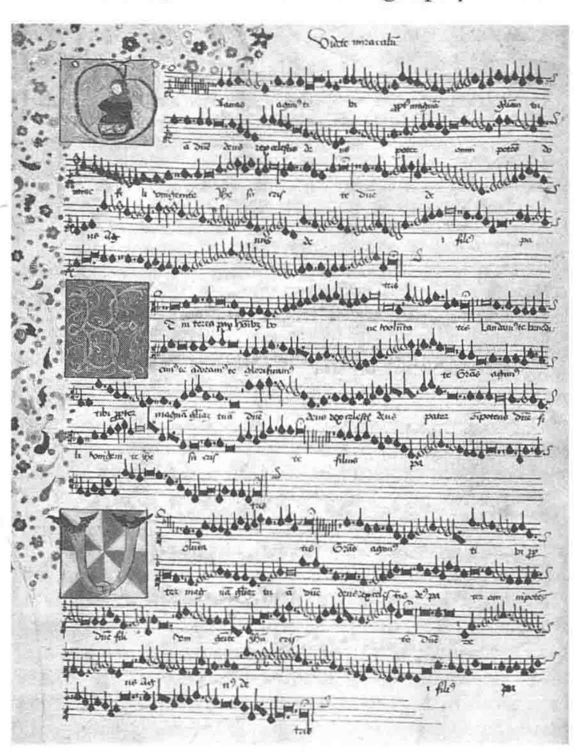
CLYTUS GOTTWALD

Ludford [Ludforde, Ludforth], **Nicholas** (*b c*1490; bur. Westminster, 9 Aug 1557). English composer. He is considered to be one of the most important and innovative composers in early Tudor England. Nothing is known of his early musical training and career. He may have been born in London, where in 1495 the composer John Ludforde (possibly Nicholas's father) joined the Fraternity of St Nicholas, the London Guild of Parish clerks; Nicholas Ludford himself joined in 1521. It is clear that he was very much a local composer who was employed for the majority of his adult working life at the royal chapel of St Stephen in the Palace of Westminster (a sister foundation of St George's, Windsor). Since its foundation by Edward III in 1348, St Stephen's comprised a dean, 12 secular canons, 13 vicars choral, four clerks or 'singing men', six choristers (a seventh being added sometime in the late 15th century), a verger and a sacristan. The Instructor of the Choristers was to be appointed from among the vicars choral and clerks; Ludford is not known to have held this post.

The earliest reference to Ludford in Westminster is in January 1517 when he rented lodgings from Westminster Abbey, during which time he may have had some association with the Chapel Royal. He was certainly attached to St Stephen's in the early 1520s (perhaps as a clerk or vicar choral), and acquired a full probationary post by 1525. On 30 September 1527 he was formally appointed verger of the chapel with an annual income of £9 2s. 6d., and an additional 13s. 4d. each year at Christmas towards his ecclesiastical dress; as organist he received an additional stipend of 40 shillings. The origin of the post of 'verger *cum* organist' is not clear but it seems to have been more administrative than musical, even though other composers are known to have held it (for example, Johannes Bedyngham at St Stephen's in 1457 and John Plummer at St George's, Windsor, from about 1460 to 1484). Ludford was probably responsible for overseeing chapel maintenance and leading the processions. Besides his organ-playing, these duties may have extended to the supervision of music in the chapel (somewhat like the duties of a precentor).



Throughout his adult life Ludford was also heavily active in the administration of St Margaret's, Westminster. He regularly maintained his pew there from 1525 and bore witness to the churchwarden's accounts between

1537 and 1556. He probably did not participate much in the music-making there, though in 1553 the churchwardens paid him 20 shillings for 'a pryke songe boke'. Between 1552 and 1554 Ludford was himself elected churchwarden of St Margaret's, during which time his first wife, Anne, died; on 21 May 1554 he married a Helen Thomas. There is no evidence that he composed for the reformed church, and it is likely that he remained a staunch Catholic throughout his life. He died in 1557, possibly from the influenza epidemic that raged in England at this time, and was buried in the vaults of St Margaret's church on 9 August next to his first wife. His will was proved on 22 November.

The majority of Ludford's festal settings of the Mass and his Magnificat are copied in the so-called Caius and Lambeth Choirbooks (*GB-Cgc* 667 and *GB-Llp* 1). Both books are enormous productions, copied by the same hand, and were probably commissioned by Edward Higgins, a prominent royal lawyer who held a canonry at St Stephen's from 1517, and who was Master of Arundel College, Sussex, from 1520. A manuscript roll containing the bass part of Ludford's antiphon *Gaude flore virginali* in Arundel Castle (*GB-AR* A340) is also in the same hand as the choirbooks, leading to the hypothesis that both books were assembled in Arundel under Higgins's mastership: Lambeth as an everyday choirbook of Arundel College, with the more elaborately decorated Caius as a presentation manuscript from Higgins to St Stephen's (possibly to mark Ludford's formal appointment as verger there in 1527).

The two six-part masses (*Missa 'Videte miraculum'* and *Missa 'Benedicta et venerabilis'*) best exemplify Ludford's command of full, rich and sonorous writing. The latter is of particular interest because of its associated *Magnificat*, which is the only English setting to incorporate an independent plainchant melody rather than a psalm tone. Both the Mass and the *Magnificat* are constructed with two equal bass parts throughout, while *Videte miraculum* (arguably Ludford's greatest work) exploits the opposite end of the vocal spectrum with two equal treble parts (see illustration). The five-part masses and votive antiphons are moulded in the post-Eton Choirbook style as developed in the works of Robert Fayrfax, where the slow-moving harmonies take precedence over individual elaborate vocal lines.

The seven three-part alternatim masses comprise the only complete weekly cycle of English Lady Masses known to have survived. They are copied in a set of four partbooks that can be dated between about 1515 and 1525, and were probably a gift to Henry VIII and Catherine of Aragon (they are recorded in an inventory made in 1542 of Henry VIII's books in Westminster). The polyphony is florid and stylistically similar to the verse sections in Ludford's festal masses. The alleluia and sequence movements of the solo passages are in plainchant, but in the Kyrie, Gloria and Credo movements they are in measured polyphony taken from a repertory of uncertain origin (possibly borrowed from polyphony) that has come to be known as 'squares'. Ludford also set a four-part mass (now fragmentary), which uses as its cantus firmus the same square as the first of the Lady Masses (*Dominica*). The theme, associated with the name 'Le roy', was also used by John Taverner and an anonymous English composer as a cantus firmus for settings of the Kyrie.

Opening of Nicholas Ludford's 'Missa "Videte miraculum"', from the Caius Choirbook, 1520s (GB-Cgc 667, f.32)

DAVID SKINNER

Ludovico, Luigi. *See* GIANELLA, LOUIS.

Ludovico Milanese [Ludovico de Mediolano; Zoppino] (*b* ?Milan, *c*1480; *d* after 1537). Italian composer, organist and singer. He was a priest. His name indicates that he was born in or around Milan. He was *maestro di cappella* and organist at S Michele, Lucca from 1512 to 1514, with a salary of 50 ducats a year. In August 1512, just after being installed in S Michele, he auditioned in Siena for the position of organist at the Cathedral and was offered the large salary of 100 florins a year. For some reason, he either did not accept or the offer fell through, for he returned to Lucca in September. In 1514 he was made a canon at S Martino Cathedral, Lucca. In 1519 he was given a three-year stipend of 24 ducats a year for 'teaching music to the many youths who so greatly desire it'. He appears to have left Lucca in July 1537, when his name disappears from the records of S Martino.

Ludovico's one lauda, *A te drizo ogni mio passo*, is a *barzelletta*; his eight frottolas consist of four *strambotti*, three *ode* (one of which is endacasyllabic) and one *barzelletta*. He seems to have preferred melancholy texts for his frottolas, for none are of the lighter, humorous variety found in the works of other composers. *Serà chi per pietà* uses dissonance as an expressive device. *Ameni colli*, a *strambotto*, features an almost recitative-like melody and is one of the few frottolas for five voices. The publication of four of his works in 1517 and 1519 suggests that he was still active as a frottolist while he was in Lucca and, by extension, that the frottola was being cultivated on Tuscan soil in addition to its native territory of northern Italy. Two *barzellette* (*Chiara luce mi può dare* and *S'io non venni*) ascribed to 'Ludovico S' in Sambonetto's *Canzone, sonetti, strambotti et frottole, libro primo* (Siena, 1515), may also be by Ludovico Milanese (D'Accone, 1995).

WILLIAM F. PRIZER

Ludovicus Sanctus [Ludwig van Kempen] (*b* ?Beringen, ?1304; *d* Avignon, ?May 1361). Franco-Flemish music theorist. During the years 1329–30 he served as *magister in musica* to Cardinal Giovanni Colonna in Avignon. There he met Petrarch, with whom, under the pseudonym 'Socrates', he became close friends. Unlike Colonna, Ludovicus survived the plague years of 1342–8 and stayed in Avignon until his death. He is probably the author of two music treatises, which in some secondary sources are attributed to St Louis of Toulouse (Louis of Anjou, 1274–97): *De musicae commendacione* (lost) and *Sentencia in musica sonora subiecti Ludovici sancti* (a short text on f.170*r* of *I-Fl* Ashburnham 1051). In the latter the author used the form of a scholastic argument to investigate the essence of *musica sonora*, which, he concluded, pertained first and foremost to the relation of number and sound; secondly to the relation of one sound to another (from which the subject of polyphony has occasionally been misconstrued); and finally – based on the first two categories – to the determination of proprieties, passions and modulations. Thus *musica sonora* largely describes Boethius's concept of *musica instrumentalis*, and in this sense the term also appears in several other 13th- and 14th-century treatises (e.g. by Robertus Kilwardby and Jehan des Murs).

Ludus Danielis (Lat.). Play of Daniel. *See* MEDIEVAL DRAMA.

Ludvicus de Arimino (*b* Rimini; *fl* 1435). Italian composer. He may be identifiable with the rector of S Andrea in the village of Masone Vicentino in 1446, a position controlled by the Paduan monastery of S Giustina, or with the *presbyter* 'Ludvico quondam Acolini Ariminensis preposito Santa Trinitatis de Padua', who acted as a leading member of the *fratelea cappellanorum* in Padua between 1455 and 1475.

Ludvicus's three extant works are in the fourteenth gathering of *I-TRmp* 87), written by a single scribe on a paper found also in Vicenza between 1433 and 1436. *Salve cara deo tellus* (edn in DTÖ, lxxvi, Jg.xl (1933), 14–15; also ed. Disertori, 75–8, Stevens, suppl., and Nosow, 379–87), on a text by Petrarch, is a finely controlled motet in the florid style initiated by Du Fay, with a highly elaborate superius line. The ballata *Gentile alma benigna* (ed. in DTÖ, xxii, Jg.ix (1903), 115–16), attributed to 'lb' ('Ludbicus') at the top of the page and in the tenor, directly follows *Salve cara deo tellus* in the

manuscript. The untexted duo headed 'Unum pulcrum' (*TRmp* 87, f.157) has an extended second ending in the manner of ballatas like *Or s'avanta omay* by Prepositus Brixiensis.

ROBERT NOSOW

Ludvig-Pečar, Nada (*b* Sarajevo, 12 May 1929). Croatian composer. She studied composition with Miroslav Špiler in Sarajevo and Škerjanc in Ljubljana, and from 1969 taught theory at the Sarajevo Music Academy. Her musical language is rooted in European music of the first decades of the 20th century. She has contributed to almost all musical genres but most successfully to the solo song repertory. Her most notable works are *Sappho* for voice and piano (1974), a violin suite (1965), the String Quartet in D (1966) and the piano pieces *Deset studija* (Ten Studies, 1965) and *Suita hexatonica* (1973).

MELITA MILIN

Ludvová, Jitka (*b* Holešov, 1 Oct 1943). Czech musicologist. She studied piano with František Rauch and music theory with Janeček at the Prague Academy of Musical Arts (graduating in 1969), and took the doctorate in musicology in Olomouc in 1975 with a dissertation on the Czech Society for Modern Music in Prague. She worked at the Musicology Institute of the Czech Academy of Sciences (1969–98), interrupted by a brief period as a freelancer (1990–93). She joined the Theatre Institute in Prague in 1998 to work on an encyclopedia of Czech theatre, with responsibility for the 19th century. A specialist in 19th- and early 20th-century Czech music, she wrote several joint studies with Vladimír Lébl, culminating in the penultimate chapter of the standard Czech music history, *Hudba v českých dějinách*. Ludvová's interests have been in Czech music theory (which has resulted in a two-volume survey from 1750 to 1900) and in the German contribution to music in Bohemia, notably the history of the Prague German theatre and of Mahler's connections with Prague. Her many specialist translations from the German include a Czech edition of Hanslick's memoirs and reviews.

JOHN TYRRELL

Ludwig. American firm of instrument makers. William F. Ludwig (i) (*b* Nenderoth, 15 July 1879; *d* Chicago, 14 June 1973) left Germany for Chicago as a boy, and in 1909 founded Ludwig & Ludwig with his brother Theobald (1888–1917). Their first product was a foot-pedal for trap drums. Having played hand-tuned kettledrums in the Pittsburgh Orchestra, Ludwig decided to build his own pedal timpani. With his brother-in-law, the engineer Robert C. Danly, he designed a model, patented in 1913, with a hydraulic pump and an expandable rubber tube filled with water which pressed a hoop against the membrane from inside the kettle for rapid tuning. An improved model with flexible tuning cables operated by a foot-pedal with self-locking device was patented in 1920. The 'Natural Way Balanced Action' timpani (patented 1923) made use of a compression spring for tension balance to hold the pedal in place. The firm expanded and made quantities of drum kits and sound-effect instruments for the flourishing silent movie theatres. However, the arrival of talking pictures and the Depression resulted in declining sales, and in 1930 the company merged with C.G. Conn. Its production was combined with that of the Leedy drum division (*see* LEEDY MANUFACTURING CO.) and moved to Elkhart, Indiana, with Ludwig as manager. During this period he introduced the first lightweight, chromatic bell-lyra for marching bands (for illustration *see* BELL-LYRA). In 1936 Ludwig resigned to set up the W.F.L. Drum Co. together with his son in Chicago and over the next 20 years produced several new models of timpani and a variety of percussion instruments. (For illustration of Ludwig machine timpani, see TIMPANI, fig.4.) In 1955 he bought back the Ludwig portion of Conn's percussion business, which became the Ludwig Drum Co. The Musser Marimba Co. (a manufacturer of vibraphones, marimbas, xylophones, bells and chimes) and its two subsidiaries was acquired in 1966; a parent company, Ludwig Industries, was subsequently organized over all the divisions. William F. Ludwig (ii) became president in 1972 and in 1981 the firm was acquired by Selmer. At the end of the 20th century it continued to operate, both the Musser Marimba Co. and the Ludwig Drum Co., as separate divisions. The Ludwig Drum Co.,

produces five models of timpani: the 'Ringer' Dresden-style, with hand-hammered, pure copper, camber-shaped kettles; the similar grand symphonic drums; the professional and standard series, with parabolic bowls and 'balanced action' pedals; and the universal model tuned by means of a hand crank.

EDMUND A. BOWLES

Ludwig, Christa (*b* Berlin, 16 March 1928). German mezzo-soprano. The daughter of the singers Anton Ludwig and Eugenia Besalle, she studied with her mother and Felice Hüni-Mihaczek, making her début in 1946 as Orlofsky at Frankfurt, where she sang until 1952. After engagements at Darmstadt and Hanover, she joined the Vienna Staatsoper in 1955 and remained there for more than 30 years, creating Miranda in Martin's *Der Sturm* (1956) and Claire Zachanassian in Einem's *Der Besuch der alten Dame* (1971). Having first sung at Salzburg in 1954 as Cherubino, she took part in Liebermann's *Die Schule der Frauen* (1957) and returned there until 1981, when she sang Mistress Quickly. Ludwig made her American début in Chicago in 1959 as Dorabella. At the Metropolitan (1959–90) her roles included Cherubino, the Dyer's Wife, Dido in the first American production of *Les Troyens* (1973), Fricka, Waltraute, Ortrud, Kundry, the Marschallin, Charlotte and Clytemnestra. At Bayreuth she sang Brangäne (1966) and Kundry (1967). She made her Covent Garden début in 1968 as Amneris, returning as Carmen (1976). Her repertory included Leonore (*Fidelio*) and Lady Macbeth, as well as Monteverdi's Octavia, Eboli and Marie (*Wozzeck*). She was also a renowned interpreter of lieder, especially those of Brahms and Mahler. Her voice was rich, even-toned and expressive, and she was a compelling actress. Ludwig's many operatic recordings include Dorabella under Böhm, Leonore with Klemperer, Venus and Kundry for Solti and Ortrud for Kempe. She also recorded much of her large concert and lieder repertory, notably Bach's *St Matthew Passion*, Brahms's Alto Rhapsody, and *Das Lied von der Erde* (all with Klemperer). From 1957 to 1971 she was married to the bass-baritone Walter Berry. At the time of her retirement in 1994 she gave an outspoken television interview with Thomas Voigt (now available on video), in which she discussed her career and her working relationships with Klemperer, Karajan and others.

ALAN BLYTH

Ludwig, Friedrich (*b* Potsdam, 8 May 1872; *d* Göttingen, 3 Oct 1930). German musicologist. He studied in the history faculty of Strasbourg University under Bresslau, but after he gained the doctorate in 1896 with a dissertation on military journeys in the Middle Ages, medieval music claimed most of his attention. Among musicians in Strasbourg in these years were Pfitzner, Schweitzer and Gustav Jacobsthal, the latter (from 1897) the only musicologist to be full professor at a German university. Jacobsthal's research into 13th-century polyphony was continued by Ludwig, who succeeded his mentor in the chair of musicology (1905), later becoming professor (1910). After the war he became professor at Göttingen University (1920), and later rector of Göttingen (1929–30). His papers are preserved in the Niedersächsische Staats- und Universitätsbibliothek, Göttingen.

Ludwig's remarkable work, his eminence in university circles and the distinction of his pupils make him an outstanding figure in the world of learning. While Coussemaker, W. Meyer and Jacobsthal had all made valuable contributions to the study of the early motet, Ludwig's systematic appreciation and analysis of all the important 13th-century sources of polyphony remains perhaps the most important achievement made by one man in the study of medieval music. His *Repertorium* – unfinished at his death, yet an indispensable textbook, research tool and guide to analytical technique – has dwarfed all subsequent work on the music. The *Catalogue raisonné* of sources in square notation appeared in 1910; sources in mensural notation were to have been described in a subsequent volume. Proofs (of pp.345–456; pagination was continuous through the first two volumes), describing the La Clayette Manuscript and part of the Montpellier Motet Manuscript, had been checked by Ludwig by 1911, but were not published until Gennrich's edition of 1961–2. The complete volume was then edited by Max and Sylvie Lütolf, and Dittmer from Ludwig's manuscript, and published in 1978. 'Die Quellen der Motetten ältesten Stils' (1923), a magisterial survey of these sources, is based on material originally intended for the second volume. At the time of this essay, the material from newly discovered peripheral sources, and the necessity of signalling the wealth of new writing on medieval music and literature, had brought an account of the repertory as thorough as Ludwig had accomplished to the limit of human capacity. Part II of *Repertorium*, containing music and text incipits arranged by cantus firmus after the course of the liturgical year, was also partly in proof by 1911. This, and Ludwig's manuscript of the rest of the volume, were also edited by Gennrich after his death.

From his essay on 14th-century music (in *SIMG*, iv, 1902–3) it is clear that Ludwig would have been a lone giant in work on this period too, but for the simultaneous interest of Johannes Wolf. As it was, Ludwig offered a remarkable critique of Wolf's *Geschichte der Mensural notation von 1250–1460* (1904/*R*), and wrote a masterly summary of his own life's work in Adler's *Handbuch der Musikgeschichte* (1924): this covered not only all polyphonic music to about 1430, but also music of the troubadours and trouvères (from Gennrich's explanation it is clear that Ludwig was the earliest advocate of using the system of rhythmic modes in the transcription of troubadour and trouvère melodies), and liturgical drama and other para-liturgical monophony. Ludwig's edition of Machaut's works was nevertheless his only publication of this type.

To later generations of musicians, for whom microfilm has replaced the copying of manuscripts by hand, and for whom the main outlines of medieval music history have been drawn, Ludwig's work of synthesis is as difficult to appreciate adequately as it is almost hypnotic in its authority. Gennrich continued his work of cataloguing, Besseler his work on later medieval music; Anglès, Husmann, Bomm and Müller-Blattau were other outstanding pupils.

DAVID HILEY

Ludwig, Johann Adam Jakob (*b* Sparneck, Upper Franconia, 1 Oct 1730; *d* Hof, 8 Jan 1782). German critic and writer on organ building. He was a postal clerk in Hof and, after 1764, accountant at the Vierling bookshop. He was a member of several scientific and economic societies and his contact with distinguished organ builders (such as J.A. Silbermann) enabled him to acquire a thorough knowledge of organ building. Ludwig was a friend and business partner of G.A. Sorge (whom he supported in his polemical arguments, interspersed with personal insults, with F.W. Marpurg), and probably wrote the pamphlet *Eine helle Brille für die blöden Augen eines Albern Haberechts zu Niemandsburg*, which was published anonymously during these polemics. His writings contain valuable information about J.J. Graichen (1701–60) and J.N. Ritter (1702–82), pupils of Gottfried Silbermann working in Franconia.

HANS KLOTZ

Ludwig, Joseph [Josef] (*b* Bonn, 6 April 1844; *d* London, 29 Jan 1924). British violinist, teacher and composer of German birth. When he was 15 he was sent to the Cologne Conservatory where he studied the violin with Grünwald and composition with Ferdinand Hiller for four and a half years. He then went to Hanover, where he was a student of Joachim for two years. After a break in his musical career for military examinations, he gave concerts in Germany before moving in 1870 to London, where he succeeded Leopold Jansa at the RAM. He became a British citizen and earned a reputation as a performer of chamber music and as a teacher, one of his pupils being Beatrice Langley.

In his chamber music concerts in London and the provinces Ludwig performed most often with G.W. Collins, Alfred Gibson (or Alfred Hobday) and W.E. Whitehouse in quartets and also in solo sonatas and

concertos with piano accompaniment. Reviews of his playing suggest that as a soloist he excelled at slow movements rather than fast virtuoso pieces. Shaw recalled his performance of the Brahms G major Sonata with Ernest Fowles on 14 June 1893 when he 'handled the violin part with discretion and sympathy, if not with a very ardent appetite for its luxuries'. His compositions (e.g. the Piano Quartet in E♭ and the Symphony no.1 in F, performed in London, 1894) are competent and interesting but by no means novel. He also wrote a second symphony and pieces for violin or cello with piano. His son Paul, a cellist, studied at the RCM and performed in chamber and orchestral concerts in London (including some with his father).

GAYNOR G. JONES

Ludwig, Leopold (*b* Witkowitz [now Vítkovice], Moravia, 12 Jan 1908; *d* Lüneburg, 24 April 1979). Austrian conductor. After studying the piano at the Vienna Conservatory under Emil Paur, he began his conducting career with engagements in south Germany and at Brno. In 1936 he became music director of the Oldenburg Staatsoper and began to be a frequent guest in Berlin. He was appointed principal conductor of the Vienna Staatsoper in 1939 and principal conductor of the Berlin Städtische Oper in 1943. After World War II he continued to appear frequently at both the Städtische Oper and the Staatsoper in Berlin, but the appointment that brought him the widest international repute came in 1950, when he was appointed Generalmusikdirektor of the Hamburg Staatsoper, where he remained until 1971. He played a full part in the company's development, helping to broaden the repertory, and also taking it to a number of leading festivals, including the Edinburgh Festival in 1952 (giving the British première of Hindemith's *Mathis der Maler*) and the Lincoln Center Festival, New York, in 1967; he made his American début with the San Francisco Opera in 1958. Ludwig conducted the first Glyndebourne production of *Der Rosenkavalier* in 1959. His performances of *Mathis der Maler* in 1967 reflected many of his virtues and failings: they evoked gratitude for the championship of a neglected work, admiration for the ability to build impressive orchestral effects and balance them skilfully with the stage action, but also astonishment at cuts so drastic that they changed the entire meaning of at least one crucial scene. Ludwig was best known for his operatic work, but he also conducted leading orchestras in London, Paris, Amsterdam and elsewhere, and made an early LP recording of Mahler's Ninth Symphony.

BERNARD JACOBSON

Ludwig, (Heinrich) Max (*b* Glauchau, 25 Oct 1882; *d* Leipzig, 1945). German conductor and composer, brother of Otto Ludwig. He began his career as a music teacher in Gesau and Glauchau and studied at the Leipzig Conservatory (1908–10) with Busoni, Reger, Reisenauer and Teichmüller, excelling as a pianist and organist. In Leipzig he was professor and deputy director at the conservatory, conductor of the Riedel-Verein and the Neuer Leipziger Männergesangverein, as well as Kantor and organist at the Peterskirche. His sacred songs for mixed choir include *Abendlied*, *Ein Lied zu Gottes Ehre* and *Reformationsgesang* (text by Luther); in addition he wrote and arranged secular works for male chorus and organ pieces, of which the Allegro scherzo, Basso ostinato and Fugue in A minor op.5 (dedicated to Max Reger) is noteworthy.

WALTER HÜTTEL

Ludwig, (Heinrich) Otto (*b* Glauchau, 1 Sept 1874; *d* Leipzig, 1922). German conductor and composer, brother of Max Ludwig. He was an established violinist and organist and, like his brother, a music teacher before he went to Leipzig to study at the conservatory with Nikisch, Reger and others. In 1901 he was appointed Kantor at Hohndorf, and he simultaneously held the post of choirmaster of the teachers' choral society in Glauchau. Three years later he became Kantor at Wurzen. Later he returned to Leipzig to direct the male choral society. His works for male chorus include the motet *Es werden wohl Berge weichen*, the psalm setting *Es ist ein köstlich Ding, dem Herrn danken* and the secular piece *Vöglein im Walde*; he also wrote some festive orchestral music.

WALTER HÜTTEL

Ludwigsburg. Residence of the dukes of Württemberg, 15 km north of STUTTGART.

Luengo, Maria Teresa (Eduarda) (*b* Quilmes, 25 Nov 1940). Argentine composer. She graduated in composition and musicology from the Catholic University of Argentina in 1969. Between 1973 and 1980 she experimented with a personal language influenced by ethnic music (as in *Cuatro soles*, 1973), which she later consolidated (in *Navegante*, 1983). Using consonant and dissonant 'regions', differentiated by particular groupings of small intervals, she builds modules of sounds and silence that have an archaic atmosphere and sonority, but without reference to Argentine or Latin American folk music. Most of her works are for chamber groups, using various combinations of instruments. They have won many prizes. Luengo also teaches contemporary techniques and in 1990 instituted a course in electro-acoustic composition at the National University in Quilmes.

RAQUEL C. DE ARIAS

Luening, Otto (Clarence) (*b* Milwaukee, 15 June 1900; *d* New York, 2 Sept 1996). American composer, teacher, conductor and flautist. His mother was an amateur singer and his father a music professor at the University of Wisconsin who had studied at the Leipzig Conservatory. Luening began composing as a child in 1906. In 1912 the family moved to Munich, where he studied theory at the Staatliche Hochschule für Musik with Anton Beer-Walbrunn (1915–17) and made his début as a flautist (1916). When the USA entered World War I he moved to Zürich, where he studied at the conservatory and at the university (1919–20), and also privately with Jarnach and Busoni, who both deeply influenced Luening's conception of music and his teaching methods. While in Zürich he played the flute in the Tonhalle Orchestra and at the Municipal Opera, and for a season was an actor and stage manager with James Joyce's English Players Company. He made his début as composer-conductor in 1917.

In 1920 Luening came to Chicago, where he studied with Wilhelm Middelschulte. He conducted the American Grand Opera Company in performances of operas in English (including Cadman's *Shanewis*). From 1925 to 1928 he was at the Eastman School as executive director of the opera department and conductor of the Rochester Opera Company (and later of its offshoot, the American Opera Company). Then, after a year in Cologne (1928–9) Luening worked in New York as a freelance composer-conductor until he was awarded two Guggenheim fellowships (1930–31, 1931–2; he was awarded a third in 1974), which enabled him to write the text and music of his opera *Evangeline*. In 1932 he began teaching at the University of Arizona, and in 1934 he was appointed chairman of the music department at Bennington (Vermont) College, remaining until 1944. During his tenure at Bennington, Luening also took part in the WPA programme and was associate conductor, under Hans Lange, of the New York Philharmonic Symphony Chamber Orchestra (1936–8), and from 1941 together with Alan Carter was active in the Vermont Chamber Music Composers' Conferences. In addition Luening was a co-founder of ACA (1938) and the American Music Center (1939).

In 1944 Luening was appointed director of opera productions at Columbia University, where he developed a graduate seminar in composition, and professor at Barnard College. During his tenure at Columbia he conducted the world premières of Menotti's opera *The Medium*, Thomson's *The Mother of Us All*, and his own opera *Evangeline*. Luening was a founder of CRI (1954) and a trustee of the American Academy in Rome (1953–70), where he was also composer-in-residence (1958, 1961 and 1965). His other recognitions have included several honorary degrees as well as awards from the National Institute of Arts and Letters (1946), the NEA (1974, 1977), the National Music Council (1985) and ACA (1970, 1985).

In 1964 Luening retired from Barnard but continued to teach at Columbia until 1960, when he became professor emeritus and music chairman of the School of the Arts until his retirement in 1970. He then taught at the Juilliard School (1971–3). Among his many students are Wuorinen, Chou Wen-Chung, Dodge, Carlos and Laderman. In 1980 Luening published an autobiography, *The Odyssey of An American Composer*, documenting all aspects of his career.

Luening's early works written in Zurich, notably the Sextet, the Sonatina for flute and piano and the First String Quartet, are highly contrapuntal combining tonal and atonal languages, and using polytonal and protoserial techniques derived from the theories of Ziehn. From the 1920s his music also exhibits a lifelong interest in his concept of 'acoustical harmony' (using voicings involving careful aural recognition and use of overtones) and the notion of musical colour as an element of form. Luening attributed his concern with sound colour in both traditional and electronic venues to Busoni's teachings. His earliest electronic works, *Fantasy in Space* (1952) and *Low Speed* (1952), use timbres of tape composition as a primary formal component. In 1953–4 Luening wrote *Rhapsodic Variations* for tape recorder and orchestra, the first of several works written in collaboration with Ussachevsky and one of the first works for this genre; they subsequently established an electronic music centre at Columbia University (later named the Columbia-Princeton Electronic Music Center). In the late 1960s Luening renewed his interest in chamber music. A strong proponent of music education, he wrote many of these works for chamber groups with modest abilities. As in Busoni's music, the juxtaposition of styles in these pieces is an essential forming principle. In the last part of his life Luening devoted himself to orchestral and chamber music, characterized by spare textures that are richly resonant, and by the aim of maximizing the presence and power of the single pitch.

WORKS
selective list

STAGE

Sister Beatrice (incid music, M. Maeterlinck, trans. P. Horgan), 1926; Eastman School of Music, Rochester, 15 Jan 1926
Evangeline (op, 3, Luening, after H. Longfellow), 1930–32, rev. 1947–8; cond. Luening, Brander Matthews Theatre, New York, 5 May 1948
Blood Wedding (incid music, F. García Lorca), 1940; Bennington College, Bennington, VT, 1 Dec 1940

LESTER TRIMBLE/SEVERINE NEFF

Luetkeman [Lütkemann, Lutkeman, Littkeman], **Paul** (*b* Kolberg, Pomerania [now Kołobrzeg, Poland], *c*1555; *d* 1616). German composer and musician. He was a student at the University of Frankfurt an der Oder in 1578. In 1587 he was a Stadtpfeifer at Wismar and in 1588 became chief Stadtpfeifer at Stettin, where he also supervised the music at St Jakob and St Nikolai. In 1604 Duke Bogislav XIII granted special privileges to one of his colleagues, and it was probably this that caused him to move two years later to Frankfurt an der Oder as a Stadtpfeifer (1606–11). He published *Newe lateinische und deutsche Gesenge auf die vornembsten Feste und etliche Sontage im Jahr nebst nachfolgenden schönen Fantasien, Paduanen und Galliarden lustig zu singen und gar lieblich auf allerley art Instrumenten zu gebrauchen* (Stettin, 1597; some works ed. in Denkmäler der Musik in Pommern, ii, 1931). It comprises 28 settings of sacred texts for five to eight voices and 32 five- and six-part instrumental pieces. A number of motets and occasional pieces – for Christmas, weddings and funerals – by him were published singly at Stettin between 1597 and 1606 and at Frankfurt an der Oder between 1609 and 1611 (another is undated). After his death, the *Neue auserlesene geistliche Kirchengesänge* was published in Frankfurt an der Oder in 1616.

INGRID SCHUBERT

Luetti, Gemignano. *See* CAPILUPI, GEMIGNANO.

Luftpause (Ger.: 'air-break'). A momentary interruption of the metre by silence, often indicated by a comma or 'V' above the staff. Though strictly an opportunity for a singer or wind player to take a breath, this device was used by Mahler and others at moments of such musical tension as to make the actual intake of breath almost impracticable. Within the Viennese tradition the word *Cäsur* or *Zäsur* ('caesura') seems to have been preferred: Mahler used it in his scores, and it remains the standard word for the interruptions that have come to be considered traditional in the Viennese waltz repertory. In the same tradition, *Atempause* ('breath-break') has occasionally been used to designate a slight hesitation before the third beat of the bar in a waltz, but there is some disagreement as to whether a waltz should be performed in this way; the word is more often used to describe a breathing-pause indicated by a superscript comma. In some cases *Luftpause* designates such a break taken by the whole ensemble, whereas *Atempause* applies within a solo line.

DAVID FALLOWS

Lugge, John (*b* Exeter, *c*1587; *d* Exeter, after 1647). English composer. Lugge was organist from 1603 and lay vicar-choral from 1605 of Exeter Cathedral until 1647. His father was probably Thomas Lugge, who married in 1586, also a lay clerk at the cathedral, but who later lost his post for misbehaviour. Another son, Peter, was brought up in Lisbon, whence he sent John a letter that the authorities intercepted in 1617, causing John to be examined before Bishop Cotton on suspicion of having Roman Catholic sympathies. The bishop exonerated him with the report that 'though I fear, and by conference do suspect that he hath eaten a little bit, or mumbled a piece of this forbidden fruit, yet I verily believe he hath spit it all out again'. A search of his house four years later revealed nothing incriminating. His son Robert (*b* 1620), who graduated BMus from St John's College, Oxford, in 1638, was in similar trouble. Sent down in disgrace, he shortly afterwards fled abroad and became a Roman Catholic. Some compositions previously attributed to him are more likely therefore to be his father's.

Since the repertory of English organ music in the first half of the 17th century is slender, Lugge's contribution, preserved in one autograph manuscript, assumes an important place along with that of Orlando Gibbons, Tomkins and Bull. His settings of the standard cantus firmi are fluent and inventive, and the three voluntaries for double organ are the best examples of this peculiarly English genre written before the Civil War. His church music is of only minor significance, though well written.

WORKS

Short Service for Meanes in A (Ven, TeD, Mag, Nunc), 4vv, *GB-Lbl*
[Short] Service in C (TeD, Bs, Ky, Cr, Mag, Nunc), 4vv, *Och* (org only), *US-NYp* (ptbks)

JOHN STEELE

Lugge, Robert. English musician, possibly composer. *See under* JOHN LUGGE.

Luigi del Cornetto. *See* ZENOBI, LUIGI.

Luigini, Alexandre (Clément Léon Joseph) (*b* Lyons, 9 March 1850; *d* Paris, 29 July 1906). French violinist, conductor and composer. His father, Joseph Luigini, was born in Italy and became a naturalized French citizen; he conducted at the Grand Théâtre at Lyons, the Théâtre Italien in Paris (1872), the Théâtre Lynque (Ventadour) (1878) and Folies-Dramatiques (1882). He composed a ballet, *Les filles de Gros-Guillot* (Lyons, 1866), two cantatas (1865, 1866) and danced divertissements including *Zédouika*, *Le printemps* and *Les postillons* for the Fantaisies-Oller in Paris (1876).

Alexandre Luigini won the *second prix* for violin at the Paris Conservatoire in 1869, and from that year led the orchestra of the Grand Théâtre at Lyons; he was appointed its conductor in 1877. While at Lyons he was a member of its conservatory and founded the Concerts Bellecour and the Concerts du Conservatoire. In 1897 he became a conductor of the Opéra-Comique in Paris. He wrote numerous ballets, including *Ballet égyptien* (Lyons, 1875; apparently also included in a 1895 production of *Aida* in Lyons), *Ange et Démon* (Lyons, 1876) and a *Ballet russe* included in Meyerbeer's *L'étoile du nord* in Lyons in 1896. His light orchestral music includes *Fête arabe*, *Carnaval turc* and *Marche de l'emir*, along with three string quartets as well as other chamber works, piano music, songs and two operas, *Les caprices de Margot* (1 act, Coste), given at the Grand Théâtre, Lyons, on 13 April 1877, and *Faublas* (3 acts, E. Cadol and G. Duval), at the Théâtre de Cluny, Paris, on 25 October 1881. (C.E. Curinier: *Dictionnaire national des contemporains* (Paris, 1889–1906))

Lukačić [Lucacich, Luccacich, Lucacih], **(Marko) Ivan** [Ioannes] (*b* Šibenik, bap. 17 April 1587; *d* Split, 20 Sept 1648). Croatian composer. He entered the Franciscan order at the age of ten, studied theology and music in Italy and was awarded the degree of Magister Musices in Rome in 1615. He returned to Šibenik in 1618 but soon went to Split, where he became prior of the Franciscan monastery in 1620. This duty he combined for the rest of his life with that of director of music at Split Cathedral.

At the time Lukačić returned to Dalmatia from Italy the new monodic style was strongly represented there by Tomaso Cecchino and Marcantonio Romano and in Istria by Gabriello Puliti. Lukačić's only contribution to the already substantial Dalmatian repertory was a collection of *Sacrae cantiones* (Venice, 1629; ed. in Corpus musicum Franciscanum, i, Padua, 1986), 27 motets for one to five voices with organ continuo. Giacomo Finetti was largely responsible for their publication, and it is possible that Lukačić had been his pupil. The motets are the works of an accomplished and sensitive musician. Those for four and five voices are based on the alternation of solo and tutti passages; those for one, two and three voices use the elements of the monodic style with a remarkable feeling for dramatic presentation. *Domine, puer meus iacet* is a miniature cantata for three soloists, one a narrator, the others a centurion and Christ.

BOJAN BUJIĆ

Lukács, Pál (*b* Budapest, 27 April 1919; *d* Budapest, 22 May 1981). Hungarian viola player, singer and teacher. He studied at the Budapest Academy with Imre Waldbauer (violin), 1934–9, and with Imre Molnár (singing), 1937–43. While still a student he sang in oratorio and changed from the violin to the viola. He was appointed a professor of singing at the academy in 1946, and leader of the viola faculty in 1947, when he also became principal viola of the Hungarian State Opera orchestra. The first Hungarian to gain an international reputation as a viola player, he won the 1948 Geneva International Competition, and toured widely in Europe. He was admired for his warm timbre, faultless technique and stylish musicianship over a wide repertory, and he applied the style of the Hungarian violin school to the viola. He gave the first performance of Hartmann's Concerto at the 1958 Venice Biennale, and inspired a number of new works by Hungarian composers, including Gyula Dávid's Concerto, which he recorded. Lukács brought about a new critical appreciation of the viola in Hungary, and was an outstanding teacher. He edited classical and modern works and published a pedagogical work, *Fekvésváltó gyakorlatok brácsára* ('Studies for change of positions for viola', Budapest, 1960). In 1975 he was elected vice-rector of the Budapest Academy and became head of the singing faculty.

PETER P. VÁRNAI/R

Lukas, Viktor (*b* Rothenburg ob der Tauber, 4 Aug 1931). German organist, church musician and conductor. He studied at the Musikhochschule in Munich (1951–3) with Karl Richter (organ), Fritz Lehmann (conducting) and Gustav Geierhaas (composition), and then privately with Friedrich Högner (organ). From 1953 to 1956 he read musicology, pedagogy and English at Munich University. He completed his organ studies in 1955–6 at the Paris Conservatoire with Marcel Dupré and Falcinelli. From 1956 to 1960 he held a post as organist in Kempten. He was appointed organist and church music director of the Stadtkirche in Bayreuth in 1960. He conducts the Bayreuth Kantorei and in 1961 founded 'Musica Bayreuth', an

annual series of concerts. In 1968 Lukas founded a consort which he directs from the harpsichord; with this ensemble, and even more as an organist, he has made concert tours to central Europe and the USSR (twice with exclusively Bach programmes) and also to the USA and East Asia. In 1975 he became director of an organ masterclass at the Cologne Hochschule für Musik and also organist at the Gürzenich, later becoming organist of the newly opened Cologne Philharmonie. He has recorded the complete organ works of Brahms and Mendelssohn, and has also recorded on the Stumm organ at Oberlahnstein and the organ of the Philharmonie. He has also compiled an organ music guide (Stuttgart, 1963, 3/1974).

GERHARD WIENKE

Lukáš, Zdeněk (*b* Prague, 21 Aug 1928). Czech composer. In Prague he studied theory with Modr (1943–6) and composition with Řídký. He worked for Czech radio in Plzeň, at first as an editor and later as choirmaster of the Česká Píseň and director of the radio orchestra (1953–65). Thereafter he lived in Prague, giving most of his time to composition. His early works, from the 1950s, are in a late Romantic style influenced by Czech folksong, examples of which are the First Quartet, the orchestral *Matce* ('To Mother') and several choral works. With the two sinfoniettas (1957, 1962) Lukáš developed a polyphonic manner close to Martinů; he then followed directions suggested by the work of Kabeláč and employed more modern techniques. A typical example is the Double Concerto (1968), where a tonal basis is combined with modal areas, an application of 12-note serialism and aleatory passages. Particularly in these later concertante pieces, Lukáš's music derives from minimal initial material. His best electronic work, *Nezabiješ* ('You do not kill'), has a definite expressive force. In the mid-1990s, with Mácha, Fišer and Bodorová, Lukáš formed the composer group Quattro.

WORKS
(*selective list*)

OPERAS

Al žije mrtvý [Long Live the Dead] (radio op, J. Hurta), 1967–8; Domácí karneval [Home-Made Carnival] (radio op, Z. Barborka), 1968; Planeta s tiše fialovou září aneb Hvězdářská opera [A Planet Glaring in Silent Purple, or Astronomic Opera] (J. Suchý), 1978; Falkenstein (D. Ledečová), 1985; Veta za vetu [Revenge for Revenge] (Ledečová), 1986

OLDŘICH PUKL, JAROMÍR HAVLÍK (work list)

Łukaszewicz, Maciej (*d* Kraków, 25 Feb 1685). Polish composer and singer. In 1661 he became a substitute singer in the Capella Rorantistarum of the Sigismund Chapel in Wawel Cathedral and probably in 1662 became a full member of it. He seems to have left in 1668. Some six years later he returned to the chapel and on 10 June 1682 became its director in place of M.A. Miskiewicz, who had resigned as a result of disagreements. These continued, and Łukaszewicz himself resigned in January 1685, a month before his death. From 1681 he was also director of the main cathedral music, in succession to Daniel Fierszewicz. Three four-part sacred works by him survive (*PL-Kk*): *Vexilla regis prodeunt*, *Lustra sex qui iam paregit* and *Credo super 'In natali Domini'*. They are simple pieces in a traditional polyphonic idiom. The two *Patrem rotulatum* settings by Bartłomiej Pękiel, his outstanding predecessor as director of music at Wawel Cathedral, served as models for the 'Patrem' section in the *Credo*.

MIROSŁAW PERZ

Lulier, Giovanni Lorenzo [Giovannino del Violone] (*b* Rome, *c*1662; *d* Rome, 29 March 1700). Italian composer, cellist and trombonist. According to Pitoni, he was 'Roman, a counterpoint scholar of Pier Simone Agostini, an excellent player of the violone, a chamber composer

for the most eminent Cardinal Ottoboni, who died *in età fresca* soon after 1700'. According to a newsletter, the cause of death was an *accidente appoplettico*. 'Giovannino' played regularly at the church of S Luigi dei Francesi during the period 1676 to 1699, and had joined the musicians' Congregazione di S Cecilia by 13 October 1679. By 1681 he was employed by Cardinal Pamphili, who appointed him *aiutante di camera* in 1682, after which he was in charge of the cardinal's musical affairs; by 1688 he was a trombonist in the Musici del Campidoglio. When Pamphili left Rome to become papal legate at Bologna in 1690 Lulier, like Corelli, entered the service of Cardinal Ottoboni, where he remained until his death. Yet in 1694 he was still called 'Giovannino di Pamphili'. In the 1690s he did continue to perform for Pamphili, was also employed by the Borghese family, and indeed seems to have been the concertino cellist whenever Corelli was the principal violinist.

Lulier's oratorio *S Maria Maddalena de' Pazzi* (1687) gives a good idea of his style; the emphasis is on rather brief da capo arias with a strongly projected affect and with four-part instrumental ritornellos that usually feature imitative textures. La Via surveyed many of Lulier's vocal works and found, surprisingly, that none had an outstanding part for the cello.

WORKS

lost unless otherwise stated

OPERAS

performed in Rome unless otherwise stated

[L'Agrippina] (dramma per musica, 3, G. De Totis), intended for carn. 1691, unperf., arias *D-MÜs*, *I-Fc*, *Rli* and *Rvat*

La S Genuinda, overo L'innocenza difesa dall'inganno [Act 1] (dramma sacro per musica, 3, ? P. Ottoboni), Palazzo della Cancelleria, Dec 1694, *D-Mbs*, *F-Pc* and *GB-Lbl* [Act 2 by A. Scarlatti, Act 3 by C.F. Pollarolo]

Il Clearco in Negroponte [Act 2] (dramma, 3, after A. Arcoleo), Capranica, 18 Jan 1695, arias *D-MÜs*, *I-Rmalvezzi*, *Rc* and *US-NYlibin* [Act 1 by B. Gaffi, Act 3 by C.F. Cesarini]

L'amore eroico fra pastori [Act 2] (favola pastorale for puppets, 3, Ottoboni), Palazzo della Cancelleria, Feb 1696 [Act 1 by Cesarini, Act 3 by G. Bononcini]; rev. A. Scarlatti as La pastorella, also for puppets, Venetian Embassy, 5 Feb 1705, arias *GB-Lbl*; rev. P.A. Motteux and V. Urbani as Love's Triumph, London, Queen's, 26 Feb 1708, 70 arias (London, 1708)

Fausta restituita al impero (dramma per musica, 3, after N. Bonis: *Odoacre*), Tordinona, 19 Jan 1697, arias *D-MÜs*, *F-Pn*, *GB-Lbl*, *Ob* and *I-Rc*

Temistocle in bando [Act 1] (dramma per musica, 3, after A. Morselli), Capranica, 2 Feb 1698, arias attrib. Lulier *I-Bc*, anon. arias *B-Br*, *F-Pc*, *Pn*, *GB-Lbl*, *Lcm* and *Ob* [Act 2 by ? M.A. Ziani, Act 3 by G. Bononcini]

LOWELL LINDGREN

Lulinus Venetus, Johannes (*b* ?Venice; *fl* early 16th century). Italian composer. The form of his name suggests that he

was born in Venice. He wrote 17 frottolas contained in Petrucci's 11th book (1514[2]; 1 ed. in *EinsteinIM*) of which only one occurs elsewhere (*I-Vnm*). They consist of settings of six *barzellette*, five ballatas, two canzoni, two sonnets, one *capitolo* and one freer poem. Five of the texts are by Petrarch. The works are generally simple in form and compositional technique; all his *barzellette* set only the *ripresa*, without separate music for the stanza. Two pieces display examples of word-painting: *Fuga ognun amor* begins with imitation on the word 'fuga', and his setting of Petrarch's *Chiare, fresche e dolci acque* has a three-bar melisma on the word 'extreme'. The ballata *Nel tempo che riveste* includes two popular tunes: *E donde vien tu, bella*, in its inverted ripresa, and *A l'ombra d'un bel pin*, in its stanza.

WILLIAM F. PRIZER

Lull [Lulio], **Antonio** (*b* Mallorca, *c*1510; *d* Besançon, 12 Jan 1582). Spanish grammarian, rhetorician and theologian. A descendant of Ramón Llull, he settled at an early age in the Franche-Comté, where he was private tutor to Claude de Baumes. The latter, on his later appointment as Bishop of Besançon, made Lull curate of the diocese. An expert in Latin, Greek and Hebrew, Lull also taught theology at Dôle University. Four of his works survive (two on rhetoric, one on grammar and one on ecclesiastical matters), of which one, *Sobre el decoro de la poética*, is available in a modern edition (ed. A. Sancho Royo, Madrid, 1994).

In his most important work, *De oratione libri septem* (Basle, *c*1558), Lull attached great importance to various musical questions, perhaps because he himself had written a treatise on music (now lost). He explained the relationship between rhetoric and music in terms of the *elocutio* (speech), whose components, *numerus* (i.e. the rhythm of the prose) and *melos*, are employed by orators, poets and musicians. Thus the study of music is necessary to the orator's training, in the same way that the study of arithmetic and geometry are necessary to the musician. He defined *melos* as a *suave modulación de la voz* (gentle modulation of the voice) composed of *harmonía* (alternation of high and low sounds) and *rhythmus*. Four principles underlie *melos*: sound, resonance, voice and movement.

In discussing the *acento del discurso* (inflection in speech), Lull established a typology for rhetorical expression according to the modulation of the voice: the expression 'virilis et erecta' would be accompanied by a rising interval in the voice, the expression 'religiosa et lamentabilis' by a falling interval followed by a rising interval, and the expression 'moderata, gravis et magnifica' by a rising 5th, followed by the equivalent falling interval, as in psalmody. The last volume of *De oratione* includes a short treatise on poetics in which Lull identified four types of poetry: dramatic (including the function and movement of the Classical chorus), epic, dithyrambic or lyric (sung poetry in which string or wind accompaniment is indispensible), and 'aulic' (i.e. courtly, synonymous with purely instrumental music).

Lull was highly regarded during his lifetime, notably by Zarlino, who cited extensive passages from *De oratione* in his *Sopplementi musicali* (Venice, 1588/*R*).

LUIS ROBLEDO

Lull, Raymond. *See* LLULL, RAMON.

Lullaby. Originally, a vocal piece designed to lull a child to sleep with repeated formulae; less commonly, it can be used to soothe a fractious or sick child. Like the lament, with which it has much in common, the lullaby is usually (though not exclusively) sung solo by women and displays musical characteristics that are often archaic, such as a descending melodic line, portamento effects, stylized representations of sighing or weeping, and non-stanzaic text lines. As with laments, the singer communicates in a direct, intimate manner that can be formalized and at the same time intense. Generically, lullabies have links not only with the lament but with vendors' cries, dance-tunes, serenades, prayers, charms, songs about the other world, and narrative songs. The use of ballad fragments has been noted especially in European and North American traditions: the Irish night-visiting song *The Mason's Word*, for instance, has been used as a lullaby.

Context and practice are not universally consistent: lullabies can be performed seated while cradling the infant in the lap, as in Samoa, or by the parents swinging the child slowly in an arc between them, as with the Ewe of West Africa. As regards the purpose of lullabies, those of the Hazara of Afghanistan, for example, are categorized as either 'functional' or 'stylized'; the former are sung by women to put small children to sleep, the latter by men for entertainment, often accompanied by a *dambura* (two-string fretless lute). They may also have more than one function: for the Hazara, lullabies not only send the child to sleep but can also act as a signal to the singer's lover. In the sub-Arctic Algonkian area, the *bebe ataushu* repertory is predominantly private, women's music. For the Navajo, lullabies are one of a number of non-ceremonial types of traditional song. In Italy, lullabies have been classified as magical (directly involving sleep), erotic (explicit love songs) or *di sfogo* ('outlet', 'venting'), in which the female singer laments her own or the human condition. Textual analysis of Japanese lullabies suggests a close connection between the manner of performance of lullabies and magic.

Textual formulae and refrains can be used, like 'fatta la ninna' ('rock-a-bye') in Italian lullabies, to ward off evil and invoke divine help, and can vary, in the vowel set of the refrain, within regions of a country such as Spain. They can cross cultural boundaries, as in 'ninna-nanna' (Italy), 'nani, nani' (Albania), and 'ljulja nina' (Bosnia-Hercegovina). Formulae appear again in the imagery and repeated diminutives of a Zuñi lullaby ('little boy, little cotton-tail, little jack-rabbit, little rat'), and melodically,

in the same lullaby, with a range of just two notes. The Hazara texts contain the sounds 'lalai' or 'lalu' along with the interjection of terms of endearment such as 'my sweet' or 'my eyes'. The sound effects of the lullaby sometimes take precedence over meaning, with words being deliberately altered to produce assonant, mellifluous sounds. Lullabies among the Tuareg differ from other women's songs in their more supple style, the use of semitones and a dissymmetric structure subordinate to the demands of improvised texts. The melody invariably moves within a fairly narrow range of a 4th or 5th, but can have, as in Norway, great melodic and rhythmic flexibility within a few common formulae.

The words of the lullaby can instil cultural values or incorporate the fears of the parent. Imagery involving the wolf in southern Italian lullabies suggests the need to cope with life's harsh realities; it may also represent violence and dominance. The 'lullaby' can, indeed, convey a plurality of messages in its text and style: one Gaelic-text lullaby ostensibly contains information, sung to another woman washing clothes, about the singer's abduction by fairies and the breaking of the spell (to be accomplished by her husband). The abducted woman lulls a fairy child to sleep by means of repetitive musical phrases, suggesting to the fairies that all is well. The 'narrative' message is to the other woman. In reality, however, the song itself tells listeners of the woman's plight. The lullaby text, therefore, can be creatively complex; matched to formulaic snatches of melody it can result in a rich and eloquent musical genre.

The lullaby as a vocal (with or without accompaniment) or instrumental piece appears in art music of all periods; examples are found in medieval carols with 'lullay' burdens, in 18th-century choral music, 19th-century lieder, and 19th- and early 20th-century piano pieces. *See* BERCEUSE and WIEGENLIED.

JAMES PORTER

Lully. French family of composers and musicians.

(1) Jean-Baptiste Lully [Lulli, Giovanni Battista] (i) (*b* Florence, 29 Nov 1632; *d* Paris, 22 March 1687). Composer, dancer and instrumentalist of Italian birth.

1. Life. 2. Ballets de cour. 3. Comédies-ballets. 4. Operas. 5. Church music. 6. Influence.

1. LIFE. Lully's origins were modest. His father, Lorenzo (1599–1667), seems to have come from peasant stock; like his ancestors, he was born in Tuscany in the Mugello area and probably at Campestri, where he, his brothers and a cousin owned a chestnut wood. By the age of twenty he was living in Florence, and in 1620 he married a miller's daughter, Catarina del Sera (or del Seta). They had three children: Verginio (1621–38), Giovanni Battista and Margherita (*d* 1639). Little is known about the education of the younger son. He may have learnt writing and arithmetic at an early age from his father, who became a miller and a businessman, but the boy probably had to turn to the Franciscan friars of the Via Borgo Ognissanti, where his parents lived, for his introduction to music and instruction on the guitar and violin, which he must have learnt in his youth. According to Le Cerf de la Viéville, his first music master was 'a good Franciscan friar'. It is not known how he came to be chosen to go to France as an Italian tutor to Louis XIV's cousin Anne-Marie-Louise d'Orléans, known as the 'Grande Mademoiselle', who was studying the language at the time, but he was engaged by the princess's uncle Roger de Lorraine, the chevalier de Guise, who visited Florence in 1645 and 1646. In late February 1646 Giovanni Battista left his native land for Paris.

Lully's post was that of *garçon de chambre* to the Grande Mademoiselle, who was then living in the Palais des Tuileries. Thanks to his employer, who was probably entertained by his lively and humorous character, he quickly completed his musical education. According to an account printed in 1695, it is likely that he studied harpsichord and the rules of composition with Nicolas Métru and Nicolas Gigault, both of them organists of the Jesuit church of St Louis in the rue Saint-Antoine in Paris. The same source tells us that he also took lessons from François Roberday, who lived in the Tuileries 'near the great staircase of the apartments of Mademoiselle d'Orléans'. Other masters in the service of the princely household to which he belonged included Jacques Cordier, known as Bocan, who may have helped Lully to perfect his violin playing, and Jean Regnault, who could have trained him as 'le grand baladin'('the great dancer') he was soon to become. He was certainly acquainted with the dancers of the royal ballets at this time, and collaborated with one of them, Du Moustier, in composing the music for the *Mascarade de la Foire Saint-Germain*, performed at the Grande Mademoiselle's palace in March 1652. Of this, the first work known to have been composed by Lully, only the libretto survives. It provides a possible explanation of the story that he was once a scullion: in the course of the masquerade the young musician did indeed appear in the character of a *crieur de ratons*, an itinerant seller of small cheesecakes supposedly

made by himself. The artistic circles in which he mingled on this occasion, and the princess whom he served, probably provided him with the opportunity of meeting his future father-in-law, Michel Lambert, already famous as a singer.

However, it must have been thanks to Du Moustier or Regnault, who became *maître à danser du roi* in 1651, that Lully entered the service of Louis XIV. After the Fronde uprising of late 1652 he left the service of the Grande Mademoiselle, whose involvement with the rebels had obliged her to retire to the château at Saint-Fargeau. On returning to Paris Lully was therefore able to take part, at the age of 20, in the magnificent *Ballet royal de la nuit*, whose many entrées called for a vast number of performers. He played the parts entrusted to him so well that on 16 March 1653, even before the spectacular festivities were over, the king appointed him to the post of *compositeur de la musique instrumentale* in succession to the famous violinist Lazaro Lazarin. For the next few years he combined the careers of dancer and composer, but it was only after 1655 that he became well known to the public.

As a dancer in the ballets performed at court Lully excelled in character parts that allowed him to display his talents for mime and comedy. His sense of rhythm and precise, supple movements meant that he was soon dancing in the same entrées as Louis XIV. Several years older than the young king, Lully soon had a privileged relationship with him, and took advantage of it to become Louis's favourite musician. Before reaching that point, however, he had to overcome many obstacles and found his way barred by a number of prerogatives. At first, in accordance with contemporary custom, he had to share the composition of the entrées and then the *récits* of ballets with other authors, usually specialists in either instrumental or vocal music. They included Verpré, Louis de Mollier and Michel Mazuel, the last of whom, like the *conducteur et répétiteur des ballets* Michel Léger, belonged to the famous 24 Violons du Roi, usually called upon to play for all the court spectacles. Lully did not like the way this ensemble performed, and to circumvent its power he got permission from the king to direct another, the 'petits violons', which he was able to conduct as he pleased.

In 1656 Lully employed this ensemble in the masquerade *La galanterie du temps*, the first work for which he wrote all the music himself. After *Le ballet des bienvenus*, performed the previous year at Compiègne for the wedding of the son of the Duke of Modena to Laure Martinozzi, Mazarin's niece, he was no longer satisfied with providing music for the dances alone, but also wrote the various vocal pieces: the *récit grotesque*, the *air*, dialogue, duet and chorus, which were sung in Italian. In the cause of his art he recruited the aid of a remarkable singer, Anna Bergerotti, in whose house he used to take part in concerts she held for her compatriots. With the support of a considerable Italian contingent, many of whose members were close to Mazarin, and of the young king himself, he was not slow to make his mark as the principal composer of royal ballets, although a spectacle entitled *Ballets des plaisirs troublés*, by Louis de Mollier, was produced in 1657 to uphold the French tradition in rivalry with *L'Amour malade*, to which Lully had contributed. From this period on, Isaac de Benserade wrote laudatory verses about him, which were published in the librettos handed out to the audience, while Loret described him in *La muze historique* as 'a genius'.

The 1660s marked a turning point in Lully's career, for several reasons. The arrival of Francesco Cavalli in France to produce operas at court on the occasion of Louis XIV's marriage stimulated Lully to extend his creative activities. He was still writing ballet scores, in particular to enhance the performances of Cavalli's *Xerse* and *Ercole amante* in 1660 and 1662, but in 1660 he also made his mark with a sacred work, the *Motet de la Paix* (probably the *Jubilate Deo*), which enjoyed such popularity that it was sung at the Louvre at least nine or ten times. Soon afterwards, in 1663, he composed a true masterpiece, his *Miserere*, for divine service at court. Was he intending at this time to take part, along with Du Mont and Robert, in the competition organized to recruit *sous-maîtres* for the royal chapel? He was never to hold a permanent post in the royal chapel, but he continued to put his talents at the service of the church. By 1663, as it happened, the situation had changed a good deal: with Mazarin's death and the only moderate success of *Ercole amante*, followed by Cavalli's departure, the way was again open for him to shine in the entertainments produced for the sovereign.

At the beginning of his personal reign, on 16 May 1661, Louis XIV granted Lully the highest office to which he could aspire, that of *surintendant de la musique de la chambre du roi*. Lully realized that to discharge his responsibilities he must adopt France as his country, and he was naturalized in December 1661. On 24 July 1662, in the church of St Eustache in Paris, he married the 20-year-old Madeleine, daughter of the composer Michel Lambert. The couple had six children. Lully's marriage contract shows how prominent was his position at court: it was signed by Louis XIV, the queens Marie-Thérèse and Anne of Austria, Louis Hesselin, *intendant* of the Menus-Plaisirs, and the king's famous minister Jean Baptiste Colbert. The composer's reputation soon spread beyond the frontiers of the kingdom. In 1663 the Grand Duke of Tuscany approached him with a commission to write some instrumental pieces, including dances in the most fashionable style of the time. His most successful *airs*, in particular a famous bourrée, spread to Italy, England and, even at this early date, perhaps to other European countries as well.

This widespread diffusion of his works, evidence of his growing reputation, came at the beginning of the most brilliant period of Louis XIV's reign, a reign propitious to the development of the arts and literature. Lully took advantage of these exceptional circumstances. In 1664 he was called upon to collaborate with Molière in a series of excellent *comédies-ballets*. His relationship with the famous actor and dramatist was productive. It enriched his knowledge of the theatre, particularly of the French dramatic repertory, and helped him to perfect his interpretation of the comic parts he himself took after 1662 at the latest, singing *baisse-taille* (baritone). His retirement from stage performance as a dancer in 1667, or early 1668, was probably due to his age, although he was extremely successful in 1669 and 1670 when he appeared under the pseudonym of 'Il Signor Chiacchiarone' (the Garrulous Man), first in *Monsieur de Pourceaugnac* and then in *Le bourgeois gentilhomme*, taking the parts of an Italian musician and the Grand Mufti. The masterpieces of the 'deux Baptiste', as Molière and Lully were called at the time, were all first performed at court

1. Jean-Baptiste Lully: engraving by Jean-Louis Roullet after Paul Mignard

as divertissements. Several of them were included in the programmes of the *grandes fêtes*. At the most brilliant of these entertainments at Versailles, *Les plaisirs de l'ile enchantée* of 1664 and a similar *fête* in 1668, performances of *La Princesse d'Elide* and *George Dandin* respectively were given.

Lully also contributed to other less well-known entertainments staged in the park at Versailles, in particular the performance of a tragi-comedy by Mademoiselle Desjardins, *Le favory*, in 1665. In the years 1663–5 he collaborated with his father-in-law Michel Lambert on the composition of several ballets, and thereafter he participated in all the great celebratory occasions that marked the course of the Sun King's life: the reception of the papal legate at Versailles and Fontainebleau in 1664, the baptism of the dauphin at Saint-Germain-en-Laye in 1668, and the funeral in 1670 of Henriette d'Angleterre, daughter of Charles I of England and wife of the duc d'Orléans.

Lully's many and varied responsibilities were bound to improve his personal situation, and soon he was prosperous enough to plan the building of a magnificent house in Paris. The façades can still be seen today on the corner of the rue Sainte-Anne and the rue des Petits Champs. When work on this house began in 1670, Molière made the composer a loan of 11,000 livres, but the relationship between the 'deux Baptiste' rapidly deteriorated. The works they had created at court came to include more and more music, but when they were produced in Paris at the theatre of the Palais Royal, Molière took the profits without giving the composer his share. This was probably the reason for their quarrel, which can be dated to 1671, after the composition of *Psyché*.

Several historians have suggested another reason for the estrangement: referring to a later document, the *Lettre de Clément Marot* by Bauderon de Sénecé, published in 1688, they maintain that Lully and Molière had agreed to act as joint directors of the newly founded Académie de Musique, otherwise known as the Paris Opéra. This theory seems improbable: it is hard to imagine Molière content to see his role limited to the writing of librettos, and Lully himself did not at first think highly of the chances of French opera. However, the triumph of Cambert's *Pomone* on 3 March 1671, and the favourable reception at court of another *pastorale en musique*, Sablières's *Les amours de Diane et d'Endymion*, must have convinced Lully that he was wrong and inclined him towards this new kind of music drama.

Circumstances were in his favour. Taking advantage of the dispute between the librettist of *Pomone*, Pierre Perrin, and some of his associates, he was able to buy the privilege of the Opéra which the king had granted to Perrin in 1669. In March 1672 Lully thus became director of what was henceforth the Académie Royale de Musique. At first his position at the head of this institution was a difficult one. Both Molière and Perrin's former associates, Sourdéac, Champeron, Sablières and Guichard, tried to oppose the registration of Louis XIV's patents confirming Lully in his new appointment, and the conditions in which he assumed it were far from easy. Unlike other Parisian theatrical troupes, the operatic company received no allowance from the king, although opera was more expensive to stage than any other kind of spectacle. Lully had also to begin by finding a theatre, hiring a tennis court (*jeu de paume*) for the purpose (the Béquet or Bel-Air court in the rue de Vaugirard), and he then had to have it fitted out for theatrical performances.

To achieve this end and cover his expenses, Lully went into partnership on 23 August 1672 with Carlo Vigarani, an architect and designer of stage sets and machinery, whom he had known at court for over ten years. They each advanced 10,000 livres, reserving the rights to share annual profits on the takings. After opening with a pastiche, *Les fêtes de l'Amour et de Bacchus*, consisting of extracts from *comédies-ballets*, they staged an original work, *Cadmus et Hermione* (fig.2). This first *tragédie en musique*, which had its première in mid-April 1673, was so successful that Louis XIV came to see it in person.

The support of the king was much in evidence for over ten years. On 28 April 1673, after the death of Molière, Lully was authorized to use the Palais Royal theatre free of charge. This meant the expulsion of its former occupants, the famous actor's own company and the Italian company with which it had shared the theatre. Fearing competition, Lully inflicted yet another blow on his rivals: they were prohibited from using dancers in their productions, and were not to employ more than two voices and six violins. Reaction was not long in coming. *Alceste*, the *tragédie en musique* performed in January 1674 in the Opéra's new home, was savagely attacked by a cabal, and even a visit from Louis XIV could not mitigate the ill effects. Impressed by the latest dramatic works of his *surintendant*, the king now decided to have them produced at court, where criticism would be less virulent and where they would be sure of better publicity.

Furthermore, rehearsals would be financed by the royal treasury, and a generous present of the sets, machinery and at least some of the costumes would be made to Lully and Vigarani so that they could be used again for revivals in Paris. Consequently *Thésée*, *Atys* and *Isis* had their premières between 1675 and 1677 in the *salle de ballets* of the old château of Saint Germain-en-Laye before being performed in the city.

Lully's enemies were not disarmed. He suffered some violent attacks during these years, particularly in connection with the lawsuit he brought against Perrin's former partner Henry Guichard, whom he accused of having tried to poison him in order to acquire his privilege. This sinister business involved Lully in controversy, and his private life did not escape the mud-slinging. The affair also sowed dissension in the theatre he directed. Guichard succeeded in seducing one of his best women singers, Anne de Boscreux, and tried to wreck his partnership with Vigarani by negotiating with the stage designer for another academy, the Académie des Spectacles, to offer the public tournaments, races and firework displays.

It was also at this period that Lully quarrelled with La Fontaine after rejecting the poet's libretto for *Daphné*. He was scarcely more accommodating to the musician La Grille, although he was related to him through his wife's family: in 1677 he used the authority of his privilege to have La Grille banned from staging music drama with the large marionettes known as *bamboches*, probably fearing that they would be used to ridicule his operas. *Isis*, his latest *tragédie en musique*, had just been at the centre of a scandal: several of Lully's enemies claimed to see Louis XIV and his mistresses portrayed in the principal characters, identifying Jupiter with the king, the jealous Juno with Mme de Montespan, and the beautiful nymph Io with Marie-Elisabeth de Ludres, Louis's latest favourite. These insinuations displeased the king and were not without consequences: for two years Lully was deprived of the aid of his faithful librettist Phillipe Quinault.

2. *Scene from Lully's 'Cadmus et Hermione', Jeu de Paume de Béquet, Paris, 1673: engraving by François Chauveau*
